(Continued from Page 16)

Contract Awarded.
REMODELING Cost, \$—
VALLEJO, Solano Co., Cal.
Remodel three-story concrete and
brick newspaper office (old Col-
onial type).
Owner—Vallejo Chronicle and Times-
Herald, 516 Marin St., Vallejo.
Architect—F. H. Slocumbe, 62 York
Drive, Oakland.
Contractor—S. J. Weeks, 331 El Do-
rado St., Vallejo.

THEATRES

Plans Being Prepared.
THEATRE Cost, \$—
LOS ANGELES, Cal. Crenshaw
Bldg. and Vernon Avenue,
Class A theatre.
Owner—Walter H. Leimert Co.
Architect—Morgan, Walls & Clements
Van Nuys Bldg., Los Angeles.
Contractor—Lindgren & Swinerton,
Inc., 523 W-Sixth St., Los Angeles

Contract Awarded.
ALTERATIONS Cost, \$70,000
SAN FRANCISCO, 1077 Market St.
Remodel class A theatre (interior and
exterior alterations).
Owner—United Artists Corp., 931 So.
Broadway, Los Angeles.
Architect—Walker and Eisen, Western
Pacific Bldg., Los Angeles.
Contractor—Henry I. Beller Const. Co.,
6513 Hollywood Blvd., Los Ange-
les.
Construction will start immediately.

Plans Being Prepared.
THEATRE & STORE Cost, \$—
LONG BEACH, Los Angeles Co., Cal.
One-story theatre and store building
(160x150-ft.; to seat 1144).
Owner—United Artists Theatres of
California.
Architect—Walker & Eisen and C. A.
Bach, Western Pacific Bldg., Los
Angeles.

Class Contract Awarded.
THEATRE Cost approx. \$1,000,000
OAKLAND, Alameda Co., Cal Broad-
way near Hobart Street.
Class A theatre building.
Owner—Public Theatres, Inc.
Architect—Miller & Pfeiffer, 580 Mar-
ket St., San Francisco.
Contractor—Geo. Wagner, 181 South
Park, San Francisco.
Glass—Habenicht and Howlett, 523
Clay St., San Francisco.
Other awards reported March 23.

VARIOUS POINTS—Hughes-Frank-
lin Theatres, 7051 Hollywood Blvd.,
announce completion of arrangements
for construction of sixteen of the
thirty-three theatres to be built for
them this year. In addition to build-
ings for the Leimert Park District,
Pomona and Whittier, previously an-
nounced, the program includes theat-
res at the following locations: Sun-
set and Laurel, Hollywood; Vernon
and Franklin Aves.; Hollywood Blvd.
and Hudson Ave.; Compton and Flo-
rence Aves.; Yakima, Wash.; Seattle,
Wash.; Wichita, Kan.; Topeka, Kan.;
Bremerton, Wash.; Sherman, Tex.;
Dallas, Tex.; McAlester, Okla., and
Palestine, Tex.

April 14, 1931
Contract To Be Awarded.
ALTERATIONS Cost, \$50,000
OAKLAND, Alameda Co., Cal. 445
23rd Avenue.
Alterations to class C steel frame and
concrete theatre (wood joists).
Owner—Golden State Theatre & Real-
ty Co., 25 Taylor St., San Fran-
cisco.
Architect—Reld Bros., 105 Montgom-
ery St., San Francisco.
Contractor—Alfred J. Hopper, 1769
Pleasant Valley Road, Piedmont.

WHARVES AND DOCKS

Contract Awarded.
WHARF Cost, \$2456
LAKEPORT, Lake Co., Cal.
Steel and concrete wharf (concrete
concrete piling).
Owner—Town of Lakeport, F. L. Coles
town clerk.
Plans by Town Engineer, Lakeport.
Contractor—Chas. Kuppinger, Lake-
port.
Ben C. Gerwick, Inc., San Francisco,
only other bidder at \$4,800.

EUREKA, Humboldt Co., Cal.—
Until 5 P. M., April 21, bids will
be received by John Griffith, Superin-
tendent of Public Works, for driving piles
at Hawthorne street and Broadway.
Certified check 10% payable to city re-
quired. Specifications obtainable
from above.

MISCELLANEOUS CONSTRUCTION

SAN FRANCISCO—M. M. O'Shaugh-
nessy, city engineer, seeks \$125,000
appropriation in the coming fiscal
year budget to finance purchase of a
site for a new incinerator.

SAN FRANCISCO—Until April 27,
\$ P. M., bids will be received by Frank
T. Kennedy, secretary, Board of Fire
Commissioners, 2 City Hall, for dry-
docking, repainting hull, overhauling
and repairing the fireboat "David
Scannell." Specifications obtainable
from above.

Plans Being Figured.
FILM SCENE DOCK Cost, \$—
CITY, Los Angeles Co., Cal.
Frame and stucco studio scene dock
(120x225 feet).
Owner—RKO Pathe Studios, Wash-
ington Blvd., Culver City.

Pahco composition roofing, skylights,

steel sash, reinforcing steel, tol-
wood and cement floors, etc.

Plans Being Figured.
STAGE BLDG. Cost, \$—
CULVER CITY, Los Angeles Co., Cal.
Frame and stucco stage building (150
feet).
Owner—RKO Pathe Studios, Wash-
ington Blvd., Culver City.
Architect—Eng. Dept. of Owner.

Plans Being Figured—Bids Close
17th.
RECREATION CENTER Cost, \$—
WOODSIDE, San Mateo Co., Calif.
Recreation center (work involv-
ing swimming pool, dressing room,
club room, kitchen, barbecue
aviary, etc.)
Owner—Withheld.
Architect—Noble and Archie T. N-
som, Russ Bldg., San Francisco.

Plans Being Completed.
TRACK Cost, \$200
BERKELEY, Alameda Co., Cal. U-
niversity Campus.
Reinforced concrete track (Stad-
Bowl) (to seat 20,000 approx.)
Owner—University of California.
Architect—Warren C. Perry, 260 C-
ifornia St., San Francisco.
Plans will be ready for bids in ab-
six weeks.

CALIFORNIA—A. C. Fleury, at-
tending supervising quarantine officer,
announces construction will
started this year on two new steel
border inspections, one to be lo-
cated on the Redwood Highway and another
on the Pacific Highway. The former
will be located between Grants Pass,
Ore., and Crescent City, Calif., and
the latter north of Hornbrook near
Oregon Line. The structures will
of log construction with public ex-
venience stations.

SAN FRANCISCO—Home Manu-
facturing Co., 552 Brannan st., aware
contract by Board of Supervisors
under Proposal No. 703, to furnish
museum cases with frames of extru-
dium aluminum alloy, as follows:

H. M. de Young Museum
Item No. 1. 16 cases Type "A"
price each \$116.55.
Item No. 2. 18 cases, Type "B"
price each \$90.25.
Item No. 3. 8 cases, Type "C"
price each \$91.55.
Legion of Honor
Item No. 4. 8 cases, designed comple-
Type "A," each \$116.55.

SAN FRANCISCO—Until April
11 a. m., bids will be received by Co-
structing Quartermaster, Fort Ma-
re for repairs to wire fences at Ft.
Miley. Specifications obtainable from
above.

SACRAMENTO, Sac. Co., Calif.
Carpenter & Mendenhall, 907 Fro-
St., Sacramento at \$3,379.44 submit
lowest bid to county clerk, to install
down sprinkling system on grounds,
Sacramento County Hospital.

Following is a complete list of \$1
bids received:
Carpenter & Mendenhall, Sac. \$3,379.
NaVay Lawn Sprinkler Co. \$3,475.
Pacific Lawn Sprinkler Co. \$3,622.
Scott Plumb & Elec. Co., Sac. \$3,830.
P. L. Burr, S. F. \$3,982.
J. A. Frazio, Oakland, \$5,279.
Bids held under advisement.

MISCELLANEOUS SUPPLIES AND MATERIALS

LINDSAY, Tulare Co., Cal.—Un-
til April 28, \$ P. M., bids will be received
by city clerk, to furnish and
deliver gasoline, kerosene an-
lubricating oils for ensuing year; de-
liveries to be made City Water Work
Plant No. 1. Further information ob-
tainable from clerk.

A Pointer on **P**rinting

Printing matter is not a commodity—it is a necessity, like the salt in our soup. Without printing matter modern business is unthinkable. The more we invest in printer's ink—that is *in the right kind of printing*—the greater the results. Therefore it is of vital interest to select the RIGHT kind of printer. — There are printers AND printers—but few are self-containing in mechanical and creative ability.— Put us on the track, and, like this pointer in suspense, we will bring back the bacon.

LABOR RESTRICTION PLAN OF SAN JOAQUIN

San Joaquin county contractors and laborers have been requested by the San Joaquin County Board of Supervisors to co-operate in the preparation of any ordinance submitted which plans to place labor restrictions upon public construction work in the county.

At a hearing last Monday in connection with proposed ordinance advanced by C. C. Williams, secretary of the Building Trades Council, developed a difference of opinion between the contractors and labor group. Earle Lewis of the Stockton Builders' Exchange submitted a letter from that organization opposing the ordinance. The proposed ordinance contemplates restriction which will force contractors on county work to employ San Joaquin county labor. The Builders' Exchange contends the ordinance would place a hardship upon contractors.

Williams contended that numerous other cities and counties have such ordinances and that the action would merely be a protective measure for county laborers and residents.

When objection was raised to the five-day residence provision in the proposed ordinance, Williams declared his group willing to compromise to 90 days. Questioned by Supervisor Mary French, he declared the duties of building circles permits a contractor using his clerical and executive force on any job regardless of the county, and such would be permitted in San Joaquin county. He contended that as taxpayers local labor is entitled to the opportunity of working on county jobs regardless of whether the contractor is an outside man or not.

After considerable discussion during which board members expressed an opinion that there was some merit to the proposed ordinance, the hearing closed with the request that the opposing sides work out an ordinance agreeable to all concerned. Supervisor E. E. Steingul suggested that the ordinance might stipulate that a certain percentage of labor must be local county residents.

One of the chief points raised in connection with the proposal was that police activities would be required to determine whether the men employed in all jobs were local residents or not. Williams declared the movement to protect county workmen has not been endorsed by labor groups and is being advanced by labor leaders acting as citizens of the county.

The San Mateo county supervisors have passed Ordinance No. 369 providing for the opening and connecting of sewers maintained by districts formed under the County Improvement Act of 1921, which ordinance also provides for the appointment, compensation and duties of sewer inspectors and other employees and requiring certain buildings to be connected with such sewers.

MARCH BUILDING GAINS 50 PER CENT

Building permits issued during March increased 50 per cent over February and new non-residential buildings authorized jumped approximately 75 per cent, according to the U. S. Department of Labor.

Tabulation of reports from 347 cities throughout the country, showed new residential construction authorized during March totaled \$50,602,646 against \$37,651,622 in February. New non-residential permits issued were \$82,316,431 against \$47,170,923.

Total authorized construction including alterations and repairs, was \$152,870,109 against \$101,528,521, a 50.6 per cent gain.

The new construction included 11,794 residential buildings, a gain of 32.5 per cent over February.

"DISHONEST PRACTICE" IS LAID TO DONOVAN

Revocation of the license of John J. Donovan, Oakland architect and a member of the State Board of Architectural Examiners, is asked by Fred Farris, in a complaint filed with the state architectural body.

Farris charges "dishonest practice and unprofessional conduct."

In the complaint, Donovan, who is said to be a stockholder in an Oakland window manufacturing company, is accused of so drafting plans for Farris that only its windows on which the architect's company holds the patents could be used; and that Donovan by "his acts has made it possible for the said company to ask such price or prices for their products as they wish, without competition; and that the said defendant is thereby receiving as president and stockholder of said company secret and excessive profits by thus preventing and restricting competition."

Donovan, it is said, readily admitted he had recommended the use of his own window, as he considered it superior to others in certain types of buildings. He said he was at a loss to know the motive behind Farris' accusations, however, as he does not know the man and "never saw him nor had any business dealings with him"

\$1,000,000 ASKED IN ELECTRIC FIRM SUIT

George C. Degner, inventor, has filed a \$1,000,000 suit against the General Electric Company in the United States district court at Los Angeles.

Degner charges the electric company with manufacturing and selling traffic signals which embody major characteristics of a signal which he invented and patented.

SANTA BARBARA GOES 5-DAY WEEK

The Santa Barbara County Board of Supervisors by a vote of 4 to 1 adopted a policy for a five-day working week for day laborers and indicated the work policy, would be required in all county contracts.

Chairman Preisker presented the resolution for such a working policy last week, but the supervisors delayed action on it to give it further study.

In asking the adoption of the five-day week for the county, Chairman Preisker said he had been operating his road department on that basis with great success.

"The five-day week is the ultimate solution to the present unemployment situation," he declared. "Santa Barbara county should be the first in the State to adopt the five-day week. It is coming and there is no stopping it. Industrial leaders in all parts of the country are advocating it. Santa Barbara county was among the first to adopt a standard wage. We first demanded local labor for public works. We should set the pace again for the state with the 5-day working week."

BUILDERS' SERVICE TAKES OVER MINTON

The Minton Company of Mountain View announces disposal of its lumber, mill, building material and plumbing business to the Builders' Service Company, recently organized.

Earl D. Minton, president and manager of the Minton Company, will go into the construction business exclusively and will move his offices and headquarters to Palo Alto with a branch office in San Jose.

Alfred Olson, J. E. Carter, J. L. McPheters, and August Landen, formerly directors of the Minton Company, have resigned and will be directors in the new concern at Mountain View.

H. A. Hoyt and William Schwartz will join the Minton Construction Co. in Palo Alto.

M. E. Joslin, until last week treasurer of the Woodhead Lumber Company in Los Angeles, has been elected manager of the Builders' Service Company, and he will arrive in Mountain View within the next few days.

Governor Riehl of Maryland will welcome some 2,000 realtors expected to attend the annual convention of the National Association of Real Estate Boards to be held in Baltimore, May 27 to 30. The Governor will speak at the opening session of what promises to be the largest convocation of the real estate men held for some years. Eight hundred and seventy-five reservations from more than 100 cities located throughout the United States and Canada are now in the files of the Association headquarters in Chicago, with new names being added every day.

NEW PLAN OF FINANCE FOR BUILDING CONSTRUCTION

By O. W. ROSENTHAL

Because of the financial situation, the construction industry is paralyzed. While we are overbuilt in some types of buildings in some localities, we are not generally overbuilt, and structures of all kinds are needed. An extremely large modernizing program is necessary at this time to protect property values. With the sound of the hammers on construction projects, there will be a general feeling of encouragement that will be reflected in all business.

The finance plan I advocate will make funds available for those desiring to build or modernize and will immediately have its effect upon the unemployment problem by providing work for a vast number of workers.

There is in process of organization The Construction Investment Trust which will issue shares of certificates of interest supported by thousands of mortgages. The diversification of types, as well as location, will set up a security second to none for investment purposes.

Up to this time the real estate mortgage bond was the best method thus far devised for bringing together the necessary funds for large enterprises. However, circumstances and maladministration has caused the public to lose confidence in this class of security.

The real estate mortgage bond differs from Construction Trust Shares in the fundamental essential of investment, namely: security. A bond issued against an individual enterprise is only as good as the enterprise regardless of the equity requirements, and if, through mismanagement or otherwise, the enterprise does not succeed, the value of the bond is impaired; whereas, Construction Trust Shares will be supported by thousands of mortgages, and should a percentage of them become distressed, it would not materially impair the value of the security.

The public has become extremely timid about selecting its investments of all kinds because of recent unfortunate experiences. It does not know where to turn for advice because much of the advice given in the past has not been sound.

Because this public confidence has been shaken, the soundness of the investment must be immediately obvious.

Construction Trust Shares supported by such wide diversification offers to the investing public the security it must have. This, together with substantial yield, will provide everything that is desired as to security and profit.

The entire construction industry, realizing that the solution of this tremendous problem of sound investment and real estate development is the obligation of the industry, offers this solution of the problem.

The Construction Investment Trust, in the hands of sound management, outstanding men of integrity and ability in finance, construction, and property management, will re-establish the confidence of the investing public in real estate securities.

According to the plan it is proposed to organize a Construction Investment Trust which will issue shares or certificates of interest. These shares to be supported by loans not upon one structure, but upon thousands of structures, so should one building become distressed because of misman-

A new plan of finance for building construction has been drafted by O. W. Rosenthal, President of the National Association of Building Trades Employers.

Mr. Rosenthal has devoted considerable thought and time devising a plan which will stimulate construction activity and will encourage an early resumption of construction work. He has spent practically a year in studying methods of financing with the idea of developing a plan which would meet with the approval of the general public and which at the same time would be one which would appeal directly to those engaged in construction activities as a sound scheme for financing new construction, different from the old methods used preceding the present depression.—Editor.

agement or otherwise, the risk would spread upon so many structures that this would not impair the value of the security. The risk is further minimized by the diversity of types as well as geographical diversification.

The organization will maintain a department constantly in touch with experts thoroughly versed in the management and conduct of building enterprises. It will carry in its contract a clause permitting its management, when necessity demands, to place such experts in charge to straighten out the management of any individual building. This will have the effect, first of safeguarding each individual loan; and, second, where others make the first mortgage, it will reassure them to have so strong an institution jointly with them upon the property. This should immediately make first mortgage money available from other sources as well.

This plan differs from the old method, which was an underwriting contract whereby the house of issue agreed to purchase the securities. These securities of necessity were offered to the investing public, and only as the investing public purchased them did the capital again become liquid for further loans. Therefore, the underwritings were limited by the ability and inclination of the public to absorb the securities.

This was a costly method and created an unusual situation with regard to competition for issues, as well as competition in selling. It was largely responsible for the present stagnation in building construction.

Under the plan of the Construction Investment Trust, there would be a constant flow of money through the Construction Trust shares. There would be no necessity for the sale of bonds or mortgages. There would be no underwriting beyond the available funds, and the tremendous expense of operation and selling to individual investors would be eliminated.

One part of the industry cannot make the plan a success. Each part must do its share. One part must not be called upon to furnish funds whereby those who furnish no funds shall have no employment.

Once the building industry demonstrates its confidence by investing its own funds in construction projects, it will immediately strengthen the confidence of the investing public, which

will then proceed to place its funds in construction securities.

The plan of the construction investment trust, when in full operation, will insure to every one in the building industry a continuous market for services and material. It will hold the business more nearly level.

For the building contractor, the architect, the engineer, the realtor, the seller of materials, and the manufacturer, this plan will operate as a stabilizer and an assurance of continuous business. It will meet what President Hoover recently declared to be the greatest need of the building industry;—a need which when met, will have the effect of keeping our building program up-to-date, with everything moving in a steady stream from the mill to the completed structure. It will be a powerful factor in the elimination of over-production in one period and under-production and depression in another; it will eliminate unsound conditions within the industry.

It will meet the one great need of the construction industry, the providing of funds for sound first mortgages and also funds, when advisable, to bridge the spread between the conservative first mortgage loan and private capital for building projects. It will go farther to induce the public to place its funds in building operations than any amount of unsupported argument. The industry is practically at a standstill and under the circumstances, to ask labor and employer, both of whom have been through a period of unemployment and hardship, to use a portion of their earnings for investment purposes, regardless of their debts and obligations, is indeed putting them to a severe test.

The Construction Trust Shares, representing as they will sound and profitable investment, will be offered to the investing public, which will be a tremendous field. Mortgages will be offered to the investing public and to institutions.

LICENSE BILLS FAIL TO PASS IN OREGON

A bill to regulate the practice of professional engineering and survey in the State of Washington was vetoed by the governor on March 21. The governor in his veto message said:

"This is a lengthy, complicated and technical bill for the regulation of the profession of engineering, embracing 'investigating, reporting on, designing and/or supervising the construction of equipment, structures, utilities and/or projects, when the proper performance of such services requires technical engineering knowledge and skill, and shall include civil, mechanical, structural and/or hydraulic engineering,' and land surveying. It would create another board. If the necessity for such a law were admitted, the provisions of the present bill are objectionable for their drastic and far-reaching effects."

In Oregon a bill to amend the license law in order to improve the definition of the practice of engineering was killed in the state senate. The definition of the practice of engineering as given in the Oregon law enumerated in detail the various operations carried on by engineers. The amendment was to add operations not specifically mentioned in the existing law.

BUILDING TO HAVE GARAGES FOR PLANES

A garage and landing field for aircraft on top of tall office buildings has been patented by John Schimmel of Philadelphia. Incoming pilots would direct their planes into a wind tunnel only twice as wide and twice as high as the machine itself. On either side of the tunnel fans set in motion by a signal would force air out at the exact speed of the landing plane. When the plane comes to a stop, the propellers of the fans would be cut off at the rear instant. An elevator would then remove the plane to the garage on the floor below. In order to meet various conditions of wind direction, the tunnel could be movable.

NEWSPAPER URGES SMALL FARM HOMES

This year's "small farm contest" the Los Angeles Times, in which prizes are offered for the best small farm homes each year, has drawn a large number of entries. The contest conducted through the daily's farm and garden magazine, a weekly supplement, assisted by the Los Angeles Chamber of Commerce. The first contest was held in 1929. An attempt is also being made to interest several local manufacturing plants to finance the purchase of such properties for those of their workers who want this type of home, on a weekly or monthly payment plan as a form of employment or old age insurance. Harold M. Finley, editor of the farm and garden magazine, and George P. Mendenhall, manager, agriculture department, Los Angeles Chamber of Commerce, developed the contest details, which are in charge of Ross H. At, local agricultural writer.

STATE ARCHITECTS' ASSOCIATION SEEKS A.I.A. AFFILIATION

Under the leadership of Robert H. Orr, president of the State Association of California Architects, the meeting of state architects' societies held at San Antonio, Tex., last Monday, the day preceding the national convention of the American Institute of Architects, decided unanimously in favor of affiliation of all states societies with the American Institute for the purpose of upholding the professional ideals of that organization and urging the affiliation of all architectural societies working through the Institute and to include all architects in the nation. At the first session of the Institute the directors introduced a resolution favoring this plan.

TO AUDIT BOOKS OF ACCUSED SURVEYOR

The Stanislaus County Board of Supervisors has unanimously voted for a complete audit of the books of John H. Hoskins, former county surveyor, now in the county jail in default of \$10,000 bail on four counts of altering papers and records filed in a public office. The audit of the books will cover the eight years Hoskins held the office of surveyor. According to District Attorney Robert R. Fowler, the defendant and Henry Clinton, Green, a deputy in Hoskins' office, manipulated the county payrolls of their department and secured large sums of money. Green is also under arrest and in jail in default of bail.

MABREY, SACRAMENTO CONTRACTOR, BANKRUPT

Listing secured and unsecured claims totaling \$2,087,034.43, Chas. S. Mabrey, Sacramento contractor, has filed a voluntary bankruptcy petition in the United States District Court. The petitioner was the president of the Charles S. Mabrey Construction Company. Four insurance policies, totaling \$16,500, were listed as the only possessions of Mabrey and in the petition the policies are claimed to be exempt. The secured claims, which are declared to have been foreclosed or transferred, amount to \$466,093.96, while the unsecured claims total \$1,620,940.47.

Nevada's Labor Laws Apply on Boulder Job

Nevada's labor laws and the rules and regulations of the state mine inspector's office are in every way applicable to the Boulder Dam construction work, according to opinions rendered by Gray Mashburn, Nevada State Attorney General, at the request of William Royle, State Labor Commissioner and A. J. Stinson, State Mining Inspector. Mashburn says that the work at Boulder Dam is being done by private concerns and that as Congress passed no act creating a United States reservation at Boulder canyon that the Nevada laws apply to all work going on there on the Nevada side of the river. He says that the mine inspector has full power to enter and inspect any of the workings at any time just the same as he has in mines operating in the state and that there is no conflict between federal laws and state

THE OBSERVER

What He Hears and Sees on His Rounds

Alfred T. Forward, 54, lumberman of Tehama County, died April 14, following a three years' illness.

William Wallace Meim, president, and all other officers of the Calaveras Cement Company, were re-elected at the initial meeting of the new board of directors held April 16.

March wholesale prices of six standard plumbing fixtures for a six-room house, ascertained by the Bureau of the Census from reports of 12 representative manufacturers and wholesalers, averaged \$97.86 as compared with \$96.49 in February, \$104.51 in March, and \$98.51 in March, 1929.

A warrant issued December 27, 1928, last Wednesday caused arrest of C. W. Strouss, former Redwood City contractor, on a charge of theft of labor, sworn to by L. A. Newman, Atherton carpenter. Newman alleges Strouss employed him in 1928 and failed to pay him \$225 wages. Bail has been set at \$1000 cash or \$2000 bond.

More than 5000 new single family homes are now needed in the Eastbay group of cities to restore a normal status, according to an analysis of residential accommodations made by the Oakland Real Estate Board. Restoration of normal employment condition in the city is creating an actual market demand for such properties at the present time, the board reports.

The Oakland city charter is being violated by three contractors on city work who pay less than the prevailing wage scale and give preference to outside labor, according to a protest filed with the city council by Charles E. Gurney, secretary-treasurer of the Building Trades Council of Alameda County. The three, according to Gurney, are M. J. Bovanada, of Stockton, working on a Foothill boulevard paving contract; the Western Road Company, and Lee Immel.

The National Lumber Manufacturers' Association has appealed to the U. S. Tariff Commission to forbid the import of Russian lumber on the grounds of unfair competition. It is charged that Russian mills and timber have been acquired by the government without cost and are being exploited by the aid of direct and indirect subsidies which is unfair to private competition.

Galen F. Oman, chairman of the committee on public information of the Columbus Chapter, American Institute of Architects, says:

"The depression we have been experiencing is only the natural swing of the pendulum following the building boom. The unfortunate part of this situation is not so much the fact that the country was overbuilt as that the speculative disregard for quality limited the quality building market to about 25 per cent of the total program. This means that about three-fourths of the total construction has resulted in a liability rather than an asset. We believe that during the calm of depression the realization of just what has happened will dawn upon the building public and the breeze of building activity increasingly stirs they will awake to demand quality construction, good design, efficient and economical planning."

An unusual development in oil burner sales strategy is the Summerheat portable unit which can be taken into a prospective customer's cellar and demonstrated at his own furnace, says the Business Week. The unit is of aluminum construction, weighs less than 125 lbs.; it carries a 36-hr. supply of oil in 2 interchangeable bottles; automatic control is obtained by a portable thermostat.

For permanent installations, this new product of Summerheat Corp., Dowagiac, Mich., can be connected with a regular 275-gallon basement tank—the bottles still being useful to provide an emergency supply against a fireless week-end. The demonstration unit, as is, can also be employed to serve fall and spring heating requirements, to provide hot water in summer, to meet the needs of renters who do not want to make permanent installations. The entire unit is secured to the fire door of the furnace, opens with it so that, if desired, the regular fuel can be burned or the furnace used as an incinerator.

It is supplied in 1 size and 4 models to suit all home sizes and all types of heating plants—steam, vapor, water, or warm air. The unit has been approved by Underwriters Laboratories, Inc. for use with Nos. 1, 2, and 3 oil and West Coast Diesel oil.

Alameda County Building Trades Council, in a communication to the Oakland city council, alleges that M. J. Bovanada, Stockton contractor, who has a contract with the city for the improvement of Foothill boulevard, is violating charter provisions which require that local help shall be employed and that the prevailing wage shall be paid. The Trades Council also alleged that outsiders are employed on this work, and that wages as much as \$4 below the scale are being paid by Bovanada. The council referred the matter to the commissioner of streets and to the city attorney, for recommendation.

The annual meeting of the American Road Builders' Association will be held in Washington, D. C., on May 15. Other meetings of old and incoming boards of directors of the national association and the various divisions will be held on May 14 and 16.

Plans will be perfected at these meetings for the work of the coming year. Among the subjects to be discussed are the appointment of joint co-operating committees with the American Association of State Highway Officials and the Highway Research Board, and the chairman of more than a score of committees that will engage in the investigative work of the year.

Results of committee work during the past year will be reviewed and new subjects for committee work examined and approved. Members have submitted a number of new subjects for investigation.

Meetings will be held of the old and incoming boards of directors of the County and City Divisions. The various executive committees will also meet and plan their work.

A. Kruse has submitted a proposal to the Hayward, Calif., city council seeking to make it mandatory on all plumbers applying for a municipal license to undergo an examination as to their ability to perform plumbing

work in accordance with a proposed plumbing ordinance. He cited an example of a woman who hired a plumber on a per diem basis, the work costing her \$54, when an accredited plumber could have done the job for \$12. Examinations, he contended, are in force wherever there is a made plumbing ordinance.

Businessmen who attack the depression with wage cuts are groping an economic quagmire, a group of nation's foremost economists warned the current issue of the American Economic Review.

The "overproduction myth" is repudiated by the conclusions of the symposium, and higher wages are pointed to as the most effective way out of the slump.

Assailing widespread acceptance of the suggestion that overproduction is the basic factor in the depression Carl Snyder, economist for the New York Federal Reserve Bank, submitted new studies of world production of basic commodities since 1890, showing that the rate of increase in industrial output was smaller in the five-year period 1925-29 than in the pre-war era.

Fresno County will either employ union labor or the labor at all, according to word from the San Joaquin Valley metropolis.

Bids for painting the county courthouse have been rejected and it is probable that the structure will go unpainted for another year.

A Fresno non-union contractor submitted the lowest bid for the work \$4,190 with materials furnished, or \$3,985, materials unfurnished. The next lowest bidder was a San Francisco concern, said to be a union operator with a figure of approximately \$5 higher.

The Fresno Building Trades Council protested award of contract to the low bidder on the grounds of "irresponsibility," declaring that the material point the structure would cost not less than \$15,000, whereas, under the low bid, the amount designated for the item is little more than \$1,200. The bid, the trades council claims, would not permit the use of high grade materials.

The \$5,000 available for the paint work will go into the 1931-32 budget to be used at the discretion of city supervisors.

Reports of new orders for fabricated structural steel for the week ending March 28, 1931, were received from 11 establishments, whose capacity represented 37.3 per cent of the total capacity of all plants in the United States. The bookings reported by the establishments amounted to 9,322 tons representing 26.7 per cent of the total capacity of the reporting establishments. Reports of shipments of fabricated structural steel for the same week were received from 99 establishments, whose capacity represented 36.2 per cent of the total capacity of all plants in the United States. The shipments reported by these establishments amounted to 19,796 tons representing 59.2 per cent of the total capacity of the reporting establishments.

CO-EDS SUE PAVING FIRM FOR \$168,000

Three University of Southern California co-eds, Helen Melone, Anna Leary and Margaret Holland, who were injured last October when returning south from a football game at Berkeley, have sued the Valley Paving & Construction Company of Fresno for \$168,000 damages. Suits were filed Wednesday in Los Angeles but were transferred to Visalia where the construction firm formerly maintained head quarters.

ALONG THE LINE

Col. B. C. Allin, director of the Port Stockton, will leave May 15th to accept a brief appointment as consulting engineer for the Port of Ohavarna, India.

Charles S. Howard of San Mateo has been elected chairman of the State Board of Forestry. B. A. McAllister of Piedmont, has been named vice-alderman. M. B. Pratt, state forester, is nominated to succeed himself, the appointment to be made by D. H. God, director of natural resources.

Nomination of Edward A. Duffy of Attle, Wash., president of Reitz, Gray & Duffy, consulting engineers, Mayor Edwards to the position of permanent director of the city lighting department, succeeding J. D. Ross, recently dismissed by the mayor, has been rejected by the city council. This is the third nomination to the position the mayor to be rejected by the council.

The home financing business may be in the list of industries backed by federal advertising programs. It is indicated in the announcement of a committee of the United States Building & Loan League to consider the subject. The league's national advertising committee will study possibilities of national and nation-wide cooperative business building for savings, building and loan associations. In H. Hazen, Benjamin Franklin of Portland, Ore., will head the committee. Hazen's business development work with the Portland association has won recognition throughout the Pacific west.

Walter E. Robinson, Southern Oregon and Northern California mining engineer, has been named assistant state engineer by C. M. Thomas, the Oregon public utilities commissioner. Robinson has been engaged in mining engineering for many years. For the last several years he has been in charge of operations at the Blue Ridge copper mine at Copper in Siskiyou County Calif., near the Oregon state line.

The lumber and materials group in Los Angeles sold more than \$34,000,000 worth of material retail in 1929, according to the U. S. census report.

LIGHTING ACTIVITIES
NOW IN ONE DIVISION

All lighting activities of the Westinghouse Electric and Manufacturing company, which are centered in the Cleveland Works, have been coordinated in one division. This organization is under the management of L. S. Wood.

The grouping of all lighting activities under one head was arranged in order to more effectively promote the sale of Westinghouse lighting equipment, according to Wood. This new form of organization completes plans which were made at the time Westinghouse lighting activities were established in Cleveland.

The lighting section will be organized under two principal groups. In the first lighting group will be street and highway lighting, tunnel, bridge and park lighting. Commercial lighting will include commercial and industrial lighting, food-lighting, athletic field lighting, industrial yard and railway lighting, dock lighting, airport and exposition lighting.

TRADE NOTES

E. A. Trafter, formerly with Celite Products Co. and Johns-Manville, has accepted a position with the Paraffine Co., Inc., as sales engineer. Mr. Trafter will specialize in diatomaceous earth products and insulating brick for high temperatures.

George W. Froesch, 2703 Stuart St., Berkeley, will operate in the East Bay district under the firm name of Building Specialties Company.

F. E. Tompkins and Frank O. Henkel, operating the Sonoma County Millwork & Roofing Company at Santa Rosa, announce a dissolution of the partnership.

James Hunter Roper will operate from 1560 Albee Street, Oakland, under the firm name of Building Service Company.

Ray Cities Hardware Alliance, Ltd., capitalized for \$50,000, has been incorporated in San Francisco. Directors are: W. B. Hocking, M. E. Page, F. E. Ruggles, E. R. Culvert and Henry C. Lind.

KANSAS DEMANDS
ENGINEER LICENSE

Among the bills passed by the Kansas legislature at its recent session was one providing for the registration of professional engineers. Provision is made for a registration and examining board composed of five registered professional engineers, who must be 35 years of age and residents of the state for three years, as well as members in good standing of a recognized state or national engineering society. Not more than two members of the board shall be from the same branch of engineering. The registration fee is \$25 and the annual fee \$2.

An applicant for registration must be 25 years old, have been actively engaged at least four years in professional engineering work, and submit satisfactory evidence that he is qualified and experienced in professional engineering in one or more of the following branches: civil, mechanical, electrical, architectural, mining and chemical. The character, training and experience of the applicant shall in no case be less than that required for membership in the American Society of Civil Engineers, American Society of Mechanical Engineers, American Institute of Electrical Engineers, or similar national engineering society covering the field of engineering in which he wishes to practice.

A copartnership, a corporation or a joint stock association may engage in the practice of professional engineering as registered engineers, provided such practice is carried on under the responsible direction of one or more registered professional engineers, whose name or names shall appear on all plans and other official documents connected with such professional engineering practice.

Bids will be received tomorrow evening by the Monterey Union High School District to erect a one-story reinforced concrete and tile gymnasium in addition to the construction of a swimming pool on the school grounds. Swartz & Ryland, the architects, estimate the cost at \$100,000.

HERE—THERE
EVERYWHERE

The city council of Hanford, Calif., is considering adoption of the Uniform Building Code as prepared by the Pacific Coast Building Officials' Conference. Representatives of the Pacific Coast Five Underwriters and various building crafts in the Kings County district urged adoption of the code at a recent meeting of the council.

Asking judgment of \$1,005, Mrs. Mathilda S. Palmquist of Tulsa, has filed suit in the superior court at Tulsa against the Master Plumbers' Mutual Benefit Association. Mrs. Palmquist states her husband, who was killed in an automobile accident last summer, was a member of the association and that she was entitled to a death benefit from a fund maintained by the group.

The Vallejo Building Trades Council has joined forces with the state council in an effort to obtain legislation through the Maloney bill which will prohibit employment of alien labor on public works projects.

Arcees, Limited, the Soviet trading organization in Great Britain, has placed with the Ruston-Bucyrus, Ltd., London, an order for 23 excavators valued at over \$500,000. These machines, which include a number of large sizes up to 3½ cubic yards capacity, are for steam and diesel engine operation. They will be delivered during the second quarter of the year and will be used on construction projects in various parts of the Soviet Union.

EDY IS APPOINTED
DALLAS CITY MANAGER

John N. Edy, former city manager of Berkeley and more lately holder of a similar post in Flint, Mich., has been named first city manager of Dallas, Texas.

In his new post Edy will receive an initial salary of \$16,500 annually. In Berkeley he was paid \$10,000 a year and at Flint \$15,000.

Edy was Berkeley's first city manager, assuming office there in 1923, after serving as an engineer in the street department of St. Louis, various other engineering posts and chief state highway engineer of Montana. In 1925 he declined an offer to serve as city manager of Cincinnati, O., at a salary of \$25,000 per year.

Last May he resigned the Berkeley post, and went to Flint to become the first city manager there when the new form of municipal government was instituted. He received a starting salary of \$15,000 annually which was to have increased to a maximum of \$20,000 a year.

A week ago Edy tendered his resignation following an election in Flint in which the faction which had hired him was ousted from power. His job and salary were the principal campaign issues.

He immediately sent his application to the Dallas council, just elected under a city manager charter. The charter provides that the manager shall receive a salary ranging from \$15,000 to \$25,000 a year.

Edy is a former president of the International City Managers' association and holds degrees from the University of Missouri and University of California.

PRIVATE ARCHITECTS WILL NO LONGER SHARE IN STATE PROJECTS

State officials announce that no future contracts for the preparation of plans for public buildings will be let to private architectural firms, whenever it is possible to have the work expeditiously performed by the State Division of Architecture.

This statement is made by Col W. E. Garrison, state director of public works, and Rolland A. Vandergrift, director of finance.

"In awarding contracts for several projects to private firms early this year," said Col. Garrison, "we were carrying out the wishes expressed by President Hoover and Governor Rolph to speed up public building projects in order to relieve unemployment."

"The architectural work for these buildings could not in our opinion have been prepared in the offices of the state division of architecture with sufficient speed to provide unemployment relief to the extent desired by the governor. Therefore, private architects were employed to put the work in readiness at the earliest possible date.

"However, in future construction, we are not going to let contracts to private firms whenever it is possible to have that work performed expeditiously by the men in the division of architecture."

Following the announcement that 40 men stood in danger of losing their positions in the Division of Architecture by August 1st because of the let-

ting of the contracts to private firms. Director of Finance Vandergrift said that every possible effort will be made to retain as many of the state employees as possible.

"However," he stated, "it would be indefensible from the standpoint of economy and good business to retain employees when there is no work for them to perform."

Among two major architectural projects listed by Vandergrift as being in the office during the biennium are the new state hospital in Southern California and the prison for first offenders.

The state officials said that plans for both of these would be kept in the state architectural office if it is able to handle the job, and it was generally agreed in the Capitol that the division will be in a position to take care of all future work.

Threats of a lay-off of 50 per cent of the state architectural staff grew out of the action of the senate finance committee in slashing \$140,000 from the general support budget of the division.

This reduction was recommended by Vandergrift in view of the fact the preparation of plans for twenty-five major projects is being performed by private firms, and thus, it was contended, the additional support, principally for salaries, was not needed.

The legislature passed a special appropriation bill of \$200,000 to defray the fees of the private architects.

ENGINEERS' REGISTRATION BOARD WINS POINT IN ENFORCEMENT OF LAW—CONTRACT WITH UN-LICENSED ENGINEER IS CANCELLED

A point has been won by the Board of Registration for Civil Engineers of California in contesting the right of the city of San Diego to enter into a contract with anyone except a licensed engineer for engineering services. Recently the city council of San Diego advertised for bids to make engineering studies, plans and specifications for a sewage disposal system, and awarded a contract over the protest of the state board to Frank W. Seifert, who is not a licensed engineer, for the same. Following a ruling by the state attorney general that the contract was invalid, the city council hastily rescinded it and approved a new contract in which Mr. Seifert was named as a contractor to procure plans to be prepared by a licensed engineer. While the situation was changed only in a technical way the state board considers it a victory in the enforcement of the registration law as disclosed by the following statement issued by the Board of Registration for Civil Engineers, of which Donald M. Baker of Los Angeles is chairman:

Statement by Engineers' Board.
"Last December the City of San Diego advertised for bids for furnishing engineering services to make studies, plans and investigations in connection with a system for sewerage disposal for the City of San Diego. This action aroused very great protest amongst the engineering profession and engineering societies, not alone in California but throughout the country. Protests were made by individuals and engineering organizations to the council against such a procedure and as a result no bids were received from engineers.

"However, a bid was received from one Frank W. Seifert, who was not a registered civil engineer in fact, not a civil engineer at all, but according to information received by the board,

was a plastering contractor. When the board received this information it notified the City Council by mail to the effect that while it did not have a copy of the contract entered into between the City and Seifert, in all probability Seifert's action in entering this contract was unlawful because of the fact that he was not registered. A copy of the contract disclosed that Seifert was to furnish complete plans and specifications with detailed estimates of cost of an improved sewerage collection system to serve all of the City of San Diego, and to make a thorough study of all conditions concerning the collection of sewerage, to make necessary field surveys, profiles, maps, working drawings, etc., for the most practical, economical and efficient sewerage collection system for the entire city. He was also to employ R. F. Goudey of Los Angeles to be sanitary engineer in charge of the work done under the contract as consulting engineer, and in the event that Goudey was unable to do so he was to obtain the services of a sanitary engineer of equal prominence. Mr. Goudey declined to serve, and with the consent of the council, Charles G. Frisbie of Los Angeles was substituted for Mr. Goudey. The contract provided that the sum of \$18,000 would be paid for the work.

"Upon receipt of the contract, the matter was referred to the board's attorney for an opinion as to whether under said contract Seifert could be considered as practicing civil engineering, and the attorney's opinion was in the affirmative. This opinion was further endorsed by the Attorney General, who said in his opinion, 'I am of the view that because of this undertaking of Mr. Seifert to so make this study concerning the preparation of a complete report in the matter of a new sewerage system for San Diego,

and to furnish the same to the City of San Diego, he is practicing the profession of civil engineering as contemplated by said act, and therefore is required to be licensed and certified as provided for in said act.'

"Upon receipt of these opinions the board instructed its president, Donald M. Baker, to proceed to San Diego to lay the matter before the District Attorney of San Diego county, who the person in charge of the enforcement of law. This was done by President Baker and Frank J. Barry, a lawyer for the Department of Professional and Vocational Standards, April 6, 1931. The district attorney stated that a warrant for the arrest of Seifert for violating the Civil Engineers' Act would be issued April 1931.

New Contract Is Made

"On April 6, 1931, the city council passed a resolution wherein, after stating the original agreement entered into did not express the true meaning and intent of the parties thereto and that it was never the intention of the contract to bind Seifert to do an engineering work contemplated by such contract, but that such engineering work necessary to be done in order to fully carry out the terms thereof should be done by a registered civil engineer according to the laws of the State of California made in that behalf; and that the true intent of said parties was that Seifert should be regarded merely as a contractor for furnishing the work, and instructed it to amend to the effect that the city an amended contract expressly the true intent of all parties. The amended contract was made and provided that while Seifert still acted as a contractor to furnish plans, that he should not make any of the study, etc., should not perform any of the civil engineering work to be done, but that all engineering work in connection therewith should be done by registered civil engineer and that plans, specifications, etc., should be signed by a registered engineer.

Precedent Is Established

"The board feels that two principles in which it was primarily interested were involved in this case:

"1. The question of whether a municipality could contract with an unregistered person to perform civil engineering work, and

"2. Whether an unregistered person could contract to perform civil engineering work.

"It feels that its attitude is justified and that both principles have been admitted by contracting parties. The question of the validity of the amended contract has not been discussed with legal counsel. Whether same legal remains to be seen, but the board feels that its attitude has been fully justified both in the opinion received from its attorney and from the attorney-general of the State of California and in the result of its action by the city of San Diego and it is hoped that the precedent established will have good results in the future."

OAKLAND TO VOTE \$8,850,000 BOND

Accepting a resolution offered by Mayor John L. Dwyer, the city council of Oakland has authorized an election for May 12 to decide the question of issuing and selling bonds of \$8,850,000 to finance municipal improvements. The projects to be listed on the ballot and the amount to be voted are: San Francisco main library and branch libraries \$900,000; Lake Merritt improvements, \$300,000; new exposition building, \$400,000; parks and recreation improvements \$300,000; new museum building, \$250,000; new emergency hospital, \$200,000.

feats proposal to issue bonds of \$25-
000 to finance erection of a two-story
brick high school. Preliminary plans
for which were prepared by Archi-
tects Davis-Pearce Co., Grant and
Weber Sts., Stockton. Incomplete re-
turns showed 901 in favor and 778
votes against the proposal, a two-
thirds majority being required to car-
ry the proposition.

OAKLAND, Cal.—City council sets
May 12 as date to vote bonds of \$75-
\$50,000 of which \$900,000 is to finance
erection of a new main library and
several branch library buildings; new
municipal exposition building, \$400-
000; new museum building, \$250,000
and new emergency hospital, \$200,000.

ROSS, Marin Co., Cal.—Election will
be held May 8 in Ross School District
to vote bonds of \$40,000 to finance
school improvements. Trustees of the
district are Gregory Jones, Ruth D.
Eroy and Clarence S. Burchaell, A. A.
Cantin, 544 Market St., San Francisco
is the architect.

VISALIA, Tulare Co., Cal.—Until
May 4, bids will be received by county
superior for purchase of the \$6,000
bond issue of the Stone Corral School
District; proceeds of the sale to fi-
nance school improvements.

SATICOY, Ventura Co., Calif.—Sati-
coy school district, Ventura county,
will call a bond election within a few
weeks to provide funds for additional
school facilities. Proceeds from the
issue, which will be approximately 270-
000, would be used for the purchase of
sites and erection of new buildings for
Mexican children and for the addition
of two rooms and installation of a
heating system at the Upper School.
The district defeated a \$115,000 bond
issue at a recent election.

SKILSAW Portable Electric Hand
Saws (4 models).

SKILSAW Portable Electric Sander
SKILSAW Radial Arm Attach-
ments.

SYNTRON Portable Electric Ham-
mers (4 models, motor-
less).

MALL Flexible Shaft Machines (50
models).

Electric Drills, Grinders, Buffers,

Tools.

1248 Mission St. Underhill
San Francisco 7662
SALES . SERVICE . RENTALS

CAMPBELL, Monterey Co., Cal.—Until
April 23 bids will be received by Coun-
ty Supervisors at Salinas for the pur-
chase of the \$75,000 bond issue of the
Sunset School District, proceeds of
the sale to finance erection of a new
school, plans for which are being pre-
pared by Swartz and Ryland, archi-
tects, Spazier Bldg., Monterey.

CLARKSBURG, Yolo Co., Cal.—
Election held in Clarksburg Grammar
School District to vote bonds of \$30-
000 to finance additions to the gram-
mar school failed to carry.

BURNS VALLEY, Lake Co., Cal.—
Burns Valley School District defeats
proposal to issue bonds of \$20,000 to
finance erection of a one-story frame
and stucco school. The vote was 63
in favor and 198 against the issue.
Preliminary plans for the structure
were prepared by William Lowe, ar-
chitect, 354 Hobart Bldg., Oakland.

SANTA BARBARA, Cal.—In a sup-
plemental order the Railroad Com-
mission has authorized Santa Barbara
Telephone Company to issue the \$1-
180,000 of bonds recently authorized
by the commission, as first mortgage
bonds instead of general and refunding
mortgage bonds, as previously
designated. This action was re-
quested by the company in view of
the fact that the existing first mor-
tgage bonds will be entirely redeemed
before the new issue is sold.

SPRINGFIELD, Monterey Co., Cal.
Election will be held May 11 in the
Springfield School District to vote on
bonds of \$3,000 to finance erection of
a new school. Trustees of the district
are: Mrs. F. Yokerson, J. H. Campbell
and J. H. Struve.

OROVILLE, Butte Co., Cal.—Due to
congested conditions in the present
high school, a bond issue is contem-
plated to finance erection of a com-
plete new plant, replacing the present
structure which was erected 14 years
ago. The proposal of a bond issue is
advocated by J. C. Nisbet, principal of
the high school.

BRENTWOOD, Contra Costa Co.,
Cal.—Until May 4 bids will be received
by county supervisors for the purchase
of the \$15,000 bond issue of the Brent-
wood-Deer Valley Union High School
District; proceeds of the sale to fi-
nance erection of an addition to the
present structure, plans for which
were originally prepared by Architect
Jas. T. Narbett, 474 31st St., Rich-
mond.

ELEVATOR SHAFT Cost, \$—
MARE ISLAND, Calif.

Furnish and install elevator shaft in Mare Island Navy Yard Hospital.

Owner—U. S. Government.

Plans by Bureau of Yards and Docks, Navy Dept., Washington, D. C.

Bids are being received by the Public Works Officer, Mare Island Navy Yard. Contract for this work was previously awarded to Sullivan & Sullivan, 3227 29th Ave., Oakland, at \$5,699 for work complete and adding \$379 for substitution of hollow metal doors for metal covered doors. The contract was awarded to this firm in error, the lowest regular bidder being Karl Koller of Crockett, at \$8,980 with \$250 addition for substitution. A complete list of bids on this work was published in issue of March 9. The shaft and lobby will be built on the exterior of the building extending from the ground floor to the roof with the openings at five floors. The work involves excavation, concrete work, steel framing, hollow tile, stucco, wood roof framing, tile roofing, electric work and heating. Plans obtainable from Public Works Officer at Mare Island on deposit of \$10, returnable.

WASHINGTON, D. C.—Bids will be called at once by the Bureau of Yards and Docks for furnishing approximately 3,500,000 lbs. of fuel oil for the use of the naval forces on the Pacific Coast. Deliveries are to be made through the fiscal year starting July 1, 1931. Specifications have been changed this year from "C" grade to "B" grade on account of the general low price of oil. Bids for supplying the naval requirements at Cavite, Philippine Islands and at Honolulu will be asked later.

SAN FRANCISCO—Until May 6th, under Circular No. 5, bids will be received by Signal Officer, headquarters

th Corps Area, Presidio, for installation of submarine cable between Lincoln Park, San Francisco and Baker Beach, Ft. Winfield Scott. Specifications obtainable from above.

pule foundations and eleven 42-ft. April 17, 1931

Bids Opened.

CULVER CITY, Los Angeles Co., Cal.
 Frame and stucco studio scene dock (120x225 feet).
 wner—RKO Pathe Studio.
 urchitect—Eng. Dept. of Owner.
 ontractor—Myers Bros., 3407 San Fernando Road, Los Angeles.

Engineering News Section

BRIDGES

YUBA COUNTY, Cal.—Construction of two bridges, one to span the Feather river between Marysville and Yuba City and another to cross the Yuba River south of Marysville, are favorably reported upon by the Senate Highway Committee.

ORANGE COUNTY, Cal.—Until May 13, 2 P. M., bids will be received by State Highway Commission to construct bridge across Santa Ana River about 2 miles north of Newport Beach, consisting of three 60-ft. 3-in. steel truss spans to be replaced with concrete girder spans and widening the reinforced concrete girder approach spans consisting of two 21-ft. 0-in. spans, eight 30-ft. 0-in. spans and two 21-ft. 0-in. spans.

SANTA BARBARA COUNTY, Cal.—Until May 13, 2 P. M., bids will be received by State Highway Commission to remove deck of the seven 164 ft. 6 in. through steel truss spans of the bridge across the Santa Ynez River about 1 mile south of Buellton and constructing laminated timber floor and surfacing with bituminous macadam.

MERCED, Merced Co., Cal.—T. E. Clark, 420 23rd St., Merced, at \$2350 awarded contract by county supervisors to reconstruct road system on steel portion of Cox Ferry bridge over Merced river on the Cox Ferry road. Complete list of bids follow:

T. E. Clark.....	\$3250
George Owens, Petaluma.....	2779
T. A. Wayne, Merced.....	3575
C. B. Camenson & Sons.....	3580
Whited & Whited.....	3682
C. C. Disney, Merced.....	3397
K. E. Angle, Dos Palos.....	4061
Liner & Allen, Merced.....	4501
Manuel Soto, Redwood City.....	4603

MERCED, Merced Co., Cal.—T. E. Clark, 420 23rd St., Merced, at \$2150 awarded contract by county supervisors to construct timber bridge No. 228 over Dry Creek on the Amsterdam and Ryer Road. Complete list of bids follow:

T. E. Clark, Merced.....	\$2150
T. A. Wayne, Merced.....	2275
E. K. Angle, Dos Palos.....	2677
C. C. Disney, Merced.....	2732
Geo. Owens, Petaluma.....	2809
Whited & Whited, Santa Rosa.....	2942
Liner & Allen, Merced.....	2982
Manuel Soto, Redwood City.....	3109
E. W. Peterson, San Francisco.....	3460

SANTA CRUZ, Santa Cruz Co., Cal.—City council and county supervisors are considering the construction of a new bridge over Wood's Lagoon at the city limits on East Cliff Drive. The cost would be borne equally by the city and the county. Roy Fowler is city engineer of Santa Cruz and Lloyd Bowman, county surveyor.

LOS ANGELES, Cal.—A conference between Los Angeles County officials and officials of Seal Beach has resulted in an effort to reduce the estimated cost of proposed bridge across Alamitos Bay. A tentative plan, estimated to reduce the cost to about \$100,000, retains the railroad trestle over the entrance to the bay. The expense may be divided between Los Angeles and Orange Counties.

SANTA BARBARA COUNTY, Cal.—As previously reported, bids will be received May 13 by State Highway Commission to remove deck of the seven 164 ft. 6 in. through steel truss spans of the bridge across the Santa Ynez River about 1 mile south of Buellton and constructing laminated timber floor and surfacing with bituminous macadam. Project involves:

- (1) 41,000 cu. yds. roadway excavation; not under class;
- (2) 300,000 sq. yds. overhaul;
- (3) 1500 cu. yds. structure excavation;
- (4) 4755 tons crusher run base;
- (5) 1500 tons broken stone (bituminous macadam surface);
- (6) 82 tons asphaltic road oil (bituminous macadam surface);
- (7) 183 cu. yds. class A Portland cement concrete (structures);
- (8) 18,500 lbs. bar reinf. steel (structures);
- (9) 110 lin. ft. 8-in. corr. metal pipe
- (10) 670 lin. ft. 12-in. corr. metal pipe
- (11) 462 lin. ft. 18-in. corr. metal pipe
- (12) 410 lin. ft. 24-in. corr. metal pipe
- (13) 263 lin. ft. 15-in. vitrified pipe;
- (14) 180 each, removing trees (size 1);
- (15) 110 each, removing trees (size 2);
- (16) 22 each, removing trees (size 3);
- (17) 167 sq. yds. paved gutter;
- (18) 13 cu. yds. rubble masonry;
- (19) 145 cu. yds. concrete removed from existing pavement;
- (20) 2500 lin. ft. laminated timber guard rail;
- (21) 20 each, culvert markers;
- (22) 2 miles new property fences;
- (23) 50 each, gates complete in place;
- (24) 54 status finisings; roadway;
- (25) 24 each, monuments complete in place.

The state will furnish corrugated metal pipe, spillway assemblies and cast steel frames and covers for drop inlets.

ORANGE COUNTY, Cal.—As previously reported, bids will be received May 13 by State Highway Commission to construct bridge across Santa Ana River about 2 miles north of Newport Beach, consisting of three 60-ft. 3-in. steel truss spans to be replaced with concrete girder spans and widening the reinforced concrete girder approach spans consisting of two 21-ft. 0-in. spans, eight 30-ft. 0-in. spans and two 21-ft. 0-in. spans.

- (1) 1 only, detour bridge, complete;
- (2) 550 cu. yds. structure excavation;
- (3) 2500 cu. yds. roadway embankment (detour);
- (4) 1260 tons crushed gravel or stone (detour surfacing);
- (5) 200 lbs. heavy fuel oil (detour);
- (6) 3 existing steel truss spans to be removed;
- (7) 300 cu. yds. concrete in existing bridge to be removed;
- (8) 1280 lin. ft. 16-in. reinf. concrete piles;
- (9) 950 lin. ft. 18-in. reinf. concrete piles;
- (10) 160 cu. yds. class A Portland cement concrete (placed by tremie);
- (11) 1600 cu. yds. class A Portland cement concrete (structure);
- (12) 38 cu. yds. class E Portland cement concrete;
- (13) 224,000 lbs. reinf. steel;
- (14) 5400 lbs. cast steel rockers and bearings;
- (15) 615 lbs. bronze expansion plates;
- (16) 420 tons asphalt concrete;
- (17) 1 lot miscellaneous items of work

EUREKA, Humboldt Co., Cal.—As previously reported, bids will be received May 12, 2 P. M., by Fred M. Kay, county clerk, to construct a reinforced concrete bridge over the No Fork of the Mattole river at Petrolia. Structure will be 88 ft. in length over all. Project involves:

- (a) 53 yds. class B concrete;
- (b) 111 yds. class A concrete.

Specifications obtainable from F. E. Kelly, county surveyor. Certified check 5% required with bid.

EUREKA, Humboldt Co., Cal.—As previously reported, bids will be received May 12, 2 P. M., by Fred M. Kay, county clerk, to construct a reinforced concrete bridge across Eaton Slough near Ferndale. Will be 90 ft. in length. Project involves 145 yds. class A concrete.

Specifications obtainable from F. E. Kelly, county surveyor. Certified check 5% required with bid.

REDWOOD CITY, San Mateo Co., Cal.—See "Streets and Highways." In this issue. Contract awarded to W. O. Tyson, Redwood City, to construct bridge and improve Main St.

SAN DIEGO COUNTY, Cal.—David Johns, Santa Monica, at \$138,678 submitted low bid April 22 to State Highway Commission to construct a reinforced concrete girder bridge across San Dieguito River about one mile north of Del Mar, consisting of eleven 5-ft. spans on concrete piers and abutments with wing walls, all on pile foundations. Following is a complete list of bids:

David Johns, Santa Monica.....	\$138,678
J. F. Knapp, Oakland.....	139,600
Merritt-Chapman & Scott, San Pedro.....	139,900
Bodenhammer Const. Co., Oakland.....	140,657
H. M. Baruch Corp., L. A.....	143,757
Macco Const. Co., Clearwater.....	147,573
Oberg Bros., Los Angeles.....	147,842
D. E. Metzger, Los Angeles.....	151,910
E. R. Bishop, Long Beach.....	154,373
R. H. Travers, Los Angeles.....	157,452
Lynch-Cannon Eng. Co., L. A.....	157,625
Owl Truck Co., Inc., Compton.....	164,844
Robinson-Roberts Co., L. A.....	166,859
B. B. Boyd, Los Angeles.....	173,064

PLACER COUNTY, Cal.—George J. Ulrich Const. Co., Modesto, at \$18,973 submitted low bid April 22 to State Highway Commission to construct a reinforced conc. girder bridge across Conn Creek, 3.6 miles north of Lincoln, consisting of six 34-ft. 6-in. spans on reinforced concrete pile bents. Following is a complete list of bids:

Ulrich Const. Co., Modesto.....	\$18,973
Holdener Const. Co., Sacramento.....	20,006
A. T. Howe, Santa Rosa.....	21,193
P. F. Bender, North Sacto.....	21,405

PALO ALTO, Santa Clara Co., Cal.—City Council's Committee on Public Works and the Board of Public Works acting jointly, have approved general plans for the proposed subway at the Embarcadero Road. The plans were prepared by engineers of the Southern Pacific Railroad in collaboration with the city engineer's office. Plans call for a structure with four vehicular lanes, two 12-ft. sidewalks, and a 40-ft. bridge over Alma St. The cost is estimated at slightly below \$140,000.

with the city bearing about two-thirds of the expense, the remainder, \$16,800, to be assumed by the railroad company. J. F. Byxbee is city engineer of Palo Alto.

MADERA COUNTY, Cal.—Thermotte Const. Co., 530 Stockton Ave., San Jose, at \$30,731 awarded contract by State Highway Commission to construct a reinforced concrete girder bridge across Berenda Slough, consisting of eighteen 36-ft. 6-in. spans on concrete pile bents. Complete list of unit bids published in issue of Mar. 21.

PETALUMA, Sonoma Co., Calif.—City council is considering early construction of a bridge over the river in D street; estimated cost \$75,000, of which \$15,000 is available from the river and waterfront fund.

DREDGING, HARBOR WORKS & EXCAVATIONS

LONG BEACH, Cal.—Specifications for dredging 400,000 cu. yds. material in the Long Beach Outer Harbor, are being completed by the Harbor Engineer, Maj. R. G. McGlone. The material will be dredged from the turning basin for use at Piers A and B. Bids will be called within the next few weeks.

SAN FRANCISCO.—Public Works Officer, 12th Naval District, 100 Harrison St., will ask bids in the immediate future for dredging at Goat Island, San Francisco Bay.

OAKLAND, Alameda Co., Cal.—Until 4:30 P. M., April 20, bids will be received by G. B. Hegardt, secy., City Port Commission, 424 Oakland Bank Bldg., to furnish and drive green timber piles for foundation for warehouse AA, Outer Harbor Terminal. Estimated cost, \$2500. Project involves 6200 linear feet of piling. Certified check for 10% of bid required. Bonds obtainable on deposit of \$5. Bond in full amount required of successful bidder.

SAN FRANCISCO.—Bids will be asked shortly by the U. S. Engineer Office, Customhouse, for removing 39,800 cubic yards of rock from San Francisco Bay.

SEWARD, Alaska.—Until April 29, bids will be received by U. S. Engineer Office, Seattle, for dredging of refuge at Seward, involving 126,000 cu. yds. silt and sand. Specifications obtainable from above.

STOCKTON, San Joaquin Co., Cal.—Hydraulic Dredging Co., Ltd., Central Bank Bldg., Oakland, at \$16 cu. yd. submitted low bid to city council for dredging 188,000 cu. yds. of material from city-owned property on the south side of Stockton Channel in the Boggs Tract. San Francisco Bridge Co. only other bidder at \$17½ cu. yd. Taken under advisement.

The company plans construction of a railroad from Hollister in San Benito County to San Juan and from there to Chittenden, Santa Cruz county, in addition to the construction of telegraph lines. The distance is 30 miles. Directors are: F. L. Brown, H. C. Stratton and Jesse E. Liffenthal, all of San Francisco and C. E. Ladd of Portland, Ore., and Gustav Baumann and H. P. Wilson of New York City.

FIRE EQUIPMENT

OAKLAND, Cal.—Until April 30, 12 noon, bids will be received by Frank C. Merritt, city clerk, for crossing improvement at East 19th st., over the right of way of the Southern Pacific between 46th and 47th aves. Estimated cost \$5,250. Project involves:
(1) 240 2½ 90-lb. guard rails 3 21 G.T.
(2) 24 90-lb. insulated gauge rods;
(3) 60 50-lb. separators;
(4) 1 C. S. 13 sign;
(5) 2 wig-wags complete with 2 train indicators;
(6) 8 seam-weld joints;
(7) 1,170 sq. ft. 6-in. asphaltic pavement.

Specifications on file in office of city clerk. Walter N. Frickstad, city engineer.

RESERVOIRS AND DAMS

MODESTO, Stanislaus Co., Cal.—City voters reject the proposal to dam the Tuolumne river and create a recreation center for the municipality. The proposal lost by 96 votes.

SEATTLE, Wash.—Until May 1, 10 A. M., bids will be received by W. H. Roberge, secretary, Board of Public Works to construct concrete lined reservoir and concrete foundations for two steel tanks, in vicinity of Sixth Avenue on south side and Cloverdale St. Project involves a 75,000,000 gal. reservoir and two standpipes, each with a capacity of 1,000,000 gallons. Certified check or bond of 5% payable to City Comptroller required with bid. Specifications obtainable from secretary on deposit of \$10, returnable.

BOULDER CITY, Nev.—Crucible Steel Co. of America awarded contract by Six Companies, Inc., contractor for the Hoover Dam, to supply all drill steel used on the dam.

CLE ELUM, Wash.—Plans and specifications for the Cle Elum Dam are being completed by the U. S. Bureau of Reclamation under the direction of S. O. Harper, Acting Chief Engineer, Bureau of Reclamation, Denver, Colorado. Copies will be ready for prospective bidders about May 20. The proposed dam will be an earth-gravel structure, 125 ft. in

height, and containing about 450,000 cu. yds. material. The estimated cost of the project is \$3,500,000.

PIPE LINES, WELLS, ETC.

SAN FRANCISCO—Until May 6, 2:30 P. M., bids will be received by Board of Public Works to construct a pipe line across the San Joaquin Valley to serve as an emergency supply line from Hetch Hetchy via the Altamont Pass. The line will be about 46½ miles in length and will cost between \$7,000,000 and \$7,500,000, exclusive of the Red Mountain siphon, to cost and additional \$250,000.

Bids will be received for the project in three sections, designated A, B and C. Separate contracts may be awarded for individual sections or any two sections, or all. Specifications obtainable from the Bureau of Engineering, 3rd floor, City Hall, on deposit of \$50. Complete list of the quantities of materials involved on this project will be listed in tomorrow's issue.

LOS ANGELES, Cal.—Santa Fe Pipe & Supply Co. submitted low bid to City purchasing agent, Thomas Oughton, at \$41.80 per hundred ft. for furnishing wrought steel pipe for the department of water and power, in accordance with specifications No. 2422, involving approximately 7500 lin. ft. 4-in. standard black asphaltum dipped, lap welded, wrought steel pipe.

LOS ANGELES, Cal.—California Pipe & Supply Co., Los Angeles, at \$6.672 submitted low bid to City Purchasing Agent to furnish asphaltum dipped, seamless or lap welded steel pipe for the department of water and power under Specification No. 2423, involving approximately 3900 lin. ft. of 8-in. nominal diameter pipe.

LOS ANGELES, Cal.—Western Pipe & Steel Co. awarded contract by city purchasing agent, for furnishing welded steel pipe under Specification No. 2418. The items are:

- (1) 5615 lin. ft. 24-in. laying lengths, 40 in. inside diameter, welded steel water pipe; minimum wall thickness ¾ in.;
- (2) same as item one, except that end sections shall be B & S.

The bid was: (1) \$5.45; (2) \$6.35.

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Cal.—City council sets May 12 as the date to vote bonds of \$3,850,000 of which \$1,300,000 is to finance construction of sanitary and storm sewers in various sections of the city. Walter N. Erickstad, city engineer.

MODESTO, Stanislaus Co., Cal.—City voters reject proposal submitted at recent municipal election to authorize adoption of ordinance appropriating \$25,000 annually to finance construction of storm sewers. The proposal was rejected by a vote of 1369 for and 1355 against.

OAKLAND, Cal.—City council sets May 12 as the date to vote bonds of \$300,000 to finance park and recreation improvements and \$500,000 for improvements at Lake Merritt for a recreation center.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—See "Government Work and Supplies", this issue. Bids wanted for construction at National Guard Training Camp, including extensions to sewer, water and electric systems.

LAS VEGAS, Nev.—An election will be held May 5 to vote on a \$160,000 bond issue to provide funds for the construction of a sewerage system and a disposal plant. Viola Burns, City Clerk.

GONZALES, Monterey Co., Cal.—Geo. DeGolyer, Federal Telegraph Bldg., Oakland, at \$27,736 using Dorr equipment, awarded contract by Gonzales Sanitary District, to construct sewer mains, outfall and separate sludge digestion plant, involving in the main:

- 600 lin. feet 8-in. sewer;
- 2400 lin. ft. 10-in. sewer;
- 16,700 lin. ft. 12-in. sewer;
- 21 manholes;
- 450 cu. yds. excavation for treatment plant structures;
- 125 cu. yds. concrete;
- 11,000 lbs. reinf. steel;
- clarifier equipment, sludge pump, pump house, etc.

Following is a complete list of bids received:

- (1) Using Dorr Equipment;
 - (2) Using Hardinge Equipment.
- Geo. DeGolyer, Oakland, (a) \$27,736; (b) \$28,186
- Oakland Sewer Construction Co., (a) \$28,588; (b) \$29,288.
- W. T. Tobin, Oakland, (a) \$31,680; (b) \$32,408.
- O. U. Miracle, San Jose, (a) \$31,791; (b) \$32,395.
- C. B. Cowden, San Francisco, (a) \$34,980; (b) \$34,980.
- R. H. Crumney, San Jose, (a) \$35,215; (b) \$35,842.
- Robert McNair, Oakland, (a) \$35,299; (b) \$35,966.
- P. & H. Construction Co., San Jose, (a) \$39,590; (b) \$39,590.

GONZALES, Monterey Co., Cal.—Oakland Sewer Construction Co., Lakeside Hotel, Oakland, at \$15,688 awarded contract by Gonzales Sanitary District to construct lateral sewers involving in the main:

- 5,740 lin. ft. 8-in. sewer;
- 11,802 lin. ft. 6-in. sewer;
- 516 yds. branches;
- 55 manholes;
- 5 lampholes.

- Complete list of bids follows:
- Oakland Sewer Const. Co. \$15,688
- Geo. DeGolyer, Oakland 15,395
- R. H. Crumney, San Jose 17,496
- P. & H. Const. Co., San Jose 19,200
- C. B. Cowden, San Francisco 19,369
- W. J. Tobin, Oakland 19,624
- Robt. McNair, Oakland 21,830
- O. U. Miracle, San Jose 27,387

SAN FRANCISCO—Louis J. Cohn, 1 De Haro st., at \$13,673 awarded contract by Board of Public Works to construct additions to the Baker and Pierce Street Outfall Sewers, \$4,000; Baker Street sewer \$9,673.

FOLSOM, Sacramento Co., Cal.—Water Works Supply Co., 501 Howard St., San Francisco, at \$60,000 awarded contract by State Department of Public Works to install sewage aerators at the Folsom State Prison.

CONCORD, Contra Costa Co., Cal.—Bids will be asked shortly by city council to furnish and install sewage pumping system; estimated cost \$2500.

SUNNYVALE, Santa Clara Co., Cal.—J. C. Kennedy, engineer, Cal. Bldg., San Francisco, is addressing civic organizations in this vicinity pointing out the need of a sewage disposal plant south of the proposed Naval Dirigible Base site at Sunnyvale, to serve a sanitary district to comprise Sunnyvale and nearby communities including possibly Los Gatos and Saratoga.

STOCKTON, San Joaquin Co., Cal.—Until April 27, 5 p. m., bids will be received by B. L. Trahern, city clerk, to construct storm water sewers in portions of Edison, San Joaquin and Central streets. Project involves:

- (1) 183 lin. ft. 5-in. dia. vit. clay or precast conc. sewer pipe;
- (2) 52 lin. ft. 8-in. vit. clay or precast concrete sewer pipe (encased in concrete);
- (3) 101 lin. ft. 10-in. vit. clay or precast concrete sewer pipe including 2-(10"x3") "Y" branches and 2-(8-in. dia.) curves.
- (4) 333 lin. ft. 12-in. vitrified clay or precast concrete sewer pipe.
- (5) 751 lin. ft. 18-in. vitrified clay or precast concrete sewer pipe including 3-(18"x3") "Y" branches and 3-(8-in. dia.) curves.
- (6) 78 lin. ft. 18-in. vitrified clay or precast concrete sewer pipe (encased in concrete).
- (7) 101 lin. ft. No. 10 gauge double dipped Armo Corrugated Galvanized Iron pipe (18-in. dia.).
- (8) 195 lin. ft. 21-in. vitrified clay pipe or precast concrete sewer pipe.
- (9) 5 Catchbasins complete.
- (10) 1 5-ft. trick manhole complete.
- (11) 1 existing manholes to be deepened.

Bidders may bid on either vitrified clay sewer pipe or precast concrete sewer pipe but shall not base their bid upon any sewer pipe having an internal diameter smaller than that herein specified.

Bidders bidding on catchbasins may bid on either brick catchbasins or concrete catchbasins.

Plans obtainable from Lyle Payton, city engineer.

REDWOOD CITY, San Mateo Co., Cal.—San Mateo County Boy Scouts organization has requested the county supervisors to provide proper sewer facilities for Memorial Park near Pescadero. County Engineer Jas. S. James instructed to prepare estimates of cost.

STOCKTON, San Joaquin Co., Cal.—J. A. Fazio, 402 Castro St., Oakland, at \$3,379, machine made, awarded contract by county supervisors to construct sanitary sewer at county fair grounds, involving: 1188 ft. 12-in. cast iron pipe; 18 12-in. wyes; 20 ft. 4-in. vitrified pipe; 10 4-in. wyes; 10 4-in. bends; 5 manholes; 1 flush tank; 425 ft. 3-in. galv. pipe; 2 3-in. gate valves; 2 concrete valve boxes. Complete list of bids follows: (a) hand labor; (b) machine:

- J. A. Fazio, Oakland (a) \$3,579; (b) \$3,279.
- Ed. L. Gnekow, Stockton, (a) \$3,588; (b) \$3,518.
- R. H. Downer, Richmond, (a) \$3,876; (b) \$2,576.
- F. L. Earr, San Francisco (a) \$3,914; (b) \$3,564.
- E. H. Burns, Stockton, (a) \$3,960; (b) \$2,600.
- Martin Murphy, Oakland, (a) \$3,990; (b) \$3,720.
- F. E. Goodell, (a) \$4,241; (b) \$4,091.
- John Hochman, Stockton (a) \$4,250; (b) \$3,970.
- Geo. McGaw (a) \$4,450; (b) \$4,400.
- Miller-Hays, Stockton (a) \$4,626; (b) \$4,296.
- Brandt Bros., Stockton, (a) \$4,850; (b) \$4,645.

GONZALES, Monterey Co., Cal.—See separate unit bid listing in this issue covering construction of sewer mains, outfall and separate sludge disposal plant for Gonzales Sanitary District. Burns-McDonnell-Smith Engineering Co., Los Angeles.

LOS GATOS, Santa Clara Co., Cal.—H. B. Fisher, engineer, 74 N-First St., San Jose, making surveys for sewer extensions in eastern section of

Los Gatos. A report will be submitted to the city trustees shortly.

MENLO PARK, San Mateo Co., Cal.—Election will be held May 2 in Menlo Park Sanitary District to vote bonds of \$2500 to finance extension to sewer system. Trustees of the district are: John B. Glutz, Lawrence H. Cook and Richard A. Fanto.

PETALUMA, Sonoma Co., Calif.—City council is considering the construction of a sewer main along the river bank, including a pumping plant.

BERKELEY, Alameda Co., Cal.—Florence E. Turner, city clerk, instructed to advertise for bids to construct sewer in Cragmont Ave. bet. Euclid Ave. and Regal Road; estimated cost, \$3,500. Harry Goodridge, city engineer. Plans on file in office of clerk.

WATER WORKS

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—See "Government Work and Supplies," this issue. Bids wanted for construction at National Guard Training Camp, including extensions to sewer, water and electric systems.

EXETER, Tulare Co., Cal.—City sells \$24,000 bond issue to finance improvements to water system. Construction involves 200,000 gallon storage tank, well drilling, installation of a deep well and booster pumps and extensions to mains. I. H. Althouse, engineer, Porterville.

LOS ANGELES, Cal.—Until 2 P. M., May 4, bids will be received by the County Supervisors for constructing shafts and tunnels in Los Angeles County Water Works District No. 1, Picture City, in accordance with plans and specifications prepared by the County Mechanical Department a copy of which is on file at the office of Mame E. Beatty, 303 Hall of Records, County Clerk.

LAS VEGAS, Nev.—Wheelwright Co., Ogden, Utah, submitted the low bid to the U. S. Bureau of Reclamation, Las Vegas, at \$35,452.70, for the construction of a 10-in. and 12-in. high pressure water supply pipe line for Boulder City, Nevada, water system, Boulder Canyon Project, Arizona-California-Nevada. The work is located near Las Vegas, Nev., on the Los Angeles and Salt Lake Railroad, Union Pacific System. The principal items of work and the advance estimated quantities involved are approximately as follows:

- (1) 19,000 cu. yds. of all classes of trench excavation;
- (2) 15,000 cu. yds. of trench backfill;
- (3) 35,000 lin. ft. of pipe laying (10-in. and 12-in. diameters);
- (4) 45 cu. yds. of reinf. concrete;
- (5) 1700 sq. yds. of rock protection;
- (6) 150 cu. yds. of dry rock wall.

The other bids were:
G. W. Kemper, Los Angeles, \$47,847.52
Lee R. Weber, Santa Monica 64,981.50
Macco Const. Co., Clearwater 90,134.00
Butterfield Const. Co., San Francisco, \$1,309.00

Thos. Haverty Co., L. A., \$3,659.20
Delta Const. Co., L. A., \$118,387.00

OAKLAND, Cal.—Paradon Mfg. Co., (C. C. LoFrest, manufacturers agent, 479 Snodgrass Bldg., San Francisco), at \$1490 submitted lowest bid to John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to furnish one Manual Control Vacuum Feed Chlorinator.

Only other bid was submitted by Wallace & Tiernan, San Francisco, at \$1939. Bids held under advisement.

SARANCO, Contra Costa Co., Cal.—Local residents propose to organize the Saranco Water District and construct water distributing system to connect up with the East Bay Municipal District lines. A distributing system costing \$14,000 is contemplated.

SAN PABLO, Contra Costa Co., Cal.—Property owners propose to organize a water district to vote bonds to finance construction of a distributing system to connect up with the East Bay Municipal Utility District lines. E. V. Hanna, chief engineer of the East Bay district, is conferring with promoters of the project. R. Schwarz, Wilbur Skow and E. P. Howard are making a survey of property owners with a view to securing their sentiment on the project.

MARTINEZ, Contra Costa Co., Cal.—An election will be held April 30 to vote on the formation of the proposed Lafayette County Water District, which, after formation, proposes to vote bonds to finance construction of a water distributing system. J. H. Wells is county clerk.

KLAMATH FALLS, Oregon.—Until May 9, 2 P. M., under Specifications No. 520-D, bids will be received by U. S. Bureau of Reclamation, to construct Dry Lake Pumping Plant No. 2, discharge pipe line and appurtenant structures in the Longview Valley Division, Klamath Project, located about 6 miles south and 24 miles east of Klamath Falls, and approximately 14 miles southeast of Dairy, Ore., the nearest railroad point. The work consists of the construction of a concrete pump inlet structure, timber and corrugated iron pump house, installation of pump, motor and accessories, concrete outlet structure and pipe piers, erection of steel pipe discharge line and channel and trench excavation incidental thereto, involving:
1400 cu. yds. channel and trench excavation;

33 cu. yds. reinforced concrete;
6550 lbs. install machinery and trash rack;

622 lin. ft. erect steel pipe line;
pump house 8x12x9-ft.

Specifications obtainable from above office.

HAYWARD, Alameda Co., Calif.—Property owners in the Kelly Hill, Fairview and East Avenue communities propose to form water district to construct distributing system, purchasing water from the East Bay Municipal Utility District. Construction of two reservoirs in addition to pipe lines is included in the contemplated improvements.

SANTA BARBARA, Cal.—An election to vote a \$2,100,000 water bond issue will be held June 1. The funds will be expended for a rock fill dam at Gibraltar, increasing Gibraltar reservoir capacity from 14,000 to 40,000 acre feet, costing \$1,975,000; reservoirs at El Cielito and La Meda with pipe lines, etc., \$100,000; trunk mains, \$50,000; and underground water development, \$100,000. The difference between the costs outlined and the bond issue will be raised through earnings. Victor E. Fontaine, S. P. Noyes, superintendent, Quinton-Cole & Hill, and Leeds & Barnard are consulting engineers.

FONTANA, San Bernardino Co., Cal.—Until May 4, bids will be received by the Fontana Mutual Water Co., Fontana, for one deep well turbine, of 1400 G. P. M., for 665-ft. lift, to be installed in a 20-in. well. P. E. Hasbrouck, manager.

SANTA ROSA, Sonoma Co., Cal.—City Engineer A. P. Noyes completes specifications to install 700-ft. 6-inch

and 8-inch water mains in Proctor Terrace in addition to the installation of two fire hydrants. Pipe estimated to cost \$12,500, will be purchased, exclusive of that in storage at the municipal warehouse.

PLAYGROUNDS & PARKS

SAN MATEO, San Mateo Co., Cal.—City council has approved specifications for planting 857 trees in Baywood Park at a cost of \$9,248, including five year's maintenance.

PACIFIC GROVE, Monterey Co., Cal.—Until May 7, 7:30 P. M., bids will be received by Elgin C. Hurlbert, city clerk, (3247) to improve Evans Ave. bet. Eardley and Central Aves., Dewey Ave., bet. Evans and Central Aves., First St. bet. Lighthouse Ave. and Central Ave. and Second St. bet. Lighthouse Ave. and Evans Ave. Project involves:

- (1) 12,000 sq. ft. 2-in. asphalt surface on 3-in. rock base;
- (2) 29,000 sq. ft. 2-in. asphalt surface on existing base;
- (3) 1,500 lin. ft. concrete curb;
- (4) 1,500 lin. ft. concrete gutter; approach;
- (5) 600 sq. ft. concrete driveways;
- (6) 300 lin. ft. 4-in. vitrified clay sewer laterals;
- (7) 50 sewer taps.

1911 Act, Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. E. Eames, city engineer.

PACIFIC GROVE, Monterey Co., Cal.—Until May 7, 7:30 P. M., bids will be received by Elgin C. Hurlbert, city clerk, (3247) to improve Ocean View Ave., bet. Eardley Ave. and Second St. Project involves:

- (1) 22,000 sq. ft. 4-in. asphalt paving;
- (2) 21,000 sq. ft. 2-in. asphalt surface;
- (3) 1,000 lin. ft. header curb;
- (4) 800 lin. ft. concrete curb;
- (5) 800 lin. ft. concrete gutter;
- (6) 2 catchbasins;
- (7) 80 ft. 10-in. corrug. iron pipe;
- (8) 30 ft. 10-in. vitrified pipe;
- (9) 10 cu. yds. concrete;
- (10) 100 ft. 4-in. vitrified clay lateral sewer;
- (11) 10 sewer taps.

1911 Act, Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. E. Eames, city engineer.

QUINCY, Plumas Co., Cal.—Until May 4, 10 a. m., bids will be received by Wm. F. Werner, county clerk, for 20,800 sq. ft. 6-in. cement concrete pavement, including grading. Specifications on file in office of clerk and obtainable from A. J. Wagon, county surveyor, on deposit of \$10, returnable.

HANFORD, Kings Co., Cal. County Surveyor Roy May preparing specifications to reconstruct 12-miles of the county highway system. Plans will provide for reconstruction from the north terminus of Doty street westerly 1 1/4 miles to the Hall corner, thence north 4 miles and west 1/2 mile and also south 6 miles from the state highway at the east city limits. Specifications will call for new top, and new construction to bring the present pavement to 18 feet in width. The county has \$110,000 available for the work.

YUBA CITY, Sutter Co., Cal.—Until May 4, 7:30 P. M., bids will be received by Beatrice Johnson, city clerk, to widen Plumas street between Reeves and Forbes Aves. Est. cost, \$22,000. Acq. and Imp. Dist. No. 1. Work under Acq. and Imp. Dist. Act 1925. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

CHURCHILL COUNTY, Nev.—Until April 29, 2:30 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, for grading, construction of structures and placing surfacing material between 5 miles south of Fallon and Salt Wells 10.14 miles in length.

Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco. Certified check \$5 required with bid.

OAKLAND, Calif.—Hutchinson Co., 1450 Harrison St., granted permit by city council to improve portion of Bennett Place between Mountain Blvd. and Jordan Road, and a portion of Guide Street. Oil macadam pavement.

OAKLAND, Calif.—Hutchinson Co., 1450 Harrison St., Oakland, at \$1,177 submitted only bid to the city council to improve portions of 88th Ave. bet. Hillside St. and Clive St., involving grading, curbs and gutters, paving, sewer with appurtenances. Etd held under advisement.

SANTA ROSA, Sonoma Co., Cal.—Highway Builders, Ltd., Redhill Ave., San Anselmo, at \$2,234.40 awarded contract by county supervisors for asphaltic oil surfacing on 6.9 miles of road in the Fourth Supervisor Dist., involving: 420 barrels light oil, 140 tons heavy oil, 1750 tons rock and screenings.

SANTA ROSA, Sonoma Co., Cal.—George French, Jr., Stockton, at \$7,381 awarded contract by County Supervisors for asphaltic oil surfacing on 7.4 miles of road in the Second Supervisorial District, involving: 444 barrels light oil, 148 tons heavy oil, 1110 tons rock, 750 tons screenings.

WILLOW GLEN, Santa Clara Co., Cal.—Town trustees declare intention to improve Willow St., Acq. and Imp. District No. 8, involving:

- (1) 120,000 sq. ft. 5½-in. asphalt. conc. pavement;
 - (2) 490 lin. ft. 12-in. P.C. conc. pipe;
 - (3) 260 lin. ft. 18-in. do;
 - (4) 48 lin. ft. 21-in. do;
 - (5) 225 lin. ft. 24-in. do;
 - (6) 355 lin. ft. 27-in. do;
 - (7) 588 lin. ft. 30-in. do;
 - (8) 2,004 lin. ft. 36-in. do;
 - (9) 63 lin. ft. 42-in. do;
 - (10) 19 inlets;
 - (11) 19 manholes;
 - (12) 7,000 lin. ft. P.C. concrete curb;
 - (13) 14,000 sq. ft. P. C. conc. gutter;
 - (14) 35,000 sq. ft. P. C. conc. sidewalk.
- Acq. and Imp. Act 1925. Hearing May 4. Dana Thomas, city clerk. H. N. Bishop, city engineer, Bank of Italy Bldg., San Jose.

ELKO COUNTY, Nev.—A. D. Drumm, Jr., Fallon, Nevada, at \$158,791.02 awarded contract by State Highway Commission for grading, constructing structures, placing surfacing material and furnishing asphaltic fuel oil, applying and mixing it with a crushed rock or crushed gravel surface between the South Elko County Line and Wendover, a length of 53.54 miles. Complete list of bids follows:

A. D. Drumm, Jr., \$158,791.
Dodge Bros., Inc., \$164,128.
Jack Casson, Hayward, Cal., \$176,003.
Irving L. Ryder, San Jose, \$195,890.
Robinson Construction Company, Twin Falls, \$226,524.
Engineer's estimate, \$204,269.94.

CLARK COUNTY, Nevada—Triangle Rock and Gravel Co., San Bernardino, at \$26,839.38 awarded contract by State Highway Commission for furnishing asphaltic fuel oil, applying and mixing it with a crushed rock or crushed gravel surface on a

portion of the State Highway system in Clark County from the California-Nevada State Line to Jean, a length of 12.62 miles. Complete list of bids follows:

U. D. Drumm, Jr., \$21,966.02.
A. B. Lee, San Leandro, \$23,518.22.
F. J. Annadich, Los Angeles, \$24,192.55.
Basalt Rock Company, Napa, \$25,388.08.
General Construction Company, Las Vegas, \$25,761.54.
Triangle Rock & Gravel Company, San Bernardino, \$26,839.38.
Engineers estimate, \$32,221.92.

ELKO COUNTY, Nevada—Gibbons and Reed, Burbank, Calif., at \$118,723.45 awarded contract by State Highway Commission for grading, constructing structures and placing surfacing material between Death and Wells, a distance of 15.53 miles. Complete list of bids follows:

Gibbons & Reed, Burbank	\$118,723.45
Dodge Eros, Inc.	127,362
Utah Const. Co.	129,314
Nevada Contr. Co.	134,867
Nevada Rock & Sand Co.	135,907
Robinson Const. Co.	140,432
W. K. McMillan	161,637
Engineer's estimate	180,053

KERN COUNTY, Cal.—Square Oil Co., 916 Adobe St., Los Angeles, at \$5,229 submitted low bid to District Engineer, State Highway Commission, Bakersfield, for treating 31.2 miles of highway with heavy fuel oil as a dust palliative, between Mojave and San Bernardino county line, involving 4,350 lbs. Complete list of bids follows:

Square Oil Co., \$1.20 bbl;	total \$5229.
Pac. Tank Lines, Inc., \$1.35 bbl;	total \$5872.50.
Fred W. Nighbert, \$1.43 bbl;	total \$6220.50.
U. B. Lee, San Leandro, \$1.47 bbl;	total \$6394.50.
Basalt Rock Co., Napa, \$1.47 bbl;	total, \$6294.50.
Gilmore Oil Co., \$1.60 bbl;	total, \$6360.
L. C. Pulley, \$1.67 bbl;	total \$7264.50.
Cal. Road Oil Service Co., Ltd., \$1.79 bbl;	total, \$7796.50.

MERCED, Merced Co., Cal.—Associated Oil Co., at 49c per bbl, awarded contract by county supervisors to furnish between 15,000 and 30,000 barrels of road oil.

PACIFIC GROVE, Monterey Co., Cal.—Until May 7, 7:30 p. m. bids will be received by Elgin C. Hurlbert city clerk, to construct combined cement concrete retaining wall and curbs and gutter in west side of Twelfth street between Ocean View and Central aves. Certified check 10% payable to city required with bid. Specifications on file in office of clerk.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUtter 1684).

R-3545-S WORKING PARTNER, for outside sales promotion of ornamental metal work. Prefer man with architectural experience and sales ability who is prepared to finance self during trial period. Business is established. Location, San Francisco.
R-3544-S GRADUATE ENGINEER, age 44, with California registration and electrical engineering experience, desires to connect with an established engineering firm in the capacity of partner. Has some capital to invest where hard work and application will pay dividends. Address communications in care of this office.
R-3541-S CIVIL ENGINEER, graduate, about 35 years old, American, with experience in bridge building, caisson, pier and air-lock work and fore shore protection. Prefer single man who has worked for contractor. Location, South China. Salary 1000 Shanghai taels per month on a four-year contract, providing first class passage both ways and six months leave on full pay on completion. Apply by letter with detail of experience for prompt action. Employer's representative in Vancouver, B. C.
R-3543-S MECHANICAL DRAFTSMAN, experienced on auto trailer drawings, for layout and details. Only this experience considered. Salary open. Location, San Francisco.

R-3533-S ENGINEER, preferably between 30 and 35 years of age, with experience on highway work and general construction such as bridges, culverts, grade separations, etc., for work with a contractor. Must be qualified for both field and office. Salary depends upon experience. Headquarters, San Francisco or Oakland.

R-3269-S ENGINEER, preferably E. E. or M. E. graduate, not over 30, single, good personality and considerable mechanical ability, for service work and testing of hydraulic machinery. Must have experience in hydro-electric plant construction or operation. Salary about \$175 per mo. Apply by letter with photo, Headquarters, San Francisco.

BRIDGE TOLL BILL BEFORE LEGISLATURE

A bill which, if enacted, will cost the users of the Carquinez Bridge approximately \$40,000,000, based on present tolls, in twenty-five years, is before the legislature.

Introduced by Assemblyman Robert Easley, Antioch, the measure would permit the board of supervisors of Contra Costa County to extend for twenty-five years the franchise under which the Carquinez Bridge is operated between Vallejo and Crockett.

According to Easley, the measure is an enabling act, which would allow the supervisors to extend franchises in similar cases. Actually, however, it applies to the Carquinez span.

The present franchise expires in 1947. Twenty-five years more, to 1972, it is estimated, would result in \$40,000,000 additional tolls to be paid by automobile drivers.

"Other bridges in the state of California operate under a fifty-year franchise act approved by the legislature of 1923," Easley said. "We believe that, because the Carquinez Bridge was constructed before that date, that it should not have a term of life of less years." At the conclusion of the

present franchise the title of the bridge would be vested in Contra Costa County.

Four years ago a similar measure extending the franchise for ten years was vetoed by Governor C. C. Young.

BETHELEHEM STEEL ACQUIRES BRIDGE

Control of the Longview Bridge, over the Columbia River between the states of Oregon and Washington, passed to the Bethlehem Steel through acquisition of practically entire issue of 9,999 shares of no common stock outstanding, according to Engineering News-Record. Holders of first mortgage 6 1/2 per cent sinking fund gold bonds, who were notified that the bridge company was unable to meet the semi-annual interest payment on the bonds due April 1, have been asked to defer interest on the next four coupons payable April 1, 1931, to Oct. 1, 1932, and waiver of the sinking fund until April 1935. In return for these concessions the holders of each \$1,000 bond will receive \$130 of 4 1/2-year secured mortgage bonds dated April 1, 1931, and due Oct. 1, 1935, bearing 7 per cent annual interest. They will also receive 7 per cent shares of the outstanding 7 per cent cumulative preferred stock, par value \$100, bearing 7 per cent dividends from March 29, 1930.

Daniel H. Deyoe of the industrial engineering department of the General Electric Company, a director and member of the American Welding Society and a figure for many years identified in electric arc welding activities, died in Sebec, Maine, April 11, at the age of 55. Mr. Deyoe was graduate of Union College Class of 1898, and joined the General Electric organization in the same year. He became affiliated with the industrial engineering department in 1906, and became active in arc welding problems, and has been an outstanding figure in that field ever since.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"

Storage Systems and "Lyon" Tank Water Heaters.

A Pointer on **P**rinting

Printing matter is not a commodity—it is a necessity, like the salt in our soup. Without printing matter modern business is unthinkable. The more we invest in printer's ink—that is *in the right kind of printing*—the greater the results. Therefore it is of vital interest to select the RIGHT kind of printer. — There are printers AND printers—but few are self-containing in mechanical and creative ability.— Put us on the track, and, like this pointer in suspense, we will bring back the bacon.

TATE LABOR CHIEF DEPLORES WAGE CUTS

James W. Mullen, chief of the division of labor statistics and law enforcement, has issued a statement to employers of labor in California pointing out the dangers of wage reductions.

"A significant number of small and large employers," said Mullen, "have during recent months reported wage increases affecting all their employees. These wage reductions, which range from 5 to 20 per cent, will seriously curtail the reduced purchasing power of consumers which already has been reduced because of part-time employment. The lowering of the standard of living of wage earners through wage cutting is bound to prolong the present depression and make matters worse, not only for the merchants, who depend upon the spending ability of the marginal consumers but also upon the manufacturers who cannot dispose of their products unless the retailers are able to sell these products to the public.

"Should the policy of wage cutting continue, it is bound to lead to organized resistance on the part of the workers affected, who should not be compelled to suffer further deprivations because of a business depression for which they are in no wise responsible," according to Mullen, wage reductions have been recently put into effect by many employers in all parts of the state. Several lumber companies employing from 200 to 500 workers have reported a 10 per cent wage cut. Manufacturers of sashes and doors, some of whom are employing as many as 400 employees, have reported 5 per cent wage reduction.

SUPERVISORS DEMAND WATER CHARGE PROBE

A vote of 13 to 3, the Board of Supervisors voted to demand the appearance of City Engineer M. M. O'Shaughnessy and Nelson A. Eckart, manager of the Municipal Water Department, to appear and explain statements they have made derogatory to the activity of John G. Little, civil engineer, employed by a special committee of the Board of Supervisors concerning a threatened water shortage.

Engineer Little supported O'Shaughnessy and Eckart in their statement that the city was threatened by a water shortage, but recommended that the city temporarily stoppped on the at range tunnel unit and that the Joaquin valley pipe line be diverted to come over Altamont pass and water from the O'Shaughnessy turned in.

was this recommendation that resulted in the statements accredited to O'Shaughnessy and Eckart that the recommendation indicated "gross incompetency."

G. G. BRIDGE BIDS ORDERED RECEIVED

Bids for the construction of the Golden Gate Bridge, a \$35,000,000 project, will be received by the directors of the Golden Gate Bridge and Highway District on June 17, it is announced by W. W. Felt, Jr., secretary of the district.

Plans for the steel superstructure, under Contract No. 1, are now available to bidders. This unit of the project will involve 75,000 tons of structural steel in the main and side spans and 28,000 tons of cables and fastenings.

Plans for the main piers and anchorages of the structure will be available for contractors on May 6. Plans for the remaining units of the work will be ready for contractors on May 13, these units involving the San Francisco and Marin approach spans; Presidio road; Sausalito road; paving of main and approach spans; electric work; cable housing and stairways, filling and grading; toll terminals and cement.

All bids will be opened in the offices of the district in the Financial Center Building, San Francisco.

Plans for the various units of the work are available at the district offices on deposit of \$50 for each set withdrawn.

SACRAMENTO MUNY WATER PLANT PAYS

The municipal water department of Sacramento, made \$52,692.57 profit last year. This represents a saving of more than 5 cents a year on the tax rate.

The \$52,692.57 surplus of revenues over water department expenses went into the general fund to help pay the cost of government in other departments. The water department thus relieved the city's ratepayers of putting up the \$52,692.57 they, otherwise, would have had to pay.

In terms of tax rate, every \$10,490 represents 1 cent of taxes. Five times \$10,490, or 5 cents of tax rate, is less than \$52,692.57 net profit of the water department.

The annual audit shows water department revenues of \$511,801.03 for 1929, and expenses of \$199,738.26. The difference is an operating profit of \$312,062.77.

But this is not the net profit of the water system, as there are many bonds outstanding against it. The city retired \$113,990 worth of bonds and paid out \$145,380.20 in water department bond interest. This totaled \$259,370.20.

Subtracting the total of bond interest and redemptions from the operating profit leaves an actual profit of \$52,692.57.

And that sum meant a 5-cent saving on every hundred dollars of assessed valuation.

PACIFIC NORTHWEST LUMBERMEN ORGANIZE

Formation of the United Export Lumber Association, embracing four export groups and 146 sawmills in Western Washington, Oregon and British Columbia, is announced by L. L. Chipman, head of the export activities of the Long-Bell Lumber Co., at Longview, Wash.

The Douglas Fir Exploitation and Export Company, Seattle; the Dant & Russell Export Co., Portland; the Grays Harbor Exportation Company, Aberdeen, and the Associated Timber Exporters, British Columbia, Ltd., are the affiliated groups.

"The four companies represent and will sell the export output of 146 sawmills," Chipman said. "These mills produce 95 per cent of the export lumber capacity west of the Cascade mountains in British Columbia, Washington and Oregon," Chipman said. "Operation of the United Export Lumber Association began last Monday, and it is the expectation of those interested that this association will be of material benefit to the lumber industry as a whole and it is considered a definite step toward general improvement in the industry."

"This company will in no way deal with the public, but will prescribe the regulations under which the four separate groups will operate. The organization is effected under the Webb-Pomerene act."

Stabilization of lumber prices to foreign buyers is one of the prime duties of the new association.

LONGEST VERTICAL LIFT RAILROAD SPAN

The longest vertical-lift railroad drawspan is said to be the 406-ft. span for the new Missouri River bridge of the Missouri-Kansas-Texas R. R. at Booneville, Mo., which will give a headroom of 57 ft. at low water, says Engineering News-Record. This span, with three 300-ft. fixed spans and one of 247 ft., will be of the through riveted-truss type, with one through girder span of 60 ft., all designed for Cooper's E-70 loading. The lift span will be electrically operated, automatically controlled by safety devices and interlocked with the automatic block signals.

A contract for the design, fabrication and erection of the superstructure has been awarded to the American Bridge Co. Erection will begin this summer and the bridge is to be completed by January 31, 1932. The concrete substructure, built in 1930 by the Kansas City Bridge Co., is founded on rock, and the river piers were sunk by the pneumatic process to a maximum depth of 50 ft. below low water. This work will be in charge of R. M. Stubbs, bridge engineer, under the supervision of P. Ringer, chief engineer, Missouri-Kansas-Texas R. R. The completed structure will cost about \$1,233,000.

A.A. MOVES FOR NEW NATIONAL BUILDING POLICY

A movement to raise the standards of architecture throughout the country was launched by the American Institute of Architects on the closing day of its 64th convention at San Antonio, Texas, April 16.

Broadening a declaration at an earlier session that the carrying out of the Federal building program should be entrusted to private architects, the convention adopted a resolution declaring that this policy should apply to all buildings erected by cities and states and other political divisions. Governor Franklin D. Roosevelt will be asked at once to further this plan in the state of New York, where extensive public works projects are to be executed.

California was singled out as an example for the nation, a telegram sent by the Institute to Governor Rolph commending his "recognition of the well-established principle of public policy that competent private architects should be employed for all municipal, state, and Federal building projects." The telegram was signed by Robert D. Kohn of New York, president of the Institute, and Frank C. Baldwin of Washington, secretary.

The resolution, which came as a climax to three days of discussion, showing that the architectural profession is thoroughly aroused over the tendency to concentrate architectural service in the hands of a single Government bureau, follows:

"The American Institute of Architects affirms that the public buildings and monuments in every community of the nation should proclaim the highest standards of enduring architecture, and that in their design the customs, traditions and local materials of the community in which they are located should be fully recognized.

"The Institute further affirms that such standards of excellence can be achieved only by enlisting the services of the best ability in the architectural profession that is locally available, and that every community is entitled to such service.

"It also affirms that men capable of producing these results are not to be found in subordinate capacities in state, municipal and other civic planning bureaus, and that the concentration of planning and designing buildings in such bureaus must inevitably tend to produce stereotyped, mediocre and uninspiring results.

"The Institute further believes that a national policy of encouraging private business initiative is wise, and that therefore the operation of state, municipal and other bureaus of designing of buildings and monuments is inconsistent with this policy and an invasion into the field of individual professional activity.

"In urging upon state, municipal and civic authorities the desirability of availing themselves of the services of architects in private practice, the Institute stresses the importance of the care which must be taken in their selection. That they should be chosen for reasons of fitness alone, and on the basis of their records, cannot be too strongly emphasized.

"The Institute through its delegates assembled directs Chapters to transmit these views to the proper state, municipal, and other civic authorities in their communities, and to take such other measures in co-operation with related organizations as may be necessary to accomplish the aims expressed herein."

The convention, in a previous resolution, charged that inferior architecture, unfair to the people, will result from the Government's present policy of "carrying into effect the greatest national building program the world has ever known."

The Government departments in charge of this program have departed from the policies laid down by President Hoover, former President Coolidge, and Secretary Mellon by confining architectural effort chiefly to the Office of the Supervising Architect of the Treasury, where it must inevitably tend to become "stereotyped, mediocre and uninspiring," it was declared.

The country, as a result of this course, is being deprived of the best architectural ability, while "a really unexampled" opportunity to contribute to higher civilization is being lost, it was asserted in the report of the Institute's Board of Directors, adopted by the convention.

The Board advocated the establishment of a Federal Department of Public Works, saying:

"The Board of Directors of the American Institute of Architects places itself on record as sponsoring the early development of a Federal Department of Public Works in order that all government construction agencies shall be efficiently correlated under one executive head, presumably of Cabinet rank; with two assistant secretaries, one in charge of engineering projects, the other in charge of architectural projects.

"The function of this Department should be solely administrative and supervisory. In this way only can the best engineering and architectural ability of the country be made available for the service of public works."

The Board's report pointed out that for thirty years the Institute had cooperated with the Government in the planning and development of Washington, many distinguished architects serving without compensation on the McMillan Commission, the National Commission of Fine Arts and National Capital Park and Planning Commission, supported by the American Institute of Architects throughout the country.

"We welcome," the report continued, "every opportunity to make available to the Government the best professional ability which the country possesses in order that the splendid example already established in our National Capital may be extended to every community where these ideals may be reflected and emphasized in Federal architecture."

"Great sums of money have been appropriated by the Congress for the erection of many Governmental structures in all sections of the country. Under the stress of circumstances, despite the large organization of the Office of the Supervising Architect of the Treasury, few out of many projects have been assigned to architects in private practice, but it is the conviction of the architectural profession that public policy will be best served by a further extension of this work into the hands of able architects resident in the localities which the buildings are designed to serve.

"We believe that the country is entitled to the services of the best architectural talent available, and that the concentration of so large a volume of work as the present appropriations provided, into the hands of a single

Government bureau, must inevitably tend to produce stereotyped, mediocre and uninspiring results.

"We believe, further, that our national policy of encouraging private business initiative is wise; and that therefore the operation of the Office of the Supervising Architect of the Treasury is inconsistent with this policy, and an invasion into the field of individual professional activity."

"In urging upon the Government the desirability of availing itself of the services of architects in private practice, we stress the importance of the care which must be taken in their selection. That they should be chosen for reasons of fitness alone, and on the basis of their records, cannot be too strongly emphasized.

"Their selection should be left to the Board which might be composed of the Chairmen of the Public Building Committees of the Senate and House and a representative of the Department concerned, disinterested architects and a qualified layman representing a national civic or business organization."

"We affirm that our Federal buildings in all parts of the country should proclaim the highest standards of enduring architecture. The special requirements, customs, and tradition of the communities in which they are located should be recognized and met in their design.

"Such standards of excellence can be achieved only by enlisting the best ability in the architectural profession. Men capable of producing these results are not to be found in subordinate capacities in government bureaus certainly not in numbers capable of credibly carrying into effect the greatest national building program the world has ever known."

In support of its position, the Board cited an address of President Hoover delivered in April, 1929, in which the President said:

"It is the wish and the demand of the American people that our new buildings shall comport with the dignity of the Capital of America, that they shall meet modern requirements of utility, that they shall fulfill standards of taste, that they shall be a lasting inspiration. In architecture it is the spiritual impulse that counts. These buildings should express U. S. ideals and standards of our time; they will be the measure of our skill and taste which will be judged by our children's children."

"Mr. Mellon has insisted that this great responsibility before us is none which can be discharged by any one individual. It must be the product of the common mind of many men devoted to securing for America the realization of the expression of our Nation. And I am confident that we have within the Nation the taste, skill and artistic sense to perform our task for our architects have already taken the leading place in the great art."

The American Institute of Architects accepted these statements as expressing the general policy of the Government, not merely applicable to Washington, according to the Board report which was adopted.

"The Institute is now faced with the facts that the departments in charge of the execution of the present nationwide program have not been guided by this policy. Data furnished by the Government shows that while the public buildings in the National Capital have been entrusted to architects distinguished reputation, the pol-

ports of officers and committees
al that the Institute was in a
ishing condition. Plans were made
carrying out constructive policies
the coming year in co-opera-
with all elements in the building
stry. The idea of a functional
ocracy in the industry was stress-
ed. President Kohn in his annual
ess.

THE OBSERVER

What He Hears and Sees on His Rounds

In the iron and steel industry both the severity and frequency of accidents increased in 1929, according to the U. S. Bureau of Labor Statistics, this being the first increase in frequency recorded since 1922 and the first increase in severity since 1926. From 1928 to 1929 the frequency rate rose from 19.7 to 24.8 (per 1,000,000 hours' exposure) and the severity rate from 2.2 to 2.6 (per 1000 hours' exposure).

At the end of 1928 there were, according to data compiled by the International Federation of Trade Unions, 44,190,525 trade-unionists in 76 countries of the world. Although these figures cover 76 countries as compared with only 62 countries covered in 1927, the number of workers organized into trade-unions showed a decline from 187,000 at the end of 1927. Of the total trade-unionists, 13,809,567 were in membership with the International Federation of Trade Unions at the end of 1929. The American trade-union movement is not affiliated.

A study made by the U. S. Bureau of Labor Statistics of hours and earnings in sawmills showed that from 1928 to 1930 the average full-time hours per week in this industry decreased from 56.6 to 56.5. Average earnings per hour decreased from \$7.1 to 35.5 cents, or 3.2 per cent, and average full-time earnings per week fell from \$21 to \$20.28.

The Socialist newspaper, *Le Peuple*, published at Brussels, Belgium, in an editorial April 25 complained against what it called the dumping of American timber in Belgium. The United States, it said, sells Oregon pine to Belgium for the construction of railway coaches at prices 25 per cent under the Russian price.

According to a U. P. dispatch from Washington, April 23, the Interstate Commerce Commission's supplemental report denied the application of Pacific coast carriers to continue rates which were established to meet water competition on lumber in carload lots from Oregon, California and Nevada points to Southern California.

For the first time since the bureau of labor statistics began the compilation of building permits the estimated cost of nonresidential buildings exceeded that of residential buildings in 1930, the total estimated valuation of the former in 311 cities aggregating \$879,878,402, as compared with \$825,909,386 for the latter. Permits were issued in these cities for 79 hotel buildings with an average estimated cost of \$333,614 for each. The average cost of office buildings for which permits were issued in these cities was \$228,651 for each. The statistics also show that permits were issued in the 311 cities for 1450 amusement buildings, 438 churches and 754 schools and library buildings.

A cargo of Russian lumber brought to Providence, R. I., last week by the Finnish steamer *Anversoise*, was admitted to the United States because there was no evidence it had been produced by convict labor.

Undersecretary Mills of the Treasury ruled the lumber could be brought in after the importers produced docu-

ments to show it had not come from an area where convict labor is used.

The shipment of nearly 4,000,000 feet of lumber was described in Russia as a test case of Treasury regulations barring from the United States lumber produced in forests north of latitude 60 in Russia.

Despite the announcement, the Treasury learned long before it arrived that it contained no convict-produced lumber and could not be used as a test.

All persons desiring employment on Hoover Dam are asked by the department of labor to write to Leonard T. Flood, in charge of United States Employment Offices, 117 North Main street, Las Vegas, Nev., before going to that city to seek work. A warning is sent out against going to the site of work before writing for information.

Toll Roads in the United States amount to less than 150 miles, according to the report submitted to the U. S. Bureau of Roads by H. H. Kelly, division of highway transport. In 35 states there are no toll roads of any character. In the public road system of the United States there are 3,000,000 miles.

"Surplus labor" is the reason given by Wm. J. Cooper, U. S. Commissioner of Education, for the present upheaval that exists in America's business and industrial world. We have paid too much attention to producing and selling and not enough attention to the consumer.

"As a result of this failure of business to look ahead we find ourselves in the present deplorable condition with an increasing surplus of labor on our hands," Mr. Cooper says. "Modern science and engineering has increased production 50 per cent, while in the face of increasing population and this greater output payrolls have been enlarged only 4 per cent."

"The remedy," Mr. Cooper declares, "is the shorter working week and shorter working day with a higher compulsory school education age limit. Anything else we may undertake to alleviate the situation is a temporary remedy and does not affect a cure," he added. "Old age pensions and unemployment insurance can only be temporary—the cure is shorter working weeks and hours."

Mr. Cooper stated that the United States will find itself with an increasing number of idle men who have "nothing above their ears" while a few with "something above their ears" are employed.

"Business is ignorant, cowardly and has no vision," Mr. Cooper says. "This lack of vision is responsible for the present condition which cannot be remedied until surplus labor is absorbed."

Supervisor Andrew Gallagher at last Monday's meeting of the Board of Supervisors protested the specifications for the San Joaquin Valley pipeline providing that wages paid on the project should be the "prevailing rate paid in the locality."

Gallagher declares that the district is noted for its cheap labor and that should this specification remain in

effect it would serve as a bar to residents of San Francisco obtaining employment at wages prevailing here. He said the original draft provided a wage rate identical to that paid private contractors in San Francisco. Unless his demand was upheld, Gallagher said, he would block awarding this contract, which, it is expected, will approximate \$7,000,000.

There will be no deflation of labor by the Ford Motor Company any attempt to deny this, nor is there likely to be any wage cuts; the many manufacturing concerns that are constantly employed on Ford work, says the Wall Street Journal.

"Henry Ford absolutely refuses to consider or condone wage reduction," the Journal says, "and believes that if the general level of wages were reduced it would take labor 20 years to get back. To prevent wage cuts on Ford work, Ford Motor Co. has a periodical inspection of its supply companies. Instances are rare where a contractor is denied the right to bid a Ford account for the belief that might be derived from a wage reduction."

All contractors on public work in California are urged to employ American citizens and persons who have been residents of California at least a year in a letter given by Col. Walter E. Garrison. His action was taken after Garrison learned that one contractor was employing foreign labor on a highway contract. In a conference with Garrison, he agreed to give up the practice.

Prolonged negotiations among international cement producers for an establishment of new international standards for Portland, ferro, bauxite and artificial cement have resulted in a preliminary agreement which will be laid before a commission composed of representatives of seven European nations. If agreed to, the standards will be proclaimed as international standards.

Road building in California was advanced by the Senate with the approval of Assemblyman Biggins providing the state may use unappropriated funds for joint county highway districts. The measure reduces the county's share of such districts from two-thirds to one-half and eliminates the provision requiring counties to build bridges and culverts before receiving state aid. It also provides that when cost of a project exceeds \$100,000 districts may distribute payment over a five-year period, allowing payment from state gas contributions. The measure was sent to the governor.

The United Socialist Soviet Republic Chamber of Commerce for Washington Trade has recently begun the publication in English of a "Five-Year Bulletin of Economic Information" which contains data on trade, industrial developments and the requirements of Soviet economic organizations for foreign equipment and products. This bulletin may be obtained by organizations and individuals interested by writing to Dnyinsk, Moscow, U.S.S.R.

At a meeting of retail lumber dealers from all parts of Southern California held under the auspices of the Lumber and Allied Products Institute of Southern California measures for promoting business were discussed. The institute now has 350 members and is working in co-operation with 150 other yards in Southern California, according to Harry A. Lay, chairman of the executive committee of the Institute.

ALONG THE LINE

red N. Morcom, city commissioner of Oakland, succeeds Chas. I. Andersen as city commissioner of streets.

ell B. Pierson, East Bay engineer, has been named city manager of Alameda, succeeding Clifton E. Hickok, resigned.

arleton M. Adams, who went to San Diego several months ago as representative of the Union Lumber Co., died in that city April 9, aged 38 years. His funeral was made at San Rafael, Cal.

C. Kellogg, previously with the Central Illinois Co. as engineer, advising on the purchase of new bonds from economical and engineering considerations, is now acting as vice-president of the Pacific Water Co. at San Mateo.

Robert Press Smith, 47, former city engineer of Sonoma County and recently engaged in highway and contracting, died in Santa Rosa last Monday night following an operation.

Smith was born in Santa Rosa and educated in the local schools. He acted as county surveyor for a time for a brief period as city engineer of Santa Rosa. Following the resignation of Lloyd Aldrich, Sonoma county engineer, Smith was appointed to fill the position, serving in that capacity until the position was abolished seven years ago. He then went into contracting business and was later survived by his widow, Ida, and three sons, Robert, Philip and Harold.

SATE FILES SUIT AGAINST BUILDERS

The state of California has filed suit against J. M. Yoho and A. B. Douglass of the Sacramento construction firm of Yoho & Dauger, and against the Midwest Casualty Company, for \$25,000 as the result of the failure of the construction company to accept the award of a contract for the erection of state fair grounds of the new \$100,000 poultry exhibit building.

Filed on the construction work were \$25,000 by the department of public works on March 24, the complaint states, and the bid of the defendants in the sum of \$13,743 was declared low.

Failure of the company to accept the contract constituted a breach of contract, the complaint declared, and was included in the suit to recover the \$25,000 posted by the company. The firm of Guth & Fox has been awarded the poultry building work.

Appointment of G. H. Garcelon as manager of the Control Engineering Department of the Westinghouse Electric & Manufacturing Company, of Pittsburgh, Pa., is announced. Garcelon succeeds J. H. Belknap, who was transferred to the Engineering Division of the Pittsburgh district office of the company. The new manager of the Control Engineering Department entered the employ of the Westinghouse Company upon his graduation from Massachusetts Institute of Technology in 1902, and before his present appointment was manager of engineering for the Company's works at East Springfield, Massachusetts. He is well known for his work in designing small motors.

TRADE NOTES

J. W. Cary and Paul C. Chambers, operating the Exeter Electric Co., at Exeter, Calif., announce a dissolution of the partnership. The business will be continued by Chambers who will maintain the same firm name.

Lyle M. Titus, for the last 11 years connected with the lumber industry in Southern California, is now sales representative of the Pelican Bay Lumber Co., Klamath Falls, Ore., manufacturers of California white pine, with office at 604 Board of Trade Bldg. Los Angeles.

U. E. Johnson and J. R. Jones have opened headquarters at 39 East San Antonio Street, San Jose, and will carry a complete line of R. N. Nason and Company paints, together with a line of wall paper, brushes and painters' tools. Johnson, for the past ten years, was in charge of sales for the Nason Company in Central California. Jones was formerly engaged in the construction business in Southern California.

Bay Counties Steel Products Co., 9601 Russett St., Oakland, is completing installation of equipment for the manufacture of light steel stair treads, ornamental iron products, gratings, and pump screens. Production is not yet under way, but is expected to start May 16. The company, comprising L. C. Young and H. D. Beasley, will market its products under the trade name of "Bayco."

Wallace & Tiernan Co., Inc., Newark, N. J., has acquired the assets of the Tanner Engineering Co., Long Island City, N. Y., and will in the future carry on the manufacture and sale of Tanner instruments for indicating and recording variations in liquid levels, vertical movements of gas-holders, positions of valves and sluice gates, or any straight line or angular motion at any distance from the point of measurement. Manufacture will be carried on at the Wallace & Tiernan plant at Belleville, N. J.

Four retail lumber yards in Southern California have signed agreements to use the West Coast Lumbermen's Association grade marks on West Coast woods graded in their yards under the supervision of A. A. Kayser of Los Angeles, the association's grade inspector. The new firms are: Construction Supply Co., Los Angeles; Blanchard Lumber Co., North Hollywood; Bank Line Lumber Co., Los Angeles, and the Riverside Lumber Co., Los Angeles. According to the association, there are now 37 retail firms in Southern California licensed to use the association grade marks on their lumber.

A million feet of lumber was destroyed in a fire which swept through the yard of the Union Lumber Company at Fort Bragg, April 28. The fire was brought under control after a five-hour fight, with an estimated loss of \$60,000.

For the first time in eight years building permits issued in a single month have passed the \$100,000 mark in Santa Rosa. According to building inspector Walter G. Stracke, the total amount of permits granted to date since April 1 is \$102,000.

HERE—THERE EVERYWHERE

Organization headquarters of the Sonoma County Builders' Exchange have been leased at 525 Fifth Street, Santa Rosa. A building exhibit will be operated in connection with the exchange activities.

The May meeting of the Contra Costa Electrical Development League will be held at Concord on May 15, it is announced by Paul Brunelle of Concord, president of the league. Tentative plans will be outlined for a second Sunday outing at which athletic events and a barbecue will be features.

Forty members and guests of the Stockton Chapter, American Association of Engineers, made an inspection trip on the progress of the work in its connection with Stockton's deep water project. The trip was arranged by Lyle Payton, Stockton city engineer.

Southern Pine Association, at the recent annual convention held at New Orleans, La., adopted a code of ethics to govern the distribution of lumber, pledged co-operation to railroads, and voted a 5c per 1000 ft. tax on lumber shipped by its members to be used for advertising and sales promotion.

An ordinance has been introduced to the Petaluma city council demanding preference for the employment of resident laborers performing labor upon public works of the City of Petaluma, and defining conditions under which contracts for such work will be awarded. The proposed measure has been laid over for further consideration.

Efforts will be made by Chas. A. Merritt of San Jose, a member of the executive board of the Northern California Federation of Plumbing and Heating Industries, to bring the July meeting of the federation to San Jose. The federation objective is to raise the ethical standard of the plumbing and heating industries throughout the northern part of the State through the medium of educational and sound business methods applicable with the conditions at the present time.

Edward Stalter has been elected president of the Monterey County Organization of General Contractors. Other officers are: Wade Halstead, first vice-president; S. W. Hooke, second vice - president; secretary - treasurer, E. H. Sundberg; directors, John Taufner, Stalter, Halstead, Hooke, Sundberg and Van der Vliet. Offices of the organization are maintained in the Work Building at Monterey.

A permit has been issued by the Federal Power Commission to the Portland Canal Co. of Seattle, Wash., for the construction of a hydro-electric power project on the Davis River in southeastern Alaska. The first work will be a 400-ft. dam costing \$144,756. Other work projected includes a 1000-ft. tunnel with concrete-lined diameter of 15 ft.; a diversion tunnel 600 ft. long; a penstock 800 ft. long; and a 2000-ft. cableway. The project, which is located near Hyder, Alaska, will cost approximately \$3,600,000 when completed.

UNIFORM BUILDING CODE IN 92 CITIES

Ninety-two cities have adopted the Uniform Building Code of the Pacific Coast Building Officials Conference, according to David H. Merrill, secretary of the conference. These cities have adopted the code in its entirety or with minor changes suited to meet local conditions. No reference is made to cities that have used the code as the basis for a code revision. Such cities are largely in the Middle West, South and Eastern sections of the United States.

A number of cities are preparing to adopt the Uniform Code at the present time. Among these are San Diego, Inglewood, South Gate, San Bruno, Petaluma, Woodland, Turlock, Mountain View and San Luis Obispo, California; Salt Lake City and Ogden, Utah; Boise City and Lewiston, Idaho; and Princeton, New Jersey.

Palo Alto has had first reading before the City Council, and final reading may occur at any time.

Stockton is the most recent city to adopt the code, the city council having given final reading for adoption on April 12.

About one-third of the present list of 92 adoption cities are operating under the provisions of the latest or 1930 Edition of the Uniform Code. The remainder are practically without exception working under the text previous edition, that issued in 1927. Insofar as can be determined, only two cities are working under the earliest printing issued (the preliminary draft of 1926), these being Sacramento, Calif., and Shreveport, Louisiana.

California cities operating under the Uniform Building Code of the Pacific Coast Building Officials Conference, arranged in alphabetical order, are:

California

Alameda, Alhambra, Alturas, Anaheim, Bell, Berkeley, Brawley, Burbank, Calexico, Claremont, Compton, Corcoran, Coronado.

El Centro, El Monte, El Segundo, Fontana, Fresno, Fullerton, Gardena, Hawthorne, Huntington Park, Laguna Beach, La Brea, Livermore, Long Beach, Lynwood, Madera, Martinez, Modesto, Monterey Park, Newport Beach.

Oceanside, Ontario, Orange, Pasadena, Piedmont, Pittsburg, Pomona, Redlands, Richmond, Riverbank, Riverside.

Sacramento, San Anselmo, San Bernardino, San Fernando, San Jose, San Leandro, San Rafael, Santa Maria, Santa Monica, Seal Beach, Sebastopol, South Pasadena, South San Francisco, Stockton.

Tujunga, Tulare, Turlock, Tustin, Ukiah, Upland, Visalia, Walnut Creek, Watsonville, Willow Glen.

Miscellaneous Points.

Albuquerque, N. M.; Birmingham, Ala.; Corpus Christi, Texas; Cottage Grove, Ore.; Dallas, Texas; Ellensburg, Wash.; Eugene, Ore.; Everett, Wash.; Grand Junction, Colo.; Grand Forks, N. D.; Helena, Montana; Houston, Texas; Kelso, Wash.; Klamath Falls, Ore.; Las Vegas, Nevada; Medford, Ore.; Olympia, Wash.; Prescott, Ariz.; Salem, Ore.; Shreveport, La.; Tucson, Ariz.; Utica, N. Y.; Yuma, Arizona.

Westinghouse Electric & Manufacturing Company has been awarded a contract by the St. Companies, Inc., contractors for Boulder Dam, to furnish and install the electrical equipment required in that project. A large part of the equipment covered by the contract will be built in the Oakland plant of the Westinghouse Company.

CITIES BUILT IN A DAY AT STUDIOS

Almost any type of home or building can be duplicated at a moment's notice in the Paramount Public Hollywood studios without going outside for material, it was stated yesterday in San Francisco by Jesse L. Lasky, first vice president of the company, which is holding its annual convention here this week.

Structural steel is about the only building material, commonly used, which isn't kept on hand in large quantities. The twenty-seven acre studio has long rows of warehouses full of material. It has many departments which function as a co-ordinated whole in the rapid construction of every conceivable type of sets.

Motion picture sets, because of their greater variety and more intricate specifications, require more highly skilled labor and more experienced supervision than ordinary building operations. From the time that the script of a new story is placed in the hands of Van Nest Polglase, designer of sets, until the completed structure awaits the troupe, is rarely more than a matter of a few days. The designer and his assistants select the material and build a garage or four-room bungalow in a few days is not extraordinary, but to duplicate Chinese, Normandy, Russian or English architecture in photographic perfection, and do it all on a schedule where every hour counts, is something more.

Blueprints go to the planing mill, where the sets are built in units, ready to assemble on the sound stage. The mill and the adjoining "prop shop" have an average force of fifty-five men and floor space of more than an acre, with every type of modern machinery. There is even a general machine shop and a foundry, providing metal fixtures from salvaged iron, copper and brass.

Units of the sets are transported through the studio on an overhead monorail system. A "jockey wheel" system of construction and overhead hoists enable them to be raised or lowered at will on the stage. Painting and papering starts the minute walls are assembled. Portable band-saws can be taken to the stage for last-minute set-up work. In just a few hours units of a large set are assembled, the set is painted and papered, and furnishings are in place.

Exterior sets with stucco, concrete, brick, stone or board walls are built easily and quickly by departments specializing in that type of work. Setting telephone poles and street lights in place is as simple an operation in the studio as hanging a picture.

Interesting are the figures given by Jesse L. Lasky, first vice-president in charge of production. These show that the past year, with very few spectacle pictures requiring enormous sets, over 2,000,000 feet of lumber was used in set construction, 1250 kegs of nails, 11,000 rolls of oatmeal wallpaper—and in the paint department, nearly 4000 gallons of denatured alcohol!

The Westinghouse Electric and Manufacturing Company announces a new eight-page, illustrated publication, identified as Circular 1913, covering Nofoze Load Centers, groups of small circuit-breakers, or "Filipons", used for the protection of branch circuits in homes, buildings, garages, small schools, farms, stores, factories, etc. The publication describes the construction and operation of Nofoze Load Centers, and includes considerable application data. A table gives the various types and sizes of fuses.

CONCRETE PAVING COSTS 28% LOWER THAN A YEAR AGO

The accompanying two tables re concrete paving prices of jobs reported by Engineering News-Record (New York), let last month and in March, 1930. The tables include all contracts that reported both square yards and price, so that the unit price could be computed. The tables therefore, roughly comparable. The current average price is \$1.53 per square yard, compared with \$2.55 in 1930, indicating a cost reduction of 28 per cent.

LICENSE LAW BILL WINS SENATE APPROVAL

Senate Bill 732, by Senators Burr and Cleveland, amending the contractor's license law of California, passed by the senate and is now in the hands of the committee on governmental efficiency and economy of the house.

Assembly Bill 615, by Mr. Nell, providing a method whereby civil engineers may qualify before using a title structural engineer has passed by the senate and was referred to the house for concurrence amendments.

Assembly Bill 616, by Mr. Nell, amending the engineers' registration law, which passed the house, has been recommended for passage with amendments by the senate committee on governmental efficiency.

California Portland Cement Company has filed a complaint with the Railroad Commission against the Southern Pacific Company alleging that the defendant carrier collected unreasonable rates for the transportation of cement from Colton, San Bernardino County, to points in California, and asking the Commission to establish reasonable rates for such movements and award repayment to complainant on account of alleged unreasonable charges paid during the last two years.

HYDROCAL" GYPSUM CEMENT ON MARKET

A gypsum cement has been recently introduced into the American market under the name of "Hydrocal," which, the manufacturer claims, is superior to other gypsum plasters, made at Paris and Keene's cement, and several points of superiority, says the Industrial Bulletin of Arthur D. Little, Inc. (Cambridge, Mass.) It has approximately twice the compressive strength of a high-grade building plaster, is much harder, and consequently can be used where Portland cement is not suitable owing to its dark color and inability to make a sharp, smooth, finished castings, or to slow setting time and its slow development of strength. Hydrocal is exactly as plaster of Paris, the time of setting may be varied from few minutes to several hours. Because of its high strength, low absorption, and density it can be substituted for many wooden and metal moulds, as well as for china and porcelain lamp bases, bookends, small statues, etc., thus eliminating the cost of firing of ceramic products. The plastic properties, such as the time setting, strength, hardness, etc., can be adjusted to suit the requirements of the product desired.

JOHN RE-ELECTED CHIEF OF A. I. A.

Robert D. Kohn of New York was re-elected president of the American Institute of Architects, at the annual convention of that body in San Antonio, last week. Other officers re-elected to serve for the ensuing year are: E. J. Russell of St. Louis, first vice-president; Horace W. Pease of Arlington, D. C., second vice-president; Frank C. Baldwin of Washington, D. C., secretary, and Edwin Bergstrom, Los Angeles, treasurer. Resolutions strongly urging the government to use local labor and building materials on construction of public structures were adopted at the closing session of the convention by the American Institute of Architects. The resolutions supplemented a similar project of the institute for establishment of a federal department of public building which would employ private architects and contractors on public buildings, rather than on draftsmen and engineers.

HOME BUILDING COSTS CUT BY NEW LUMBER

A new precision lumber for house building, designed to further better home construction during 1931, is announced by F. K. Weyerhaeuser, president of Weyerhaeuser Sales Company, Spokane, Wash. This new structural lumber, known as 4-Square Guide-Line Framing, has been developed with a number of unusual features said to make it easier to build better homes. Every piece of this new precision lumber is accurately squared on the ends and cut to exact lengths. It is dressed on all four sides and the grain is "eased" to allow for greater ease in handling and to avoid danger splinters. Another interesting feature is that it is marked with ide-lines every inch of its length to help the carpenter plane, measure, and level the framing members with minimum effort and waste, and to lessen the chance of inaccuracy. Every piece of this framing lumber is plain-marked with the species and grade name, and fully guaranteed as to seasoning.

EMPLOYMENT STOPS GAS TAX DIVERSION

Employment for labor on the highways as well as the demands of traffic for better roads has stopped attempts to divert the gasoline tax to purposes other than highways in most states, according to Chas. Upham, engineer-director of the American Road Builders' Association.

A number of states have diverted the gasoline tax but the total is less than 3% of the amount collected. Money has been used for all kinds of things not related to roads. Kentucky is buying Mammoth Cave with gasoline tax money; Maryland supports a conservation department busy with other properties; Florida, Michigan and Texas diverted in 1930 a total of \$13,404,200 to the support of schools—the largest single item of diversion. Mississippi built a sea wall to the amount of \$207,440. New York City receives 5% of the gasoline tax to go in the general fund. Idaho and Michigan are building aviation field using \$44,000 of gasoline tax money but they are collecting a tax on airplane gasoline that partly covers this diversion. Louisiana is building a port with \$155,000 of the gasoline tax money in 1931. "The present need for providing work for the unemployed and the readiness with which men from all classes of industry can be absorbed in road building work," continued Mr. Upham, "seems to be known and legislatures generally recognize these facts. The needs of the highways are apparent to all motor vehicle drivers. The 32,500 people killed in 1930 by motor vehicles and the 962,000 injured, not to mention nearly a billion dollars property damage, clearly indicates the need for more and better highways and streets."

"The need for the greatest road building year in history," he continued, "and coming at a time when other work is decreased much distress will be relieved through employment given by road contractors and officials. The public will gain because roads can be built more economically in a period of comparatively low prices."

WELDING NOT TO REPLACE RIVETS

Welding will not replace rivets in building construction, according to Mr. Lee H. Miller of Cleveland, Chief Engineer of the American Institute of Steel Construction, who addressed the Building Officials Conference of Toronto, Canada, last week.

"Because it is newer, welding has been subjected to closer study, whereas rivets have been accepted without extensive research. This is the time, in the opinion of Mr. Miller, when the function and the performance of rivets under stress should be more intimately studied."

"Based upon my present experience and information," said Mr. Miller, "I consider it folly to claim we are now ready to abandon rivets, even though welds may be made to replace them, and it is as great a folly to wipe out welds from our industrial processes, because we lack the experience to inspect and analyze their properties."

Construction of sixty pedestrian subways in the vicinity of schools is contemplated by the Los Angeles Board of Education which has provided \$500,000 for such work. The subways will be constructed at points designated by Luke L. Gallus, assistant superintendent of city schools in charge of safety.

PLYWOOD INTERESTS PLAN ADVERTISING

Seventeen mills representing 100 per cent of the production of Douglas fir plywood are launching at once an intensive, nation-wide, three-year program of advertising, sales promotion and engineering research. This program will acquaint the public, wood-using industries and every factor in the construction industry with the hundreds of uses of this unique material.

"We are convinced that 1931 will long be remembered as the greatest opportunity for aggressive selling and advertising in a decade," said A. E. Wuest, chairman of the industry's executive committee. "With retailers' stocks smaller than in years and business men everywhere fast regaining confidence, the time to sell hard—and advertise hard—is right now."

RESIDENTIAL LOANS ON THE INCREASE

Moderate increase in the average size of loans on city residential property funded by Investors' Syndicate was shown during March and the average approximated that for the first quarter of the year, according to a report issued by E. E. Crabb, vice-president. Loan average for the month and for the quarter was slightly under that of the 12 months ended March 31.

March loans averaged \$4,263.88, compared with \$4,227.41 in February. The average for the quarter was \$4,277.44 and for the year ended March 31 was \$4,308.25. In the first quarter of 1931, loans funded by the company numbered 437 and totaled \$1,869,241.20.

In the 12 months ended March 31 loans numbered 1747 and totaled \$7,526,522.68. The corresponding 1747 loans, totaling \$7,393,242.28 in the 12 months ended Feb. 28. During the quarter loans were made in 17 cities and during the year in 24 cities.

STATE EMPLOYMENT CONDITION IMPROVING

Improvement in employment conditions in California during March as compared with January of this year, and December and other late months of 1930, is indicated in the monthly survey made public by the state division of labor statistics.

While the number of employees and total weekly payrolls were off 18.1 per cent and 21.7 per cent from March of last year, the decrease was less than that reported for January.

The report shows that average weekly earnings amounted to \$29.95 during March against \$29.57 in January and 29.24 in March of last year, the decrease was less than that reported for January.

The figures are from 920 manufacturing establishments in California, employing about 60 per cent of the wage earners of the state.

The Westinghouse Electric & Manufacturing Company announce the publication of an eight-page booklet, identified as Special Publication 1917, describing the Westinghouse Vertical Parking Machine, an invention effecting the utilization of vertical space, with minimum ground coverage, for parking automobiles. This booklet includes: a discussion of the parking problem and the use of the vertical parking machine as its solution, a description of the construction and operation of this machine, and a discussion of its numerous applications. The various sizes in which the machine is available are also given. The booklet is illustrated with photographs and drawings showing the appearance and construction details of the machine.

CONSULTING SERVICE ON STEEL CASTINGS

Announcement is made by the Steel Foundry's Society of America, Inc., that it has established an engineering department under the direction of an experienced metallurgist and engineer to provide consulting service to mechanical engineers, designers and others engaged in the selection and application of metals for products of all kinds. This service is offered without charge by the society, which is made up of a group of steel foundry organizations. W. H. Worrell, Lebanon Steel Foundry, Lebanon, Pa., is president; vice-presidents include G. R. Casey, Treadwell Engineering Co., Easton, Pa.; W. W. Powell, Mesta Machine Co., Pittsburgh, Pa.; Arthur Simonson, Falk Corporation, Milwaukee, Wis., and E. H. Fieser, Oklahoma Steel Castings Co., Tulsa, Okla.

Indicative of the type of service the engineering department will render is assistance with such problems as: (1) proper apportioning of metal sections for best casting results; (2) advice concerning types of cast steels available to satisfy desired physical specifications; (3) redesign of cast-steel members with which trouble has been experienced either in production or service; (4) redesign of products previously constructed in metals other than cast steel; (5) locating a foundry capable of handling individual requirements.

Inquiries should be addressed to the development engineering department, Steel Foundry's Society of America, Inc., 420 Lexington Ave., New York, N. Y., according to Granville P. Rogers, managing director of the society.

ESTIMATING FEE HIT BY KANSAS DECISION

The Kansas Supreme Court, in a unanimous decision rendered March 7, declared that contract agreements between bidders which provide for the inclusion of estimating fees in proposals and for the collection of fees from the successful bidder are contrary to public policy and void under the Kansas laws.

The decision was made in the appeal of the suit of the Master Builders' Association of Kansas against Lee Carson who was not a member of the association but had entered into a contract with members to pay the association one-half of one per cent of the total contract price which would be received for the construction of a schoolhouse at Cherryvale, Kansas.

It was asserted that the one-half of one per cent which the association was to receive under the contract with Carson and its members, was in return for engineering service and quantity surveys which were a valuable help in compiling the bids. Approximately one-half of the percentage received by the association was to compensate for such service, the remainder being applied as partial reimbursement to the five next lowest bidders for the costs incurred in providing the owners with their estimates.

The case was appealed to the Kansas Supreme Court from the decision of Judge J. W. Holden of Montgomery County, by the Master Builders' Association. The decision of Judge Holden was upheld and the contractors' association denied the right to collect the fee mentioned in the contract it had with the defendant Carson.

Contracts for 400 miles of road paving in Louisiana, amounting to nearly \$10,000,000, have been approved by a citizens' advisory board, sitting jointly with the state board of liquidation.

FIRE PROTECTION BODY TO RATIFY N.E.C. CHANGES

Changes of varying importance in practically every article of the National Electrical Code, made at the annual meeting of the Electrical Committee of the National Fire Protection Association early this year, will be presented for ratification at the thirty-fifth annual meeting of the Association on Toronto May 11 to 14.

One of the important changes is the addition of an new section covering electrical installations in warehouses for the storage of cotton, jute, hemp and other combustible fibres which present a special fire hazard requiring for safety a special type of electrical installation. In accordance with this action, R. F. Strong of New Orleans, Chairman of the N. F. P. A. Committee on Storage of Combustible Fibres, will recommend that the separately published regulations on the storage of combustible fibres make reference to the new National Electrical Code rule instead of covering these electrical features in the separate pamphlet.

The National Electrical Code, prepared by the N. F. P. A. Committee composed of representatives of electrical engineering organizations, central station interests, electric power manufacturers, underwriters, and other interested groups, is adopted as an American standard by the American Standards Association. It is the recognized standard of good practice in electric wiring, and has the effect of law throughout most of the United States, as well as influencing wiring practice in both North and South America.

A. R. Small, Vice-President of Underwriters' Laboratories, New York, is chairman of the committee. Copies of the report may be secured from N. F. P. A. headquarters at 60 Battery-march St., Boston.

UNIT CONSTRUCTION COSTS FOR SEATTLE

An average unit construction cost computed from the total volume of residential structures for the past several months is revealed by the Seattle Journal of Commerce as being at a new low mark of \$4.79 per square foot of floor area.

The report states that not only residential, but all types of construction, are now at the lowest cost in many years, due to the low level of prices prevailing in building materials.

The average construction cost per square foot of floor area for the principal types of buildings are as follows:

Class of Bldg.	Cost Per Sq. Ft.
Dwellings, residential.....	\$4.79
Schools.....	6.42
Commercial buildings.....	6.43
Public buildings.....	8.21
Hospitals.....	8.53
Churches.....	8.55
Factories.....	8.65

A.S.M.E. NOMINATE OFFICERS FOR 1932

Nominations for officers of the American Society of Mechanical Engineers for 1932 were announced at the recent meeting of the Nominating Committee at Birmingham, Ala., during the semi-annual meeting. The election will be held by letter ballot of the entire membership, closing on September 22. The nominees are:

President—Conrad N. Lauer, President, Philadelphia Gas Works, Philadelphia, Pa.
Vice-Presidents—Robert M. Gates, Vice-President, Superheater Company,

New York, N. Y.; Charles M. Allen, Prof. of Hydr. Engrg., Worcester Polytechnic Institute, Worcester, Mass.; Fred I. Dörner, Mechanical Engineer, Milwaukee, Wis.; William B. Gregor, Prof. of Exp. Engrg., Tulane University, New Orleans, La.

Managers—Alexander J. Dickl, Editor, Pacific Marine Review, San Francisco; Eugene W. O'Brien, Editor, Southern Power Journal, Atlanta, Ga.; Harry R. Westcott, President Westcott & Mapes, Inc., New Haven, Conn. Delegates—American Engineer Council—Conrad N. Lauer, Philadelphia; Paul Doty, New York; J. Flanders, Springfield, Vt.; C. Ferris, Knoxville; L. P. Alford, New York City; J. H. Lawrence, New York City; R. C. Marshall, Jr., Chicago; A. A. Potter, Lafayette, Ind.; W. H. Trask, Jr., Salt Lake City; C. W. Hutchinson, New York City.

REVISIONS PROMPT DEMAND FOR EXTRA

The city of Tacoma has received claims amounting to \$238,273.30 from L. H. Hoffman, contractor for the dam and spillway on the city's second Cushman power development, as extra compensation. The contractor claims that the plans were changed by the city after the contract was let at that rock excavation greatly exceeded the engineers' estimates. A balance of \$139,071 has been asked for river diversion and excavation for the dam out of a total actual cost plus 15 per cent of \$290,104. Increasing the bid inforcing in the dam which changes the classification of 16,198 cu. yds. concrete resulted in an additional claim of \$71,271.

OFFICIAL PROPOSALS

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3552-S MAINTENANCE ENGINEER, for city streets. Requires 1 years' of engineering experience, which 3 years are concerned with highway design, construction & maintenance during the last 5 years. At least 1 year in responsible charge of maintenance required. Must be resident of California for past 12 months and between 35 and 50 years of age. Salary \$300 per month. Apply by letter for further information. Location California.

R-3546-S FLOTATION OPERATOR, practical mill man with experience in ball mill operation, for small mill in California. Shift work, \$5.00 per day. Board costs \$4.00 per month. R-3547-S SALESMAN, take agencies for a patented device for testing automobile brakes. Reasonable price and good commission. Territories open for exclusive right. Headquarters, San Francisco.

R-3548-S WORKING PARTNER, outside sales promotion of ornamental metal work. Prefer man with architectural experience and sales ability who is prepared to finance self during trial period while selling on commission. Business established. Location San Francisco.

R-3544-S GRADUATE ENGINEER, age 44, with California registration and electrical engineering experience desires to connect with an established engineering firm in the capacity of partner. Has some capital to invest where hard work and application will pay dividends. Address communications in care of the office.

Building News Section

APARTMENTS

Plans Completed.
APARTMENTS Cost, \$225,000
OS ANGELES, Cal. No. 6283
 Franklin Avenue.
 light-story Class A reinforced concrete apartments (95x124-ft.)
 Owner—Maurice Feigenbaum, Union Bank Bldg., Los Angeles.
 Architect—Max Maltzman, Rives-Strong Bldg., Los Angeles.

Plans Being Prepared.
APARTMENTS Cost, \$50,000
N FRANCISCO, Calif. Pierce Street.
 Three-story and basement frame and stucco apartments.
 Owner and Builder—A. T. Morris, 3500 Fulton St.
 Plans by Owner.

Plans Being Prepared—Contract Awarded.
APARTMENTS Cost, \$200,000
ERKELEY, Alameda Co., Cal.
 Free-story and basement reinforced concrete apartments.
 Owner—Withheld.
 Architect—H. Nelson, 3730 Atlas St., Oakland.

Plans Being Figured.
APARTMENTS Cost, \$35,000
N FRANCISCO, N Greenwich W
 Steiner St.
 Free-story and basement frame and stucco apartments (twelve 2- and 3-room apts.)
 Owner—J. Guaraglia, care architect.
 Architect—R. R. Irvine, Call Bldg.
 Robinson & Johnson are figuring the plans.

Bids Being Taken.
APARTMENTS Cost, \$50,000
N FRANCISCO, Twenty-fifth Ave.
 N Fulton Street.
 Free-story and basement frame and stucco apartments (12 4-rm. apts.)
 Owner and Builder—O. M. Oyen, 50 Castaneda Street.
 Architect—H. C. Baumann, 251 Kearny Street.

Integrated Figures Being Taken.
APARTMENTS Cost, \$60,000
CLAND, Alameda Co., Cal. 17th and Jefferson Streets.
 Free-story and basement class C steel frame and brick apts. (47 apts.)
 Owner—G. Lloyd.
 Architect—Leonard Ford, 1435 Harrison St., Oakland.

Plans Being Figured—Bids Close May 20th.
APARTMENTS Cost, \$60,000
CLAND, Alameda Co., Cal. Greenwood Ave. near Park Blvd.
 Free-story and basement apartments (wood frame and stucco exterior with concrete basement; 24 2- and 3-room apts.)
 Owner—Withheld.
 Architect—H. K. Jensen, 354 Hobart St., Oakland.
 Steel and composition roofing, gas heating system, hardwood flooring.
 Contractors who will submit bids are:
 Ryan Milton, 689 Haddon Rd., Oakland.
 Graham, care architect.
 Jensen, care architect.
 Architect is also taking bids on a segregated bid basis.

Plans Being Completed.
APARTMENTS Cost, \$200,000
BAYWOOD, San Mateo Co., Cal.

Certified check \$75, payable to district required with bid. Specifications obtainable from secretary.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco, or phone GA 8744.
2019—Furniture, San Francisco. French firm is interested in establishing contact with importers of furniture from the continent, and is desirous of obtaining information as to the prospects of marketing such products.

21026—Representation, San Francisco. Party in Napoli, Italy, is anxious to represent American manufacturers of radio receivers and radio-phonographs in Italy.

21032—Soda Water Making Machine, Ensenada, Mexico. A merchant wishes to secure a high-pressure soda water making machine, with complete facilities for charging and bottling the water and turning out a finished product at the rate of 1000 to 1500 bottles per day.

21035—Marble Chips, Milan Italy. Association inquires for list of importers of marble chips for use in terrazzo work.

21036—Handtruck, Muenchen, Germany. Party desires representative for handtruck with device to elevate the loaded goods.

21037—Representation, Detroit Michigan. Party returning to South Africa is anxious to represent local manufacturers there.

21049—Almond Cracking Machine, Vancouver, B. C. Party is anxious to obtain information, also catalogue, regarding an almond cracking machine.

Claude H. Sook (Harrison Cook, Inc.), Frankfort Ave., Cleveland, O., manufacturing a line of electrical

merchandise wishes to contact party with view to representation.
 Geo. A. Mortland, Imperial Chemical Co., 2827 Hyans St., Los Angeles manufacturing a new cleaner for floor desires to secure representation in the San Francisco district.
 W. S. Millener, Jr., 2846 West Lak St., Chicago, Ill., wishes to secure representative to handle a line of hollow metal windows, hollow metal doors, ventilated skylights and vent lators.

\$9,000,000 SUITS FOLLOW ON MERGE

Cyrus S. Eaton, Cleveland financier who led the foes of the proposed \$100,000,000 Bethlehem-Steel-Youngtown Sheet & Tube merger, was attacked in three suits filed at Cleveland, Ohio, April 15. Joined with Eaton were some of his financial associates.

Two suits allege illegal stock transactions involving more than \$9,000,000. Because of the alleged illegal transactions, \$1,682,599.25 are due stockholders of Continental Share Inc., Eaton holding company, it was said.

Two of the suits, filed by Charles S. Wachner, Cleveland attorney and Continental shareholder, asked an accounting and equitable relief.

The other, filed by W. K. Gardne attorney on behalf of the Paramount Coal & Coke Company, had asked a judgment of \$1,682,599.25 from the shareholders.

Business progress in a period of economic recovery like the present must depend in large measure upon co-operative effort. Individual action directed toward establishing business on a basis of the soundest and most efficient operation is timely and constructive. Of far wider significance, however, is such an effort when undertaken by an industry for the benefit of the industry as a whole. Thus it is that the tremendous potential value of trade association effort in promoting business recovery through establishing sound trade practices and stimulating sales and advertising effort commends itself to the serious study and support of the business world. Prompted by a realization of the influence which trade associations are in a position to exert Daily Pacific Builder, in this issue presents a summary of their status with the thought that it may prove valuable to those units of the construction industry not already represented by a trade association.

DAY LABOR PROJECTS PREVENTED BY COURT

A program for carrying out by day labor an extension of program of street paving and repaving in McKeesport, Pennsylvania, was defeated recently when the Supreme Court of the state held that the city officials were not allowed to use the day labor method under the Clark Act of 1913.

This act provides that all third class cities of the state must have all work required, when the amount thereof exceeds \$250, performed under contract to be given the lowest responsible bidder, except the ordinary repair of highways, sewers and other public improvements.

A taxpayer's suit was instituted against the city officials when they announced their intention of carrying out the work, amounting to approximately \$250,000, by day labor.

The lower court held for the plaintiff and the case was appealed and carried to the Supreme Court which upheld the decision of the lower court.

Engineering News Section

BRIDGES

TULARE COUNTY, Cal.—Until May 20, 2 P. M., bids will be received by State Highway Commission to construct four and widen two reinforced concrete slab bridges between Goshen and Kingsburg, varying in length from 30 ft. to 105 ft.

SAN FRANCISCO.—Until June 17, 2 P. M., bids will be received by W. W. Felt, Jr., secretary, Golden Gate Bridge and Highway District, 722 Financial Center Bldg., to construct the Golden Gate Bridge across the Golden Gate at the entrance to San Francisco Harbor, together with approaches, approach roads and certain accessory structures. Bonds of \$35,000,000 were voted by the district to finance construction.

The dates upon which the plans, specifications and terms of contracts will be available to bidders for the various departments of the work are as follows:

Contract No. 1.—Steel superstructure, involving 75,000 tons of structural steel and 28,000 tons of cables and fasteners. Plans now available for distribution to contractors.

Contract No. 2.—Main Piers, plans available May 6.

Contract No. 3.—Anchorages, Plans available May 6.

Contract No. 4.—San Francisco and Marin approach spans, plans available May 13.

Contract No. 5.—Presidio Rd., plans available May 13.

Contract No. 6.—Sausalito Rd. plans available May 13.

Contract No. 7.—Paving of main and approach spans, plans available May 13.

Contract No. 8.—Electric work, plans available May 13.

Contract No. 9.—Cable housing and stairways, filling and grading, plans available May 13.

Contract No. 10.—T-11 terminals, plans available May 13.

Contract No. 11.—Furnishing cement specifications available May 13.

Applications for plans must be accompanied by a certified check of \$50 for each set, checks to be made payable to Golden Gate Bridge and Highway District. In addition to the San Francisco offices of the district, plans are obtainable from the offices of the State Engineering Corp., 307 North Michigan Avenue, Chicago, Ill., and the offices of Leon S. Moisseiff, 68 Williams Street, New York City.

The official proposal on this project will be published in Daily Pacific Builder shortly.

STOCKTON, San Joaquin Co., Cal.—County Surveyor Julius Manthey preparing plans for Garwood Ferry bridge affording a connection from about 400 ft. north of the present bridge, affording a connection from Charter Way to the Borden Highway after the latter is re-routed. Will be of the draw-span type, 320-ft. long with 24-ft. roadway. Estimated cost, \$70,000.

TULARE COUNTY, Calif.—As previously reported, bids will be received May 20 by State Highway Commission to construct four and widen two reinforced concrete slab bridges between Goshen and Kingsburg, varying in length from 30 to 105-ft. Project involves:

- (1) 640 cu. yds. concrete to be removed.
 - (2) 1600 cu. yds. structure excavation.
 - (3) 1465 cu. yds. class A Portland cement concrete.
 - (4) 250,000 lbs. reinf. steel;
 - (5) 1050 lin. ft. timber guard rail;
 - (6) 1 lot miscellaneous items of work.
- See call for bids under official proposal section in this issue.

SACRAMENTO, Cal.—Until May 21, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to construct H street subway; estimated cost \$90,000. Southern Pacific Railroad to share one-half the cost. Project involves:

- (1) 179 30-foot untreated wooden piles;
- (2) 7250 cu. yds. excavation;
- (3) 700 cu. yds. backfill;
- (4) 35,000 cu. yds. bowlev levee fill;
- (5) 30,000 lbs. reinforcing steel and mesh;
- (6) 950 cu. yds. Class "A" concrete;
- (7) 580 cu. yds. Class "B" concrete;
- (8) 66.25 tons 33-inch steel girder beams;
- (9) 6 tons structural steel flood gates;
- (10) 16,800 sq. ft. concrete pavement;
- (11) 3960 sq. ft. 3 and 4-inch sidewalk;
- (12) 300 lin. ft. 2-inch, 2-rail pipe railing.

Project consists of an underpass, bow levee and flood gates.

Main structure, for underpass, to have gravity-type abutments built on piling. Deck to provide for three tracks, and consisting of 16, 33-inch 202 lb. Bethlehem steel beams, with a clear span of 28 feet, topped with a 10-inch concrete slab with one-inch of bituminous waterproofing. Five foot concrete walkways outside of and paralleling tracks.

Vehicle portion to consist of 30-foot California State Highway Commission standard concrete pavement, with 14 feet of vertical clearance, and one 7-foot pedestrian walk. Drainage to be disposed of by means of a sump and an automatically controlled electric pump.

Bow levee to enclose the vehicular lane between the main structure and the flood gate structure—a distance of about 200 feet. Top of bow levee to be about 13 feet above natural ground, with crown width of 13 feet and 2:1 side slopes.

Flood gate structure to have counterforted retaining walls and to be equipped with two steel gates 18 feet high, hinged at the walls and meeting at the roadway center line when closed.

Plans obtainable from Fred J. Klaus, city engineer, and on file in office of city clerk.

SAN FRANCISCO.—George Pollock, Forum Bldg., Sacramento, submitted the lowest bid to the Board of Public Works to construct bridge over the channel in Third Street; to be single leaf bascule type, 140-ft. span, 80-ft. overall width, 103-ft. between fenders with 6-ft. sidewalks and provision for two street railway tracks and the Belt Line Railroad in addition to vehicular traffic. A complete list of the bids received follows:

(1) Furnishing and erecting a bascule bridge superstructure and approaches, including the dismantling of the existing bridge anchors and appurtenances, and the construction of

all necessary foundations, piers, abutments and appurtenances, all in conformity with the plans and specifications.

(2) Furnishing and erecting a bascule bridge superstructure, including counterweight, machinery and appurtenances, all in conformity with the plans and specifications.

Geo. Pollock, Sacramento.....(1) \$311,117
 (2) \$300,000
 Healy-Thibbitts Const. Co.....(1) \$328,000
 San Francisco.....(2) \$318,000
 Barrett & Hill, S. F.....(1) \$321,230
 (2) \$313,650
 Seims-Helmets Co., Inc.....(1) \$353,030
 San Francisco.....(2) \$279,000

 Frederickson Bros., Oakfield 111,832
 F. J. Maurer, Inc., Eureka.....120,198
 Jasper-Stacey Co., S. F.....123,261
 Ward Eng. Co., S. F.....136,190
 Bids held under advisement.

NAPA, Napa Co., Cal.—City council sets June 5 as date to vote bonds to finance construction of a new bridge in Third Street over the Napa river and another over the Brown St. crossing. For the Third St. bridge, bonds of \$35,000 are to be voted and for the Brown St. bridge, \$5,000. The Third St. issue will finance one-half the cost, the remaining half to be contributed by the county and state.

TRINITY COUNTY, Calif.—Whited, Santa Rosa, at \$7,924 submitted low bid April 29 to State Highway Commission to construct a reinforced concrete girder bridge across Browns Creek, consisting of one 32-ft. 6-in. span on concrete abutments with wing walls. Following is a complete list of bids received:

Whited & Whited, Santa Rosa.....\$ 7,924
 A. Young, Yreka.....8,899
 F. H. Nielsen, Orland.....9,337
 A. T. Howe, Santa Rosa.....9,445
 John Berlinger, Orland.....9,622
 J. P. Brennan, Redding.....11,651
 Bids held under advisement.

SHASTA COUNTY, Calif.—J. P. Brennan, Redding, at \$49,161 submitted low bid April 29 to State Highway Commission to construct bridge across Clear Creek about 5 miles south of Redding, consisting of two 50-ft. steel stringer spans on concrete piers with pile foundations and eleven 42-ft. steel stringer spans on concrete pile bents. Following is a complete list of bids:

J. P. Brennan, Redding.....\$49,161
 Geo. Ulrich Const. Co., Modesto 52,596
 Frederickson & Watson and

Frederickson Bros., Oakland 53,953
R. B. McKenzie, Red Bluff..... 54,812
Peter McHugh, S. F..... not totaled
Bids held under advisement.

DREDGING, HARBOR WORKS & EXCAVATIONS

SANTA MONICA, Los Angeles Co., Cal.—Fred S. Wilson, secretary of Santa Monica department of industry, has recommended to the city council that a bond issue to raise funds for the completion of the Santa Monica harbor breakwater be placed before voters.

SAN FRANCISCO—Until May 13, 11 A. M., under Specification No. 6253, bids will be received by Public Works committee, Twelfth Naval District, 169 Harrison St., for dredging approximately 26,000 cubic yards of sand and mud from the Inner Boat Harbor, and along the faces of the Long Wharf and the Old Wharf at Yerba Buena Island, and disposing of the material in an authorized dumping ground. Specifications obtainable from above on deposit of \$10, checks for same to be made payable to the Chief of the Bureau of Yards and Docks, returnable.

REDONDO BEACH, Los Angeles Co., Cal.—A petition asking that the city council call a bond election for raising \$300,000 to construct two breakwaters to form an outer harbor, has been presented to the city council.

STOCKTON, San Joaquin Co., Cal.—Hydraulic Dredging Co., Ltd., central Bank Bldg., Oakland, at \$16 c. yd. awarded contract by city council for dredging 158,000 cu. yds. of material from city-owned property on the south side of Stockton Channel in the Boggs Tract.

MODESTO, Stanislaus Co., Cal.—City defeats proposal to issue bonds of \$15,000 to dam the Tuolumne river for development as a recreational center. The issue was defeated by 51 votes.

STREET LIGHTING SYSTEMS

PASADENA, Los Angeles Co., Cal.—City directors have adopted specifications for metal posts to be used in Prospect Crescent. The Union Metal Co. has agreed to furnish the standards at \$84.67 each.

SACRAMENTO, Cal.—Property owners are circulating petitions seeking to have city council install ornamental electrolux system in K St., comparable to those in J St., between 10th and 16th Sts. Fred J. Klaus is city engineer.

SAN FRANCISCO—Alta Elec. Co., Inc., 938 Howard St., at \$14,940 submitted low bid to the Board of Public Works to install street lighting system in Junipero Serra Blvd. Complete list of bids follows:

Alta Electric Co.....	\$14,940
H. C. Reid Co.....	15,600
Weidental-Gosliner Elec. W'ks	15,775
R. Flatland.....	16,000
NePage-McKenney Co.....	16,270
Superior Electric Co.....	18,965

STOCKTON, San Joaquin Co., Cal.—Business interests propose to replace the present 4-light standard lighting system in downtown Stockton with an electrolux of the single-light type. Petitions seeking the installation will be presented by property owners to the city council shortly. The group desires to have the new electrolux installed on Miner avenue, between El Dorado and California streets, and

on Sutter, San Joaquin and Hunter streets between Weber and Miner avenues, Lyle Payton, city engineer.

SAN FRANCISCO—Weidental-Gosliner Electric Works, 352 10th St., at \$4,934 submitted low bid to the Board of Public Works to install street lighting system in Portola Drive between 24th Street and Evelyn Way. Complete list of bids follows:

Weidental-Gosliner Elec. W'ks.	\$4,024
Butte Elec. & Mfg. Co.....	4,025
R. Flatland.....	4,200
Alta Electric Works.....	4,340
H. C. Reid Co.....	4,650

MACHINERY AND EQUIPMENT

PUGET SOUND, Wash.—Until June 3, 11 A. M., under Specification No. 6432, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., to furnish 250-ton stationary hammerhead crane electrically operated; 20-ton traveling tower crane having gasoline electric power; and 10-ton traveling gantry crane with traveling revolving jib having gasoline-electric power at Navy Yard, Puget Sound, Washington. Plans obtainable from above office on deposit of \$10.

PEARL HARBOR, T. H.—Until June 10, under Specification No. 6158, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., to furnish a 30-ton revolving crane at the Naval Submarine Base, Pearl Harbor. Specifications obtainable from the Public Works Office, Room 513, 100 Harrison St., San Francisco.

RAILROADS

SAN FRANCISCO—Public Utilities Committee of the Board of Supervisors has approved petition of Market Street Railway, 53 Sutter St., to extend its Turk St. line from Turk and Divisadero Sts. out Turk and across Arguello Blvd. and thence out Balboa St. to a point between 30th and 31st Sts. The application will be submitted to the board of supervisors next Monday for final approval. The project will involve an expenditure of \$400,000.

FIRE ALARM SYSTEMS

SANTA BARBARA, Cal.—An election will be held May 5 to vote on a \$24,000 bond issue for a traffic signal system using three-light type with bells.

SACRAMENTO, Cal.—See "Government Work and Supplies," this issue. Bids wanted for fire alarm boxes, bells, etc., under Order No. 2244-1890, by U. S. Engineer Office, Sacramento.

ALAMEDA, Alameda Co., Cal.—Fire Chief Walter T. Steinmetz has recommended the installation of fire alarm boxes on each floor of the city hall and the installation of a master alarm box at Santa Clara ave. and Oak st., and control boxes in the city hall, public library and city health center.

RESERVOIRS AND DAMS

SAN JOSE, Santa Clara Co., Cal.—William J. Popp, city engineer, reports plans have not yet been started for the proposed dam at Cherry Flat near Alum Rock Park. Test excavations for the foundations and abutments are now being made. It is contemplated that the preliminary work will be completed within thirty days. Pre-

liminary dimensions cover a dam ranging in height of from 50- to 55-feet with a width at the top of from 175- to 200-feet. It is estimated that the dam will impound 530-acre feet.

PIPE LINES, WELLS, ETC.

SIGNAL HILL, Los Angeles Co., Cal.—Bids will be asked shortly by city council to construct approximately 2.5 miles of 20-in. riveted steel pipe line between the city plant and the new well to be drilled at Ocean Ave. and South St., in connection with municipal water system.

SIGNAL HILL, Los Angeles Co., Cal.—Until 3 P. M., May 18, bids will be received by city council to drill 20-in. well on recently acquired water lands on Orange Ave. about 4 miles north of Signal Hill. Separate bids will be taken on drilling the well and furnishing the casing.

SEWERS AND SEWAGE DISPOSAL PLANTS

SANTA MARIA, Santa Barbara Co., Cal.—City Engineer York Peterson completes plans for vitrified sewer extension in North Broadway, involving:

1500 ft. 12-in. vitrified sewer;
2250 ft. 10-in. vitrified sewer;
470 ft. 8-in. vitrified sewer;
6100 ft. 6-in. vitrified sewer.
Temporary collecting tank;
Pumping station;
Estimated cost, \$14,300. Hearing will be held May 4.

PHOENIX, Ariz.—Until 19 A. M., May 23, bids will be received by city commission to construct three units included in sewage disposal system to be built under the \$317,000 bond issue. Bids may be submitted on any one or all of the following:

(1) Sewage treatment and disposal plant,
(2) Main trunk line sewer,
(3) City sewer lines feeding into main trunks.

Alternate sites for the disposal plant may be bid on. They are 23rd Ave. near lower Buckeye Road, and 27th Ave. near lower Buckeye Road. The treatment plant will have a capacity of 15,000,000 gallons per day.

Plans prepared by W. J. Jamieson, city engineer, and C. C. Kennedy, Cal. Bldg., San Francisco, consulting engineer.

FRESNO, Fresno Co., Cal.—E. W. Redmond, Fresno, awarded contract by city council (109) to construct sewers in Coast avenue, involving: 456 lin. ft. 6-in. vitrified pipe sewer; 1 manhole.

SAN BRUNO, San Mateo Co., Cal.—Until May 13, 8 P. M., bids will be received by Emil A. Bohm, city clerk, (1284) to sewer El Camino Real bet. San Felipe Ave. and Crystal Springs Ave., involving 6-in. and 8-in. vit. pipe sanitary sewer with 4-in. wye branches; 8 brick manholes. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

WATER WORKS

WHITTIER, Los Angeles Co., Cal.—City rejects bids to furnish 150,000-gal. steel water tank for Rideout Heights. Pittsburgh—Des Moines Steel Co., low at \$6945 with and \$6515 without balcony.

LAS VEGAS, Nev.—Wheelwright Construction Co., Ogden, Utah, awarded contract by U. S. Bureau of Reclamation, Las Vegas, at \$33,452.70 to con-

struck 10-in. and 12-in. diameter high pressure water supply pipe line for Boulder City, Nevada, water system, Boulder Canyon Project. The work is located near Las Vegas, Nev., on the Los Angeles and Salt Lake Railroad, Union Pacific System. The principal items of work and the advance estimated quantities involved are approximately as follows: 19,000 cu. yds. of all classes of trench excavation; 15,000 cu. yds. of trench backfill; 35,000 lin. ft. of pipe laying (10-in. and 12-in. diameters); 45 cu. yds. of reinforced concrete; 1700 sq. yds. of rock protection; 150 cu. yds. of dry rock wall.

BEVERLY HILLS, Los Angeles Co., Cal.—J. M. Ball-Krogh Co., 1010 E. 62nd St., Los Angeles, awarded contract by city council at \$1940 plus \$120 for Parkershring, to furnish 50-cycle water pump for plant No. 2.

MODESTO, Stanislaus Co., Cal.—City council appropriates \$2,500 to finance purchase of two sand traps for municipal pumping plants. Frank J. Rossi, city engineer.

FRESNO, Fresno Co., Cal.—Bids to furnish and install three pumps for the municipal water system have been taken under advisement. Claude Weekes, manager of the Water Department, objects to acceptance of the low bid, that of the Layne Pump Co., which is \$69 lower than the next low bid. Weekes declares there is a 5% difference in efficiency in the pumps.

CORCORAN, Kings Co., Cal.—Until May 4, 8 P. M., bids will be received by Jas. C. Condon, city clerk, to furnish and deliver, f.o.b. Corcoran: 1,500 ft. 8-in. c.i. bell and spigot pipe, class B; 304 ft. 6-in. do; 3 8x8-in. tees; 1 8x8-in. increaser; 1 8x8-in. tee.

Certified check 10% payable to city required with bid.

CORCORAN, Kings Co., Cal.—Until May 4, 8 P. M., bids will be received by Jas. C. Condon, city clerk, to furnish and install one new turbine pump and motor installed complete with wiring and hand starter. Pump to have 12-ft. setting with 20-ft. of suction; capacity of 500-g.p.m. Motor 25-hp., 220-volt, 3-phase. Alternative bids on used pump and motor of the above specifications will be considered. Certified check 10% payable to city required with bid. Further information obtainable from clerk.

MANHATTAN BEACH, Cal.—Until 8 P. M., May 21, bids will be received by city council for furnishing the city a 600-g.p.m. turbine pump, with motor. Spec. obtainable from Merritt J. Crandall, city clerk, after May 1.

LINDSAY, Tulare Co., Cal.—Until May 12, 8 P. M., bids will be received by E. V. Bogart, city clerk, to furnish and install direct connected pump on well in city park. Certified check 10% payable to city required with bid. Specifications on file in office of clerk.

SOUTH GATE, Los Angeles Co., Cal.—Until 8 P. M., May 5, bids will be received by city council to furnish and install deep well pump, direct connected electric motor, and appurtenances. Specifications obtainable from H. C. Peiffer, city clerk. Certified check, 10%.

EUREKA, Humboldt Co., Cal.—Until May 6, 5 P. M., bids will be received by John Griffith, city superintendent of public works, 524 D St., to construct four wood filter tanks at

Hawthorne St. and Broadway. Certified check 10% payable to city required with bid. Plans obtainable from E. D. Gardner, city engineer.

CALENICO, Imperial Co., Cal.—May 15 has been set as date for election to vote on a \$20,000 water works bond issue. The proceeds will be expended for pipe line extensions, new tank, and tower.

STOCKTON, San Joaquin Co., Cal.—County Surveyor Julius Manthey has been authorized by the supervisors to purchase portable pumping equipment for use in fighting fires in the Delta region.

BOULDER CITY, Nevada—Until May 11, 2 P. M., under Specifications No. 523-D, bids will be received by U. S. Engineering Service, Denver, for the furnishing, fabrication, erection and painting of one riveted plate steel surge tank; one plate steel sump tank and flume; one 7-foot diameter aerator tank with accessories; and one air vent pipe 12 inches in diameter by 45 feet high, and accessories, for the Boulder City, Nevada, water supply system, Boulder Canyon Project, Arizona-California-Nevada, approximately 23 miles southeast of Las Vegas, Nevada, on the Los Angeles and Salt Lake Railroad. The estimated quantities of metal involved are:

16,400 lbs. Surge tank, 4-ft. dia. by 90 ft.
16,700 lbs. Sump tank, 19.5-ft. dia. by 15 ft.
3,600 lbs. Aerator tank, 7-ft. dia.
2,200 lbs. Air vent pipe and accessories.

Foundations and bases will be constructed by the government. Unloading and hauling of fabricated material to sites will be done by the government. Plans obtainable from the office of the Reclamation Bureau at Denver or at Las Vegas, Nev.

BOULDER CITY, Nevada—Bids for furnishing pressure control equipment for the Boulder City water supply project were opened by the U. S. Bureau of Reclamation, Denver, Colo., April 17. The bids were taken on the following equipment:

(1) Six automatic hydraulic operated control valves, two automatic check valves and two automatic relief valves.
(2) Four automatic air valves.

Specifications No. 516-D. The bids were:

The Pelton Water Wheel Co., San Francisco—Net (1) F. O. B. point, San Francisco: 30-day delivery, total shipping weight, 5200 lbs.; f.o.b. cost, \$4,433; F. O. B. price, \$4433; guaranteed characteristics—max. pressure rise, 50 lbs., max. loss of head, 2 ft.; (2) F. O. B. point, San Francisco: 30 days delivery, 220 lbs. f.o.b. price, \$118. Automatic Air Valve Co., Chicago, Ill.—15% 10 days: (1) F. O. B. point, York, Pa.; 75 days; F. O. B. cost, \$15,400; discount \$154; F. O. B. price, \$15,246; guaranteed characteristics, max. loss of head, 4 lbs.; (2) no bid.

LOS ANGELES, Cal.—Until 11 A. M., May 1, bids will be received by the Los Angeles city purchasing agent Thomas Oughton, for furnishing two horizontal centrifugal pumps under Specifications No. 2437, for department of water and power.

GRIDLEY, Butte Co., Cal.—Pacific States Cast Iron Pipe Co., 111 Sutter St., San Francisco, at \$2,004 for pre-cast pipe, awarded contract by city council to furnish and deliver: 1,500 ft. 6-in. class B cast iron bell and spigot pipe; 2,000 ft. 4-in. do; 8 4-in. double hub fittings side out-

ward tap 2-in. standard thread 2 6x4-reducers, bell and spigot; 2 4x4 all left tee; 12 4-in. plugs tap 2-in. standard thread 6 6-in. do;

Complete list of bids follows:
C. G. Clausen & Co., 825 Polson St. San Francisco, \$185.20
Pacific States Cast Iron Pipe Co., 111 Sutter St., San Francisco, \$2004.00
American Cast Iron Pipe Co., 808 Balboa Bldg., San Francisco, \$2,045.20
Crane Co., Sacramento, \$2099.20
United States Pipe & Foundry Co., Mondnock Bldg., San Francisco, \$2,103.60.

PLAYGROUNDS & PARKS

SAN MATEO, San Mateo Co., Cal.—City council declares intention (30-10) to plant trees and shrubs in Baywood Park. Estimated cost, \$9,248, including five years' maintenance. Work under 1915 Bond Act. Hearing May 4. E. W. Foster, city clerk.

STREETS AND HIGHWAYS

EUREKA, Humboldt Co., Cal.—Until May 12, 2 P. M., bids will be received by Fred M. Kay, county clerk, to widen Kneeland Prairie Road in Road District No. 4. Certified check 5% required with bid. Specifications obtainable from Frank E. Kelly, county surveyor.

SAN FRANCISCO—California Construction Co., Standard Oil Bldg., has been awarded the contract by Fernando Nelson & Sons, Ocean Ave. and West Gate Drive, for the street paving and sewers in the new tract at Sloat Blvd. and 19th Ave. Way Concrete Co., 360 Second Ave., awarded contract for curbs and sidewalks. Five hundred residents to be erected in the tract; plans being prepared by the owners.

MARIPOSA COUNTY, Cal.—Until May 11, 2 P. M., bids will be received by E. E. Wallace, district engineer, State Highway Commission, P. O. Box 1253, Fresno, to treat with heavy fuel oil as a dust palliative 11.3 miles in Mariposa county, between Mariposa and Corcoran on the Erievan Grade. Specifications obtainable from engineer.

SANTA CLARA COUNTY, Cal.—Col. John B. Skeggs, district engineer, State Highway Commission, State Bldg., San Francisco, announces surveys are being made for the extension of the Bayshore Highway from Palo Alto to the Sunnyvale Air Base and on to the Alviso-Mountain View Road.

SANTA CRUZ COUNTY, Cal.—Colonel John B. Skeggs, district engineer, State Highway Commission, State Bldg., San Francisco, announces surveys will be started shortly to rebuild six miles of the Santa Cruz Grade, involving re-routing and reconstructing from Inspiration Point to Scotts valley, making the grade about two miles shorter and saving away with a large number of curves.

NEVADA CITY, Nevada Co., Cal.—County Supervisors declare intention to improve County Road between Grass Valley and Colfax; from city limit of Grass valley on Colfax Ave. via Empire mine, Peardale and Chicago Park, to Bear River Bridge, Acq. and Imp. Dist. No. 2, involving re-grading, resurfacing and eliminating bad curves. Work under Acq. and Imp. Act of 1925. Hearing May 6. J. F. O'Connor, engineer for district, Nevada City. R. N. McCormack, county clerk.

HAWTHORNE, Nevada—Until May 20, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for treating approximately 82,000 sq. yds. gravel road with asphaltic fuel oil at the naval ammunition depot, Hawthorne, Nev. Plans for this work are also obtainable from the office of the Twelfth Naval District, 100 Harrison St., San Francisco, on deposit of \$10, returnable.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, completing specifications to extend San Ness ave. from Mission to Howard sts., estimated cost \$50,000. This is a unit of the Boulevard Bond Issue voted in 1927.

MONTEREY, Monterey Co., Cal.—City council rejects lone bid of Clark & Henry Constr. Co., Chancery Bldg., San Francisco, to improve Teresa St., bet. Monroe and Clay Sts., and Garret St. from Clay to High Sts., and from High St. to the U. S. Military Reservation, involving 2½-in. asphaltic concrete base pavement 12-in. thick, concrete surface, 1.15 sq. ft.; concrete sidewalks, 1.19 sq. ft.; conc. curbs and gutters, 1.10 lin. ft.; 12-ft. sidewalk crossings, 16.50 sq. ft.; 22 4-in. house connection sewers, \$1 ft. New proceedings will be started, omitting one block included in the original proceedings.

TURLOCK, Stanislaus Co., Cal.—Bids will be asked shortly by the Modesto and Turlock Irrigation Districts, jointly, to construct proposed north road into Don Pedro, 3 miles in length; estimated cost \$21,000, exclusive of engineering. R. V. McKie is chief engineer of the Turlock Irrigation District.

BURLINGAME, San Mateo Co., Cal.—City council declares intention to improve Newhall Road for its full length involving clearing, grading, 6-in. water bound macadam base with 2½ in. asphaltic surface; bit. macadam walk; cross drain 10-in. concrete pipe; catchbasin; extn. of sewer laterals; concrete curb returns. 1911 Act. Hearing May 4, 8 P. M. J. R. Murphy, city clerk.

RICHMOND, Contra Costa Co., Cal.—City council declares intention (484) to improve Tenth St., between south line of Dock Ave., and south end of Tenth, involving grading; 4-in. broken rock crush; 2-course pavement consisting of cement concrete base reinforced with steel dowels, 3 in. thick; 2-in. asphalt concrete surface; portions of exist. pave. to be resurfaced with asphalt concrete; cement concrete curbs, gutters, sidewalks; vitrified sewers, etc. 1911 Act. 1915 Bond Act. Hearing May 4, 8 P. M. Edward A. Hoffman, city engineer. A. C. Paris, city clerk.

NEVADA COUNTY, Cal.—Until May 4, 2 P. M., bids will be received by H. H. Whitmore, district engineer, State Highway Commission, for the construction of underdrains at various locations in Nevada County, between Donner Lake and 1 mile west of Truckee. Specifications obtainable from the engineer.

SACRAMENTO, Cal.—Sacramento Northern Railway will commence at once on 5-year paving program involving an expenditure of \$250,000. Work to be undertaken this year includes repaving north track on X St. from 28th to the Western Pacific crossing, bet. 19th and 20th streets; repaving single track on Front St., bet. X and S Sts., and repaving both tracks from the Western Pacific tracks to 16th St.

SANTA ANA, Orange Co., Cal.—Until 11 A. M., May 5, bids will be received by county supervisors to improve Manchester Ave., from Grand Ave. to Artesia St., and Commonwealth Ave. from Manchester Ave. to the Fullerton city limits, about 1.23 miles, involving:
(1) 12,000 cu. yds. grading;
(2) 450 cu. yds. cement concrete pavement (9-7-7-9-in. section, 22 ft. wide).
Est. cost, \$60,000. The work will be paid for in cash. Plans obtainable from Nat H. Neff, county road superintendent. J. M. Backs, county clerk.

Yreka, Siskiyou Co., Cal.—Informative bids received by the city trustees for a street paving program indicate that the cost will run \$2,916 for concrete as against \$39,215 for asphaltic pavement. A meeting of the city trustees will be held April 23 when a selection of type of pavement will be made. Arthur O'Connor is city engineer.

ANTIOCH, Contra Costa Co., Cal.—City Engineer E. L. O'Hara completes plans to improve streets in the Wills Addition involving:
(a) 326,030 sq. ft. grading;
(b) 143,551 sq. ft. 5-inch concrete pavement;
(c) 10,613 ft. 4-in. to 8-in. vitrified clay sewers;
(d) 6,500 ft. 4-in. to 10-in. cast iron water pipe.
1911 Act. Bond Act 1915. Hearing May 11.

AMADOR COUNTY, Cal.—Basalt Rock Co., Napa, at \$7,881.25 submitted low bid to R. E. Pierce, division engineer, State Highway Commission, Sacramento, to treat with light and heavy fuel oil as a dust palliative, 34.3 miles between Chappmans and Silver Lake. Complete list of bids follows:

er, \$1,551; 1538 sq. ft. concrete walk, 20; 1368 sq. ft. rock and oil shoulder, 12.

NAPA, Napa Co., Cal.—City council declares intention (539) to improve 6th bet. River St. and Soscol Ave., including grading, concrete curbs, two-course emulsified asphalt macadam pavement, 40-ft. wide. 1911 Act. Hearing May 11. H. H. Thompson, city clerk. H. Harrold, city engineer.

SACRAMENTO COUNTY, Cal.—Until May 20, 2 P. M., bids will be received by State Highway Commission to grade and pave with Portland cement concrete, 7.2 miles between Trighion and Mills.

SANTA BARBARA COUNTY, Cal.—Until May 20, 2 P. M., bids will be received by State Highway Commission to be treated with asphaltic road oil and screenings, 15.5 miles between Suckhorn Creek and the second crossing of the Cuyama river.

YOLO AND COLUSA COUNTIES, Cal.—Until May 20, 2 P. M., bids will be received by State Highway Commission to improve 8.7 miles of highway between Dunnigan and 1 mile south of Arbuckle, involving placing of 8.7 miles of bituminous treated rock borders.

SAN JOAQUIN COUNTY, Cal.—Until May 20, 2 P. M., bids will be received by State Highway Commission to grade and surface with bituminous treated crushed gravel or stone, 3.5 miles between French Camp and Stockton.

WHITE PINE COUNTY, Nevada.—Until June 10, 2:30 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, for grading, constructing structures and placing surfacing material between Conner's Pass and Ely, 17.5 miles in length. Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans are on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

CLARK COUNTY, Nevada.—Until June 10, 2 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, to furnish, apply and mix asphaltic fuel oil with roadway surface between Las Vegas and 10 miles southeast, a distance of 10.15 miles. Plans are on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

KERN COUNTY, Cal.—Square Oil Co., 916 Adobe St., Los Angeles, at \$520 awarded contract by State Highway Commission to treat with heavy fuel oil as a dust palliative 31.2 miles between Mojave and the San Bernardino County Line, involving 4350 bbls. oil.

MONTEREY COUNTY, Cal.—Until May 4, 2 P. M., bids will be received by L. H. Gibson, district engineer, State Highway Commission, to treat with heavy fuel oil on each side of existing pavement, 3.5 miles between San Lucas and a point 3.5 miles north. Specifications obtainable from engineer.

CULVER CITY, Los Angeles Co., Cal.—Until 8 P. M., May 25, bids will be received by city council to improve Zanja Ave., and other streets in district bounded by Lincoln Blvd. and Francis Ave., and from Venice Blvd. to Washington Blvd., under A. & I. No. 9. Where necessary, jurisdiction has been granted by Los Angeles. The work will involve approximately 900,000 sq. ft. 2-in. granular Warrenite surface on 4-in. asphaltic concrete

base, curb, walk, and a vitrified sewer system. The total cost will be about \$350,000 including \$76,000 for the sewer system. Plans obtainable from Geo. E. Lee, city engineer. Paul Jarrett, city clerk.

CAKLAND, Cal.—Until May 7, 12 noon, bids will be received by Frank C. Merritt, city clerk, to improve Hopkins St. bet. High St. and 55th Ave., and portions of High St., Madrone Path, Green Acra Road, Pierson and Simmons Sts., 55th Ave., Camden Ave., 58th Ave., Seminary Ave. and Trenor St., involving:

- (1) 31,616 cu. yds. excavation;
 - (2) 1,496 lin. ft. concrete curb with steel guards;
 - (3) 9,593 lin. ft. concrete curb with guard;
 - (4) 394,515 sq. ft. cement concrete pavement, 7' to 9-in. thick;
 - (5) 48,266 sq. ft. cement sidewalks;
 - (6) 2,728 sq. ft. concrete driveways;
 - (7) 90 lin. ft. 8x24-in. corrugated iron and concrete culvert;
 - (8) 136 lin. ft. 12-in. reinf. concrete pipe conduit;
 - (9) 132 lin. ft. 15-in. do;
 - (10) 104 lin. ft. 12-in. do (extra strength);
 - (11) 43 lin. ft. 15-in. do (extra strength);
 - (12) 1 storm water inlet, 43-in. opening;
 - (13) 7 storm water inlets, Type A;
 - (14) 1 concrete inlet with 34-in. opening;
 - (15) 1 concrete handhole with c. l. cover;
 - (16) 1 cast iron handhole;
 - (17) 1 manhole;
 - (18) 1 manhole top;
 - (19) 365 lin. ft. 8-in. vit. pipe main sewer;
 - (20) 1962 lin. ft. 5-in. vit. pipe side sewers;
 - (21) 1 8-in. lamphole;
 - (22) 17 12-in. lampholes;
 - (23) 11 wye branches.
- Estimated cost, \$127,000. 1911 Act. City will pay 32½% of the cost from the City Treasury. Certified check 10% payable to city required with bid. Plans on file in office of clerk. W. N. Frickestad, city engineer.

ALAMEDA COUNTY, Cal.—Jones & King, Hayward, at \$34,595 awarded contract by State Highway Commission to grade and pave with Portland cement concrete, 0.5 mile bet. Stanton Ave. and Foothill Blvd.

LOS ANGELES COUNTY, Cal.—W. F. Peck Co., 1120 N. Las Palmas Ave., Los Angeles, at \$422,221 awarded contract by State Highway Commission to grade 7.3 miles in Los Angeles county between Canton Creek and Piru Creek.

SAN FRANCISCO.—Until May 6, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, for permanent paving on Sec. "C," Bayshore Blvd. Estimated cost,

\$27,000. Quantities of materials involved will be published shortly. Spec. obtainable from Bureau of Engineering, 3rd floor, City Hall.

CAKLAND, Calif.—Until May 7, 12 noon, bids will be received by Frank C. Merritt, city clerk, to improve portions of Plymouth St., 99th Ave. and Cherry St., involving:

- (1) 4,571 cu. yds. excavation;
 - (2) 2,802 lin. ft. concrete curb;
 - (3) 6,092 sq. ft. concrete gutter;
 - (4) 42,178 sq. ft. penetration macadam pavement;
 - (5) 170 lin. ft. 8x24-in. corr. iron and concrete culvert;
 - (6) 87 lin. ft. 8x29-in. do;
 - (7) 6 handholes;
 - (8) 250 lin. ft. 8-in. vit. pipe sewer;
 - (9) 1 8-in. lamphole;
 - (10) 10 wye branches.
- Imp. Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. W. N. Frickestad, city engineer.

SAN FRANCISCO.—Pay Imp. Co., Phelan Bldg., at \$3,984.59 awarded contract by Board of Public Works to improve 27th Ave. bet. Vicente and Wawona Sts., and the crossing of 37th Ave. and Wawona. Project involves: 647 lin. ft. unarmored conc. curb, \$52, 3954 sq. ft. 1-course concrete sidewalk, \$67.

3 brick catchbasins, \$50, 105 lin. ft. 10-in. V.C.P. culverts, \$120, 40 lin. ft. 6-in. V.C.P. side sewer, \$61, 14,447 sq. ft. asphalt. conc. pave., 2-in. asphalt. conc. wearing surface on 6-in. class F concrete base, \$208.

SAN FRANCISCO.—Pay Imp. Co., Phelan Bldg., at \$11,002.59 awarded contract by Board of Public Works to improve west half of 36th Avenue bet. Vicente St. and Sloat Blvd. Project involves:

1836 lin. ft. unarmored conc. curb, \$52, 12,960 sq. ft. 1-course concrete sidewalks, \$67, 100 lin. ft. 6-in. V.C.P. side sewer, \$61, 2 brick catchbasins, \$50, 107 lin. ft. 10-in. V.C.P. culverts, \$120, 35 lin. ft. 15-in. V.C.P. sewer, \$61, 42,428 sq. ft. asphalt. conc. pavement, 2-in. asphalt. conc. wearing surface on 6-in. class F concrete base, \$208.

SAN FRANCISCO.—M. Bertolino, 22 Shotwell St., at \$1,478.75 awarded contract by Board of Public Works to improve Arch St. bet. Sargent and Randolph Sts., and Sargent St. bet. Ralston and Vernon Sts., involving: 175 lin. ft. armored conc. curb, \$140, 105 lin. ft. 6-in. V.C.P. side sewers, \$225, 2625 sq. ft. 6-inch class E concrete pavement, \$38.

SACRAMENTO, Cal.—County Engineer Charles Deterding is preparing plans to pave Del Paso Blvd. from Marysville road easterly, involving asphaltic pavement, 20-ft. wide.

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Co., San Carlos and Dupont Sts., at \$11,485 awarded contract by county supervisors to improve Pearl Avenue in Supervisor District No. 5. Project involves 204,375 sq. ft. oil macadam pavement. Complete list of bids follows:

San Jose Paving Co.....	\$11,485
A. J. Raisch.....	11,936
Granite Const. Co.....	13,840
W. A. Dantanville.....	14,262

Demand for a thorough investigation of the affairs of the Oakland City Port Commission is made by George Wilhelm, city commissioner.

The city council has agreed to meet in executive session tomorrow with the port commission to discuss the situation.

In a statement to the council Wilhelm declared that ever since he has been in the position of commissioner of public works, charges have reached him tending to disparage the operation of the port.

"If these charges are untrue," he said, "the work of the port commission is seriously hampered. If true, the public should be acquainted with the facts."

The commissioner listed 14 charges against the port commission, which included inefficiency of executives, poor management, evasions of civil service, discrimination against Oakland citizens as employees, favoritism in granting leases, wastage of public money and excessive salaries for executives.

Wilhelm suggested that the council name 10 persons of outstanding integrity, which group would appoint three experts to make a thorough investigation.

STEEL INSTITUTE INAUGURATES WIND STRESS RESEARCH ON EMPIRE STATE BUILDING IN NEW YORK CITY

Despite the fact that the steel frame is more permanently elastic than rubber, the engineering profession is called upon to design tall buildings with a rigidity sufficient to withstand any storm or stress. The American Institute of Steel Construction has inaugurated a wind stress research on the Empire State Building which will afford some actual performance data regarding the effects of wind on tall buildings. These studies are expected to prove whether or not tall structures of this type can be so designed and constructed that the amount of the sway under the most adverse weather conditions will not make them uncomfortably habitable.

It would take a force of over four and a quarter millions of pounds of pressure to overturn this, the tallest structure ever erected in the history of man. That means in practice that it would not only take more than the severest storm ever recorded in this latitude, but a pressure greater than that from any recorded earthquake, to damage this building.

Building codes usually require strength of frame far in excess of any possible contingency, and inasmuch as no practical data has ever been gathered in regard to the behavior of tall buildings against winds, these investigations are now being made for the American Institute of Steel Construction. Mr. Aubrey Weymouth, Chief Engineer of Post & McCord, is chairman of the committee acting for the Institute. Mr. H. C. Galloway, Consulting Engineer, who designed the building and who will have active charge of the recording instruments installed on the building, is a member of the committee and will have associated with him Mr. Lee H. Miller, Chief Engineer of the American Institute of Steel Construction; Mr. D. C. Coyle, Consulting Engineer; Prof. J. C. Rathbun, Professor of Structural Engineering at the College of the City of New York; and Prof. Clyde T. Morris, Professor of Civil Engineering at Ohio State University.

Explaining the scope of the investigation, Mr. Weymouth said: "A series of tubes have been installed from the outside walls at three different floor levels, thirty-sixth, fifty-fifth and seventy-fifth, and on all four faces of the building. By pressure-recording devices these will give some idea of the wind pressure and suction on the building while at the same time we may record the velocity and direction of the wind. These tubes are located in such a manner that the pressures can be measured on the windward side of the building, as can also the pull from the partial vacuum on the leeward side. The Empire State Building is symmetrical in design and very few of the columns were offset or carried by girders, therefore it is an almost ideal structure for the purposes of this research. This regularity has made it possible to figure the floors as rigid horizontal plates which distribute the wind stresses to the various bents in the ratio of their resistance.

"Extensions have also been attached to the four corners of vertical columns and to portal beams, which read to 1/10,000 of an inch on a gauge length of about 50 inches. We anticipate that this will make possible the reading of bending and overturning stresses in the columns and of bending stresses in the portal girders. Reading will be taken simultaneously by means of cameras electrically operated and controlled. In addition, the horizontal deflection of the top of

the building during heavy winds will be measured.

"These stress-recording instruments have been placed in the twenty-fourth story, which is immediately below the base of the tower where the main tower columns are accessible on their four sides. Under the Building Code of the City of New York, the Empire State Building was designed to withstand a wind pressure of 20 pounds per square foot above the sixth floor level. It is not required to figure any wind pressure below the 100-foot level, practically at the sixth floor. In addition to this, a horizontal force of 50 tons, applied at the top of the mooring mast, was used as the probable pull from a dirigible. Under the requirements of the Code the building was designed to withstand in all a wind pressure of 4,240,000 pounds, of which the wind pressure on the mooring mast and the pull from a dirigible was calculated at 318,000 pounds, or seven per cent of the total.

"An instrument especially designed and built for the U. S. Geodetic Survey, is used for measuring sways of the building. This is known as a vertical collimator. It is proposed to set this instrument at the foot of the first stair door at each floor, and sight on an illuminated target at the eighty-fifth floor. This great vertical length of sight will provide an excellent opportunity for observing the sway of the structure in any direction. Any sway, even to one-quarter of an inch, may be accurately observed through this instrument.

"Calculations of wind pressure have in the past been entirely empirical. Until the American Institute of Steel Construction authorized a series of researches no effort had been made to calculate actual wind stresses on tall buildings in the wind. In 1928, when the American Insurance Union Building was erected in Columbus, Ohio, the Institute first authorized some investigations to be made. These were placed under the direction of Professor Morris of the Ohio State University. This particular building was selected for the tests because it was fairly symmetrical in design, and it stood out above all surrounding buildings and was exposed to a clear sweep of the winds.

"The recording anemometer on the American Insurance Union Building has been in constant operation and complete records have been kept of the wind velocity. The records for the windiest day of each week have been plotted and compared with those of the U. S. Weather Bureau Station which is located at a lower level on a neighboring building. The sway-measuring instruments, which were constructed last year, have been installed in the attic room above the observation gallery and are in readiness for use at any time. Several records have been taken with quite satisfactory results.

"Professor Morris found that this building, 48 stories high, swayed less than one-tenth of an inch in a 30-mile wind. It is obvious from the results so far obtained that the records have not afforded adequate data for the design of buildings against wind pressure. We are hopeful that much more experience will be attained from the instruments installed in the Empire State Building. In addition to all the other calculations made here we expect to measure the horizontal deflection on the top of the building during heavy winds. It will be of great assistance to be engineering profession if these experiments show definite results."

Concrete Reinforcing Steel Institute, Tribune Tower, Chicago, Ill., has issued a code of standard practice for concrete joist construction and floor forms. The code is intended to govern conditions not covered by engineers' and architects' plans and specifications, and also gives valuable information as to practices which are standard within the industry and which may be used to decrease the cost of floor design when either metal or wood filler forms are used.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

A Pointer on **P**rinting

Printing matter is not a commodity—it is a necessity, like the salt in our soup. Without printing matter modern business is unthinkable. The more we invest in printer's ink—that is *in the right kind of printing*—the greater the results. Therefore it is of vital interest to select the RIGHT kind of printer. — There are printers AND printers—but few are self-containing in mechanical and creative ability.— Put us on the track, and, like this pointer in suspense, we will bring back the bacon.

S. F. HOME BUILDING SPURTS DURING APRIL

Building permits issued in San Francisco during the month of April involved an expenditure of \$1,837,433, according to John B. Leonard, superintendent of the Municipal Bureau of Building Inspection. During the month 103 permits were issued; of these 421 covered alterations, repairs and additions to standing buildings at a cost of \$240,010. The balance of the operations comprised new structures, two of which were undertaken by the State Board of Harbor Commissioners for \$245,000.

Frame building construction last month was unusually active. The total number of frame buildings for which permits were issued last month exceeded the total for each month since January, 1928, with the exception of October, 1928 and May, 1929. Last month, permits were issued for 263 frame buildings costing \$1,075,323, and of which 95 per cent covered the erection of single family dwellings.

During the past four months, Leonard reports, 2,228 building permits have been issued for improvements aggregating an expenditure of \$7,471,116 as compared with 2,276 permits in 1930 when the total valuation registered \$7,435,010.

A segregated listing of the April, 1931, activities classified according to types of construction, follows:

Class	No. of Permits	Est. Cost
A	1	\$ 80,000
C	12	187,100
Frames	263	1,075,323
Alterations	424	250,010
Harbor Bldgs.	2	245,000
TOTAL	703	\$1,837,433

WAGES INCREASED ON BOULDER PROJECT

Elwood Mead, U. S. Reclamation commissioner, has been informed by officials of the Six Companies, Inc., contractors on the Boulder Dam, that he pay for unskilled workers on the project will be raised from \$3.50 to \$4.00 per day.

Protests were filed with the Federal and Interior departments claiming that workers on the project were receiving less than the average paid in the vicinity for private work.

The Interior Department was not divided as to whether the pay of skilled workers, which also was said to be lower than the average, would be increased.

This price for unskilled labor, an official statement by the interior department said, is regarded as good wage even in prosperous times. With the congregation of unemployed at the vicinity of the Hoover Dam it is admitted that workers could have been secured at a lower price, but the recent action is in touch with the government policy of doing all it can toward maintaining favorable wage levels.

ARCHITECTS BID FOR FEDERAL WORK

Sixteen architects submitted bids for preparation of plans for construction of a building at Tatoosh Island for the United States Weather Bureau.

Congress appropriated \$30,000 for the building which must cover architect's fees.

Bids were based on percentage of cost of the building, two sets of bids being submitted, one based on plans drawn with supervision by the government officials and the other without such supervision. The complete list of bids as released by the weather bureau office follows:

Architect	With Supervision	Without Supervision
Higgins & Biedermann, Portland	4 %	3 %
Haucock & Lockman, Seattle	5 1/4 %	3 3/4 %
E. J. Breseman, Seattle	5 1/2 %	3 %
J. M. Taylor, Seattle	7 1/4 %	4 %
Wm. Aitken, Seattle	8 %	4 1/2 %
Stimson & McDonald, Seattle	6 %	4 %
F. B. Stephen, Seattle	8 %	4 %
I. L. Wright, Seattle	6 %	4 %
F. H. Fowler, Seattle	6 %	3 1/2 %

J. L. Holmes, Seattle	6 %	7 1/2 %
O. F. Nelson, Seattle	7 1/2 %	5 %

WUELKER REFLECTOR GIVEN STOCK PERMIT

The Wuelker Reflector Lighting Corporation of San Francisco, has been authorized by the State Corporation Commissioner to sell 200,000 shares of 7% common capital stock, with a par value of \$1.00 per share. The Corporation is capitalized at \$1,000,000.

It is the intention to market all of this stock within the electrical and building industry.

The Wuelker Corporation is the manufacturer and patentee of the Wuelker Baby White Kitten Lamp, an aluminum reflector with a processed inside finish called Wuelker Diffusion, which produces the unusually clear white light that has given it the name "Daylight Whitelite."

Products of the company are used for innumerable purposes in the theatrical field and for show-window lighting and building illumination.

The Wuelker Reflector Corporation, organized about 7 years ago, maintains headquarters in the Wuelker Building, 231 Franklin Street, housing complete facilities for every need in publicity, sales, architectural and electrical draftsmanship and electrical engineering. Showrooms are a feature of the corporation headquarters.

SEATTLE REJECTS LICENSE MEASURE

An effort of Seattle building organizations and allied industries to obtain passage of a city ordinance that would require building contractors and sub-contractors to be licensed has met with defeat, the bill being indefinitely postponed by the city council.

The proposed law was designed by its proponents to curb activities of what are termed "fly-by-night" contractors within the city. Protests on the part of a large lobby which attended a public hearing on the bill caused the council to shelve it.

According to terms of the bill a \$15 annual license fee was to be required of all contractors. Five acts were enumerated and violation of one or more would repeal a builder's license. These acts were:

Gross incompetence, violation of the city building code, or ordinances; abandonment of a contract with intent to defraud; diversion of funds intended to be used for completion of the contract into other channels, such as for personal use; departure from, or disregard of specifications without the owner's consent, or without orders from the city building department in order to comply with the building code.

The licensing law was favored by the Seattle Material Dealers Credit Association, Seattle Construction Council, Central Building Council, Master Painters Association, Lathers and Masons. The Associated General Contractors, it is stated, also favored the adding of a bond clause to the measure that would require the posting of a bond by contractors and sub-contractors at the time a license was granted.

According to terms of the delayed measure only licensed builders could be employed on projects in Seattle, but this did not include owners who were building for themselves, or making improvements on their own buildings.

BRICK AND TILE CUTTER PERFECTED

A demand for equipment to handle the cutting of brick and tile on the job has led the DeWalt Products Corp., Lancaster, Pa., to design a special unit for this work, applying the principle of direct drive power. Totally enclosed electric motors of either 4 or 8 hp. are used, operating at 1,750 r.p.m. Proper choice of cutting blades adapts this machine to either cutting through or scoring the hardest construction materials, including glazed or floor tile, common or glazed brick, and natural or artificial stone. Easy adjustment of the machine makes possible accurate angular cuts. A tank with an automatic pump and motor is provided for use where a continuous water supply is not available. The entire machine can be mounted on a portable truck for easy handling.

QUANTITY SURVEY IN RELATION TO HEATING AND VENTILATING

By Paul Sodeman, Secretary, St. Louis Chapter, A. S. H. & V. E.

In order to get a correct perspective of the relation of Quantity Survey Service to Heating and Ventilating it would no doubt be well to first consider the Heating and Ventilating Industry as it is now constituted.

Some type of Heating and Ventilating or Air Conditioning must be applied to practically any structure that is to be called modern in the light of present day practice. The Heating and Ventilating Industry has advanced to a point where it is now possible to take standard built apparatus, such as is available in any market, and so design and install same that it will automatically create and automatically maintain any Air Condition desired, from the conditions which exist at the North Pole to the Conditions existing on the Sahara Desert. An Apparatus intended to produce such extremes of conditions would necessarily be quite complicated whereas the usual type of Heating Apparatus encountered, where it is only intended to warm the air within to a comfortable degree is relatively quite simple when considering the many other engineering Features of the modern structure.

The Architect knowing the use to which the building is to be put, and also knowing the possibilities of Heating and Ventilating is the best judge as to just how extensive the application should be in each case, and it therefore becomes his prerogative to specify, using one of two methods which are available in this connection.

The first and most common method of specifying especially in the larger buildings, is for the Architect or his Heating and Ventilating Engineer to make a complete and detailed plan and specification of the Apparatus to be furnished, usually calling each piece of Apparatus by trade name and number, also making detailed layouts of the piping and sheet metal work.

The second method of specifying Heating and Ventilating is instead of making a plan and specification as outlined only the results to be obtained under certain conditions are indicated. In residence work particularly the specifications often read as follows: "Furnish and install a Hot Water Heating System capable of maintaining a Uniform Temperature of 70 degrees in all rooms and halls, when the outside temperature is at zero. Here we have competition not only in Quality, Price and Quantity, but also competitive Engineering, because under this type of specification it becomes the function of the Heating and Ventilating Contractor to design as well as install the necessary Apparatus to accomplish this result, and his guaranteeing the capacity of the Apparatus he installs to create the results specified becomes the basis of his contract.

Although it would seem that this method has a tendency to eliminate the Architect and Engineer, making it more or less a matter between the owner and the Contractor, this is not entirely true, because in many instances it is still necessary for the Architect or Engineer to specify for the owner (who is rarely qualified to do this for himself) exactly what the minimum and maximum condition to be met are, as well as to make the

necessary tests and check up on the Apparatus when the plant is ready for final acceptance.

It is true, however, that this method of specifying for Heating and Ventilating requirements does entirely eliminate the Quantity Surveyor who would ordinarily not be in the position to design the Apparatus necessary, and this method of specifying probably presents one of the greatest obstacles to overcome in applying Quantity Survey Service to the Heating and Ventilating Industry under existing conditions. It also affects the relation of the Quantity Surveyor to the Heating and Ventilating Contractor should he hope to serve him, because on such work as well as on many existing buildings in which no heating plant was originally installed, but due to changes in the tenant, etc., it later becomes desirable, it is obviously necessary that the Contractor maintain his own Engineering Department which can take these plans or go out and measure the existing building, as the case may be, and design the complete heating plant, making the estimate on same from his own design. This same Department which for reason stated above is a necessary part of the Heating Contractors business, also makes the Quantity take-off and figures the cost of the other work on which a definite and complete plan and specification is submitted by the Architect or Engineer, and as mentioned before, the Quantity Contractor to maintain this Engineering organization presents one of the greatest obstacles to overcome in applying Quantity Survey Service to the Heating and Ventilating Contractor, or to the industry under the existing conditions.

Returning to the former method of specifying, wherein complete and detailed plans and specifications are furnished the Contractors, here of course the Quantity Surveyor can make a complete take-off for the owner or Architect as is done in the construction industry, and he also has a definite claim of merit for the contractors sincere consideration, in addition to those with which you are already familiar.

Heating and Ventilating Contractors as a class have no found it possible to specialize on certain types of work except in the very largest cities and many of them not only do Heating and Ventilating, but also submit figures on plumbing, refrigeration, and many other kinds of mechanical equipment. Even in cities of the size of St. Louis, few Contractors make any effort to organize for special work only, and generally speaking, will submit bids on anything from a one-story residence heating plant to that of a skyscraper or a theatre. As a result of this, the general training of their organization will be on numerous small and medium size jobs, rather than on the larger type of work.

In many instances the estimators and take-off men also handle much of the buying and supervision for the jobs in question, therefore as a result of a large job which requires 24 hours or more of concentrated work comes up for figures the Contractor and his Engineering Department have to choose between one of two evils. Either they must neglect the supervision and general work which they do from day to day or they have to work on this large

estimate on odd times or at nights. Both of these methods have proven very costly in the past. Daily and constant supervision is absolutely necessary in order to make money on contracts already secured, and the possibility of error and omission in estimates is very great when the work is done at interrupted moments or at nights after a hard day's work.

Rather than maintain a large organization which does nothing but estimating year in and year out, it certainly would seem that if a contractor had suitable service available which was dependable and on which he could call for dependable Quantity Survey it would be very much to his interest to take advantage of it particularly on the larger jobs. It would of course be necessary for the purpose of estimating labor, drayage, etc. for his Engineering Department to take off as detail an estimate as they have time to do, but let it remain for the Quantity Surveyor to determine the accurate quantities needed of such items as pipes, fittings, pipe covering, and the like. While the Contractor is of course obligated to give the subcontractor to that Sub-Contractor whose bid he used in making up his estimate there are many items which can be bought on the open market and on which no sub-contract bid is needed if an accurate, and detailed list of the material under this heading is available. Here again the Quantity Surveyors' list will be of service.

Immediately after being awarded a contract, the contractor is usually besieged with offers, threats and what not, on the part of salesmen who seem to think they must secure the business then and there or never. Some of these offers, made in an atmosphere of great enthusiasm are recognized as being perhaps the best price obtainable, and if the Contractor has a very accurate take-off of pipes and fittings for instance, it puts him in a position to place the business to a great advantage. The Quantity Survey lists are also very useful in getting the material assembled after the work is started.

It is hardly necessary to stress the need of completeness in mechanical plans for either the Contractor or the Quantity Surveyor to make an intelligent estimate of the material required. Extreme accuracy in scale dimensions on plans for Heating and Ventilating are perhaps not as essential as in other lines, the reason being that practically nothing is scaled off as all quantities are stated by trade name and number with the exception of the pipe work, and in this item the size of the pipe is mentioned and only the length need be scaled and a foot more or less of pipe is not of great consequence as pipe comes in 20 ft. lengths and unless there is an error of one whole length more or less, no serious consequence or inconvenience would result.

To give some idea of the amount of detail involved in taking off all the items in connection with a heating apparatus in a 12-story office building, I am submitting herewith a list of the various items which constitute the heating plant in such a building. This list was compiled from the cost record on an actual installation. Exceptional care was used in recording figures from which this take-off was made, because there was some talk of duplicating this building at the time this one was under construction so

these figures for all practical intents and purposes are correct.

- 2 Steam Boilers.
- 1 Electric Pump.
- 182 Radiators.
- 365 Specialties.
- 690 Ferrells and Plates.
- 365 Lengths of Pipe.
- 37 Pieces of Soil Pipe and Fittings.
- 35 Gaskets.
- 844 Caps and Plugs.
- 2526 Cast Iron Fittings.
- 2389 Pipe Nipples.
- 53 Valves.
- 36 Bushings and Unions.
- 371 Miscellaneous such as Bolts, Nuts etc.
- 1312 Pieces Pipe Covering.

9209 Total.

This figure, 9209, does not cover the entire number of possibilities of error in this take-off. Take for instances of 2526 Cast Iron Fittings, each of these has at least two dimensions that must be accurately taken off, some of them such as the Tee have three sizes and a cross has four, indicating that in this item alone there are at least 7,000 readings that must be accurately taken. It is a characteristic of pipe fittings that you can not cut or weld these cast iron fittings in case they are too large. If you have a 2-in. by 1-in. Tee and you need an 1½-in. by 1-in., the former is absolutely useless for your purpose; while you might secure bushings to reduce the 2-in. connection to 1½-in. you might just as well secure the correct fitting instead of the bushings as it would not take any more time. Often bushings are prohibited by the specifications.

In conclusion I wish to state that in presenting this paper my idea has been to present a frank statement of conditions to be encountered when applying Quantity Survey to the Heating and Ventilating Industry, and I am leaving it to your judgment whether or not it can be applied and how the obstacles mentioned can be overcome. I believe that greater obstacles exist in this field perhaps than in some less technical phases of the work, where it is only necessary to calculate volumes or contents.

I am not familiar with what has been done along this line elsewhere, but I feel sure that on jobs where complete information is available the Quantity Surveys Service once it is firmly established can fill a very definite need in the industry which will result in a saving of money to both the owner, who secures the lowest possible price which can only be made when a man has absolute confidence in the accuracy of his figures as well as the contractor who will no longer then suffer from unfortunate errors in quantities.

CEMENT PRODUCTION IN MARCH DECLINES

American Portland cement mills still show a decline in the ratio of operations to capacity as indicated by the figures for the 12 months period ending March 31. According to statistics released by the Bureau of Mines of the Department of Commerce, the ratio of operations to capacity for the last 12 months was 58.6 per cent. The ratio percentage for the 12 months ending March 31, 1930, was 65.1 per cent, and for the 12 months ending March 31, 1929, was 70.9 per cent.

During the month 8,277,000 barrels were produced, 7,172,000 barrels were shipped, and stocks on hand at the end of the month were 29,827,000. Production in March, 1931, was 26.7 per cent less and shipments 18.7 per cent less than in March, 1930. Stocks at the mill were 3.3 per cent less than a year ago.

RECEIVERSHIP FOR PICKERING LUMBER COMPANY IS ASKED

Federal receivership for the \$35,000,000 Pickering Lumber Company, which operates manufacturing plants in Louisiana, Texas and California, and retail yards in the southwest, has been asked by Harold W. Woodbury, a bond holder.

The petition for a receiver was filed in Kansas City last Saturday night by Chas. F. Woodbury, attorney in the action, who said the night filing was decided upon to forestall other possible court petitions.

In an effort to keep its affairs out of the courts, a call was issued to holders of \$7,000,000 Pickering bonds, requesting that bonds be deposited with a bondholder's protective committee, to be advanced to cover interest due May 1, defaulted by the company itself.

Jesse Andrews, attorney for the concern, said the receivership application would be resisted as an unnecessary burden on the organization.

The Pickering Lumber Company operates in Modoc, Calaveras and Tuolumne counties, California. It recently established large sawmill properties near Alturas, Modoc County.

RECEIVER ASKED FOR PACIFIC DOOR

Receivership in equity was asked for the Pacific Door and Sash Company in a petition filed in Federal District Court, at Los Angeles last Monday on behalf of the Donovan Lumber Company of Washington. The Pacific Door and Sash Company is owner of several lumber mills and material plants in the State.

After the filing of a consent to the receivership by C. S. Miller, president of the company, Judge James appointed W. H. McComb as the receiver, fixing the bonds at \$200,000.

The complainant company asserts the lumber company is indebted to it to the extent of \$8,733.37 and has total outstanding debts of \$1,186,102.74 with assets amounting to \$2,969,515.78.

WELDING OF BAND AND CIRCULAR SAWS

After an investigation extending over a period of several years, the Industrial Accident Commission has approved the welding of band saws and circular saws when done by an approved procedure, Will J. French, director of the State Department of Industrial Relations, announces. The recent progress in welding has advanced to where it will permit repairing of large saws at a saving of hundreds of dollars, with no decrease in safety, says French. This action follows the customary practice of the Commission in keeping its orders up-to-date with industrial progress.

The State Division of Housing and Sanitation has had for years an agreement with the United States Forest Service where the State officials are advised of contracts let or labor camps operated on projects under Federal jurisdiction. Copies of inspection letters are furnished the U. S. officers. Inasmuch as the contracts prescribe compliance with State laws, it is believed that better housing conditions will be provided for workers. Last month a similar agreement was entered into between the Bureau of Public Roads (U. S. Department of Agriculture) and the Division of Housing and Sanitation.

PUBLIC AND REAL ESTATE INTERESTS TO DISCUSS TAXES

Something is going to be done about taxes! A convention of housewives, skyscraper owners, and big and little bond holders, will be held in Baltimore, Md., on May 28 to plan an intensive drive for tax relief in cities throughout the country.

School teachers, doctors, dentists, business executives, young women and middle aged men, will come together from 25 cities in the nation to a meeting of the private owners of the land that has never been held in this or any other country.

The Convention has been called by the National Association of Real Estate Boards in connection with its own annual meeting to be held in Baltimore, May 27 to 30.

Those attending the property owners' sessions will be properly elected Delegates from "Property Owners Divisions" of local real estate boards. Who are also members of a national property owners group organized to expand and intensify these programs.

Delegates will describe local tax conditions and some of the successful measures already undertaken on behalf of realty tax payers in various places. The Convention may add to the national program which so far has been occupied primarily with far reaching studies of current conditions in the tax field, and recommendations to all property owners may be issued by this unique body.

Judge Arthur J. Lacy of Detroit, non-Realtor, Chairman of the Property Owners' Division of the National Association of Real Estate Boards will preside at this meeting.

Prof. S. E. Leland of the University of Chicago will report on the Association's research program which has been under way for a year and in which is seeking data for practical solutions of the tax problem by analyzing the success and failure of

A reduction of thirteen per cent in the accident rate for the stone-quarrying industry of the country in 1930 has just been announced by Scott Turner, director of the United States Bureau of Mines, Department of Commerce. Mr. Turner's statement is based upon reports which the Bureau of Mines has received from quarry operators that employ nearly three-fourths of the total number of men employed at all quarries in the United States. The reports cover the quarrying and crushing of stone and the manufacture of lime and cement, as well as rock-dressing done at the quarries.

Col. Charles T. Leeds, B. F. Jakobson and Allan Sedgewick, consulting engineers of Los Angeles, were appointed members of a special commission to investigate and report on the feasibility of a plan to serve the Hollywood district with water for domestic consumption without using the storage reservoir in West Canyon, which was built to supply the district with water by gravity. Abandonment of the reservoir would necessitate installation of a pumping plant. The commission will act under authority of the Los Angeles water and power commission.

THE OBSERVER

What He Hears and Sees on His Rounds

The recent formation in Delaware of a cement company with authorized capital of \$19,250,000, to operate in California, has aroused considerable discussion in industrial and financial circles here, says Carl C. Wakefield, financial editor of the San Francisco Chronicle. The cement cement companies in the United States have capitalization in excess of \$19,000,000. Considerable mystery surrounds the new organization, which is known as San Jose Cement, Inc. No information is obtainable from Dover, Del., on the list of officers and directors. The company has not communicated with the office of the Secretary of State in California and no request has been made to the State Corporation Commissioner for a permit to sell stock.

At the local office of the company it was stated that full information will be available within two weeks on the setup and plans of the organization. In the meantime efforts to locate any officials of the new concern have been unsuccessful.

With the cement industry in the State operating at only about 30 per cent of capacity considerable surplus has been expressed that new capital would enter the field at this time.

As a result the rumor has spread that the company has been organized to purchase and consolidate several companies now in operation.

For a number of months negotiations were on to merge a number of the leading Northern California cement companies. They never reached the point, however, where final details were worked out. And from interests associated with the companies included in the proposed merger it is learned that the formation of the new concern is in no way connected with that particular deal.

Los Angeles continues to hold first place in Pacific Coast building activities. Last month that city issued 2,332 building permits for improvements valued at \$2,413,850. San Francisco took second place with 703 permits involving an expenditure of \$1,837,433. Seattle registered third was 568 permits for work costing \$913,460 and Portland, 4th place, with 419 permits for developments aggregating an expenditure of \$527,285. Tacoma reports having issued 186 permits for work costing \$542,019 and Tacoma, 165 permits for improvements valued at \$249,580.

After a public hearing lasting more than an hour the proposed legislation restricting labor on public work to county residents was tabled last Monday by the San Joaquin County Board of Supervisors. Arguments for and against the proposal resulted in an apparent deadlock. Labor groups favoring the legislation and contractors who voiced opposition.

Creation by 1932 of a new city department of municipal utilities to take over the administration of the present water department, the city airport, the harbor front, and the department of waste removal is proposed by Jas. S. Dean, city manager of Sacramento. Dean and the engineering department are now at work on a report showing the organization of the proposed new department and what it would accomplish. The report will be made to the city council in six months.

Contracts for construction in Canada during March represented a value of \$27,311,800, an increase of 5.3 per cent over the previous month, and 12.6 per cent over March, 1930. Contracts for business building, valued at \$10,680,390, were 35.9 per cent of the total. Engineering work continued with \$5,593,800, or 35.6 per cent. Residential took care of \$5,568,700, or 20.4 per cent, and industrial \$1,669,000, or 6.1 per cent.

The State Department of Public Works is co-operating to maintain the wage scale and to give preference to married men and residents of communities in which improvements are projected. It is announced by Walter E. Garrison, director of the department. With every contract the successful contractor is urged to adopt the policies held necessary to relieve unemployment. So far, the contractors are meeting the requests of the department, Garrison declares.

If the building code requirement for either brick or concrete construction in a "first-class" fire zone works a hardship without gaining the object of the fire zone ordinance, protection of life and property from fire, the city council may grant permission to erect buildings which accomplish the objects of the ordinance in ways other than in the manner prescribed, in the opinion of City Attorney Bernard Brennan, submitted to the Glendale city council. The opinion was given on a complaint from H. M. Lennox, that the first-class fire zone on Sunset Glendale prevented the improvement of that street with apartment houses and bungalow courts because investors would not buy there when they learned that buildings must be of brick or concrete. He asked that frame stucco buildings be permitted.

Monterey County Builders' Exchange has voted "to maintain the present wage scale on all building construction within its control for the remainder of 1931."

Building inspectors from practically every community along the Peninsula from South San Francisco to San Jose, gathered at the Sunset Cafe in Palo Alto last week to discuss problems of mutual interest. The main topic of discussion featured an ordinance regulating the installation of gas fixtures. Another meeting will be held May 15 to discuss the proposed legislation, according to L. Harold Anderson, Palo Alto building inspector.

State highway expenditures for 1931 in California will amount to \$34,000,000, the program announced by C. H. Purcell, state highway engineer, discloses.

Construction will absorb \$27,000,000 and maintenance \$7,000,000. The figures represent increases over both 1930 and 1929, by well over \$1,000,000 and \$2,000,000, respectively.

Counties will spend \$45,000,000 on roads in addition to the state outlay, it was estimated.

In point of numbers private garages led the list of buildings for which permits were issued during 1930 in 311 of 319 cities having a population of 25,000 or more, it is shown by statistics compiled by the bureau of labor statistics, United States Department

of Labor. The total number of permits for private garages was 37,458, which was 46.4 per cent of the total number of permits for all buildings. However, these garages accounted for only 2.3 per cent of the estimated cost of all buildings for which permits were issued. The average cost was \$346 for each garage. One-family dwellings were second in the list in point of numbers with a total of 61,458, or 29.3 per cent of all buildings for which permits were issued, and accounting for 20.2 per cent of the total cost. The average cost for single-family dwellings was \$4966 for each.

Vitrified clay pipe of the heavy type has been selected by the city council of Long Beach for the North Long Beach sewer system. Plans for the project have been completed by H. Paterson, city engineer, who estimates the cost at between \$600,000 and \$700,000. The project involves about ninety miles of trenching. The council contemplates using local unemployed instead of machinery in trench work.

TRADE NOTES

Hopkins Electric Appliance Company of Oakland has been incorporated. Directors are H. C. and Bertha Hopkins of Oakland, and A. W. Willford of Alameda.

Pacific Heating Company, 1451 Stevenson St., San Francisco, has opened branch headquarters at 14 Mariposa Street, San Rafael. The new branch will carry a complete line of furnaces and heating appliances.

Basalt Rock Company of Napa is reported to have closed a deal for purchase of the Russian River Gravel Company's plant near Healdsburg in Sonoma county. The purchase price is reported to be in the neighborhood of \$100,000.

Chapman Lumber Co., of Portland, Oregon, has been appointed lumber purchasing agents for the Six Companies, Inc., contractors for the Boulder Dam project. The first order covers 2,000,000 ties for use in the construction of the railroad to the dam site.

Acquisition of the radiator valve division of the General Brass Company, Detroit, by Jas. P. Marsh & Company, manufacturers of steam specialties, heating systems and industrial instruments of Chicago, is announced by A. D. Rose, general sales manager of the latter concern. The Detroit Company's manufacturing equipment is rapidly being transferred to the Marsh plant in Chicago. The Marsh Company is a division of the Commercial Instrument Corporation.

Electricity is the popular field for aspiring young engineers of 1931. There are more students enrolled in college electrical engineering courses than in any other branch of engineering, it shows in a survey of Walter J. Greenleaf, education specialist of the U. S. Department of the Interior. There are four major divisions of work available to followers of the electrical engineering: Manufacturing, power, transmission, transportation and communication.

Clyde Jenken, city engineer of Santa Ana, has submitted his resignation to Mayor John Knox. Mr. Jenken was an appointee of the former city council, only one member of which was returned at the late municipal election.

ALONG THE LINE

Tacoma Section, American Society of Civil Engineers, elected R. K. Tiffany, president, and C. E. Putnam, vice-president, at its April meeting.

Fred L. Swartz, Fresno architect, has been appointed chairman of the publicity and educational committee of the Fresno Community Chest.

Clarence L. Sturdevant, major, corps of engineers, has been named engineer of the Seattle district by the war department, to succeed Major John S. Butler, present engineer, who will be given a new assignment.

A. W. Laird, 67, vice-president and general manager of the Potlatch (Ida.) Lumber Company, and a leading figure in the lumber industry, died in Spokane, Wash., April 30, following an illness of four months.

George W. Snedigar, general contractor of Berkeley, died in that city last Sunday. He had been critically ill for a week. Born in Illinois 66 years ago, Mr. Snedigar went to Olympia, Wash., more than 30 years ago and after remaining there for six years went to Berkeley.

S. A. Hart, formerly sanitary engineer for the City of Berkeley, is now an associate engineer on the supervision of dams for the California State Department of Public Works at Sacramento.

Harland Bartholomew, city planning engineer, has been selected by the Jose City Council to assist in the selection of a civic center site for the proposed city, county, state and federal buildings contemplated for that city. The survey will cost \$2000 which will be borne equally by the city of San Jose and Santa Clara county.

Andrew M. Jensen, consulting engineer of San Francisco and previously city engineer of Fresno, is now engineer for the Clay Products Association of Central California in the promotion of vitrified clay pipe for sewers. Jensen will continue to act as engineer on all employments secured prior to the present connection, and will maintain his headquarters at 68 Post St., San Francisco.

Robert Nordin, 717 Mills Bldg. San Francisco, has been granted a Provisional Certificate to practice architecture. The certificate was granted at the April 23 meeting of the State Board of Architectural Examiners, it is announced by Albert J. Evers, secretary of the board.

Captain Harold E. Bowen has been appointed assistant chief of the Bureau of Engineering in the Navy Department and ordered to duty at Washington, D. C., about July 6. He now is at Puget sound navy yard.

It will be the general policy of the Federal Government for the next fiscal year and the remainder of this year to increase salaries of government employees only where such increase is required by law, according to word from Washington. The announcement said other departments of the government would follow the policy of the Interior and Justice Departments in maintaining present wage scales in the government, but would not make any increases.

BUILDING PERMIT TOTALS IN PACIFIC COAST AREA FOR MONTH OF APRIL SHOWS ACTIVITIES GAIN

The following is a report of building permit totals covering Pacific Coast States as reported by executives of municipal building departments in the cities named:

CALIFORNIA

City	April, 1931 No.	Cost	April, 1930
Alameda	60	\$ 42,681	\$ 181,113
Albany	16	27,325	24,774
Alhambra	59	111,200	231,550
Annheim	19	19,576	32,801
Bakersfield	59	87,015	140,588
Berkeley	85	160,472	304,352
Beverly Hills	58	772,470	766,400
Burbank	33	51,780	102,365

CODE OF ETHICAL PRACTICE TO GOVERN BIDDING ON PRIVATE WORK WOULD INCLUDE A FEE FOR BIDDING IN PROPOSAL

A code of ethical practice for the competitive bidding and for the award of contracts on private building construction, drafted by a special committee, was presented to the Northwest Branch, Associated General Contractors of America, at their recent annual convention at St. Paul, Minn. This is one of the important auxiliaries of the A.G.C. and comprises leading contractors in all branches of construction. Twelve articles are included in the code, according to a summary by the Improvement Bulletin.

The code declares the selection of bidders to be the privilege of the architect who should choose a limited number of equally qualified bidders.

It opposes any more being made for the privilege of figuring plans, but excepts deposits to be refunded when plans are returned and excepts payment for plans desired after a reasonable number have been provided. It urges that adequate time be allowed for the general contractor to take off quantities, prepare an estimate and complete a bid.

It suggests a minimum period of 8 days for figuring theatres, schools, clubs, banks and similar structures costing up to \$25,000, and increases on a classification schedule to 30 days for structures costing in excess of \$700,000. Hotels, office buildings and apartments in the same range of cost start with 7 days and increase to 20, as do factories and loft buildings.

The time of receiving bids should not be earlier than 2 p. m. and should not be on Saturdays, Mondays, legal holidays nor on days following legal holidays. Certified checks and bidders' bonds are stated not to be necessary to guarantee bids of responsible bidders, and upon private work the architects and owners should select bidders who are responsible.

Alternates should be limited to those absolutely essential to the award of the job.

Unit prices should not be requested from competing bidders since they are difficult to quote accurately for units of concrete, excavation, forms, partitions, etc., unless the amount and character of such units and the point of sequence in a construction operation at which they will be required, is known in advance.

Refiguring Work

When bids have been opened and changes in the plans are desired, all competitors should recognize the right of the low bidder to negotiate with the owner or architects for such changes.

It is declared to be unethical, unjust and detrimental to the construction in-

dustry when a general contractor discloses to architects, owners or others the amounts of sub-bids or quotations obtained in confidence for the purpose of preparing a bid upon a general contract.

When refiguring work, when original bids have been rejected and new figures are asked, only the original bidders should be invited to bid. No refiguring should take place unless major changes shall have been made in either the plans or specifications or unless at least three months have elapsed since the original bids were submitted. When refiguring occurs, bidders should not take advantage of their competitors by making alterations in their bids disproportionate to the changes in the plans and specifications, so as to unfairly change the relative status of the original bids. It is declared that for one bidder to reduce his figure after opening so as to deprive a lower bidder of his legitimate advantage, would defeat the principle of fair competition. For an owner to permit a competing bidder to do this is unfair.

Low bidders should not have any advantage other than that which results legitimately from their low bids and any competitor should have the right to take the contract at the price bid by the low bidder.

Drafting of Contracts

All of the construction work should be included in the general contract, since one of the principal functions of the general contractor is that of manager. That function cannot be fully exercised unless he has complete control of all forces engaged upon the building, so that the work may be properly co-ordinated and efficiently carried forward. The execution of other contracts for labor and material upon a building simultaneously with the work of the general contractor is deemed an interference with, and a hindrance to, efficient and economical performance of the work of the general contractor, and increases the cost of his work.

The form of contracts should be the standard documents of the American Institute of Architects, fourth edition.

Monthly payments should be not less than 90 per cent of the value of labor and materials. When no contract is awarded, each invited bidder should be compensated on the basis of one-twentieth of one per cent of the low-price bid, with a maximum charge of \$500 and a minimum charge of \$25. This would carry into effect the policy of sharing with the owner a portion of the expense incurred in compiling a bid.

HERE—THERE EVERYWHERE

To lessen the danger of collisions, the Kansas State Highway Commission is having all of its road grading and maintenance machinery painted an aluminum color. While members of the commission can see no reason for motorists running into the machines, as they are never left on the highway after working hours, several accidents occurred last year. Several workmen were injured in the accidents, all of which happened during the working hours.

The annual meeting of the Builders' Exchange of Contra Costa County, with headquarters at Richmond, will be held June 19, it is announced by W. A. Brown, secretary, at which time the election of officers to serve for the ensuing year will be held.

Stockton is making preliminary arrangements for the annual meeting of the California section of the American Water Works Association to be held in that city in October.

Governor George White of Ohio, has signed the "yellow dog" labor contract bill which makes illegal any labor contract which attempts to forbid either employe or employer from organizing.

A tax of 1/2 mill per kilowatt-hour on all electrical energy generated in the State of Idaho is levied by a bill recently passed by the Idaho legislature.

Today we take our hats off to—The State Senate, for without a dissenting vote, that body passed Senator Fellows' San Francisco Bay bridge "loan" bill.

This carries an appropriation of \$650,000 to be advanced to the California toll bridge authority by the State. It will meet the preliminary engineering costs applied to the first actual work on the great enterprise.

The "loan," it is provided, will be repaid into the State treasury from the first proceeds from sale of the revenue bonds which have been worked out to be issued for the construction costs of the bridge. The estimated cost of the project is placed at \$75,000,000.

In anticipation of the enactment of the bill by the Legislature, the department of public works is proceeding with surveying and engineering work at Goat Island.

Research facilities of the Pittsburgh Testing Laboratory are the subject of a 14-page bulletin discussing specialized services available for research leading to product development, improvements, modern marketing and special investigation. It may be obtained from the laboratory at Pittsburgh, Pa.

It has just been announced by the division of simplified practice of the National Bureau of Standards that simplified practice recommendation R1-29 on Vitrified Paving Brick has been reaffirmed by the standing committee of the industry, without change, for another year. This recommendation, which includes plain wire-cut (vertical fiber lugless) brick, as usually laid; wire-cut lug brick (Dunn), and repressed lug brick, has been instrumental in reducing the number of sizes and varieties from 66 to 6, or 91 per cent.

Plans by Mr. Walstrum.
Contractor—P. T. Wallstrum, 217 Center St., Watsonville.
Construction expected to start May 19th.

POWER PLANTS

BOULDER CITY, Nevada.—Until May 15, 2 P. M., under Specifications No. 521-D, bids will be received by the U. S. Bureau of Reclamation, Las Vegas, Nevada, to construct transmission lines from the Hoover Dam Substation to Boulder City and to Pumping Plant No. 1, Bortone Canyon Project, Arizona-California—Nevada. The work is located near Las Vegas, Nevada, on the Los Angeles and Salt Lake Railroad of the Union Pacific System.

The work will consist of the construction of 6.33 miles of single-circuit, 33,000 volt, wood pole transmission line and 0.73 miles of single circuit 2300 volt transmission line and the placing of a telephone circuit on the poles of the 2300 volt line.

This invitation for bids does not cover the purchase of materials which are to be furnished by the Government. Materials to be furnished by the contractor, and those furnished by the Government are described in the specifications which will be a part of the contract.

Specifications obtainable from the Bureau at Las Vegas.

BRAWLEY, Imperial Co., Cal.—City will call election shortly to vote bonds of \$150,000 to finance enlargement of the present municipal power plant.

SEATTLE, Wash.—Until May 15, 19 A. M., bids will be received by the Board of Public Works, G. W. Roberge, secretary, to assemble and install hydro-electric machinery and equipment in the Diablo Power Plant; estimated cost \$250,000. The apparatus to be assembled and installed, purchased several months ago, includes two 66,700 kva. main generators; two 1500 kva. house generators; four water wheels; two 14-foot butterfly valves and auxiliary equipment. Specifications obtainable from R. H. Thompson, city engineer.

UKIAH, Mendocino Co., Cal.—J. H. Baxter & Co., 323 Montgomery St., San Francisco, awarded contract by city council to furnish one carload of mixed poles, f. o. b. cars, Ukiah, as follows:

(a) 25-50' Western Red Cedar Poles, \$17.65 each.
(b) 45' Western Red Cedar Poles in sufficient quantity to make carload lot, \$15.80 each.

All poles to be butt treated with grade one creosote oil, guaranteed 1/2" penetration. Treatment to comply strictly with Western Red Cedar Association butt treating specification as adopted January 13, 1925.

Complete list of bids follows:

J. H. Baxter, San Francisco (a) \$17.65; (b) \$15.80.
Niedermeyer & Martin Lumber Co., Portland, Ore. (a) \$20.72; (b) \$16.79.
James L. Hall, San Francisco (a) \$19.50; (b) \$16.85.

Chas. R. McCormick Lumber Co., San Francisco, (a) \$18.10; (b) \$15.60.
Hetcher & Hetcher, Sand Point, Idaho (a) \$24.25; (b) \$20.75.

May 4, 1931
To Vote Bonds May 11.
CITY HALL. Cost, \$15,000
LOS BANOS, Merced Co., Cal.
Two-story brick and reinforced concrete combination fire house and city hall.
Owner—City of Los Banos.
Plans by W. E. Bedesen (engineer).
Shaffer Bldg., Merced.

PUBLIC BUILDINGS, FIRE HOUSES AND JAILS

Sub-Bids Being Taken.
RESIDENCE. Cost, \$6000
SAN CARLOS, San Mateo Co., Calif.
One-story and basement frame and stucco residence (5 rooms).
Owner and Builder—John McCarthy, 1342 Funston Ave., San Francisco.
Architect—Not Given.
Composition and the roofing, gas and hot air heating system.

To Be Done By Day's Work.
RESIDENCE. Cost, \$10,000
BERKELEY, Alameda Co., Cal. 475
Boystown Elevator.
Two-story and basement frame and stucco residence (7 rooms).
Owner—J. P. Hayes, care architect.
Plans by S. Schindler, 350 N. Hampton Road, Berkeley.

Plastering Contract Awarded.
RESIDENCE. Cost, \$12,000
SAN MATEO, San Mateo Co., Calif.
Baywood Park.
Two-story and basement frame and stucco residence (7 rooms and 3 baths).
Owner & Builder—Robert Smith, 1493 Burlingame Ave., Burlingame.
Plans by Grimes & Grimes, Balovich Bldg., San Mateo.
Plastering—Charles Smith, 666 Mission St., San Francisco.
Other awards will be made shortly. Work is being done by day's labor by owner.

To Be Done By Day's Work.
RESIDENCE. Cost, \$5,000
OAKLAND, Alameda Co., Cal. SW
Trestle Glen and Brookwood Road.
Two-story and basement frame and stucco residence (7 rooms).
Owner and Builder—Jas. L. Rich, 1175 Stanford Ave., Oakland.
Plans by Owner.

Preparing Preliminary Plans.
MUSEUM. Cost, \$200,000
SAN DIEGO, Cal. Balboa Park.
Frisch museum.
Owner—City of San Diego.
Architect—Wm. T. Johnson, San Diego Trust & Savings Bank Bldg., San Diego.

TEHACHAPI, Kern Co., Calif.—Until Monday, May 18, bids will be received by the Kern County supervisors, Bakersfield, for the erection of the Tehachapi branch library.

SAN FRANCISCO—Fink & Schindler Co., 228 13th Street, San Francisco, at \$16,937.10 awarded contract by State Purchasing dept., Sacramento, for interior partitions, etc., in State Building, San Francisco. Following is a complete list of the bids received:
Fink & Schindler \$16,937.10
Diamond Show Case Co. 18,406
Encke Mfg. Co. 19,475
Weber American Co. 19,733
Braas & Kuhn 21,828
R. Brandlein 22,397
Home Mfg. Co. 29,639

RICHMOND, Contra Costa Co., Cal.—Wm. Harris, 305 Ripley Ave., Rich-

mond, at \$208.51 awarded contract by city council for painting offices of police department. Other bids: Charles Swartz, \$225; Lambie & Lambie, \$385; Joseph Burdon & Son, \$388.

Bids Opened.
LEGION BLDG. Cost, \$2,500,000
SAN FRANCISCO. Civic Center.
Four-story and basement concrete structure. L. L. L. Building.
OPERA HOUSE. Cost, \$2,500,000
Six-story class A opera house, seating capacity, 4,000; standing room, 500.

Owner—City and County of San Francisco (S. F. War Memorial).
Architect—G. A. Lansburgh, 110 Montgomery St., and Arthur Brown, 251 Kearny Street.

Mrs. of Const.—Lindgren & Swinerton, Inc., 225 Bush St.
Following is a complete list of bids:

 turers of laminated silicon-steel f
 cores, insulated copper wire for th
 coils, coil and core insulators suc
 varnishes, paper and cloth insulat
 etc., bettolic condenser plates, ename
 ed and perforated sheets for makin
 the exterior covers.

TRADE LITERATURE

Methods of applying Tervia A and
 B, Tervia Retread and Tervia-Lithi
 are outlined in three recent bulletin
 published by The Barrett Company
 40 Rector St., New York City.

Information of practical value to
 the builder in the construction of a
 oil heated home or building is con-
 tained in the "Handbook of Oil
 Burning" just published by the Ameri-
 can Oil Burner Association. In addi-
 tion to authoritative information
 charts, tables and descriptive illustra-
 tions relating to the use of oil as a
 fuel, the book discusses installation
 and construction details, ordinances
 and regulations on oil burners and
 equipment, tank installations, the de-
 termination of heating capacity re-
 quirements and the construction of
 the basement. A wealth of general
 information such as the chemistry of
 combustion and flame, fundamentals
 of heat and heat transfer, compara-
 tive fuel costs and like subjects also
 is included. Printed in pocket size
 for convenience, the new handbook
 contains 629 pages including 123 tables
 and 535 illustrations and charts spread
 over 24 chapters. It can be had (\$3.00)
 at the Association headquarters, 312
 Madison Avenue, New York.

Cleveland Rock Drill Co., 3734 East
 78th St., Cleveland, Ohio, has issued a
 122-page pocket-size illustrated vol-
 ume, "The Driller's Handbook," com-
 piled by E. L. Cidham and selling at
 \$1 per copy. This is designed for the
 use of drill operators and takes up the
 subjects of lubrication, operation,
 shanks and bits, hoses and couplings,
 modern rock drill types and explosives
 and blasting. Many illustrations are
 included.

"Concrete Facts for Concrete Con-
 tractors" is a new 48-page booklet
 which has been published by the Por-
 tland Cement Association, 33 W. Grand
 Ave., Chicago. It details the details of
 concrete making, including facts on col-
 ored concrete, special surface finishes,
 forms, watertight concrete and cold
 weather construction. The methods
 described are thoroughly practical and
 are being used by an increasing num-
 ber of present-day contractors.

Engineering News Section

SAN FRANCISCO—Until May 29, 10 P. M., bids will be received by J. Hester, Secretary, Board of Public Works, to construct the Sloat viaduct at the crossing of Sunset Boulevard; estimated cost \$30,000. Project involves:

- 1) 25,350 cu. yds. excavation;
- 2) 4,150 cu. yds. Class B 2500-lb. concrete in viaduct, piers, abutments, walls, etc.
- 3) 43 cu. yds. Class A 300-lb. concrete in railing;
- 4) 840,000 lbs. bar reinf. steel;
- 5) 16,900 sq. ft. — point 1½" concrete wearing surface; 1½" binder;
- 6) 13,300 lbs. bronze bearing plates;
- 7) 6880 sq. ft. 3-ply waterproofing membrane with asph. protective coat;
- 8) 18,700 sq. ft. 8" waterproof macadam pavement with 2-in. asph. conc. wearing surface;
- 9) 373 lin. ft. 15" VCP storm drain;
- 10) 895 lin. ft. 12" VCP storm drain;
- 11) 110 lin. ft. 10" VCP culverts;
- 12) 5 brick manholes;
- 13) 4 brick catchbasins;
- 14) electrical work including controllers (lump sum bid).

Certified check 10% payable to Clerk of the Board of Supervisors required. All bids. Plans obtainable from the Bureau of Engineering, 3rd Floor, City Hall, on deposit of \$10, returnable.

LOS ANGELES, Cal.—Until 5 P. M., May 18, bids will be received by county supervisors to widen the bridge on Huntington Drive, over Santa Anita Wash. This bridge will be located partly in Monrovia and partly in Aradale. The county will pay all costs. The structure is a reinforced concrete girder bridge, consisting of six 30-ft. spans. The roadway will be widened 4 each side to increase the roadway width from 26 ft. to 70 ft. There will be a 5 ft. walk on each side. W. D. Armstrong, county bridge engineer, 303 Hall of Records, county clerk.

SAN DIEGO COUNTY, Cal.—David Johns, Santa Monica, at \$138,678 awarded contract by State Highway Commission to construct a reinforced concrete girder bridge across San Diego river about 1 mile north of Del Mar, consisting of eleven 54-ft. spans on concrete piers and abutments with wing walls, all on pile foundations. All bids published in issue of April 19.

PLACER COUNTY, Cal.—George J. Ulrich Const. Co., Modesto, at \$13,973 awarded contract by State Highway Commission to construct a reinforced concrete girder bridge across Conner Creek, 3.6 miles north of Lincoln, consisting of six 34-ft. 6-in. spans on reinforced concrete pile bents. Unit bids published in issue of April 29.

SAN FRANCISCO—State Senate has passed bill providing a state loan of \$550,000 for preliminary engineering work in connection with the San Francisco Bay Bridge, a \$75,000,000 project. These funds will be returned to the state from the first sale of bridge revenue bonds.

VISALIA, Tulare Co., Cal.—Pacific Properties and Construction Co., 3747 Woodruff ave., Oakland, at \$12,972.83 for labor only, (material to be furnished by the county, estimated at \$12,584.35) awarded contract by county supervisors to construct reinforced concrete bridge No. 90 in Dinuba Blvd., over St. Johns River, involving:

- (1) 576.59 cu. yds. class A concrete, including excavation;
- (2) 47.59 cu. yds. class B concrete;
- (3) 458.95 cu. yds. class A concrete in pavement;
- (4) 1632 lin. ft. concrete piling (driving only);
- (5) 4500 cu. yds. earth fill, approaches (6) 4500 cu. yds. earth fill, approaches

All the material to be used in the construction of the bridge will be furnished by the County of Tulare f.o.b. Pacific Railroad either of the Southern Pacific Railroad or of the Santa Fe Railroad. Complete list of bids follows:

Pacific Properties and Construction Co., Oakland.....	\$12,972.83
Fred Kame, Visalia.....	17,703.35
C. L. Clark & C. E. Dougherty, Visalia.....	18,050.47
G. A. Graham, Bakersfield.....	18,656.02
Earl Bowen, Strathmore.....	18,792.97
R. Hodgson and Sons, Porterville.....	19,965.46

TRINITY COUNTY, Calif.—Whited & Whited, Santa Rosa, at \$7,924 awarded contract by State Highway Commission to construct a reinforced concrete girder bridge across Browns Creek, consisting of one 32-ft. 6-in. span on concrete abutments with wing walls.

SHASTA COUNTY, Calif.—J. P. Brennan, Redding, at \$49,161 awarded contract by State Highway Commission to construct bridge across Clear Creek about 5 miles south of Redding, consisting of two 50-ft. steel stringer spans on concrete piers with pile foundations and eleven 42-ft. steel stringer spans on concrete pile bents.

HUMBOLDT COUNTY, Calif.—Smith Bros. Co., Eureka, at \$106,150, awarded contract by State Highway Commission to construct a bridge across South Fork of Eel River at Dyerville, consisting of one 290-ft. thru steel truss span, two 60-ft. reinforced concrete girder spans, four 45-ft. 6-in. reinforced concrete girder spans and one 23-foot reinforced concrete girder span on concrete piers, concrete bents and a concrete abutment.

SAN JOSE, Santa Clara Co., Cal.—Until May 25, 4 P. M., bids will be received by C. R. Goodwin, city manager, to construct reinforced concrete bridge over Guadalupe river at Home-West Virginia Streets. Certified check 10% payable to city required with bid. Plans obtainable from Wm. Popp, city engineer, on deposit of \$10, of which \$5 is returnable.

TRINITY COUNTY, Cal.—F. H. Nielsen, Orland, at \$38,089 submitted

low bid May 6 to State Highway Commission to construct bridge across North Fork of the Trinity River near Helena, composed of one 150 ft. through steel truss span and two 47 ft. 2 inch concrete girder spans on concrete piers and abutments. Complete lists of bids follow:

F. H. Nielsen, Orland.....	\$38,089
A. T. Howe, Santa Rosa.....	42,551
Ralph McLeran Co., S. F.....	43,433
P. J. Maurer, Eureka.....	43,653
J. Berlinger, Orland.....	45,672
E. B. McKenzie, Red Bluff.....	55,700
A. Young, Yreka.....	Not totaled

DREDGING, HARBOR WORKS & EXCAVATIONS

LONG BEACH, Calif.—Consulting Engineer R. D. Van Alstine, 410 E 9th St., Long Beach, has completed plans for the new Silver Spray Pleasure Pier that is to extend from Chestnut Place to Cedar Walk for the Neptune Pier Co. It is to be a solid fill type 1464 feet long and 461 feet wide and will involve the following:

- 60,000 tons of rock;
- 650,000 cu. yds. of hydraulic fill;
- 2,000 tons of steelwork;
- 9,000 cu. yds. of concrete;
- 70,000 lin. ft. of wood piling.

Work is planned to start about June 1st and will cost approximately \$1,000,000.

SACRAMENTO, Cal.—American River Flood Control District will vote in June on the proposal to issue bonds of \$775,000 to finance flood control work in the American River. The total cost of the work is estimated at \$1,125,000 of which the state and federal governments will each pay \$175,000 and the city of Sacramento approximately \$150,000.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Cal.—H. Johansen, Turlock, at \$1,159.56 awarded contract by Turlock Irrigation District for improvements in Improvement District No. 64, involving: 11,872.2 sq. ft. 2-in. concrete canal lining; 4 concrete structures, involving 5.27 cu. yds. concrete; 5 concrete structures, involving 5 cu. yds. concrete. This work will be paid for in cash by property owners.

TURLOCK, Stanislaus Co., Cal.—Aldrin & Anderson, Turlock, at \$2,218.05 awarded contract by Turlock Irrigation District for improvements in Improvement District No. 23, involving: 17,670 sq. ft. 2-in. concrete canal lining; 4 concrete structures, involving 4.74 cu. yds. concrete; 17 concrete structures, involving 17 cu. yds. concrete.

TURLOCK, Stanislaus Co., Cal.—H. Johansen, Turlock, at \$843.45 awarded contract by Turlock Irrigation District for improvements in Improvement Dist. No. 77, involving 705 lin. ft. 30-inch diameter concrete pipe.

STREET LIGHTING SYSTEMS

SAN FRANCISCO—Alta Elec. Co., Inc., 938 Howard St., at \$14,940 awarded contract by Board of Public Works to install street lighting system in Junipero Serra Blvd.

SAN FRANCISCO—Weidental-Gosliner Electric Works, 353 19th St., at \$4,024 awarded contract by Board of Public Works to install street lighting system in Portola Drive between 24th Street and Evelyn Way.

MACHINERY AND EQUIPMENT

SACRAMENTO, Cal.—Until May 7, 8:15 P. M., bids will be received by H. G. Denton, city clerk to furnish and deliver one six- or eight-cylinder 4-door sedan automobile. Cert. check 5% payable to City Controller required with bid. Specifications obtainable from clerk.

OAKLAND, Calif.—Allis-Chalmers Mfg. Co., Rialto Bldg., San Francisco, at \$2,645, with pump add \$50, submitted low bid to East Bay Municipal Utility District to furnish and deliver one 30-hp. caterpillar tractor. Robinson Tractor Co., 1705 E. 15th St., Oakland, at \$2,700 only other bidder. Taken under advisement.

RAILROADS

SAN FRANCISCO—Market Street Railway Co., 58 Sutter st., authorized by supervisors to extend its Turk street line out Turk and Balboa Sts., a distance of 2 miles, with the understanding that the railway company pay \$17,000 for reduction of the grade on Turk St., between Broderick and Baker Sts., and the grade at 24th Ave. and Balboa St. The line is to extend to a point between 39th and 31st Aves.

EQUIPMENT

LIVERMORE, Alameda Co., Calif.—H. L. Anderson Co., Berkeley, at \$2,500 submitted low bid to city council to furnish one combination hose wagon and pump for fire department. Other bids, all taken under advisement, were: Pacific Fire Extinguisher Co., San Francisco, \$2,675; S. S. Albright Co., Sacramento, \$3,050.

PIPE LINES, WELLS, ETC.

SAN FRANCISCO—Time for opening bids to construct the San Joaquin Valley Pipe Line in connection with the Hetch Hetchy project has been extended by the Board of Public Works from May 6 to May 20. A complete list of the quantities involved in this project will be found in a separate article on page five of this issue.

KETTLEMAN HILLS, Cal.—Macco Construction Co., 815 Ocean Ave., Clearwater, awarded contract by Kettleman North Dome Association, 719 Richfield Oil Bldg., Los Angeles, at about \$20,000 to construct pipe line extensions in Kettleman Hills in connection with pipe line and storage project of the association which embraces fifteen oil producing oil companies operating in that field. The pipe has been purchased by the association.

Contract for the pipe has been awarded as follows:

Western Pipe & Steel Corp., Los Angeles—7500 ft. 16-in. A. N., 2000 ft. 14-in. 3-16-in., 2500 ft. 12-in. 3-16-in., and 2500 ft. 16-in. No. 10; pipe to be butt welded in the shop with lap welding in the field.

Western Pipe Steel of San Francisco—6000 ft. 16-in. 3-16-in.

A. C. Smith Corp., Los Angeles—4500 ft. of 12-in. and 14-in. pipe.

The Republic Steel Corp. was also given a portion of the pipe order.

SANTA BARBARA, Calif.—Lyon Bros., 1363 S. Carmona Ave., Los Angeles, submitted low bid to city council at \$4119 for drilling and casing one gravel envelope well for the water department. The contract may call for one or more but not more than six such wells. Other bids were: Roscoe Moss Co., \$4875; Hatherly & Palm, \$6034; Western Well Drilling Co., \$7,485. Taken under advisement.

SEWERS AND SEWAGE DISPOSAL PLANTS

LONG BEACH, Cal.—The Long Beach City Council has selected vitrified clay pipe of heavy type, for the North Long Beach sewer system. Plans and specifications for this system, estimated to cost between \$600,000 and \$700,000, have been completed by the City Engineer H. Paterson. The project involves about 90 miles of trenching. The city council is discussing a proposal to use local unemployed instead of machinery in trench work.

PASADENA, Los Angeles Co., Cal.—City Engineer Geo. K. Hooper is preparing specifications for the installation of a new compressor to be installed at the sewage disposal plant. The cost is estimated at \$20,000.

MONTREY, Monterey Co., Cal.—City council has started proceedings for the installation of a sewer system in Oak Grove, west of Park Ave. An improvement district will be organized to finance construction.

CAPITOLA, Santa Cruz Co., Cal.—Election will be held May 12 in Capitola-Soguel Sanitary District to vote bonds of \$56,000 to finance construction of a trunk line sewer and sewer outlet 1500 ft. from the shore at Monterey Bay.

FRESNO, Fresno Co., Calif.—Until May 14, 10:30 A. M., bids will be received by H. S. Foster, city clerk, (119-D) to construct 6-inch vitrified clay pipe sewer in portions of Belmont Ave., including 4-in. vit. clay pipe connections; 2 concrete manholes with c. frames and covers; 4-in. on 6-in. wye branches. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk, Jean L. Vincenz, city engineer.

FAIRFIELD, Solano Co., Cal.—Election will be held May 23 to vote bonds of \$6,000 to finance reconstruction of outfall sewer. A. M. Jensen, engineer, 68 Post St., San Francisco.

BRAWLEY, Imperial Co., Cal.—City will call election to vote bonds of \$30,000 to finance extensions to sewer system.

SANTA MARIA, Santa Barbara Co., Cal.—Until May 18, 7:30 P. M., bids will be received by city clerk, to construct vitrified sewer extension in North Broadway. The project will be financed in two units, a portion under the 1911 Bond Act and a portion from the City Treasury, as follows:

1911 Bond Act

- (1) 5650 ft. 6" vitrified clay pipe sewer
- (2) 465 ft. 8" vitrified clay pipe sewer
- (3) 519 ft. 10" vitrified clay pipe sewer
- (4) 16 manholes;
- (5) 4 flush tanks;
- (6) 2 lampholes.

To Be Financed From City Treasury

- (1) 1540 ft. 12" vitrified clay pipe sewer;
- (2) 1941 ft. 10" vitrified clay pipe sewer;
- (3) 341 ft. 6" vitrified clay pipe sewer;

- (4) 500 ft. 4" cast iron pressure sewer;
 - (5) 10 manholes;
 - (6) small pumping plant.
- Certified check 10% payable to city required with bid. Plans obtainable from city clerk. Payment of \$10, not returnable. J. K. Peterson, city engineer.

STOCKTON, San Joaquin Co., Cal.—McGraw, 425 Lexington Ave., Stockton, at \$4,452.92 awarded contract by city council to construct storm water sewers in portions of Ison, San Joaquin and Center Sts. Complete tabulation of unit bids received on this project published in issue of April 25.

MISCELLANEOUS CONSTRUCTION

OAKLAND, Calif.—County supervisors have appropriated \$200,000 toward construction of the proposed level tunnel between Alameda and Contra Costa Counties. The money available from the gasoline tax fund. Plans for the tunnel are being prepared by County Surveyor George Posey.

ESTACADA, Ore.—Sullivan & Doyle, Oregon City, awarded contracts by Portland Electric Power Co., to construct 4-miles tunnel through O. Grove Mountain to bring water from the upper fork of the Clackam river to the dam in Oak Grove river to generate power. The power company will spend about \$300,000 in the work this year. The Sullivan & Doyle contract calls for 3,500-ft. of 21,000-ft. tunnel. It will be about 1 ft. 1 dia. with a drop of 1-ft. 1 in. each 1,000-ft. and will allow a flow of 300-second feet of water. Work is under the supervision of W. L. Sharp of the Portland Electric Power Co.

SAN JOSE, Santa Clara Co., Cal.—Engineering Department of the Southern Pacific Railroad, 65 Market Street, San Francisco, is preparing plans for the second subway in the S. P. re-location project in The Alameda. Bids for construction will be asked with the settlement of property suits which can be adjusted. City Manager C. B. Gordon recently decided, with 34 trustees, after acceptance of the plans from the railroad by the city council.

WATER WORKS

EXETER, Tulare Co., Cal.—Until May 18, 5 P. M., bids will be received by T. E. Aubrey, city clerk, to furnish and install one deep well turbine pump, one horizontal centrifugal booster pump and testing and developing one well. This work will be financed from the \$24,000 bond issue recently sold by the city by trustees. Certified check 5% required with bid. Specifications on file in office of city clerk.

SAN FRANCISCO—Time for opening bids to construct the San Joaquin Valley Pipe Line in connection with the Hetch Hetchy project has been extended by the Board of Public Works from May 6 to May 20. A complete list of the quantities involved in this project was published on page five, issue of May 1.

SAN MATEO COUNTY, Calif.—See "Streets and Highways," this issue. Bids wanted May 27 by State Highway Commission to construct under-grade crossing near Henderson Station, including installation of drainage system, pumping equipment and grading and paving 0.4 mile.

LISTOGA, Napa Co., Calif.—City bonds of \$15,000 to finance improvements to water system, involving construction of a pipe line to cost \$10,000 and improvements to reservoir at Canyon to cost \$3,000.

SAN FRANCISCO—Consolidated St. Corp., 273 Seventh St., at \$77,070 awarded contract by Board of Public Works to construct Section No. 1 of University Mound Pipe Line. Complete list of unit and total bids recorded on this project published in list of April 16.

FRESNO, Fresno Co., Cal.—City Commissioners, at informal meeting, tentatively agreed to provide \$50,000 in 1931-32 budget to finance additions and betterments to the municipal water system. Jean L. Vincenz, city engineer and Claude Weekes, manager of the water system.

SAN FRANCISCO—See tentative building program story on page one of this issue. Construction contemplated by the California State Board of Harbor Commissioners. Frank G. White, chief engineer of the commission, Ferry Bldg., San Francisco.

SANGER, Fresno Co., Cal.—Until May 13, 8 P. M., bids will be received for Niles, City Clerk, to furnish and install deep well turbine pump on cement foundation at Plant No. 2, Block 81, Sanger. Pump for 14-in. standard double well casing; set 10-80 ft. from base of discharge well to top of bowl assembly and equipped with 10-ft. of suction pipe, screen of standard make; electrically controlled automatic oiler to be furnished with pump; pump capacity shall not be less than 700 gals. per minute at a total head of 100 feet of which 52 feet will be estimated well head; pump to be direct connected to vertical auto-start electric motor, designed to operate under 440 volts, 3-phase, 60-cycle current. Certified check 10% payable to city required with bid. Further information obtainable from clerk.

BATTLE, Wash.—Elliott, Stroud & Brook, P. O. Box 158, La Mesa, Cal., at \$215 Orcas St., Seattle, at \$384.35 (reted steel pipe) submitted low bid the city council to construct concrete lined reservoir and concrete foundations for two steel tanks in vicinity of Sixth Ave. southwest and Verdale St. Project involves a 75,000 gallon reservoir and two standpipes, each with a capacity of 1,000 gallons. Following is a complete list of bids, all being taken under advertisement.

Riveted Steel Pipe	
Elliott, Stroud Bros. and Sea-	
brook	\$334,350
Ernst-Knudsen Co.	408,367

Guthrie Co., Inc.	475,342

FAIRFIELD, Solano Co., Cal.—Election will be held May 23 to vote bonds of \$42,000 to finance improvements to water system, including sinking new deep well, construct tank and tower, install pump and extend water mains. A. M. Jensen, engineer, 68 Post St., San Francisco.

LINDEN, San Joaquin Co., Cal.—Hearing will be held by the State Bond Commission to consider proposal of the Linden Irrigation District to issue bonds of \$30,000 to finance installation of a pumping plant at Fellota and for other miscellaneous irrigation developments. Fred H. Tibbets, engineer, Alaska Commercial Building, San Francisco has submitted tentative plans for the contemplated improvements.

BRAWLEY, Imperial Co., Cal.—City will call election shortly to vote bonds of \$20,000 for a water tank in the east section of the city, including pipe connections and \$30, for water extensions.

FRESNO, Fresno Co., Cal.—Until May 14, 10:30 a. m., bids will be received by H. S. Foster, city clerk, for:

One Deep Well Turbine Pump, 700 G. P. M., 150 ft. head with Air line and gauge all installed; with direct connected or built in double end ventilated, or equal, Motor of sufficient H. P., 440 Volt, 3 phase, 60 cycle, 1750 R. P. M. to start directly across line; with G. E. Magnetic Switch or equal, installed complete less electric wiring.

The bids submitted on the above shall be made subject to the condition that the successful bidder shall purchase from the City of Fresno one 8-inch Byron-Jackson Centrifugal Pump, direct connected to 1-100 H. P. G. L. motor, which may be seen at Station No. 15.

Also on Two Deep Well Turbine Pumps, 500 G. P. M., 140 ft. head, with air lines and gauges all installed, with direct connected or built in double end ventilated, or equal, Motor of sufficient H. P., 440 Volt, 3-phase, 60 cycle, 1750 R. P. M. to start directly across line; and with G. E. Magnetic Switch or equal, installed complete less electric wiring.

The bids submitted on the 2 pumps above mentioned shall be made subject to the condition that the successful bidder will purchase from the City of Fresno one 8-inch Byron-Jackson Centrifugal Pump, direct connected to 1-100 H. P. Westinghouse C. C. L. Motor which may be seen at Station No. 21.

Certified check 10% payable to city required with bid. Specifications on file in office of city clerk, Jean L. Vincenz, city engineer, Claude Weekes, manager of municipal water department.

MODESTO, Stanislaus Co., Calif.—Until May 12, 7:30 P. M., bids will be received by H. E. Gragg, city clerk, to furnish two steel sand traps complete. Certified check 10% payable to Mayor required with bid. Specifications on file in office of clerk, Frank J. Rossi, city engineer.

CORCORAN, Kings Co., Cal.—K. S. Battelle, Corcoran, at \$1,122.26 awarded contract by city council to furnish and install one new turbine pump and motor installed complete with wiring and hand starter. Pump to have 120-ft. setting with 50-ft. of suction; capacity of 500-g.p.m. Motor 25-hp., 220-volts, 3-phase. Complete list of bids follows:

K. S. Battelle	\$1,122
Sterling Pump Co., Stockton	1,167
Fomina Pump Co., Pomona	1,177
Villemon & Job Machine, Wks., Porterville	1,313

CORCORAN, Kings Co., Cal.—Grinnell Co., 5th and Brannan Sts., San Francisco, at \$1,638.02 awarded contract by city council to furnish water pipe, as follows: 1,000 ft. 8-in. c. l. bell and spigot pipe, class B; 304 ft. 6-in. do.; 3 8x8x6-in. tees; 1 6x8-in. increaser; 1 8x8x1-in. tee.

Complete list of bids follows:
Grinnell Company \$1,638.02
American C. I. Pipe Co. 1,667.76
Pacific States C. I. Pipe Co. 1,689.55
C. G. Claussen Co. 1,709.44
U. S. C. I. Pipe & Fdy. Co. 1,722.23

PLAYGROUNDS & PARKS

STOCKTON, San Joaquin Co., Cal.—City Engineer, Lyda Burton, has completed plans for ornamental fencing at the east end of Yosemite Lake in American Legion and a call for bids will be issued by the city council in the immediate future.

STREETS AND HIGHWAYS

PALO ALTO, Santa Clara Co., Cal.—City council has started proceedings to pave thirteen streets this summer, in accordance with recommendations submitted by J. F. Byxbee, city engineer. The cost is estimated at \$98,750.35, including \$11,900 to be paid by city for improvements fronting city property. The streets to be paved are: cement concrete pavements, curbs, sidewalks, sewer and water connections, and small extensions to the storm water system. Streets included are: Grant, bet. Second and the Southern Pacific right-of-way; Alhambra, bet. Stanford and California; Euterpe, bet. Cowper and Webster; Palo Alto, bet. Middlefield - Fulton and Everett - Guinda; Marlowe, bet. University and Palo Alto; Boyce, bet. Channing and Forest; Melville, bet. Middlefield and Channing; Cecal, bet. Hopkins and Harker; Pine, bet. Hopkins and Harker; Harker, bet. Hutchinson and Newell; Hopkins between Harriet and Newell; Channing, bet. Melville and Newell; Nevada, bet. High and Ramona.

Portions of streets to be paid for by the city are: Palo Alto, bet. Middlefield-Fulton and Everett-Guinda, \$3500; Channing, fronting Eleanora Park, \$2900; Hopkins, fronting Rinconada Park, \$5500.

PLACER COUNTY, Cal.—Frederickson & Watson & Frederickson Bros., 354 Hobart St., Oakland, at \$147,845 submitted low bid May 6 to State Highway Commission to grade and pave with Portland cement concrete 1.4 miles between Wise Power House and Auburn. Complete list of bids follows:

Frederickson & Watson & Frederickson Bros.	\$147,855
W. H. Hauser, Oakland	161,787
Granfield, Farrar & Carlin, San Francisco	171,307
C. W. Wood, Stockton	174,639
Clark & Henery Co., S. F.	182,063
Geo. Pollock Co., Sacramento	184,422
McCray Co., Los Angeles	195,121
Gist & Bell, Arcadia	209,886

GILROY, Santa Clara Co., Calif.—City Engineer Ray Fisher instructed to prepare plans to pave 20 additional blocks of streets, including Monterey 2nd to north city limits; Monterey 9th to south city limits; Seventh, from Elginberry to Church; Church, 6th to 7th; Rosanna, 6th to 7th; Railroad, Lewis to Old Gilroy; Lewis to Martin; Old Gilroy from Monterey to east city limits, resurface present paving and widen three feet, from Maple St. to city limits; Fourth, from Dowdy to Hanna; and Seventh St. from Monterey to South Pacific property.

MONTEREY COUNTY, Cal.—Pacific Tank Lines, Inc., Los Angeles, Cal., at \$9,338 submitted low bid May 6 to State Highway Commission to treat with heavy fuel oil to a width of 8 ft. on each side of the existing pavement, 10.1 miles between Chualar and Salinas. Following is a complete list of bids:

Angelo Pacific Tank Lines, Inc., Los Angeles	\$ 9,338
C. W. Wood, Stockton	15,104
J. F. Knapp, Oakland	15,497
Granite Const. Co., Watsonville	16,505
F. W. Nighbert, Bakersfield	17,305
Cornwall Const. Co., Santa Barbara	17,294
C. A. LaBeeze, South Gate	18,148
U. B. Lee, San Leandro	19,203
W. A. Dontanville, Salinas	19,371

SAN MATEO COUNTY, Cal.—Until May 18, 2 P. M., bids will be received by Jno. H. Skaggs, district engineer, state Highway Commission, State Bldg., San Francisco, for cement concrete pavement at the Colma Underpass of the Southern Pacific Railway. Specifications obtainable from district engineer.

SANTA BARBARA, Cal.—Henry C. Dalesi, 1125 Olive St., San Luis Obispo, awarded contract by the county supervisors at \$11,737.56 to improve Turnpike Road, consisting of a graded and drained highway to Goleta Foot-hill Blvd., from Cienigias Road 6200 lin. ft. west.

MONTEREY COUNTY, Cal.—Cornwall Const. Co., 215 E. Mason Street, Santa Barbara, and Granite Const. Co., Watsonville, at \$4,976.49 submitted identical bids to L. H. Gilson, district engineer, State Highway Commission, San Luis Obispo, to treat with heavy fuel oil, 3.5 miles on both sides of existing pavement, between San Lucas and a point 3.5 miles north. Taken under advisement.

SAN JOSE, Santa Clara Co., Cal.—Proceedings are under way by the city council to widen W. Santa Clara Street from Market Street, out to the bridge, including the installation of electroliers. The cost is estimated at \$8.95 per front foot or approximately \$35,000. Wm. Popp is city engineer.

DOUGLAS COUNTY, Nevada—Until May 28, 3 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading Section D of Route 3, Glenbrook National Forest Highway in Tahoe National Forest, 4.164 miles in length, involving:

69,000 cu. yds. unclass. excavation;	
757 cu. yds. unclass. excav. for struc.;	
30 cu. yds. foundation fill;	
33,200 sta. yds. overhaul;	
4.164 miles finish earth graded road;	
100 cu. yds. class A concrete;	
64.5 cu. yds. class B concrete;	
8,900 lts. reinforcing steel;	
65 cu. yds. cement rubble masonry;	
1,982 lin. ft. corr. metal pipe;	
38 cu. yds. rand-laid rock embankment	
70 right of way monuments;	
114 lin. ft. tunnel excav. unlined sec.;	
50 lin. ft. tunnel excav. lined sec.;	
50 lin. ft. class A conc. tunnel lining;	
2 stone arch rings complete.	

Plans obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to the Federal Reserve Bank of San Francisco.

WASHOE COUNTY, Nevada—Until May 28, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading sections C and D of Route 1, Lake Tahoe National Forest Highway in the Tahoe National Forest, 3.125 miles in length, involving:

18.56 acres clearing;

28,750 cu. yds. unclass. excavation;	
680 cu. yds. unclass. excav. for struc.;	
12,290 sta. yds. overhaul;	
3.125 miles finish earth graded road;	
12 right of way monuments;	
268.4 cu. yds. class A concrete;	
38 cu. yds. class B concrete;	
24,500 lts. reinforcing steel;	
804 lin. ft. corr. metal pipe, remove,	
clean and stockpile;	
200 lin. ft. existing 31. M. pipe.	

Plans obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to the Federal Reserve Bank of San Francisco.

YUBA CITY, Sutter Co., Cal.—S. M. McGraw, 425 Leighton Ave., Stockton, at \$13,100 submitted the only bid to the city council to widen Plumas St. bet. Reeves and Forbes Avenues. Taken under advisement.

SAN FRANCISCO.—Pacific States Construction Co., Call Bldg., at \$28,167.25 submitted low bid to Board of Public Works to pave Section C, Bayshore Blvd. See separate unit bid listing on page five of this issue.

REDWOOD CITY, San Mateo Co., Cal.—Frank Bryant, 2911 23rd St., San Francisco, at \$5,554 awarded contract by county supervisors for grading section of Sneath Road, approximately 2,500-ft. in length. Complete list of bids received follows:

Frank Bryant	\$5,554
R. L. Oakley, Palo Alto	5,711
W. A. Dontanville, Salinas	5,800
Chas. N. Chittenden, Napa	6,105
J. S. Baker, Burlingame	6,408
Grandfield, Farrar and Carlin, San Francisco	7,538

MENLO PARK, San Mateo Co., Cal.—City council declares intention (31-3) to open, extend and widen Live Oak Avenue from present SW termination to University Drive, 1915 Bond Act. Hearing May 19. Fannie I. Kurtz, city clerk. Bert J. Mehl, city engineer.

MENLO PARK, San Mateo Co., Cal.—City council declares intention (31-4) to improve Oak Grove Ave., Pine St., Cherry Ave., Laurel St., Ravenswood Ave., Mills St. and Glenwood Ave., involving grading; pave with 1½ inch emulsified asphalt concrete surface on 4-in. waterbound rock base and resurfacing existing pavement with 1½-in. emulsified asphalt; concrete curbs, walks, driveway entrances, vit. clay pipe sanitary sewer connections; corr. iron part circle culverts. 1911 Act. Bond Act 1915. Hearing May 19. Fannie I. Kurtz, city clerk. Bert J. Mehl, city engineer.

BERKELEY, Alameda Co., Calif.—Until May 13, 10 A. M., bids will be received by Florence E. Turner, city clerk, to improve NE corner of Warring and Derby Sts. Certified check 10% payable to city required with bid.

Specifications on file in office of clerk and obtainable from Harry Gooding, city engineer, on deposit of \$10, returnable.

SACRAMENTO, Cal.—Until May 7, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to improve roadway along north side of Willam Lane, Park from a point 400 ft. N. of 18th St. to west line of Forest Blvd. and entrance to Wm. Land Pk. opposite 18th St. Specifications on file in office of clerk. Fred J. Klaus, city engineer.

MCDON COUNTY, Cal.—Until May 15, 2 P. M., bids will be received by H. S. Conly, district engineer, State Highway Commission, Redding, to treat with heavy fuel oil as a dust palliative, 9.5 miles between 9.5 mi. west of Alturas and Alturas.

BURLINGAME, San Mateo Co., Cal.—Until May 18, 5 P. M., bids will be received by J. R. Murphy, city clerk, to improve Newhall Road for its full length, involving clearing, grading; in. water bound macadam base w. 2½-in. asphalt surface; bit. macadam walk; cross drain 10-in. concrete pipe, catchbasin; extension of sewer laterals; concrete curb returns. 1911 Act. Plans on file in office of clerk.

TEHAMA COUNTY, Calif.—H. Street & Bell, Marysville, at \$59,4 awarded contract by State Highway Commission to surface with bituminous treated crushed gravel or stone surfacing, 7.3 miles bet. Dales Run and Paynes Creek. Unit bids published in issue of April 29.

PLUMAS COUNTY, Cal.—Chigrlis Sutos, 2211 18th St., San Francisco, at \$60,184 awarded contract by State Highway Commission to grade 1 mile between Spanish Creek and 0 mile south of Keddie. Unit bids published in issue of April 29.

HUMBOLDT COUNTY, Cal.—H. Street & Bell, Marysville, at \$62,6 awarded contract by State Highway Commission to improve 10 miles of highway between Loleta and ¾ mi. south of Eureka, 5.3 miles to be surfaced with bituminous treated crushed gravel or stone and 4.7 miles to be widened with bituminous treated crushed gravel or stone borders. Unit bid published in issue of April 29.

SALINAS, Monterey Co., Cal.—Until May 18, 7:30 P. M., bids will be received by M. R. Keef, city clerk, (55) to improve portions of So. Mal St. bet. Geil St. and Romie Lane, involving grading; hy. cem. conc. curbs sidewalks; 6-in. hyd. cem. conc. paving. Est. cost, \$10,500. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from Howard Cozzens, city engineer.

TUOLUMNE & MARIPOSA COUNTIES, Cal.—Basalt Rock Co., Napa, at \$1,890.60 awarded contract by State Highway Commission for furnishing and applying light and heavy fuel oil as a dust palliative, 33.3 miles between Sierra Hotel and Yosemite National park.

TUOLUMNE - CALAVERAS AND PLINE COUNTIES, Cal.—Until May 1, 2 P. M., bids will be received by E. Pierce, district engineer, State Highway Commission, State Office Bldg., Sacramento, to treat with light and heavy fuel oil, 25 miles between Long Barn and the foot of the So. Pass Grade in Tuolumne County and for 19.5 miles in Calaveras and Pline counties, between Big Trees and Lake Alpine. Specifications obtainable from engineer.

ALPINE COUNTY, Calif.—B a s a l t Rock Co., Napa, at \$2,822.50 submitted by bid April 30 to R. E. Pierce, district engineer, State Highway Commission, Sacramento, for treating with light and heavy fuel oil as a dust palliative, 10.6 miles between Hangman's bridge, approximately 2 miles southeast of Markleeville and the State Highway Cam, approximately 2 miles northwest of Woodfords. Complete list of bids follows:
Basalt Rock Co., Napa.....\$2,822.50
J. B. Lee, San Leandro.....2,950
Pacific Tank Lines Inc., L. A.....3,164
D. McDonald, Sacramento.....3,181
Bids held under advisement.

LODI, San Joaquin Co., Cal.—Until May 11, 8 P. M., bids will be received by J. P. Blakely, city clerk (72) to improve Cherokee Lane, involving: (prices quoted are engineer's estimate):
(1) 322,000 sq. ft. grading, at \$.015.
(2) Cement Concrete Paving
(3) 108,000 sq. ft. slab, 10-ft. wide, by 9-7-9-in. thick, at \$.20.
(4) 108,100 sq. ft. slab, 10-ft. wide, by 9-6-8-in. thick, at \$.18.
(5) 89,950 sq. ft. slab, 7.5-ft. wide, by 8-5-8-in. thick, at \$.15.
(6) 10,350 lin. ft. curbs, rolled and integral, at \$.40.
(7) 148,200 lbs. reinforcing steel, etc., at \$.05.
(8) 903 lin. ft. concrete pipe sewers, at \$.30.

Work under Boundary Line Act of 1917, Bonds under April 7, 1917 Act, Part 3. Estimated cost \$72,654.70. Certified check 10% payable to Mayor required with bid. Plans on file in office of clerk and obtainable from Edw. Hussey, city engineer (Hussey & Belcher), 719-720 Syndicate Bldg., Oakland.

AMADOR COUNTY, Calif.—Basalt Rock Co., Napa, at \$7,881.25 awarded contract by State Highway Commission to treat with light and heavy fuel oil as a dust palliative, 34.3 miles between Chapmans and Silver Lake.

LASSEN & SIERRA COUNTIES, Cal.—Basalt Rock Co., Napa, awarded contract by State Highway Commission to treat with heavy fuel oil as a dust palliative, 42.2 miles between two miles west of Milford and Doyle and between Long Valley Creek and the Nevada State Line.

TULARE COUNTY, Calif.—Union Paving Co., Call Bldg., San Francisco, at \$305,561 awarded contract by State Highway Commission to grade and pave with asphalt concrete 12.1 miles between Goshen and Kingsburg.

SISKIYOU COUNTY, Cal.—D. McDonald, 1118 G Street, Sacramento, awarded contract by State Highway Commission, Redding, to treat with heavy fuel oil as a dust palliative, 21 miles between Shasta river and Walker Station.

SAN MATEO COUNTY, Cal.—Until May 27, 2 P. M., bids will be received by State Highway Commission to construct an undergrade crossing under the tracks of the Southern Pacific Railroad near Henderson Station, consisting of two concrete abutments with wing walls, installing drainage system and pumping equipment, and grading and paving approximately 0.4 miles of roadway with Portland cement concrete.

SAN JOAQUIN COUNTY, Cal.—Until May 27, 2 P. M., bids will be received by State Highway Commission to improve highway between Turner Station and Stockton, 7.1 miles to be paved with Portland cement concrete.

IMPERIAL COUNTY, Calif.—Until May 27, 2 P. M., bids will be received by the State Highway Commission to widen with asphalt concrete, 21 miles between East High Line Canal and Sand Hills.

SUTTER-BUTTE COUNTIES, Cal.—Until May 27, 2 P. M., bids will be received by State Highway Commission to place bituminous treated rock borders on 19.2 miles between Yuba City and Biggs Road.

BERKELEY, Alameda Co., Calif.—Until May 12, 10 A. M., new bids will be received by Florence E. Turner, city clerk, to construct pathway between Euclid and Hildale Aves., involving:
(1) 40 cu. yds. excavation;
(2) 40 cu. yds. concrete;
(3) 1800 lbs. reinforcing steel.

H. J. Marin, Berkeley, was previous low bidder at \$900. The bids were rejected. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Harry Goodridge, city engineer. (Complete list of unit bids previously received on this project published in issue of April 1931.)

SACRAMENTO COUNTY, Cal.—Edward R. Jameson, Box 853, Sacramento, desires to submit sub-bids for fencing in connection with 7.2 miles of state highway between Brighton and Mills in Sacramento county, bids for which will be opened May 20. The fencing contract involves: 0.2-miles move and reset property fences; 6-miles of new property fence and installation of 30 gates. Contractors figuring this project may obtain sub-bids from Jameson at the above address.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, completes specifications to improve 35th Ave., between Judah and Kirkham Sts.; estimate cost \$750. Project involves:

- (1) 75 lin. ft. armored concrete curb;
- (2) 50 lin. ft. 6-in. V.C.P. side sewer;
- (3) 1500 sq. ft. asphalt concrete pavement, consisting of 2-in. asphalt

conc. surface on 6-in. Class F concrete base.

SAN FRANCISCO—Until May 20, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve crossing of Fitzgerald Ave. and Jennings St., and Jennings St., bet. Fitzgerald and Gillman Aves., involving:

- (1) 195 lin. ft. armored concrete curb;
- (2) 660 sq. ft. 1-course concrete sidewalk;
- (3) 4 brick catchbasins;
- (4) 90 lin. ft. 10-in. V.C.P. culverts;
- (5) 32 lin. ft. 12-in. V.C.P. sewer;
- (6) 68 lin. ft. 6-in. V.C.P. side sewer;
- (7) 113 sq. ft. asphalt concrete pavement, 2-in. asphalt conc. surface on 6-in. Class F concrete base.

Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

SAN FRANCISCO—Until May 20, 2:30 P. M., bids will be received by S. J. Hester, Secretary, Board of Public Works, to improve crossing of Quintara and Stockton Aves., and Quintara St., between 33rd and 34th Avenues, involving:

- (1) 600 cu. yds. excavation;
- (2) 94 lin. ft. armored concrete curb;
- (3) 3 brick catchbasins;
- (4) 165 lin. ft. 10" V.C.P. culvert;
- (5) 345 lin. ft. 21" V.C.P. sewers;
- (6) 16 Y or T branches on 21" V.C.P.
- (7) 40 lin. ft. 8" V.C.P. sewer;
- (8) 3 brick manholes;
- (9) 660 sq. ft. 1 course concrete sidewalk;
- (10) 4893 sq. ft. asphalt concrete paving, consisting of 2" asphalt concrete wearing surface and 6" Class F concrete base.

Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

SAN FRANCISCO—Until May 20, 2:30 P. M., bids will be received by S. J. Hester, Secretary, Board of Public Works, to improve Ingerson Ave., between Ingalls and Hawes Sts., and intersection of Redondo Ave., involving:

- (1) 3,180 cu. yds. excavation;
- (2) 1,103 cu. yds. embankment;
- (3) 1,217 lin. ft. concrete curb;
- (4) 475 lin. ft. 6-inch V.C.P. side sewer;
- (5) 10,965 sq. ft. 1-course concrete sidewalk;
- (6) 2 brick catchbasins;
- (7) 50 lin. ft. 10-in. V.C.P. culverts;
- (8) 6.75 cu. yds. Class B concrete in steps;
- (9) 212 lbs. bar reinforcing steel;
- (10) 21,997 sq. ft. asphalt concrete pavement, 2-in. asphalt conc. surface on 6-in. Class F concrete base;

CHURCHILL COUNTY, Nevada.—Dodge Bros., Inc., Fallon, Nev., at \$69,322.80 awarded contract by State Highway Commission for grading, construction of structures and placing surfacing material between 5 miles south of Fallon and Salt Wells, 10.14 miles in length.

CLARK COUNTY, Cal.—Pat Cline, Inc., Las Vegas, at \$84,642.25 awarded contract by State Highway Commission for grading, construction of structures and placing surfacing material between 10 miles southeast of Las Vegas and Boulder City, 11.01 miles in length.

LYON COUNTY, Nevada.—Nevada Rock & Sand Co., Inc., Reno, at \$65,680.29 awarded contract by State Highway Commission for grading, construction of structures and placing surfacing material between 5 miles north of Fernley and the Lyon-Churchill county line, 8.61 miles in length.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Works, completes specifications to improve Sixteenth Ave., between Vicente and Wawona Sts.; estimated cost \$2060. Project involves:

- (1) 159 lin. ft. armored concrete curb;
- (2) 504 sq. ft. 1-course concrete sidewalk;
- (3) 29 lin. ft. 6-in. V.C.P. side sewer;
- (4) 3 brick catchbasins;
- (5) 60 lin. ft. 10-in. V.C.P. culverts;
- (6) 2000 sq. ft. 6-in. Class E concrete pavement;
- (7) 2267 sq. ft. asphalt concrete pavement, consisting of 2-in. asphalt concrete surface with 6-in. Class F concrete base.

SHASTA COUNTY, Cal.—As previously reported, bids will be received May 27 by State Highway Commission to treat 60.1 miles between Redding and Fall River with heavy fuel oil and cut-back asphalt as a dust palliative. Project involves:

- (1) 4935 bbls. heavy fuel oil in place;
- (2) 41 tons cut-back asphalt, grade E, in place.

NEVADA COUNTY, Cal.—Harms Bros., Galt, at \$5,102.50 submitted low bid to C. H. Whitmore, district engineer, State Highway Commission, for the construction of underdrains at various locations in Nevada County, between Donner Lake and 1 mile west of Truckee, Martin Murphy, Berkeley, only other bidder at \$8,970.

EL DORADO COUNTY, Calif.—Tiffany, McReynolds & Tiffany, at \$12,680.50 awarded contract by the State Highway Commission, Sacramento, to treat with light fuel oil as a dust palliative, 54.6 miles between Riverton and the Nevada State Line and between Alpine Junction and a point 5.2 miles south and between Meyers and Emerald Bay.

SAN JOSE, Santa Clara Co., Cal.—Until May 18, 11 a. m., bids will be received by Henry A. Pfister, county clerk, to improve the Alviso-Milpitas Road in Supervisor District No. 3, involving asphaltic concrete pavement. Plans obtainable from County Surveyor Robert Chandler on payment of \$1.

SAN JOSE, Santa Clara Co., Cal.—A. J. Ralsch, Burrell Bldg., San Jose, at \$27,573.61 awarded contract by county supervisors to improve Moorpark Ave. and a portion of Northrup

St., in Supervisor District No. 4, involving 259,250 sq. ft. 4½-inch asphaltic pavement at 10.6 sq. ft. San Jose Paving Co., San Jose, only other bidder at \$34,010. Engineer's estimate \$31,700.

RICHMOND, Contra Costa Co., Cal.—Until May 18, 5 P. M., bids will be received by A. C. Faris, city clerk, (484) to improve Tenth St., between south line of Dock Avenue and south end of Tenth St., involving:

- (1) 3,250 cu. yds. excavating;
- (2) 1,620 cu. yds. filling;
- (3) 2-in. asphalt concrete wearing surface on 8-in. cement concrete;
- (4) 71,900 sq. ft. base on 4-in. broken rock cushion;
- (5) 15,300 sq. ft. sidewalk;
- (6) 2,250 sq. ft. gutter;
- (7) 5,000 lin. ft. curb;
- (8) 62 lin. ft. curb bar;
- (9) 526 sq. ft. open drain;
- (10) 1,120 lin. ft. industrial curb and gutter;
- (11) 12 tons asphalt concrete wearing surface;
- (12) 3 each catchbasin "A";
- (13) 1 each catchbasin "B";
- (14) 4 each, 10-in. vit. sewer pipe tee;
- (15) 120 lin. ft. 10-in. vit. sewer pipe culvert.

1911 Act, 1915 Bond Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from City Engineer Edward A. Hoffman.

SANTA BARBARA, Cal.—City Engineer E. L. Brown completes specifications to improve Harbor View and Scenic Drives, a distance of six blocks involving cement concrete paving. Estimated cost, \$7364. Geo. Geib, city clerk.

SANTA BARBARA, Cal.—City council votes to ask new bids to improve E Canon Perdido St. bet. Santa Barbara St. and Milpas St. The previous bid was submitted in the name of R. C. Atkinson whereas the bond was written in the name of the firm. The work involves the following approximate quantities:

- (1) 148,945.8 sq. ft. 8-5-8-in. concrete pavement;
- (2) 121.6 sq. ft. 5-in. concrete base;
- (3) 6171.72 sq. ft. curb;
- (4) 7093.86 sq. ft. gutter;
- (5) 41 side concrete sewers (vit. pipe);
- (6) 30 ft. 6-in. stub sewer;
- (7) 300 ft. 6-in. vit. main sewer;
- (8) 272 ft. wooden band rail;
- (9) 81.15 sq. ft. walk;
- (10) 58 ft. 12-in. R.C.P.;
- (11) 74 ft. 14-in. R.C.P.;
- (12) 128 ft. 16-in. R.C.P.;
- (13) 120 ft. 30-in. R.C.P.;
- (14) four 7 ft. 7 in. slot catchbasins;
- (15) two concrete junction boxes to be raised;
- (16) 336.2 sq. ft. curb to be removed;
- (17) 1632.8 sq. ft. gutter to be removed;
- (18) 177.2 sq. ft. walk to be removed.

SHASTA COUNTY, Cal.—Until May 27, 2 P. M., bids will be received by State Highway Commission to treat 60.1 miles between Redding and Fall River with heavy fuel oil and cut-back asphalt as a dust palliative.

SUPREME COURT IN FREIGHT RATE RULING

The California Supreme Court has rendered a decision defining and clarifying the jurisdiction of the Railroad Commission to award reparation to shippers in proceedings involving freight rates.

In a suit brought by The Atchison, Topeka and Santa Fe Railway Company, et al, against the Railroad Commission a number of railroads sought to annul an order of the Commission directing the payment of reparation

for the collection of charges in violation of the long and short haul provisions of the California Constitution and the Public Utilities Act.

It was contended by the carrier that jurisdiction to award reparation for the collection of such charges was vested exclusively in the courts. The court ruled against the carriers in this regard and held that there is concurrent jurisdiction in the Railroad Commission and in the courts over the matter of reparation for the collection of such charges. This sustains the position held by the Commission for many years.

The practical effect of the decision is that the California Commission may properly award reparation for the collection of unreasonable, excessive or discriminatory rates, which includes violations of Sections 13, 17a(2), 19, and 24(a) of the Public Utilities Act. The jurisdiction of the Commission is exclusive over claims for reparation for violation of Sections 13, 19, administrative questions being presented in such cases. The jurisdiction of the Commission is concurrent with that of the courts in cases where reparation is sought for the violation of Sections 17 or 24(a) of the Public Utilities Act, administrative questions not

SURVEYOR ADMITS PADDING PAY ROLL

John Hoskins, former Stanislaus county surveyor, and Henry C. Greene one of his field men, pleaded guilty to charges of altering payroll records when arraigned before Superior Judge L. W. Fulkerth at Modesto.

Each admitted the four counts alleged in a complaint filed against them three weeks ago.

They applied for probation and Judge Fulkerth referred the plea to the Probation Officer C. H. Ramont for a report on May 11.

Their guilty pleas came a few hours after a complete audit of the books of the county surveyor's office during Hoskins' eight years as surveyor showed the shortage to be \$5,215, according to District Attorney R. R. Fowler. Fowler said the shortage will be made up by the defendants.

GLADDING, McBEAN PROFITS IN 1930

Balance sheet calculations indicate that Gladding McBean & Co. earned a net profit of \$148,065 in the year ended December 31, 1930, equal to 65 cents a share on 226,982 shares, as against \$1,228,563, or \$5.52 a share on 222,531 shares, in 1929, according to the Pacific Coast edition of the Wall Street Journal.

Ratio of current assets to current liabilities on December 31, 1930, was 6.5 to 1, as against 8.5 to 1 at the end of 1929.

All officers and directors were re-elected. Asa Hall, attorney of Los Angeles, was named a director to succeed the late Arthur C. Parsons.

STEEL ORDERS SHOW INCREASE IN MARCH

Orders for structural steel in March totaled 185,600 tons, as against 158,800 tons in February, and 226,800 in March, 1930, according to the Department of Commerce. Shipments during the month totaled 152,800 tons, as against 166,800 tons and 264,800 tons, respectively.

For the quarter ended March 31, bookings totaled 506,800 tons, as against 742,200 in the like 1930 period, while shipments for the period were 491,600 tons and 774,800 tons, respectively.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3559-S SALES ENGINEER, to sell sprinkler systems for outside and inside irrigation. Straight commission. Opportunity for right man. Location, San Francisco.
R-3537-S SALESMEN, to take agencies for a patented device for testing automobile brakes. Reasonable price and good commission. Territories open for exclusive rights. Headquarters, San Francisco.
R-3545-S WORKING PARTNER, for outside sales promotion of ornamental metal work. Prefer man with architectural experience and sales ability who is prepared to finance self during trial period while selling on commission. Business is established. Location, San Francisco.
R-3544-S GRADUATE ENGINEER, age 41, with California registration and electrical engineering exper-

ience, desires to connect with established engineering firm in capacity of partner. Has working capital to invest where hard work and application will pay dividend. Address communications in care of this office.

R-3554-S CHIEF STATIONARY ENGINEER, preferably with technical training and well up on combustion theory, for responsible position large steam plant. Must be a man with experience in actual charge operation of steam power plant. Salary \$275 per month to start. Apply by letter with personal data, detailed experience and reference Location, Southern California.
R-3556-S STRUCTURAL DESIGNER, experienced on dams and other hydraulic structures, to check and detail also. Must be technical graduate, American citizen and resident of San Francisco. Temporary. Salary \$250 per month. Apply by letter. Location, San Francisco.

R-3308-S ENGINEER, preferably Electrical or Mechanical, not over 30 years of age, single, good personality and considerable mechanical ability, for service work and testing of hydraulic machinery. Must have experience in hydro-electric plant construction or operation. Salary about \$175 per month. Apply by letter with photo. Headquarters, San Francisco.

The Division of Industrial Fire Safety of the State Department of Industrial Relations is striving to eliminate those dangers that contribute to the risks from fire. State institutions have received attention, and fire chiefs in different cities of California have given their services, without charge, to assist State authorities. Dry cleaning plant owners are more and more appreciating the aid given them in maintaining safe places of employment, especially in relation to the inflammable liquids used in the industry.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink"

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

A Pointer on **P**rinting

Printing matter is not a commodity—it is a necessity, like the salt in our soup. Without printing matter modern business is unthinkable. The more we invest in printer's ink—that is *in the right kind of printing*—the greater the results. Therefore it is of vital interest to select the RIGHT kind of printer. — There are printers AND printers—but few are self-containing in mechanical and creative ability.— Put us on the track, and, like this pointer in suspense, we will bring back the bacon.

CERTIFIED INSULATION IS BACKED BY DEALERS

Certified insulation is the aim of the
Asbestos Bureau Incorporated, com-
posed of manufacturers and dealers,
engaged in the manufacture and sales
of asbestos.

The aim of the bureau is to assure
the owner full value and lower costs;
to assure the architect responsible bid-
ders; assure the engineer specifica-
tions fulfilled; assure the general con-
tractor more responsible subcontract-
ing; assure the steam fitter and
 plumber better performance of his
job and uniform costs with his com-
petitor; assure the asbestos house in-
spector standards of materials and
workmanship.

California firms which will offer
certified insulation include the As-
bestos Co. of California, San Francis-
co; Jones Bros. Asbestos Company,
San Francisco; Western Asbestos
Company, San Francisco; City Asbestos
Company, Oakland; Harrington Engineering Co., Los
Angeles; Rubber and Asbestos Works,
Southern Asbestos and Magnesia
Corp., and Warren and Bailey Co., all
in Los Angeles, and the Marine En-
gineering and Supply Co., of Wilming-
ton.

The following Pacific Northwest
firms comprise the bureau: Asbestos
Supply Co., of Seattle; Charles R.
Power & Co., Seattle; V. S. Jenkins
Co., Seattle; Asbestos Supply Co., of
Tacoma; Gillen-Cole Co., Tacoma; As-
bestos Supply Co. of Oregon, Port-
land; Gillen-Cole Co., Portland; Pacific
Asbestos & Supply Co., Port-
land.

LUMBER COMPANY RECEIVER NAMED

George R. Hicks, president of the
Pickering Lumber Company, at \$35-
0,000 concern was appointed receiver
for his firm last Saturday by Federal
Judge Albert L. Reeves of Kansas
city.

The receivership was ordered upon
petition of Harold H. Woodbury.
There was no opposition when the
action was heard in court.

The receivership does not include
a Pickering Lumber Sales Company
formed last year with about \$4,000,000
assets, the company's active market-
ing subsidiary.

The company recently defaulted in-
terest coupons for May 1.

The Wright Manufacturing Com-
pany, Bridgeport, Conn., has issued a
new catalog on Wright Electric Hoists.
The catalog contains forty-
eight pages and gives a complete de-
scription of Wright Electric Hoists,
as well as dimensions and other use-
ful data. The hoists include hook and
drum suspension; plain, geared and
motor driven trolleys; and drum and
winch types.

HUGE FEDERAL BUILDING PROGRAM

The Federal Government is pre-
paring to spend \$55,000,000 within
the next nine months on its public
buildings program, President
Hoover announces.

Hoover said \$119,000,000 has
been expended on buildings com-
pleted within the last 18 months.
Within the next 90 days \$53,000-
000 will be expended, the Presi-
dent said. The following 90 days
\$50,000,000 additional and the third 90-
day period will provide for ex-
penditure of \$40,000,000.

The entire program provides
for 395 new buildings throughout
the country, a project suggested by
Hoover to take up slack employ-
ment during the business depres-
sion.

Hoover said he would announce
this week a complete list of all
the buildings completed, being con-
structed and to be constructed.

TEHACHAPI PRISON LOCATION APPROVED

The site chosen at Tehachapi, Kern
County, for the proposed new state
prison for women, was given a "clean
bill of health" by the report of a special
Senate investigating committee,
last Friday.

The committee, composed of Sen-
ators Walter H. Duval, Santa Paula;
Henry E. Carter, Los Angeles, and
John L. Moran, Corning, was named
after a charge was filed that there
was an inadequate supply of water
for the institution.

Instead, the report declared, there
is "an abundance" of water on the
site and that the department of pub-
lic works should proceed immediately
to construct the necessary buildings
for the institution.

Accompanied by W. H. Rockingham,
engineer of the State Department of
Agriculture, the committee visited the
site. They reported:

"The place selected for the buildings
is located over a wash of the valley,
and upon poor soil. The committee
recommends that the location of the
buildings be changed to higher and
more fertile ground."

"The site is most admirably adapted
for the prison and the committee here-
by recommends that the request di-
rected to the director of public works
to withhold the award of contract for
construction and improvement of said
site be revoked to the end the board
of trustees may proceed with the im-
provement of the property."

Copper welding by the Premag pro-
cess is explained in an 8-page bulletin
issued by Murex Welding Processes,
Ltd., Forest Road, London, E. 17,
England.

SEEK BIDDERS FOR LOWER CALIF. PROJECT

The construction of 1000 miles of
18-foot California type highway along
the coast of Lower California is
planned by the Lower California De-
velopment Co., of Los Angeles.

J. E. McElroy, of Chicago, engineer
and the owner of land which the pro-
posed road will traverse, desires to
make contacts with the contractors
who will be interested in bidding on
the construction of 50 to 100-mile sec-
tions of this highway. The company
plans to improve present graded roads
and wagon trails in the land, about
4,250,000 acres, owned by the company
which extends along the west coast
of the peninsula for approximately 600
miles. The starting point of the com-
pany's highway will be about 55 miles
below Tijuana.

The road construction, drilling of
water wells, installation of pumping
plants, and other engineering features
will be supervised by a firm of con-
sulting engineers not yet announced.

Plans of the company include the
construction of a \$100,000 hotel of 100
rooms, at Magdalena Bay, and three
other smaller hotels where needed.
Arrangements are being completed to
build 16 auto camps and oil and gaso-
line service stations along the proposed
route.

McElroy states that a \$20,000,000
bond issue will probably be placed
through New York, Chicago and Los
Angeles investment banking houses.

Members of the company, in addi-
tion to J. E. McElroy, are O. W. Hines
E. P. Hughes, Dave Chapman, and
several Mexican capitalists.

Offices of the Lower California De-
velopment Company are located in the
Merritt Building, Los Angeles.

HONEY-COMB GRAVITY TYPE DAM PROPOSED

C. E. Grunsky, consulting engineer
of San Francisco, has proposed a new
type of construction for dams which
he calls a "honey-comb gravity dam."

It consists of horizontal or inclined
cells in tiers extending downstream
from the solid concrete upstream face
of the structure. The successive tiers
would be separated by construction
joints. Vertical construction joints ex-
tending the height of the structure
would divide it into locks.

Advantages of the proposed design
are that the cells or galleries would
provide adequate drainage, would min-
imize the effects of heat generated by
setting of the concrete, and would
save material. Pressure of the im-
pounded water would be utilized to
give stability to the dam by a 4 to 6
slope on the upstream face. To make
the structure watertight, a metal dia-
phragm would be imbedded in the up-
stream face.

THE OBSERVER

What He Hears and Sees on His Rounds

Can an employer who has entered into a sub-contract to perform work on a certain building recover damages against the labor unions of which, with his knowledge, his employees are members, because those unions have ordered them to quit work on the building in question for the reason that the general contractor has refused to employ union labor on other jobs in the same locality? There was no contract of employment between the sub-contractor and his employees.

The Court says: "That the injury to the plaintiff which arose from the strike was inflicted upon it, an innocent party, in order to compel it to coerce the general contractor. The real grievance of the union was not with the plaintiff, but with the general contractor for his not unloading his work, and the plaintiff is the innocent victim."

"Organized labor's right of coercion and compulsion is limited to strikes on persons with whom the organization has a trade dispute. There was no such dispute with the plaintiff in this case and the plaintiff is entitled to relief."

"The judgment will be affirmed, with costs."

A national privately owned organization to help finance home building is being suggested in Washington. It is reported by Paul Wooten, correspondent for Engineering News-Record in the nation's capitol. A decided shortage exists in the more reasonably priced homes. It is contended that home owners, even in houses of better grades, is being discouraged by high financing costs. This is certain to continue as long as speculators are being relied upon to furnish the bulk of housing. Such a national company, if certain outstanding men can be interested in the project, could be functioning by autumn and could stimulate building to an extent entirely impossible under the present disorganized system, it is believed.

Sectional selfishness, provincial jealousy and interference by the so-called trust last Friday caused proponents of the \$175,000,000 state-wide water program to abandon efforts to obtain action at this session of the Legislature. As a result, Gov. James Rolph will probably call a special session either next July or January.

A proposal that all building construction undertaken with public funds be done by residents of the city is proposed in an ordinance submitted to the city council at Visalia, Calif. The proposed measure is said to have the approval of the Visalia Building Trades Council and the Chamber of Commerce. It would require that any laborer on a building job undertaken by public money in Visalia be a resident of that city for at least 6 months or that he be a home owner. The ordinance was proposed by Councilman E. R. Connelly.

Unfilled tonnage of the United States Steel Corporation amounted to 3,897,729 tons on April 30, a decrease of 37,601 tons from the total of 3,935,330 tons on March 31, 1931. On February 28, unfilled tonnage amounted to 4,132,351 tons and on April 30 the amount stood at 4,354,220 tons.

As a result of the cement-price war, the state highway department of Minnesota is making cement contracts for its 1931 paving program on a basis of 90c. a barrel net, in bulk, at the mill plus freight. The department will replace, at the new figure, contracts entered into last December for 959,982 barrels of cement for 247 miles of paving and will also buy at this price cement for the additional paving program made possible by the legislative bond issue authorization and special federal aid.

A plan for the public sale of \$250,000,000 worth of bonds to rebuild slum and tenement districts of the Nation was approved by the American Construction Council at its annual meeting in New York City, last week.

The Senate last Friday defeated the "yellow dog" contract bill by a vote of 22 to 15. The bill was introduced by Senator J. M. Inman, Sacramento, on behalf of organized labor. It would make illegal any contract under which an employer requires an employee to promise to refrain from joining any labor union or from associating with any union labor group while remaining on the payroll. Similar bill have been before the legislature for several sessions.

For the first time in its history the American Society for Testing Materials will sponsor an exhibit of testing apparatus and machines in conjunction with the annual meeting of the society in Chicago, June 22-26. The exhibit has been planned with a view to having a distinctly scientific and broadly educational atmosphere which will be consistent with the technical nature of the society's activities.

A comprehensive discussion of the use of scraper mucking in mines is contained in a 118-page illustrated booklet issued by the Sullivan Machinery Co., 400 North Michigan Ave., Chicago, Ill., at \$2 per copy. The book is divided into two major sections, the first half being devoted to an analysis of the elements and the setting up of general principles of scraper mucking, while the second half contains descriptive matter collected and condensed from previously published articles illustrating applications of the principles.

Pamphlets describing spiral welded pipe and a new metal curb and the rod design for highway construction have been issued by the American Rolling Mill Co., Middletown, Ohio.

Palo Alto reports the issuance of 42 building permits in April for improvements involving an expenditure of \$79,800 as compared with \$78,500 for the corresponding period in 1930. Fourteen homes were put under construction last month. These will cost \$72,400.

Fifty-two machinists, tool and die makers and apprentices in the Emeryville plant of the Marchant Calculating Machine Company, walked out when the company ordered a reduction in wages, according to Sidney M. Jacobs, business agent for Machinists' Union No. 284. The company declares, however, that only eight or nine employees "walked-out."

ALONG THE LINE

Lincoln Electric Co., Cleveland, has advanced George G. Landis to the post of chief engineer.

Edward R. Newman will operate from 1540 Ninth St., Alameda, and the firm name of Star Electric Shop. Frederick M. Berryhill, city manager of Tulare, Calif., at the first regular meeting of the newly installed council, was unanimously retained city manager.

Adolph Schaffer, 69, pioneer plumber of Red Bluff, died in that city May, following a stroke suffered several months ago.

Frederick S. Harrison, architect, announces the removal of his office from the Pacific States Bank Bld., to 1065 Tenth St., Sacramento.

Stephen Puter, 75, retired California lumberman, died at his home in Burlingame, last Sunday. Puter, a native of Trinity County, was among the pioneers in the early California lumber industry. His widow and two daughters survive.

Clay V. Brown, building contractor 521 N 16th St., San Jose, has filed a notice of bankruptcy. He declares his incurred debts totaling \$9,019, which \$6,463 are secured. He lists his assets as his home, valued at \$500, entirely covered by mortgages.

The Los Angeles county supervisors have authorized E. C. Eaton, chief engineer of the county flood control district, to take the necessary steps to secure a \$1,000,000 federal appropriation for construction and repair of jetties at the mouths of the Los Angeles and San Gabriel rivers and Ballona creek, where these tributaries empty into the ocean.

A. A. Horwege has joined the staff of Robinson-Roberts Company of Los Angeles, general contractors, and will have charge of highway and public works construction. Horwege worked for ten years superintendent of the California Construction Company, San Francisco and prior to that time was engaged as division engineer with the Nevada State Highway Department, city engineer of Petaluma and later in the service of the engineering department of San Francisco.

Holding President Hoover primarily responsible for what he termed failure properly to meet emergency conditions resulting from the business depression in Washington, D. C., in candidate for president said Democrats and Progressives in congress were partly to blame.

In an address opening the third first annual convention of the World Business Circle, a labor fraternal organization in Washington, D. C., on Tuesday, Thomas said "the political capitalism have not, of course created" the depression.

Nevertheless, he continued, "the party politicians have stupidly or deliberately misled the people by promising a degree of freedom and plenty under capitalism which they could not deliver. The engineer in the White House," he added, "has been an engineer of disaster for the workers. His ruling passion is the defense of private profit under the false name of rugged individualism."

Jan. A. Talbot has resigned as president and director of the Western Pipe & Steel Co. of California and Edward G. Tallard, formerly executive vice-president, has been elected to succeed him. Talbot's resignation is forth that his personal affairs required so much of his time that he found it impossible to continue to serve the company in an executive capacity.

Westinghouse Electric & Manufacturing Company recently completed an addition to its plant at Emeryville, Calif. The plant covers three acres of ground area and is part of a two million dollar Westinghouse manufacturing plant.

S. G. Masters will operate from 919 eighteenth Street, Oakland, under the name of Masters Electric Co.

Philip T. King, 50 Church St., New York City, has purchased from the industrial Brownhoist Corp., its entire present stock of crawler cranes and cranes, with the understanding that an additional machine of this type will be built for at least three months after the consolidation of the Cleveland, Ohio and Bay City, Mich., plants of the corporation at Bay City.

S. R. Dresser Mfg. Co. and Mercor Portland Valve Co. are planning to consolidate, according to plans disclosed. In a letter addressed to stockholders of the Dresser company requesting their approval. Assent to the merger plan has already been given by stockholders of the company, and also by directors and stockholders of the Mercor Portland company. Formation of new company with assets of nearly \$100,000, to be known as the Dresser Portland Co., is contemplated.

S. M. Kintner, who has been assistant vice-president of the Westinghouse Electric & Manufacturing Company, was elected vice president in charge of engineering for that company at a recent meeting of the Board of Directors. He succeeds W. S. Tugg, who has been elected vice president in charge of sales.

Paul Pemberton, for the last ten years sales manager of the W. E. Cooper Lumber Co. of Los Angeles, has announced he will continue in the lumber business but has not announced his plans for the future.

Ralph W. Flege will operate from 69 East Fourteenth Street, Oakland, under the firm name of Crown Roof Company.

The Board of Directors of the National Lumber Manufacturers Association in Chicago unanimously voted last week to continue the National Trade Extension campaign for lumber and lumber products. At the same time it approved of the new trade extension campaign presented by the Trade Extension Committee under the caption "Making Lumber Promotion Permanent." This plan calls for a maximum expenditure of approximately \$1,500,000 a year. It is planned to bring into the circle of financial support the timber owners, loggers, lumber manufacturers, wholesalers and the principal lumber consuming industries. The outlook for the National Trade Extension will have the moral support of the retailers even more than in the past.

Roy Vernon Ish, for ten years connected with the lumber industry in the Santa Clara county section, has become associated with the San Jose Lumber Company with headquarters in San Jose. In his new position, Ish will specialize in the design and sale of summer cabins.

WAGE CUT AIM OF BUILDING EMPLOYERS

Perhaps the outstanding feature of the wage situation during the first month is the growing tendency on the part of building employers toward efforts in wage reductions, says General Building Contractor. While actual reductions have been generally limited to "open shop" cities, negotiations are under way in a number of cities where union labor predominates looking towards a reduction. The fact that many agreements are nearing expiration is responsible for bringing this question to the fore at this time. Agreements have expired in Boston on April 1, but there have been no real news items and it is believed that the present wage will stand. Discussions are taking place in other cities, however, looking towards a downward revision; so far, no "closed shop" city has signed any new agreements at a lower scale than has prevailed heretofore. The strongest effort has been made in Waterloo, Iowa, where contractors attempted to reduce the six highest paid trades. Their offer was refused, whereupon the contractors have declared open shop. It must be pointed out, however, that no real test of the situation can be made because of the fact that only one building job is in progress in that city at this time.

It is reported that Omaha, Nebraska, has been paying building labor about 10 per cent under the official scale. This practice is growing and while it is not effective on large metropolitan building projects it finds a fertile field in suburban construction. In Salt Lake City it is reported that all building trades have joined the carpenters and bricklayers in demanding the five-day week. The proposal is being resisted by the organized contractors of that city.

The following important changes in wage scales have been reported for the past month:

Increases	
Philadelphia, painters, from \$1.07½ to \$1.12½.	
Rochester, N. Y., bricklayers, from \$1.50 to \$1.58½; plasterers, \$1.50 to \$1.58½; stone masons, \$1.50 to \$1.58½; tile setters, \$1.43½ to \$1.51½.	
Salt Lake City, electricians, \$8 to \$9.	
Decreases	
New Orleans, bricklayers from \$1.50 to \$1.25; carpenters, \$90 to \$55-\$75; plasterers, \$1.50 to \$1.25; roofers, \$1.37½ to \$1.25.	
Memphis, sheet metal workers, \$1.37½ to \$1.25.	

BUILDING GAINS ON PACIFIC COAST

Continued improvement in the building industry on the west coast during April is shown in the monthly building permit compilation released by S. W. Straus & Co.

Among the first 32 cities to report, 29 showed substantial gains in April over March of this year. These included San Francisco, Seattle, Sacramento, Berkeley and Spokane. Seventeen of the 32, or more than half of the group, showed gains over the same month last year, while 15 of the cities reported increases over both the preceding month and April, 1930.

Twenty-two of these first 32 cities reported permits in excess of \$100,000. Among this group were Salinas, Astoria and Tucson, which had not reported during the previous month.

The largest gain proportionate to the size of the city was registered by Astoria, Ore., with permits totaling \$264,547.

Among the cities reporting gains over

er both March this year and April, 1930, were San Francisco, Sacramento, Salinas, Burlingame, Orange, Pacific Grove, Spokane, Vancouver, Wash., Tucson, Astoria, and San Bernardino.

Leading cities in March maintained their respective ranks during April, with Los Angeles, San Francisco and Oakland in consecutive order. Seattle again returned to fourth place, followed by San Diego, Spokane and Portland.

With the exception of Los Angeles, Long Beach and Portland, all of the first ten cities showed increases over either the previous month or the same month last year, or over both comparable periods.

PLUMBING FIXTURE FIRMS IN MERGER

The consolidation of the West Coast Porcelain Manufacturers of Millbrae, San Mateo County, and the Sunset Plumbing Fixtures, Inc., of Los Angeles into a \$2,000,000 company is announced.

Executives and business offices of the new firm will be maintained in Los Angeles and both products will be marketed under the trade name of "Sunset" on the Pacific coast.

Officers and directors of the new corporation are: Moritz Thomsen, Seattle, chairman of the board; Adolph Ramish, Los Angeles, president; Chas. M. Thomsen, Seattle, first vice-president; R. C. Troeger, Los Angeles, executive vice-president and secretary; W. R. Coates, Los Angeles, treasurer, and W. A. Shaw, San Francisco, director.

Negotiations are pending for the acquisition of another manufacturing unit in the plumbing industry. It was said, the consummation of which is expected soon.

The merger does not include the old unit of the West Coast Porcelain Manufacturers, which will remain intact. The opening of the old unit in a new line of industry with a prospective personnel of some 150 men is rumored.

BRIDGE DESIGN AWARDS ARE MADE

For the most aesthetic design of a bridge in steel, the American Institute of Steel Construction has awarded five prizes totaling \$1,200. The prize winners were selected from some 150 students of engineering and of architecture in the various colleges and universities of the United States and Canada.

The first prize of \$500 for the best design was given to a student of architecture who went to R. F. Weber of Atelier Adams Nelson, Chicago. The second prize of \$250 was awarded to Glenn E. Crippen of Iowa State College and the third prize of \$100 went to Lester W. Casey of Iowa State College.

The jury decided to withhold the first prize to the group who contested for the best design by an engineering student. The second prize in this group for \$250 was awarded to Jeremiah C. Jandolo of the University of Pennsylvania and the third prize of \$100 went to Covert Robertson of the University of Michigan.

The jury making the selection consisted of Dr. Ralph Modjeski, consulting engineer; Dr. Shortridge Hardesty, consulting engineer; H. H. Murdock, architect; Clinton Mackenzie, architect, and F. E. Schmitt, editor of Engineering News-Record.

This is the third annual competition held by the Institute on bridge designing by students.

NAVIGABLE WATERS DEFINED BY COURT

In ruling on the master's report in the dispute between Utah and the United States over the title to portions of the beds of the Green, Grand and Colorado rivers, the U. S. Supreme Court has held that the determining point is whether or not the rivers in question are navigable. The suit was brought by the United States to quiet title to certain portions of the beds of rivers on the contention that the government had acquired these titles in the treaty of Guadalupe Hidalgo of 1848. By this treaty it is contended that the United States acquired from the Republic of Mexico the title to all lands riparian to the rivers together with the river beds.

On the other hand, the State of Utah, claimed title adverse to the United States. Both the State and the United States have granted a number of prospecting permits in the disputed territory. Charles Warren, the special master to whom the case was referred, concluded in his findings that the title is vested in the State of Utah in the case of rivers that are found to be navigable but where the rivers are non-navigable the title remains vested in the United States.

Despite the contentions of the government that the rivers are not navigable the supreme court has sustained the principles involved in the master's report. In the opinion of the court, the issue rests upon whether or not the rivers were navigable when the State of Utah was admitted to the Union in 1896. In deciding on navigability, the court has ruled that it is not correct to use a narrow interpretation.

As a test of navigability, the supreme court has handed down the following rule: "Those rivers must be regarded as public navigable rivers in law which are navigable in fact and that they are navigable in fact when they are used, or are susceptible of being used, in their ordinary conditions, as highways of commerce, over which trade and travel may be conducted in the customary modes of trade and travel on water."

It is true that some of the commerce on the rivers in question was composed of lumber rafts and that some of the rest of the navigation was of a private nature, constituting traffic for surveying and mining operations. Despite this, the supreme court has been convinced by the evidence submitted that extensive use has been made of portions of the rivers by public commerce vessels such as steamboats, flatboats and motor boats.

It is therefore ruled that the complaint of the United States shall be dismissed so far as it relates to portions of the beds of the rivers found to be navigable and the title in non-navigable portions shall remain in the possession of the United States.

PERPETUAL STATE WATER BUREAU PLAN

A new constitutional amendment setting up a perpetual state water conservation bureau, patterned after a similar agency in the federal government, has been introduced in the assembly by Arthur R. Honnold of San Diego.

The measure would create a bureau consisting of the governor, director of public works and state engineer, for the purpose of co-ordinating and putting into effect a general conservation scheme of water and land reclamation.

PORTLAND SALES UNIT DISSOLVES

The Central Sand & Gravel Co., selling organization for eight of the larger Portland sand and gravel firms, has been dissolved and is discontinuing business as of May 2.

The several companies which composed the Central Sand & Gravel Company will each continue business under their separate identity. They are: Columbia Contract Co., Hackett Ligger Co., Hawthorn Dock Co., Nickum & Kelly Sand & Gravel Co., Pacific Bridge Co., Ross Island Sand & Gravel Co., Star Sand Co., and James A. C. Tait Co.

H. P. Warren, who has been manager of the Central Sand and Gravel Co., is returning to the Portland Gravel Co., a producing company.

PURCELL SALARY BOOST APPROVED

A measure granting an increase in salary from \$10,000 to \$15,000 a year for C. H. Purcell, state highway engineer, was one of a group of bills passed by the assembly last Monday.

The bill, A. B. 1134, by R. L. Patterson of Kern County, was the subject of considerable debate, several assemblymen holding the general conditions at this time do not warrant salary increases. A call of the house was kept on most of the afternoon while votes were being sought for the bill. The final vote was 53 ayes and 18 noes.

Sponsors of the bill pointed to the record Purcell has made as highway engineer as proof that he should be retained at a higher salary. The fear was expressed that he might be employed by a private corporation and that the state thus would be deprived of his services.

Promulgation of a national legislative program to be aggressively supported by organized general contractors at the next session of Congress is to be undertaken by the executive board of the Associated General Contractors of America, Edward J. Harding, managing director of the association, has announced.

Failure of the law makers, notably in the case of the Davis-Bacon Prevailing Wage Act, to frame legislation directly effecting the general contractor in such form that its purposes might be accomplished without hardships and uncertainties, has convinced the association that it must take a constructive hand in the framing of all such legislation in the future, Harding declared.

It is probable, he stated, that the association's program will include a constructive amendment to make the wage law workable and equitable and at the same time assure a living wage to construction labor. Bills for the reorganization of Government contract statutes and for the authorization of a permanent national construction census also will receive the active support of the association, Harding believes, while the board undoubtedly will give favorable consideration to plans for pushing legislation in the States for long-term advance planning of construction and for prequalification.

Properties, sources and technical uses of "Ayr Sil" amorphous silica as an admixture for concrete are discussed in a pamphlet issued by the Industrial Chemical Sales Co., Inc., 230 Park Ave., New York City.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUTTER 1684).

R-3544-S CHIEF STATIONARY EN

GINEER, preferably with technical training and well up on combustion theory for responsible position, large steam plant. Must be a man with experience in actual charge operation of steam power plant. Salary \$275 per month to start. Apply by letter with personal data, detailed experience and reference Location, Southern California.

W-2622-C-S (K-355) CHEMICAL EN

GINEER for engineering comparison experienced in the sales of chemical machinery to establish branch office for the sale of chemical machinery. Persons with a following in the territories preferred. Straight commission basis. Apply only by letter. Locations, Middlewest, Far West and South.

R-3544-S GRADUATE ENGINEER

age 44, with California registration, experienced in engineering experience, desires to connect with an established engineering firm the capacity of partner. Has son capital to invest where hard work and application will pay dividend. Address communications in care of this office.

R-3560-S CHEMIST-ASSAYER, ex

perienced on wet assay work, small mine producing gold, silver, copper, lead and zinc and requiring careful assays to operate. Salary \$165 per month. Apply by letter. Location, Northern California.

R-3562-S FLOTATION OPERATOR

experienced, preferably single as accommodations for family. Runs on quicksilver ore. Salary 1 per day less \$45 per month for board. Location, Northern California.

R-3559-S SALES ENGINEER, to se

sprinkler systems for outside and inside irrigation. Straight commission. Opportunity for right man. Location, San Francisco.

R-3561-S TIME STUDY MAN, ex

perienced, preferably with some knowledge of order manufacturing and the application of the Bedau system. Salary to start, \$125 per month. Location Northern California.

Detailed knowledge of the needs c

airports in connection with drainage and surfacing problems, and information as to present practices along these lines has been obtained from first-hand study of approximately 10 representative airports throughout the United States, undertaken by the Committee on Airport Drainage and Surfacing, it is announced by Harry H. Blee, Director of Aeronautic Development, Department of Commerce and chairman of the committee. The information together with data secured from a variety of other sources will be incorporated in the committee's report, the preliminary draft of which now is being drawn up by a subcommittee. The Committee on Airport Drainage and Surfacing was organized about a year ago, and included in its membership representatives of the American Engineering Council, the American Road Builders Association and the Aeronautic Branch of the Department of Commerce. Outstanding problems that have been given consideration by the committee include landing area requirements, grading, drainage, surfacing, runways, impact, surface textures, transition strips turf and treatment of soils to increase stability.

APARTMENTS

Regulated Bids Being Taken.
APARTMENTS Cost, \$60,000
CLAND, Alameda Co., Cal. Green-wood Ave. near Park Blvd.
 Two-story and basement apartments (wood frame and stucco exterior with concrete basement; 24 2- and 3-room apts.)
 ner—Withheld.
 ict—H. K. Jensen, 354 Hobart St., Oakland.
 ile and composition roofing, gas heating system, hardwood flooring.

ns Completed.
APARTMENTS Cost, \$150,000
N FRANCISCO. SE corner Ellis and Franklin Streets.
 Inforced concrete, steel and brick apartments (tar and gravel roof, electric stoves and refrigerators, 12 2- and 3-room apts.)
 ner—Bargene Realty Co., 323 Mod-ernadock Bldg.
 ict—Charles E. J. Rogers, Phen-ix Bldg.
 bids to be taken in one week.

ns Completed.
APARTMENTS Cost, \$200,000
WOOD, San Mateo Co., Cal.
 ur-story and basement steel and concrete class C apartment building (steam heating system; eight 3-room and 16 4-room apts.)
 ner and Builder—L. Dieguarini, 30 W. Poplar St., San Mateo.
 ict—Wm. Toepke, 715 New Mont-gomery St., San Francisco, and O. G. Hintermann, associated.
 ub-bids will be taken within a few days.

b-Bids Being Taken.
APARTMENTS Cost, \$15,000
N FRANCISCO. Church St. S 13th.
 Two-story and basement frame and stucco apartments, the roof, steam heat, tile baths, six 2-room apts.)
 ner and Builder—R. H. Bell, 917 Hobart Bldg.
 ict—Withheld.

Regulated Bids Being Taken.
APARTMENTS Cost, \$25,000
N FRANCISCO. 274 27th Ave.
 Two-story and basement frame and stucco apartments (three 4-room apts.; steam heat, tile roof).
 ner and Builder—W. Heidelberg, 280 27th Ave.
 ict—Withheld.

Regulated Bids Being Taken — To Close May 20th.
APARTMENTS Cost, \$60,000
CLAND, Alameda Co., Cal. Green-wood Ave. and Park Blvd.
 Two-story and basement apartments (wood frame and stucco exterior with concrete basement; 24 2- and 3-room apts.)
 ner—Withheld.
 ict—H. K. Jensen, 354 Hobart St., Oakland.
 ile and composition roofing, gas heating system, hardwood flooring.

BONDS

ORICK, Humboldt Co., Cal.—Elec-trical will be held May 29 in Orick School District to vote bonds of \$18,000 to finance erection of a new school. Trustees of the district are: M. P. King and Robert S. Davidson.

ROSS, Marin Co., Cal.—Bonds in the amount of \$10,000 were defeated by Ross School District to finance school improvement. Trustees of the district are: Gregory Jones, Ruth D. Broy and Clarence S. Bartchell. A. A. Cantin, 541 Market St., San Francisco, was the architect.

REDWOOD CITY, San Mateo Co., Cal.—Election will be held June 3 in Redwood City School District to vote bonds of \$55,000 to finance erection of a new school on Eagle Hill and for a 2-classroom addition to the Garfield School and the purchase of necessary equipment. John Gill is city superintendent of schools.

CHURCHES

Low Bidder.
CHURCH Cont. Price, \$55,500
PITTSBURG, Contra Costa Co., Cal.
 NW Black Diamond and W Eighth Streets.
 Two-story reinforced concrete church with steel roof trusses (120x12 ft.)
 Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St.
San Francisco, a corp. Sole (St. Peter Martyr Parish), Rev. Louis A. Nazzari, rector.
 Architect—Arnold Constable, 580 Market St., San Francisco.
 Contractor — Larsen & Larsen, Russ Bldg., San Francisco.
 Will have full basement for Parish Hall and auditorium with seats for 700. Will have stucco finish, tile roof and be of Italian Romanesque style of architecture.
 American Seating Co., 650 Second Street, San Francisco, at \$450 submitted lowest bid on oak pews, per screens and kneelers, etc.
 There were thirteen bids submitted.

Plans Being Completed.
CHURCH Cost, \$20,000
SACRAMENTO, Sacramento Co., Cal.
 SW 5th St. and 4th Ave. (72x125 feet).
 One-story reinforced concrete and stucco church (seal 250; tile roof).
 Owner—First English Lutheran Church, Sacramento.
 Architect — Wm. E. Coffman, Forum Bldg., Sacramento.
 Bids will be taken in one week.

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander
SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

7682

Bids Wanted—To Close May 22.
CHURCH Cost, \$—
SANTA MONICA, Los Angeles Co., Cal. Tenth and California Sts.
 Two-story brick and stucco church plant (classrooms and offices).
 Owner—Trinity Baptist Church.
 Architect—Robert H. Orr, 1300 Corporation Bldg., Los Angeles.

FACTORIES AND WAREHOUSES

Plans Being Figured—Bids Close June 1, 11 A. M.
HOG LARIN Cost, \$8,000
STOCKTON, San Joaquin Co., Calif.
 Agricultural Park, County Fair grounds.
 Livestock building and hog barn.
 Owner—County of San Joaquin, Eugene D. Graham, county clerk, Stockton.
 Architect—Peter Sala, 2130 N Commerce St., Stockton.
 Certified check 10% payable to the Chairman of the Board of Supervisors required with bid. Plans on file in office of clerk and obtainable upon deposit of \$10, returnable.

Prospective Bidders.
WAREHOUSE Cost, \$20,000
OAKLAND, Alameda Co., Cal. South Seventh St. E Fallon St.
 One-story concrete warehouse.
 Owner—George R. Borman Steel Co., 4th and Grove St., Oakland.
 Engineer—H. H. Bolin, Financial Center Bldg., Oakland.
 Following contractors will submit bids:
 James T. Walsh, 251 Kearny St., San Francisco.
 R. W. Littlefield, 337 17th St., Oakland.
 Geo. Petersen, 1841 Bancroft Ave., San Leandro.
 Dyer Const. Co., Ray Bldg., Oakland.
 H. J. Christensen, 2026 Broadway, Oakland.
 Jacobs & Pattiani, 337 17th St., Oakland.
 H. L. Paige, 5651 Oak Grove, Oakland.
 F. C. Stolte, 3449 Laguna Ave., Oakland.
 Austin Co., 1924 Broadway, Oakland.
 Bids will be opened May 13, 10:30 A. M.

FRESNO, Fresno Co., Cal.—Plant of Levi Junk Co., M St. and California Ave., suffered a \$60,000 fire loss May 11.

Contract Awarded.
WAREHOUSE Contract price, \$12,870
OAKLAND, Alameda Co., Cal. West 14th Street Pier.
 Structural steel for 1-story steel frame warehouse (515x100-ft.; Warehouse AA).
 Owner—City of Oakland (Port Commission), 424 Oakland Bank Bldg., Oakland.
 Lessee—Rosentberg Bros., 3rd & Bancroft, Oakland.

Owner—Quaker State Oil Refining Co.,
1240 17th St., San Francisco (J. E.
McCormick, in charge), 654 E 60th
St., Los Angeles.

Private plans.

RICHMOND, Contra Costa Co., Cal.
—The Berkeley Water Front Com-
pany has acquired approximately
seventy acres on the inner harbor from
the Parr Terminal Company.

The deal has a bearing on the ac-
tivities of the water front corpora-

tion in Richmond, activities which
call for a development program along
the bay shore toward the south.

Acquisition of the new land gives
the company access to the joint tracks
of the Southern Pacific and the Santa
Fe. It also gives them a channel
past the Ford plant to the main chan-
nel of the Richmond inner harbor.

Purchase of the property completes
the program of buying land in this
vicinity and permits the Berkeley
Water Front Company to proceed
with its development program, details
of which are not fully known.

Contract Awarded.
WAREHOUSE. Cost, \$29,000
SAN FRANCISCO, Phelps St., Ban-
croft and Carroll ayes.

One-story and basement class C con-
crete warehouse.

WHARVES AND DOCKS

LOS ANGELES, Calif.—Until 19 A. M., May 27, bids will be received by the Los Angeles harbor department, at room 112, City Hall, Los Angeles, for the construction of reinforced concrete wharf deck, retaining walls and shed foundations at Berths 144-146, L. A. Harbor, Sp. No. 87. The work includes construction of a concrete wharf deck, approximately 1012x36 ft., approximately 1100 lin. ft. of concrete retaining walls of various heights, and concrete foundations for a steel transit shed. Bidding data may be obtained from the harbor engineer, Branch City Hall, San Pedro. Certified check or bond for 10 per cent must accompany each bid. Burt Edwards, general manager.

SAN FRANCISCO.—Bids will be asked shortly by Constructing Quartermaster, Fort Mason, for repairs to Torpedo Dock at Fort Winfield Scott.

LONG BEACH, Cal.—Until 9 A. M., May 16, bids will be received by the Long Beach city council for furnishing and delivering f.o.b. Pier No. 1, Inner Harbor or Municipal Pier A, Outer Harbor, approx. 135,000 B. ft. 2x12-in. cross-tied Douglas fir, rough. Spec. H. D. 54.

OAKLAND, Cal.—Following bids received by City Port Commission, 421 Oakland Bank Bldg., to furnish and drive pile foundations for Warehouse "C," Outer Harbor.
 (a) untreated wooden piles, furnished and driven, per lineal foot.
 (b) concrete followers, per lineal foot, furnished and driven.

M. B. McGowan, 74 New Montgomery St., San Francisco, (a) \$275; (b) \$240.

Duncanson-Harrelson Co., S. F. (a) \$29; (b) \$150.

Ben. C. Gerwick, San Francisco, (a) \$319; (b) \$150.

A. W. Kitchen, San Francisco (a) \$335; (b) \$175.

Clinton-Stephens Const. Co., S. F. (a) \$32875; (b) \$111.

Healy-Tibbitts Const. Co., S. F. (a) \$357; (b) \$143.

Bids held under advisement.

MISCELLANEOUS CONSTRUCTION

EL NIDO, Merced Co., Cal.—Until June 1, 3 P. M., bids will be received by A. L. Cowell, secretary, El Nido Irrigation District, to furnish redwood, cedar, or cross-tied pine lumber. Certified check or bid bond \$5 required with bid. Specifications obtainable from G. E. Winton, chief engineer of district, Shafter Bldg., Merced.

Commissioned To Prepare Plans.
 BOILER Cost, \$—

LOS ANGELES, Cal. (Campus of the University of California).

Additional boiler.

Owner—Regents of the University of California, Berkeley.

Engineers—Hunter & Hudson, 403 S Spring St., Los Angeles.

MARCH FIELD, Riverside Co., Cal.—See "Government Work and Supplies," this issue. Bids wanted by Constructing Quartermaster to construct incinerator, gas, water, sewerage and electrical connections for 61 buildings and for grading, roads, walks and curbs.

BERKELEY, Alameda Co., Calif.—Snead & Co., at \$3,755 awarded contract by Regents of the University of California to furnish and install book stacks in the group of engineering buildings located on the campus of the University of California.

STOCKTON, San Joaquin Co., Cal.—Bids will be asked at once by city council to construct a 45-inch steel wire netting fence around Yosemite Lake in American Legion Park. The bids will probably be opened at the May 25th meeting of the council. Further mention will be made of this work.

SAN FRANCISCO.—Bids will be asked shortly by the Board of Public Works to construct a 6-ft. concrete stairway in the north side of 22nd St., between Kansas and Rhode Island Sts.; estimated cost \$1000. Plans for work have been completed by the Bureau of Engineering, 3rd floor, City Hall.

ALAMEDA, Alameda Co., Cal.—Until May 19, 8 P. M., bids will be received by W. E. Varcoe, city clerk, for resurfacing south tennis court at Lincoln Park. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Burnett Hamilton, city engineer.

LOS ANGELES, Cal.—The Los Angeles Park Commission has been authorized by the city council to employ an architect for the preparation of plans and specifications for an observatory, planetarium and museum of science to be erected at Griffith Park. Provisions for this project were made in the will of the late Colonel Griffith J. Griffith.

MISCELLANEOUS SUPPLIES AND MATERIALS

ORANGE, Orange Co., Cal.—Until 1 p. m. June 2, bids will be received by city council to furnish Neon sign to be placed on the Butterfield property north of the county hospital. Specifications on file at office of city clerk.

MONTEREY, Monterey Co., Cal.—W. W. Hastings, 282 Alvarado St., Monterey, is in the market for catalogs and information on Neon electric signs.

LOS ANGELES, Cal.—Until 11 A. M. May 18th bids will be received by Thomas Oughton, City Purchasing Agent, for furnishing porcelain enameled iron signs under specifications Nos. 2444, f. o. b. department of water and power's warehouse, 1630 N. Main St. The items are:
 (1) 12,500 "high" sign 3½x5-in.;
 (2) 12,500 "voltage" signs, 3¼-in.x5¼-in.;
 (3) 11,000 "high voltage" signs, 3¼-in.x12-in.;
 (4) 10,000 "M" signs, 3¼-in.x2½-in.

SALINAS, Monterey Co., Cal.—Until May 18, 7:30 P. M., bids will be received by M. R. Keef, city clerk, to furnish and deliver oils and gasoline to city for period commencing May 18, 1931, and ending May 18, 1932. Specifications obtainable from clerk.

In seeking to comply with the provisions of the Davis-Bacon prevailing wage law, contractors for public buildings encounter difficulties, says Paul Wooton, Washington correspondent for Engineering News-Record. One of the first applications of this law, which requires that they must pay prevailing wage rates, was made by District of Columbia officials in connection with building work in the city of Washington. In instructions to bidders the district officials inserted the requirement that the contractors must submit a certified copy of their time books every month showing the work covered by the measurement sheets, this requirement extending to work of subcontractors or other work included in the payment, either incorporated in the building or on which the 60 per cent allowance for material is paid. To comply with the requirements, a contractor would be forced to submit certified copies of the payrolls of cement mills, steel plants and other manufacturing industries. The contractor would also be forced by these rigid requirements to determine whether or not the supply industries are paying prevailing wage rates to their employees. After protest, an order was issued modifying the requirements to relieve the contractor of responsibility concerning wages paid by supply trades. In the opinion of department officials the incident demonstrates the confusion in government circles as to the method of administering the law.

American Contractor Equipment Co. of Nevada has filed articles of incorporation in Oakland. Directors are Leslie E. Johnson, P. M. Layton, C. L. Dowd, T. L. Withers and A. E. Painter, all of Reno, Nevada.

Engineering News Section

BRIDGES

PLACERVILLE, El Dorado Co., Cal.—Until June 2, 2 P. M., new bids will be received by Arthur J. Koletzke, county clerk, to construct reinforced concrete girder bridge for the South Approach of the Coloma Bridge on the South Fork of the America River. Previous bids were rejected, these being:

Geo. D. Hudnutt, Inc., Sacto.....\$2460
A. B. Hauser, Modesto.....2488
H. Williamson, Placerville.....2699
J. P. Morton, Placerville.....2793
Nelson Bros., Escalon.....3400
Certified check 10% payable to clerk required with bid. Plans obtainable from Henry Lahiff, county surveyor, at Placerville.

SUTTER COUNTY, Cal.—Senate Finance Committee has recommended for passage a bill by Senator W. P. Rich, Yuba County, which appropriates \$35,000 to build a bridge across the Tisdale Weir in Sutter County. The bridge is in a county road and the appropriation was opposed by the department of finance because of this fact. Senator J. M. Inman, Sacramento, however, declared the necessity for the bridge grew out of the creation of an "artificial river" by the state in Sutter County flood control work and the county was not responsible for the bridge being needed.

SACRAMENTO, Cal.—Until May 29, 10 A. M., bids will be received by H. W. Hall, county clerk, for the sale of the Natomas Realestate. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Further information obtainable from Chas. Detering, county engineer.

SACRAMENTO, Cal.—Until May 29, 10 A. M., bids will be received by H. W. Hall, county clerk, to construct the Stoll Bridge, northeast of Rio Linda. Certified check 10% payable to the Chairman of the Board of Supervisors required with bid. Plans obtainable from County Engineer Chas. Detering at Sacramento.

SAN JOSE, Santa Clara Co., Cal.—Until May 25, 8 P. M., bids will be received by C. B. Goodman, city manager, to construct reinforced concrete bridge over Guadalupe river at Home-West Virginia Sts. Project involves 425 cu. yds. concrete. Certified check 10% payable to city required with bid. Plans obtainable from Wm. Popp, city engineer, on deposit of \$10, of which \$5 is returnable.

TRINITY COUNTY, Cal.—H. H. Boon, Mills Bldg., San Francisco, at \$18,000, awarded contract by State Highway Commission to construct reinforced concrete girder bridge over Browns Creek, consisting of one 32-ft. span on concrete abutments with wing walls. Complete list of unit and total bids received on this project published in issue of May 6.

LANE COUNTY, Ore.—Until May 20 10 A. M., bids will be received by W. H. Lynch, district engineer, U. S. Bureau of Public Roads, 316 New Post-office Bldg., Portland, Ore., to construct Hell Gate Bridge over the Willamette River, Willamette Highway, Project No. 21-D-1, consisting of two

160-ft. through steel truss spans and five 15-ft. concrete tee beam spans on concrete substructure with alternate design for piles under footings, involving in the main:

- (1) 550 cu. yds. unclass. excavation for structures;
- (2) 245 cu. yds. class A concrete;
- (3) 506 cu. yds. class D concrete;
- (4) 60 cu. yds. class S concrete;
- (5) 125,000 l.b.s. reinf. steel;
- (6) 440,000 l.b.s. structural steel;
- (7) 2,909 lin. ft. untreated piling.

Plans obtainable from district engineer on deposit of \$10, returnable.

CLARK COUNTY, Nevada—Until May 20, 2:30 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, to construct reinforced concrete bridge approximately 1000 ft. long, including approaches, over the Virgin River at a point between Mesquite and Bunkerville. Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

SAN LUIS OBISPO COUNTY, Cal.—Until June 3, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge over San Marcos Creek about 7 miles north of Paso Robles, consisting of four 40-ft. spans on concrete bents and grading and paving approaches with Portland cement concrete.

ORANGE COUNTY, Calif.—R. R. Bishop, Long Beach, at \$51,718 submitted low bid May 13 to State Highway Commission to construct bridge across Santa Ana River about 2 miles north of Newport Beach, consisting of three 60-ft. 3-in. steel truss spans to be replaced with concrete girder spans and widening the reinforced concrete girder approach spans consisting of two 31-ft. 0-in. spans, eight 30-ft. 0-in. spans and two 21-ft. 0-in. spans. Complete list of bids follows:

R. R. Bishop, Long Beach.....\$51,718
Nood Const. Co., Wilmington.....59,947
Merritt, Chapman & Scott, San Pedro.....64,298
Oberg Bros., Los Angeles.....64,340
J. F. Metzger & Son, L. A.....66,217
Owl Truck Co., Compton.....70,763
Herbert Baruch Corp., L. A.....72,531
L. A. Travers, L. A.....78,788
Byert & Dunne, L. A.....80,044

Bids held under advisement.

SANTA BARBARA COUNTY, Cal.—Neves & Hart, Santa Clara, at \$18,000 submitted low bid May 13 to State Highway Commission to remove deck of the seven 164-ft. 6-in. through steel truss spans of the bridge across the Santa Ynez River about 1 mile south of Buellton and constructing laminated timber floor and surfacing with bituminous macadam. Complete list of bids follows:

Neves & Hart, Santa Clara.....\$18,009
Gist & Bell, Arcadia.....19,718
Johnson Const. Co., L. A.....23,649
Oberg Bros., Los Angeles.....24,629

Bids held under advisement.

DREDGING, HARBOR WORKS & EXCAVATIONS

SAN FRANCISCO—Until July 9, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, for rock

removal in San Francisco Bay. Specifications obtainable from above office.

SACRAMENTO, Cal.—Bids will be asked shortly by U. S. Engineer Office, California Fruit Bldg., to construct concrete weir with apron and abutment walls near Moulton Laundry on the Sacramento River.

SACRAMENTO, Cal.—Until May 20, 3 P. M., under circular Proposal No. 31-216, Specifications No. 2294, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, for removing approximately 2,500 cubic yards of material from Mormon Channel. Specifications obtainable from above office.

MONTEREY, Monterey Co., Calif.—City votes bonds of \$32,250 to finance the purchase of shore connection and spur track facilities in connection with the proposed \$60,000 Lighthouse to be constructed by the Federal Government.

SAN FRANCISCO—The American Dredging Co., 255 California St., San Francisco, at \$343, cu. yd. submitted low bid, under Specification No. 625, bids will be received by Public Works Officer, Twelfth Naval District, 100 Harrison St., for dredging approximately 26,000 cubic yards of sand and mud from the Inner Boat Harbor, and along the faces of the Long Wharf and the Oil Wharf at Sausalito, Buena Vista Island, and disposing of the material in an authorized dumping ground. Complete list of bids as follows:

American Dredging Co.....\$343
Pacific Coast Dredging Co.....36
S. F. Bridge Co.....40

Taken under advisement.

MACHINERY AND EQUIPMENT

FRESNO, Fresno Co., Cal.—City council plans to provide \$2,500 in budget to finance purchase of motor ambulance.

PASADENA, Cal.—Until 11 a. m., June 5, bids will be received by the Pasadena city directors for rotary air compressor for the sewage disposal plant, near Alhambra. Bids are being taken as follows:

Item 1-A One rotary type air compressor, horizontal type, connected to a 3-phase synchronous electric motor 440 volts 40 deg. C. 50 cycles unitary power factor equipped with synchronizing motor field rheostat (D. C. excitation will be supplied by the city from a 125 volt D. C. bus) automatic start and stop push button station, suitable automatic reduced voltage starter or equivalent with starting kVA not to exceed 350 per cent of full load kVA of motor (D. C. ammeter, 1 AC ammeter, overload and no voltage relays for automatically disconnecting motor when pulled out of synchronism, power factor indicating meter panel or bracket mounting, furnished and connected complete as per the following instructions:

Panel and starting equipment shall be assembled complete in every respect and ready to be installed by the City of Pasadena.

Item 1-B—Alternate bids are desired on duplicate of Item 1-A except that the synchronous motor shall be a .9 leading power factor.

Item 1-C—Alternative to Item 1-A except that motor shall be .8 leading power factor. Alternate bids are requested on the motor to be furnished and a selection of only one will be made.

The service is the delivery of at least 8000 cu. ft. of free air per minute at not less than 7½ nor more than 8½ pounds gauge pressure at the 16-in. longitudinal air main on the aeration tanks, under the atmospheric conditions prevailing at that locality and as stated herein.

The above is to be furnished and erected in the compressor house at the Pasadena sewage disposal plant, located near the city limits.

Bidder will supply full prints and specifications for any necessary starting apparatus. The city will furnish and install the necessary wiring between the switch board and the apparatus furnished.

Specifications may be obtained from the city engineer, Geo. K. Hooper, Bessie Chamberlain is the city clerk.

LOS ANGELES, Calif.—Until 11 A. M., May 19, bids will be received by city purchasing agent, Thomas Oughton, for furnishing a dust collection system, similar in type to the Cyclone Wet Chamber System, and to be installed at the San Fernando asphalt plant, 12,251 Sherman Way, under Spec. No. 2454.

SAN FRANCISCO.—Until May 25, 7:30 P. M., bids will be received by F. T. Kennedy, secretary, Fire Commission, Room 2, City Hall, for dry-docking, repainting of hull, scraping, wire brushing, overhauling and repairing the fireboat "Dennis T. Sullivan." Specifications obtainable from above.

SAN DIEGO, Calif.—English Const. Co., Washington, D. C., at \$145,000, item 1, complete, submitted low bid to Bureau of Yards and Docks, Navy Dept., Washington, D. C., under Spec. 6460, for floating derricks for the Navy Yard at Mare Island and the Naval Operating Base at San Diego. The work consists of two 25-ton floating steel derricks of the stiff-leg type with bull wheel having steel pontoons, steam engines, and oil burning boilers; one delivered to the Navy Yard, Mare Island, and the other to the Naval Base (Destroyer Base), San Diego. Bids were taken on alternates providing separate lidding.

(Item 1) Revolving cranes in lieu of derrick. (Item 2) Diesel engines in lieu of oil burning boilers and steam engine drive. (Item 3) Diesel-electric drive in lieu of oil burning boiler and steam engine drive. A complete list of bids will be published shortly.

RAILROADS

PHOENIX, Arizona.—Until 10 A. M., May 20, bids will be received by city commission for furnishing special work delivered at the Railway depot for the city under specifications and plans which may be seen at the office of the Superintendent of the Street Railways, Phoenix. Bids shall specify by trade name the special work upon which they are bidding and state delivery date. Price to be f.o.b. Phoenix. All frogs, crossovers, switches, mates and other material entering in the manufacture of special work shall be done under the American Electric Railway Engineering Assn. Specifications, Manual W. 104-16, W. 105-26, W. 106-26, W. 107-26, W. 108-26, and W. 109-26. Certified or cashier's check on a bank payable to the city of Phoenix, in the amount of 5% of the total amount of bid, must accompany each bid. Geo. H. Todd, city manager.

FIRE ALARM SYSTEMS

SANTA BARBARA, Cal.—City defects proposal to issue bonds of \$24,000 to finance installation of a police call system, 2294 votes being in favor and 2700 against; another proposition to provide \$24,000 to finance installation of an automatic traffic signal system, also failed, 262 votes being in favor and 3079 against. A two-third's majority was required to carry the proposals.

ALAMEDA, Alameda Co., Cal.—City council will ask bids at once to resurface tennis courts at Lincoln Park. Burnett Hamilton, city engineer.

EQUIPMENT

LIVERMORE, Alameda Co., Cal.—Pacific Fire Extinguisher Co., San Francisco, at \$2,675 awarded contract by city trustees to furnish motor pumping unit for Fire Department.

FRESNO, Fresno Co., Calif.—Until May 21, 10:30 A. M., bids will be received by H. S. Foster, city clerk, to furnish 600-ft. of 1½-in. D.J.R.L. fire hose, 400-lbs. test, and 800-ft. 2½-in. D.J.R.L. fire hose, 400-lbs. test, for Fire Department. Couplings to be Pacific Coast Standard thread. Certified check 10% payable to city required with bid. Specifications on file in office of clerk.

RESERVOIRS AND DAMS

SANTA ANA, Orange Co., Calif.—Change of location of the proposed Santa Ana River Dam from the lower Prado site to the upper or Chester site, is one of the modifications in the new Orange County Flood Control District report filed with the board of supervisors of Orange county April 28. A modification of cost decreases the estimate from \$16,500,000 to \$10,600,000. The estimate of cost of constructing the Chester site dam is set at \$7,215,323. The dam would be 93 ft. high and have a storage capacity of 180,000 acre feet. The report also provides for the acquisition of the Santa Ana River channel to the sea, the addition of 25 ft. to the dam being built in Santiago Canyon by the Irvine Co., the Serrano Irrigation District, and the Carpenter Water District, the increased height to cost \$498,560. Other dams proposed by the engineers are:

A dam 33 ft. high with a storage capacity of 15,750 acre feet on San Juan creek, four miles above San Juan Capistrano, to cost \$1,077,980. (The earlier plan recommended \$1,187,100 for dams on San Juan and Trabuca creeks).

A Carbon canyon control, consisting of a dam 115 feet high above Olinda, storing 2500 acre ft. and costing \$481,900; also a channel, lined with concrete through the orchard areas, and carrying water to the Santa Ana river for spreading, this to cost \$141,383.

A dam on Brea creek, above Fullerton, 73 feet high, storing 3300 acres, this dam to cost \$149,737 and enlargement of Brea channel at a cost of \$253,073; a diversion pipe leading to the old river bed southwest of Fullerton, costing \$141,383.

Fullerton reservoir, consisting of a dam 39 feet high, storing 770 acre feet and costing \$44,870.

The board of consulting engineers which prepared the report, consists of Thomas Mearns, G. A. Elliott, both of San Francisco; and Prof. E. A. Etcheverry, of Berkeley.

PIPE LINES, WELLS, ETC.

SALT LAKE CITY, Utah.—Morrison - Knudsen Co., Boise, Idaho, awarded contract by Salt Lake City at \$262,314 to construct about 7 miles of 30-in. and 36-in. welded steel pipe line. The bid was a total of \$106,024 for constructing a 30-in. pressure line and \$156,890 for constructing the 36-in. gravity line.

LOS ANGELES, Cal.—Contracts for the construction of Sections 2, 3, and 4 of the Southern Fuel Co.'s natural gas pipe line between Glendale and Kettleman Hills were tentatively awarded by the Board of Directors May 8, according to F. B. Lewis, vice-president of the Southern California Edison Co., and one of the directors of the Southern Fuel Co. Details of the proposed contracts have not been announced due to certain engineering matters which have to be considered before the basis upon which the award may be made can be worked out. The board will make recommendations of the board follow:

Section 2, 31 miles between Glendale and Castaic, and Section 4, 109 miles between Castaic and Kettleman Hills, to Macco Construction Co., 815 Ocean Ave., Clearwater and Robertson Co., 300 East 61st St., bidding together.

Section 3, 40 miles across the ridge between Castaic and Grapevine, to Southern California Constr. Co., 111 Mesenger St. and Lang Transportation Co., 5501 Santa Fe Ave.

Other bidders who submitted bids on this work were: M. Miller, Hutchinson Co., Bechtel & Kuiser, Claude Fisher, R. A. Wattson, and the General Engineering Co.

ABERDEEN, Wash.—Wright Const. Co., Aberdeen, at \$75,613.25 awarded contract by city council to reconstruct 3.8 miles of the Wishkah Pipe Line in connection with the municipal water system. The successful bidders will use wood pipe cut and treated in Aberdeen.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, completes specifications to sewer Alameda St., bet. Bryant St. and Treat Ave. Estimated cost \$2100. Project involves:

- (a) 440 lin. ft. 15-inch V.C.P. sewer;
- (b) 6 15x8-inch Y or T branches;
- (c) 3 brick manholes.

SAN RAFAEL, Marin Co., Calif.—County supervisors declared intention (5) to construct sanitary sewer system in Homestead Valley Improvement District No. 1, involving:

- 11,103 ft. 6-in vitrified pipe;
- 4,219 ft. 8-in vitrified pipe;
- 3,683 ft. 10-in. vitrified pipe;
- 2,485 ft. 12-in. vitrified pipe;
- 746 ft. 6-in. cast iron pipe;
- 50 ft. 8-in. cast iron pipe;
- 52 ft. 8-in. concrete;
- 286 ft. 10-in. concrete piling;
- 57 manholes;
- 6 lamp-holes.

County Imp. Act 1921 and Imp. Act ham, county clerk. J. C. Oglesby, en-1911. Hearing May 18. Rob. E. Graginer, San Rafael.

LAS VEGAS, Nev.—The \$160,000 sewer bond issue carried at the election May 6. The issue provides for a sewage disposal plant and about six miles of sewer mains. The laterals will be built by assessment districts. The Benham Engineering Co., consulting engineer, is handling the engineering work and prepared the preliminary estimate.

PHOENIX, Ariz.—Until May 23, 10 a. m., bids will be received by city commissioner for construction of sewage treatment and disposal plant and lateral sewers, under the \$517,000 bond issue. Proposal involves: **SEWAGE TREATMENT AND DISPOSAL PLANT AT SITE A**

Intake Works

540 cu. yds. excavation;
7800 lbs. reinf. steel;
3000 cu. ft. concrete;
Brick bulkhead;
Mechanical lat. screen;
Venturi flame recording mechanism;
Wood construction floor gratings;
Sluice gates and piping;
Screen house superstructure.
Primary Clarifier and Drainage Sump
6000 cu. yds. excavation;
45,700 lbs. reinf. steel;
10,200 cu. ft. concrete;
16 cast 8-in. tile drain;
56 cast iron pressure relief valves;
Mechanism, influent equalizer, metal weirs, floor gratings, sump manhole frame and cover, and pipe lines.

Channel and By-Pass between Primary Clarifier and Aerator

21 cu. yds. excavation;
1100 lbs. reinf. steel;
245 cu. ft. concrete;
Floor gratings and sluice gates.
Aerator and Sludge Return
41,900 cu. yds. excavation;
857,700 lbs. reinf. steel;
214,400 cu. ft. concrete;
1230 ft. 8-in. tile drain;
12 rotating mechanisms;
6 diffuser plate units;
30 air diffuser plates;
4 precast concrete containers;
900 ft. 4-in. cast iron air supply lines, welded or flanged;
620 ft. 4-in.;
110 ft. 8-in.;
550 ft. 10-in.;
15 expansion joints;
12 12-in. circ. and 10 ft. 2 in. rect. sluice gates;
84 2-in. and 6 6-in. plug valves;
Weir plates, wood construction and floor gratings;
Secondary sludge pumping equipment and house;
600 ft. 16-in. cast iron pipe;
75 ft. 12-in. cast iron pipe;
3 16-in. gate valves;
One 12-inch gate valve;
240 ft. 8-in. cast iron pipe;
One 8-in. flap gate;
Channel Between Aerator and Secondary Clarifier
26 cu. yds. excavation;
900 lbs. reinf. steel;
200 cu. ft. concrete;
Floor gratings.

Secondary Clarifier and Drainage Sump

15,450 cu. yds. excavation;
126,000 lbs. reinf. steel;
28,200 cu. ft. concrete;
800 ft. 8-in. tile drain;
48 8-in. cast iron pressure relief valves;
One mechanism;
One influent equalizer;
Metal weirs;
Floor gratings;
Sump manhole frame and cover and pipe lines.

Thickeners

350 cu. yds. excavation;
11,250 lbs. reinf. steel;
2500 cu. ft. concrete;
One mechanism;
Pipe lines.

Digesters

2400 cu. yds. excavation;
117,000 lbs. reinf. steel;
26,000 cu. ft. concrete;
One steel stairway;
Two mechanisms;
Two gas collecting systems;
Two hot water heating systems;
Two sludge lines.

Sludge Drying Beds

2600 cu. yds. excavation;
15,000 ft. concrete;
45,100 lbs. reinf. steel;

800 ft. 6-in. vitrified drain;
2500 cu. yds. filter rock;
One conveyor crane and mechanism;
Cast iron sludge lines.

Control House

50 cu. yds. excavation;
2300 lbs. reinf. steel;
1200 cu. ft. concrete;
Superstructure.

Power Houses and Equipment

350 cu. yds. excavation;
15,000 lbs. reinf. steel;
5000 cu. ft. concrete;
One superstructure;
One mechanical equipment;
One chlorine tank;
Crane and hoist;
Compressors;
Air supply and filters;
Sludge pumps;
Gas steam boiler;
Heat exchange and water circulating pump;
Switchboard, meters, and control equipment.

Gas Holder

100 cu. yds. excavation;
1500 lbs. reinf. steel;
650 cu. ft. concrete;
Steel gas holder.

Outfall Structures

5170 cu. yds. excavation;
5100 lbs. reinf. steel;
1650 cu. ft. concrete;
21,000 sq. ft. Gunite;
100 ft. 36-in. reinf. concr. pipe.
Miscellaneous Items
600 ft. 6-in. and 600 ft. 4-in. cast iron pipe;
100 ft. 1½-in. and 200 ft. 2-in. galv. iron pipe;
575 ft. 6-in. cast iron soil pipe;
Outdoor lighting system;
600 ft. 1½-in. galv. iron gas pipe;
160 ft. concrete pipe trench;
150 ft. 54-in. circ. hand, or centr. cast or monolithic or 57-inch semi-ellipt. mono. sewer;
1000 ft. 36-in. reinf. concr. by-pass sewer.

TRUNK LINE SEWERS

Line M

1320 lin. ft. 54-in. circular hand made or 54-in. centrif. cast, or 54-in. circular monolithic, or 57-in. semi-elliptical monolithic reinf. concrete sewer.

Line A

2650 lin. ft. 48-in. circular hand made, or 48-in. centrif. cast, or 48-in. circular monolithic, or 51-in. semi-elliptical monolithic reinf. concrete sewer.

5290 lin. ft. 42-in. circular hand made, or 42-in. centrif. cast, or 42-in. circular monolithic, or 45-in. semi-elliptical monolithic reinf. concrete sewer.

2140 lin. ft. 36-in. circular hand made, or 36-in. centrif. cast, or 36-in. circular monolithic, or 42-in. semi-elliptical monolithic reinf. concrete sewer.

5110 lin. ft. 36-in. circular hand made, or 36-in. centrif. cast, or 36-in. circular monolithic reinf. concrete sewer.

560 lin. ft. 24-in. circular hand made, or 24-in. centrif. cast, or 24-in. circular monolithic reinf. concrete sewer.

800 lin. ft. 21-in. vitrified or 21-in. machine made concrete pipe.
230 lin. ft. 18-in. vitrified or 18-in. machine made concrete pipe.
380 lin. ft. 15-in. vitrified or 15-in. machine made concrete pipe, 19 manholes.

Line A-1

405 ft. 18-in. vitrified or 18-in. machine made concrete, one manhole.

Line B

7580 lin. ft. 36-in. circular hand made, or 36-in. centrif. cast, or 36-in. circular monolithic reinf. concrete sewer.

4020 lin. ft. 33-in. circular hand made, or 33-in. centrif. cast, or 33-in. circular monolithic reinf. concrete sewer.

2620 lin. ft. 30-in. circular hand made, or 30-in. centrif. cast, or 30-in. circular monolithic reinf. concrete sewer.

3350 lin. ft. 27-in. circular hand made or 27-in. centrif. cast, or 27-in. circular monolithic reinf. concrete sewer.

5300 lin. ft. 24-in. circular hand made, or 24-in. centrif. cast, or 24-in. circular monolithic reinf. concrete sewer.

2810 lin. ft. 21-in. vit. or 21-in. machine made concrete pipe.

1310 lin. ft. 15-in. vitrified or 15-in. machine made concrete pipe, 47 manholes.

Line B-1

1150 ft. 15-in. vitrified or 15-in. machine made concrete pipe, 4 manholes.

Line B-2

2840 ft. 12-in. vitrified or 12-in. machine made concrete pipe, 5 manholes.

Line C

6105 lin. ft. 20-in. circular hand made, or 30-in. centrif. cast, or 30-in. circular monolithic reinf. concrete sewer.

6600 lin. ft. 27-in. circular hand made, or 27-in. centrif. cast, or 27-in. circular monolithic reinf. concrete sewer.

900 lin. ft. 21-in. circular hand made, or 24-in. centrif. cast, or 24-in. circular monolithic reinf. concrete sewer.

3757 sq. yds. pavement replace.

31 manholes.

One wye branch.

LATERAL SEWERS
40,210 lin. ft. 8-in. vit. or 8-in. concr. pipe.

93 manholes.

88 sq. yds. pavement replace.

135 ft. 6-in. vit. or 6-in. concr. pipe.

30 flush tanks.

110 wye branches.

Plans may be obtained from the city engineer upon payment of the following: for sewage treatment and disposal plant plans, \$10; trunk line sewer plans, \$20; lateral sewer plans, \$15.

The city will consider bids on each of the three sections, viz: treatment plant and disposal plant, the trunk lines and the laterals.

C. C. Kennedy, Civil Building, San Francisco, is the consulting engineer.

BERKELEY, Cal.—Alameda Co., Cal.—Martin Murphy, 777 Eighth St., Oakland, at \$2650 awarded contract by city council to construct sewer in Ragmont Ave., between Euclid and Regal Road, involving 790 lin. ft. 15-in. sewer, \$2.75; 225 lin. ft. 4-in. drain tile, \$6.60; 1 manhole, \$80; 10 cu. yds. "A" concrete, \$15; 1 cu. yd. "B" concrete, \$15; 125 cu. yds. backfill, \$3. Complete list of unit bids rejected on this project published in issue of April 29.

OAKLAND, Cal.—City defeats proposal to issue bonds of \$1,200,000 to finance sewer construction in various sections of the city.

MARCH FIELD, Riverside Co., Cal.—See "Government Work and Supplies," this issue. Bids wanted by Constructing Quartermaster to construct incinerator, gas, water, sewerage and electrical connections for 61 buildings and for grading, roads, walks and curbs.

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Cal.—Until 10 A. M. May 20, bids will be received by the board of public works for constructing pedestrian subway across Figueroa St. at 29th St., the subway consisting of twin tunnels each about 102 ft. in length, of 7 ft. 3 in. by 6 ft. section, with drainage into a sanitary sewer. The two tunnels will cost about \$16,-

900. Plans were prepared by R. H. Bacon under the direction of Merrill Butler, chief bridge engineer, 6th floor City Hall.

WATER WORKS

MARTINEZ, Contra Costa Co., Cal.—City Engineer Ben Greene preparing estimates of cost for development of water system including a steel storage tank on Thomas Hill adjoining the city's concrete reservoir.

MARCH FIELD, Riverside Co., Cal.—See "Government Work and Supplies," this issue. Bids wanted by Constructing Quartermaster to construct incinerator, gas, water, sewerage and electrical connections for 61 buildings and for grading, roads, walks and curbs.

HONOLULU, T. H.—Bids will be asked shortly by the Constructing Quartermaster, Fort Mason, San Francisco, for water softener plant for Honolulu. Will have capacity of 75,000 gallons. Further mention will be made of this work when a date for opening bids is determined.

EUREKA, Humboldt Co., Cal.—Halsby & Lax, Eureka, at \$1388 awarded contract by city council to construct four filter tanks at Hawthorne and Broadway for Municipal Water Department. Complete list of bids follow:
Halsby & Lax\$1388
A. C. Johnson
Northern R. W. Lumber Co. 1756
E. D. Gardner, city engineer, estimated the cost at \$1200.

DENVER, Colorado—Stearns-Rogers Mfg. Co., 1250 California St., Denver, awarded contract by U. S. Bureau of Reclamation at \$1,174.50 for three motor-driven centrifugal pumps, each having a discharge capacity of 550 G. P. M. when operating against a total effective head of 115 ft.

ST. HELENA, Napa Co., Cal.—Until May 21, 3 P. M. bids will be received by J. G. Finch, city clerk, to furnish six inch cast iron pipe and connections; also lay pipe line from Pond's Well, west of Calistoga. Bonds of \$15,000 recently voted to finance this work. Specifications on file in office of clerk.

EXETER, Tulare Co., Cal.—Until May 25, 3 P. M. bids will be received by T. E. Aubrey, city clerk, for
(1) One 200,000-gallon stand pipe;
(2) trenching and backfilling for approximately 4,700 lin. ft. of 4, 6 and 8-in. pipe;
(3) furnish and install approximately:
1,850 ft. 4-in. pipe
2,700 ft. 6-in. pipe
300 ft. 8-in. pipe
7 fire hydrants
60 service connections with gate valves and other appurtenances
(4) Painting 200,000-gallon stand pipe. Certified check 5% payable to Mayor required with bid. Further information obtainable from clerk.

OAKDALE, Stanislaus Co., Cal.—City Clerk Clarence Wood has been authorized by the Oakdale city council to secure information as to the cost of a 100,000-gallon tank to provide additional water pressure for fire protection.

NEVADA CITY, Nevada Co., Cal.—City Council will call election May 28 to decide on diversion of \$2000 swimming pool bond funds to improve water system and the remaining \$8000 on the improvement of streets.

MANTECA, San Joaquin Co., Cal.—Members of the Nile Garden Farm Bureau Center have placed themselves on record against the use of pumps as a solution to the drainage problem of the South San Joaquin Irrigation District.

PLAYGROUNDS & PARKS

MANTECA, San Joaquin Co., Cal.—E. C. Woodruff, president of the Manteca District Chamber of Commerce and D. W. Brownell, chairman of the Park Committee of that organization, have submitted plans to the city council for improvements at the city park site. Plans provide for planting 50 shrubs and 26 trees. The work will be financed by private subscription.

ALAMEDA, Alameda Co., Cal.—Until May 19, 8 P. M., bids will be received by W. E. Varcoe, city clerk, for resurfacing south tennis court at Lincoln Park. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Burnett Hamilton, city engineer.

OAKLAND, Cal.—City defeats proposal to issue bonds of \$75,000 for finance public park and playground developments.

STREETS AND HIGHWAYS

SALINAS, Monterey Co., Calif.—James L. Conner, 1221 9th St., Monterey, at \$7,600 awarded contract by county supervisors to grade portion of River Road in Supervisor District No. 3, involving 45,000 cu. yds. roadway excavation and 40,000 sta. yds. overhaul. Following is complete list of bids:
James L. Conner, Monterey\$7,600
George G. Wood, Santa Cruz 8,790
A. B. Hauser 9,150
L. W. Hess 9,800
Granite Construction Co. 10,120
Watsonville 11,100
Lee J. Immel, Oakland 11,200
Carl W. Heple 12,100
W. A. Dontanville, Salinas 12,847
Owl Truck Co. 13,450
Steele Finley, Santa Ana 13,450

QUINCY, Plumas Co., Calif.—M. A. Jenkins, 3550 Y St., Sacramento, at \$7,372.57 awarded contract by county supervisors for 20,800 sq. ft. 6-in. cement concrete pavement, including grading. R. D. Tucker, Quincy, at \$8,158.75, only other bidder.

SAN BERNARDINO COUNTY, Cal.—Until June 3, 2 P. M., bids will be received by State Highway Commission to grade and pave with asphalt concrete, 2.2 miles through Upland.

MINERAL COUNTY, Cal.—Until May 20, 2 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, for grading, con-

structing structures and placing gravel surface on 10.42 miles between Hawthorne and Dutch Creek. Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

MONO COUNTY, Cal.—Until June 3, 2 P. M., bids will be received by State Highway Commission to grade and surface with bituminous treated crushed gravel or stone, 12.3 miles between Yerby and Casa Diablo Hot Springs.

SAN BENITO - SANTA CLARA COUNTIES, Cal.—Until June 3, 2 P. M., bids will be received by State Highway Commission to grade and surface with bituminous treated crushed gravel or stone surface, 4.7 miles between 3.2 miles north of Hollister and Pacheco Pass Road.

CALAVERAS COUNTY, Cal.—Until June 3, 2 P. M., bids will be received by State Highway Commission for surface treatment on 15.5 miles between Murphys and Big Trees.

SISKIYOU COUNTY, Cal.—Until June 3, 2 P. M., bids will be received by State Highway Commission to apply to existing roadbed bituminous surface treatment on 7.0 miles between 1.5 miles north of Yreka and the Klamath River.

WHITE PINE COUNTY, Nevada.—W. K. McMillan, 2088 Howard St., San Francisco, at \$80,645.65 submitted low bid May 7 to C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, San Francisco, for grading 9.620 miles of Section A of Route 13, Midland Trail (Ely-Holt Creek) National Forest Highway, Nevada National Forest and Federal Lands Project No. 1, part of Midland Trail (Ely-Tonopah) State Route No. 4, White Pine County, Nev. Project involves:
12,400 cu. yds. unclassified excav.;
1,451 cu. yds. unclass. excav. for struc.
10,800 sta. yds. overhaul;
9,620 miles finishing earth graded rd.;
133.2 cu. yds. class A concrete;
110.2 cu. yds. class B concrete;
12,350 lbs. reinforcing steel;
102 cu. yds. cement public masonry;
2,246 lin. ft. C. M. pipe;
300 lin. ft. move fence;
28 each right-of-way monuments;
200 cu. yds. hand laid rip-rap.

Complete list of bids follows:
W. K. McMillan, S. F.\$80,645
C. G. Willis & Son, L. A. 99,508
Nevada Contracting Co., Fallon 101,947
Wheelwright Const. Co., Ogden, Utah 121,781
Dodge Bros., Inc. 129,551

EUREKA, Humboldt Co., Cal.—City council rejects bids to construct concrete sidewalk fronting Municipal Railway property at Harris and J Sts.

CONTRACTORS' MACHINE WORKS

CREAR & BATES

57 Zoe St., bet. 3rd and 4th, off Brannan St.
Phone GARfield 4374
San Francisco

Bids were: L. H. Langdon, \$1118; J. B. Morganti, \$1131. Estimate of City Engineer E. D. Gardner, \$750.

OAKLAND, Calif.—U. B. Lee, \$88
Rodney St., Oakland, at \$11,302 submitted low bid to city council to improve portions of Plymouth St., 99th Ave., and Cherry Sts. See separate unit bid listing on page five of this issue.

OAKLAND, Calif.—Healey-Moore Co.
344 High Street, Oakland, at \$11,774 awarded contract by city council to improve Hopkins St. bet. High St. and 15th Ave. and portions of High St., etc., involving \$95,000 sq. ft. 7-in. to 9-in. concrete pavement, curbs, walks, etc. Complete list of unit and total bids reported in issues of May 8 and 15.

OAKLAND, Calif.—U. B. Lee, \$88
Rodney St., Oakland, at \$11,302 awarded contract by city council to improve portions of Plymouth St., 99th Ave., and Cherry St., involving grading, curbs, gutters, macadam pavement, etc. Complete list of unit and total bids received published in issues of May 8 and 11.

SAN JOSE, Santa Clara Co., Cal.—Until May 25, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to improve Hillsdale Ave. from the San Jose-Almaden Road to Monterey road south of Schitzen Park, involving macadam pavement. Plans obtainable from County Surveyor Robert Chandler on payment of \$1.

SAN DIEGO COUNTY, Cal.—Until June 4, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 451 Market St., San Francisco, for applying oil and processing the existing roadway surface on Sections A and B of Route 72, Laguna National Forest Highway in Cleveland National Forest 11,061 miles in length, involving:

- (1) 26,500 gals. furnish and apply fuel oil,
- (2) 11,081 miles mixing old treated roadway surface;
- (3) 80 tons furnish and apply asphaltic oil;
- (4) 850 cu. yds. decomposed granite for seal coat.

Specifications obtainable from engineer on deposit of \$10, returnable, check for same to be made to Federal Reserve Bank of San Francisco.

EL DORADO COUNTY, Cal.—Until May 25, 2:30 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, for placing additional crushed gravel or stone and treating with cutback asphalt by road mix method, 1.7 miles between Clark's Corner and Placerville.

EUREKA, Humboldt Co., Cal.—Until May 19, 5 P. M., bids will be received by John Griffith, city superintendent of public works, 524 D St., to construct concrete sidewalk in Harris St. between J and K Sts., and in J St., between Wood and Harris Sts. Certified check 10% payable to city required with bid. Specifications obtainable from above.

NAPA, Napa Co., Cal.—Until May 25 7:30 P. M., bids will be received by H. H. Thompson, city clerk, (539) to improve 8th St. bet. River St. and Soscol Ave. Involving grading, concrete curbs, two-course emulsified asphalt macadam pavement, 40-ft. wide. 1911 Act. Certified check 10% payable to city required with bid. Plans obtainable from H. Harrold, city engineer.

ALPINE COUNTY, Calif.—Basalt Rock Co., Napa, at \$2,822.50 awarded contract by State Highway Commission to treat with light and heavy fuel

oil, 1916 miles, between Haugman's bridge, approximately 2 miles south-east of Markleville and the State Highway Camp, approximately 2 miles northwest of Woodfords.

PLACER COUNTY, Cal.—Fredrickson & Watson and Fredrickson Bros., 354 Hobart St., Oakland, at \$147,585.02 awarded contract by State Highway Commission to grade and pave with cement concrete, 1.4 miles between Wise Power House and Auburn. A complete list of the unit and total bids on this project published in issue of May 12.

MARCH FIELD, Riverside Co., Cal.—See, "Government Work and Supplies," this issue. Bids wanted by Contracting Quartermaster to construct incinerator, gas, water, sewerage and electrical connections for 61 buildings and for grading, roads, walks and curbs.

MONTEREY, Monterey Co., Calif.—City votes bonds of \$22,500 to finance purchase of property required to extend Alvarado Street and for clearing Booth Cannery warehouse site.

SANTA CRUZ COUNTY, Calif.—C. W. Wood, Stockton, at \$42,109 submitted low bid to the State Highway Commission May 13 to grade and surface with crusher run base and pave with bituminous macadam 1 mile bet. 1 mile north of Santa Cruz and Santa Cruz. Complete list of bids follows:

C. W. Wood, Stockton.....	\$42,109
Nevada Contracting Co., Watsonville	42,799
J. L. Conner, Monterey	43,737
I. L. Rider, San Jose.....	45,485
Healy-Tibbitts Const. Co., S. F.....	48,480
Contoules Const. Co., S. F.....	48,529
Granfield, Farrar & Carlin, S. F.....	50,558
Ariss-Knapp Co., Oakland.....	52,998
W. H. Hauser, Oakland.....	64,073

Bids held under advisement.

ELKO COUNTY, Nev.—Until July 1, 2 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, for grading, construction of structures and placing surfacing between east foot of the Pequos and 4 miles east of Silver Zone, a distance of 16.83 miles.

Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from the engineer on deposit of \$15, of which \$10 is returnable. Certified check 5% required with bid.

CLARK COUNTY, Nev.—Until July 1, 2:30 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, to furnish, apply and mix asphaltic fuel oil with the roadway surface between the west slope of Mormon Mesa and the Lower Virgin River Bridge, a distance of 19.65 miles.

Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from

the engineer on deposit of \$15, of which \$10 is returnable. Certified check 5% required with bid.

BOULDER COUNTY, Nevada—Until July 1, 3 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, for furnishing, applying and mixing asphaltic fuel oil with the roadway surface between Gardnerville and 5 miles east of Holbrook, a length of 19.06 miles.

Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from the engineer on deposit of \$15, of which \$10 is returnable. Certified check 5% required with bid.

HUMBOLDT COUNTY, Nev.—Until July 1, 3:30 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, for furnishing, applying and mixing asphaltic fuel oil with the roadway surface between Winnemucca and 6 miles west of Stonehouse, a distance of 27.2 miles.

Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from the engineer on deposit of \$15, of which \$10 is returnable. Certified check 5% required with bid.

MARIPOSA COUNTY, Calif.—Until May 25, 2 P. M., bids will be received by E. E. Wallace, district engineer, State Highway Commission, P. O. Box 1353, Fresno, to cover with a bituminous surface treatment consisting of asphaltic road oil and screenings, 12.5 miles between Loresnes on the Erieburg grade and El Portal.

MARIPOSA COUNTY, Cal.—No bids received May 11 by E. E. Wallace, district engineer, State Highway Commission, P. O. Box 1353, Fresno, to treat with heavy fuel oil as a dust palliative 11.8 miles in Mariposa county, between Mariposa and Loresnes on the Erieburg grade.

FRESNO-KERN COUNTIES, Cal.—Until May 25, 2 P. M., bids will be received by E. E. Wallace, district engineer, State Highway Commission, P. O. Box 1353, Fresno, to treat with light fuel oil as a dust palliative, 15.4 miles in Fresno county, between the west boundary and 2 miles east of Parkfield Junction and in Kern county, 8.2 miles between the west boundary and 2 miles west of Mariposa.

SACRAMENTO, Cal.—County supervisors declare intention (1631) to improve portions of N B Street, involving grading; asphalt macadam pavement, consisting of 5-in. crushed rock base course with 2-in. asphaltic macadam surface. Work under County Improvement Act 1921. Hearing May 23. Harry W. Hall, county clerk. Chas. Deterding, county engineer.

ANTIOCH, Contra Costa Co., Cal.—Until June 8, 8 P. M., bids will be received by J. C. McElheny, city clerk, to improve streets in the Wills Addition, involving (approximately):
326,030 sq. ft. grading;
145,551 sq. ft. 5-in. concrete pave.;
10,613 ft. 4- to 8-in. vit. clay sewers;
6,500 ft. 4- to 10-in. cast iron water pipe.
1911 Act Bond Act 1915. Certified check 10% payable to Town of Antioch required with bid. Plans obtainable from E. L. O'Hara, city engineer.

HEALDSBURG, Sonoma Co., Cal.—A. Helwig Const. Co., Sebastopol, at \$3,950.24 awarded contract by the city trustees to surface various streets.

LODI, San Joaquin Co., Cal.—R. H. Crummett, Cecil Hotel, San Francisco, at \$61,297, submitted low bid to city council to improve Cherokee Lane, involving grading, cement concrete paving. See separate unit and total bid listing on page five of this issue.

LASSEN AND MODOC COUNTIES, Cal.—Hemstreet & Bell, Marysville, at \$129,646 awarded contract by State Highway Commission to surface with bituminous treated crushed gravel or stone, 24.5 miles between Hillside and Rush Creek. Complete list of unit and total bids received on this project published in issue of May 6.

EL DORADO COUNTY, Cal.—Finland Co., 1630 39th St., Sacramento, at \$52,593.55 awarded contract by State Highway Commission to grade and surface with crusher base and untreated crushed gravel or stone, 1.7 miles between Placerville and the Railroad Crossing. Complete list of the unit and total bids on this project published in issue of May 6.

MODOC COUNTY, Cal.—Hartman Construction Co., Box 1687, Bakersfield, at \$134,875 awarded contract by State Highway Commission to surface with bituminous treated gravel or stone, 23.8 miles between Rush Creek and Hot Creek. Complete list of unit bids received on this project published in issue of May 6.

ORANGE COUNTY, Cal.—John & Bressi, 208 West 4th St., Los Angeles, at \$282,107 awarded contract by State Highway Commission to grade and pave with cement concrete and asphalt concrete, 5.5 miles between San Mateo Creek and Serra. Complete list of unit and total bids published in issue of May 6.

SONOMA, Sonoma Co., Cal.—City trustees plan to improve all un-paved streets and construct extensions to sewer system. The cost of paving is estimated at \$11,500.

NEVADA CITY, Nevada Co., Cal.—City Council will call election May 25 to decide on diversion of \$2000 swimming pool bond funds to improve water system and the remaining \$8000 on the improvement of streets.

SISKIYOU COUNTY, Cal.—Dunn & Baker, Klamath Falls, Ore., at \$74,944 awarded contract by U. S. Bureau of Public Roads, to grade 9.913 miles of Section "A" of Route 10, Weed-Medecine Lake National Forest Highway in Shasta National Forest, involving: 61 acres clearing; 190,000 cu. yds. unclass. excav.; 754 cu. yds. unclass. excavation for structures; 71,000 sta. yds. overhaul; 9,905 miles finishing earth graded road; 80 cu. yds. class A concrete; 40 cu. yds. class B concrete; 78 cu. yds. class B concrete; 19,000 lbs. reinforcing steel; 2504 lin. ft. corr. galv. metal; 64 r. w. monuments. Complete list of unit bids re-

ceived on this project published in issue of April 17.

ALAMEDA, Alameda Co., Cal.—Until May 19, 3 P. M., bids will be received by W. E. Varcoe, city clerk, for resurfacing south tennis court at Lincoln Park. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Burnett Hamilton, city engineer.

SAN JOSE, Santa Clara Co., Cal.—Until May 18, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to improve the Alviso-Milpitas Road in Supervisor District No. 3, involving 123,575 sq. ft. 5-in. asphaltic concrete pavement. Plans obtainable from County Surveyor Robert Chablander on payment of \$1.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd floor City Hall, complete specifications to improve De Long street between Orizaba avenue and Head street. Estimated cost \$11,000. Project involves:

- 2400 cu. yds. excavation;
- 950 cu. yds. embankment;
- 990 lin. ft. armored conc. curb.
- 6340 sq. ft. 1-course conc. sidewalk;
- 2 brick catch basins;
- 62 lin. ft. 10-in. VCP culverts.
- 226 lin. ft. 8-in. VCP sewer;
- 629 lin. ft. 12-in. VCP sewer;
- 4 brick manholes;
- 9 8x6 V or T branches;
- 33 12x6 V or T branches;
- 370 lin. ft. 6" VCP side sewers;
- 11 cu. yds. Class B 2500 lb. concr. in stairways;
- 300 lbs. bar reinf. steel in stairways;
- 105 lin. ft. 2x8 Redwood headers.
- 17,200 sq. ft. asph. conc. pavement,
- 2" asph. conc. wearing surface
- 6" Class "F" concr. base.

SAN FRANCISCO—Until May 21, 11 A. M., bids will be received by Constructing Quartermaster, Fort Mason, for repairs to roads at Fort Funston. Specifications obtainable from above. (\$500)

SAN LUIS OBISPO COUNTY, Cal.—W. A. Dontanville, Salinas, at \$1,609.65 submitted low bid May 8 to L. H. Gilson, district engineer, State Highway Commission, Bank of Italy Bldg., San Luis Obispo, for treating with heavy fuel oil acid a dust palliative 1.5 miles between San Simeon and Piedras Blancas Lighthouse.

MENDOCINO COUNTY, Cal.—Until May 21, 2 P. M., bids will be received by F. W. Hazelwood, district engineer, State Highway Commission, 546 Wabash Ave., Eureka, to surface with untreated crushed gravel or stone, 2.1 miles between Piercy and the north boundary.

CALAVERAS COUNTY, Cal.—As previously reported bids will be received June 2, 2 P. M., by State Highway Commission for surface treatment in 15.5 miles between Murphys and Big Trees. Project involves:

- (1) 207 bbls. fuel oil;
- (2) 456 tons asphaltic road oil;
- (3) 3640 cu. yds. coarse screenings;
- (4) 1964 cu. yds. medium and fine screenings.

The State will furnish screenings.

DOUGLAS-ORMSBY COUNTIES, Nev.—Until May 25, 2 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, to reconstruct and oil portion of state highway in Douglas and Ormsby counties, from Spooner's to the County Hospital a length of 10.42 miles. Specifications on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from engineer without charge. Certified check 5% required with bid.

MONO COUNTY, Cal.—As previously reported, bids will be received June 2, 2 P. M., by State Highway Commission to grade and surface with bituminous treated crushed gravel or stone, 12.3 miles between Yerbys and Casa Diablo Hot Springs. Project involves:

- (1) 260,000 cu. yds. rdwy. excav. without class;
- (2) 1,000,000 sta. yds. overhaul;
- (3) 12,900 cu. yds. imported borrow;
- (4) 1500 cu. yds. structure excavation;
- (5) 27,500 tons crusher run base;
- (6) 22,340 tons bitum. treated crushed gravel or stone surfacing;
- (7) 4000 cu. yds. binder for subgrade;
- (8) 255 cu. yds. class A Portland cement concrete (structures);
- (9) 22,000 lbs. bar reinf. steel (structures);
- (10) 30 lin. ft. 12-in. corr. metal pipe
- (11) 384 lin. ft. 18-in. corr. metal pipe
- (12) 728 lin. ft. 24-in. corr. metal pipe
- (13) 150 lin. ft. 30-in. corr. metal pipe
- (14) 50 lin. ft. 36-in. corr. metal pipe
- (15) 258 lin. ft. 12-in. perforated metal pipe underdrains;
- (16) 180 lin. ft. part circle corr. metal pipe.
- (17) 3200 M. gals. water applied to subgrade;
- (18) 08 mile moving and resetting property fences;
- (19) 2 miles new property fences;
- (20) 802 lin. ft. salvaging existing culverts;
- (21) 2 ea. removing concrete bridges;
- (22) 651 stations finishing roadway;
- (23) 125 ea. monuments complete in place.

State will furnish corrugated metal pipe and part circle corrugated metal pipe.

AMADOR COUNTY, Cal.—Until May 25, 2 P. M., bids will be received by R. E. Pierce, district engineer, State Highway Commission, 502 State Office Bldg., Sacramento, for bituminous surface treatment on 2.7-miles between Drytown and Amador City.

SAN BERNARDINO COUNTY, Cal.—As previously reported, bids will be received June 3, 2 P. M., by State Highway Commission to grade and pave with asphalt concrete, 2.3 miles through Upland. Project involves:

- (1) 9800 cu. yds. rdwy. excav. without class;
- (2) 15,000 sta. yds. overhaul;
- (3) 6100 cu. yds. imported borrow;
- (4) 3720 cu. yds. structure excav.
- (5) 18,000 sq. yds. subgrade for pavement.
- (6) 23,000 sq. yds. asphaltic paint binder;
- (7) 16,100 tons asphalt concrete;
- (8) 620 cu. yds. class A Portland cement concrete (structures);
- (9) 714 cu. yds. class A Portland cement concrete (structures);
- (10) 67,000 lbs. reinforcing steel;
- (11) 220 lin. ft. 12-in. corr. metal pipe
- (12) 80 lin. ft. 18-in. corr. metal pipe
- (13) 168 lin. ft. 24-in. corr. metal pipe
- (14) 152 lin. ft. 36-in. corr. metal pipe
- (15) 132 lin. ft. part circle corrugated metal pipe;
- (16) 645 cu. yds. rubble masonry wall
- (17) 624 lin. ft. laminated timber guard rail;
- (18) 0.8 mile moving and resetting property fences;
- (19) 503 cu. yds. concr. in existing permanent structures to be removed;
- (20) 115 stations finishing roadway;
- (21) 28 ea. monuments complete in place;
- (22) readjusting pivot Improvements
- (23) 2500 lbs. drop inlet covers, frames and grate.

State will furnish corrugated metal pipe and part circle pipe.

SISKIYOU COUNTY, Cal.—As previously reported, bids will be received until 2 P. M., by State Highway Commission to apply to existing roaded bituminous surface treatment on 0 miles between 1.5 miles north of reka and the Klamath River. Project involves:

- (1) 610 tons cut-back asphalt;
- (2) 300 tons mixing cut-back asphalt and surfacing material.

NEVADA STATE—S. C. Durkee, State Highway Engineer of Nevada, has made an announcement of interest to all contractors bidding on state highway work in Nevada, as follows:

Your attention is respectfully directed to the attached copy of amendments to the General Highway Law enacted by the 1931 State Legislature, and amendments being approved on March 27, 1931, and will become effective on May 26, 1931.

You will note under Section 14 that all contractors desiring to bid on State highway work must prequalify before the Department can furnish you with plans and specifications.

The Highway Department has prepared a questionnaire entitled "Contractors' Statement of Experience and Financial Condition." These questionnaires may be secured through the office of the undersigned. The Highway Department has ruled that the questionnaire form must be completely filled in and filed in the office of the undersigned at least 30 days prior to the opening of bids on all State Highway projects.

As the law becomes effective on May 26, it is suggested that you immediately write this office for a copy of the questionnaire form.

S. C. DURKEE, State Highway Engineer.

NEVADA CITY, Nevada Co., Cal.—Until June 1, 10 A. M., bids will be received by R. N. McCormack, county clerk, to reconstruct county road between Grass Valley and Bear River, via Empire Mine, Peardale and Chicago Park, a distance of 9.84 miles; road to be graded 30 ft. in width, with a crusher run base and a bituminous macadam surface, 16 ft. in width involving:

- (1) clearing right of way 5.10 acres and 439 stations, 34,800 cu. yards roadway excavation;
- (2) 2,900 cu. yds. crusher run base;
- (3) 5,250 cu. yds. crushed rock to be salvaged;
- (4) 3,558 tons broken stone (bituminous macadam surface);
- (5) 283 tons emulsified asphalt;
- (6) 525 barrels light fuel oil;
- (7) 5,574 lin. ft. 8-in. to 36-in. corr. metal pipe;
- (8) 1.13 miles property fence.

Work under Acq. and Imp. Act 1925. Certified check or bond 10% payable to County of Nevada required with bid. Plans on file in office of clerk and obtainable from J. P. O'Connor, engineer, Commercial Building, Grass Valley, on deposit of \$10, not returnable.

involves concrete curb, \$.75 lin. ft.; concrete walks, \$.18½ sq. ft.; cement concrete pavement, including grading, \$.28½ sq. ft.; catchbasins, \$60 each; remove portion and reconstruct front of firehouse, \$200.

MONTEREY, Monterey Co., Cal.—City Council declares intention (3128) to improve Teresa street, between Monroe and Harriet Sts., and between Clay and High Sts., involving grading 2½ in. asph. conc. base pavement with 1½-in. asph. conc. surface; concrete curbs, gutters, sidewalks; 14 4-in. house connection sewers, 1911 Act. Bond Act 1915. Hearing May 26. Clyde A. Doraey, city clerk.

MINERAL COUNTY, Nev.—As previously reported, bids will be received May 20, 2 P. M., by S. C. Durkee, state highway engineer, Carson City, for grading, constructing structures and placing gravel surface on 10.42 miles between Hawthorne and Dutch Creek. Project involves:

- (1) 55,300 cu. yds. roadway excav.;
- (2) 1 cu. yd. structure excav.;
- (3) 20,200 cu. yds. selected borrow excavation in place;
- (4) 75,908 yds. sta. overhaul;
- (5) 10.42 miles prepare subgrade and shoulders;
- (6) 32,300 cu. yds. crushed rock or crushed gravel surface in place;
- (7) 500 cu. yds. crushed gravel or crushed rock in stockpile;
- (8) dump sun, furnish water equip.;
- (9) 2256 M. gals. apply water;
- (10) 1 cu. yds. class B concrete in place;
- (11) 972 lin. ft. 18-in. corrugated metal pipe in place;
- (12) 800 lin. ft. 24-in. do.;
- (13) 220 lin. ft. 36-in. do.;
- (14) 46 monuments in place;
- (15) 10.42 miles finishing roadway;
- (16) 650 lin. ft. remove & reconstruct fence.

Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

CLARK COUNTY, Nevada—As previously reported, bids will be received May 20, 2:30 P. M., by S. C. Durkee, state highway engineer, Carson City, to construct reinforced concrete bridge approximately 100 ft. long, including approaches, over the Virgin River at a point between Mesquite and Bunkerville. Project involves:

- (1) 8200 cu. yds. roadway excav.;
- (2) 900 cu. yds. structure excav.;
- (3) 75,694 yds. sta. overhaul;
- (4) 1260 cu. yds. class A concrete in place;
- (5) 1775 cu. yds. class D concrete in place;
- (6) 1 corr. metal pipe culvert extension in place;
- (7) 1504 lin. ft. standard timber guard rail in place;
- (8) 8 monuments in place;
- (9) 2 furnish and install posts for F. A. markers;
- (10) 9.35 mile finishing roadway;
- (11) 490,700 lbs. reinf. steel in place;
- (12) 11,500 lbs. expansion rockers and plates in place;
- (13) 7058 lin. ft. furnish timber piles;
- (14) 5020 lin. ft. driving timber piles.

Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

BURLINGAME, San Mateo Co., Cal.—Until May 18, 8 P. M., bids will be received by J. R. Murphy, city clerk, to improve Newhall Road for its full length, involving:

- (1) 35 stumps, 1 ft. and under, remove;
- (2) 33 stumps, over 1 ft., remove;
- (3) 20 trees, 1 ft. and under, remove;
- (4) 14 trees, over 1 ft., remove;
- (5) 3 cutting concrete pedestals below subgrade;
- (6) 2 remove brick fillers;
- (7) 216 ft. 4-in. vit. pipe sewer;
- (8) 1 "X" branch;
- (9) 9 install conn. and raise man-holes;
- (10) 3700 cu. yds. excavation;
- (11) 35,500 sq. ft. 6-in. waterbound macadam paving;
- (12) 35,500 sq. ft. 2-in. asph. surface;
- (13) 60 ft. 10-in. concrete drain;
- (14) 2 head walls;
- (15) 1 catchbasin;
- (16) 3554 sq. ft. sidewalks (macadam);
- (17) 2,400 sq. ft. 3-in. rock top;
- (18) 5500 sq. ft. 6-in. rock shoulders;
- (19) 65 ft. 6-in. conc. curb returns;
- (20) 8 cu. yds. concrete encasement.

Plans on file in office of clerk.

ELKO COUNTY, Nevada.—Nevada Rock & Sand Co., Reno, at \$60,094.92 awarded contract by State Highway Commission to reconstruct 16.86 miles between 4 miles east of Silver Zone and Wadsworth. Engineer's estimate, \$79,601.26. Other bidders: Utah Const. Co., Ogden, Utah, \$61,688.92; Wheelwright Const. Co., \$65,425.77 and Dodge Bros., Fallon, Nev., at \$67,176.62, were other bidders. Quantities of materials published in April 30th issue.

YUIMA CITY, Sutter Co., Cal.—S. M. McGraw, 425 Lexington Ave., Stockton, at \$13,100 awarded contract by the city council to widen Thmas St. between Reeves and Forbes Avenues. Project

BUSINESS OPPORTUNITIES

T. W. Thompson, 137 Palm Avenue, San Francisco, wants specialty work on distribution in the Northwest and South, on commission basis.

Harold L. Herzfelder, 114 W. 86th St., New York City, offers connections for local concern desiring representation.

Paul Kaven, 960 S. Oxford Avenue, Los Angeles, Calif., general Pacific Coast agent for the distribution of a self-timing device, wishes to secure an agent for this district.

H. A. Wright, Sales Mgr., Multicore Co., 31 St. James Ave., Boston, Mass., with sorting methods and equipment wishes to secure representation in this territory.

The Vital Mfg. Co., 7500 Quincy Avenue, Cleveland, Ohio, manufacturers of automatic glazing and caulking gun wish to get in touch with party to handle their product.

Lambert Friedl, 1900 Euclid Ave., Cleveland, Ohio, wishes to act as sales representative in Ohio and Michigan for reliable, well-rated manufacturers.

C. A. Slocum, vice-president, Shineen Products Corp., 110 N. Franklin St., Chicago, Ill., manufacturers of polish cloths both for furniture and automobiles wish representation in this territory.

The Hamilton Mfg. Co., Dallas, Tex., manufacturers of vegetable spray stand wish list of businesses who might be interested in handling their line.

John G. Hooven, Drexel Bldg., Philadelphia, Pa., wishes to contact local firm with view to representation.

W. O. Lochner, secretary, Trenton Chamber of Commerce, Trenton, N. J., represents company wishing sales agency or manufacturers' representatives that call on the ceramic, rubber, paint painter and other clay-making industries.

F. M. Snook, 1642 Larkin St., San Francisco, experienced in specialty sales work, desires to represent local firms.

The average hourly rate for skilled building mechanics is \$1.35%, the prevailing rate for the last two months Engineering News-Record of New York reports. A year ago it was \$1.33%. The national average for common labor is \$3.94c, compare with \$3.89c a month ago and \$6.28c a year ago.

Bricklayers and carpenters of Boston, Mass., signed an agreement April 21 to continue under the present wage schedule for the next three years with the five-day week. Sheet metal workers continue on the 44-hour week basis at \$1.37½ per hour.

Although the number of licensed realty brokers in California at this time compares favorably with that of former years, there is a notable decrease in the number of salesmen, although the records of the State Real Estate Department indicate a recent increase in the number of applicants for salesman licenses. Glenn Williamson points out in an article in the April number of California Real Estate. This indicates, the writer believes, that the realty business has been carried on through "dry times" by the older and more firmly established brokers and that the recent demand for salesman licenses is evidence of a marked revival in business.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

HOW

**To reach the Construction Market
in one of the Wealthiest Sections of the World!**

THE tide of population is sweeping Westward. New structures of all kinds are under way and being planned. California is growing three times faster than the United States as a whole.

Leading architects, engineers, contractors and materials distributors are planning for the great new building program immediately ahead.

Wide awake manufacturers of building products and their advertising agencies are planning now to concentrate their selling energy in the great San Francisco metropolitan district.

Every architect in this district, practically every general and sub-contractor and materials dealer, reads the Daily Pacific Builder **every day**. To them it is just as necessary as Standard Rate and Data to an agency space buyer.

Founded forty years ago, Daily Pacific Builder counts among its constant readers hundreds of executives who direct the huge construction projects in this most prosperous market.

Write for analyses of circulation, rates and market data.

PROSPERITY VIA 7-HR. DAY WEEK ADVOCATED

The seven-hour, five-day week and
 the maintenance of high wages are
 necessary to prosperity, according to
 Paul Bloch, statistician of the State
 Department of Industrial Research.
 Bloch, speaking before the industrial
 group at the annual meeting of a
 California Conference of Social
 Work in Berkeley, stressed the need
 of shorter working hours and contin-
 uance of present wages.

Also, said Bloch, captains of indus-
 try of the United States are largely
 responsible for the present unemploy-
 ment of an estimated 6,500,000 persons
 in this country.
 A long time planning program of
 public work by the various states also
 is advocated as a means of reducing
 unemployment.
 Frank P. Foiese, industrial relations
 adviser, Washington posts, advocated
 coordination of local, state and fed-
 eral governments in building pro-
 grams.

He said that eventually compulsory
 unemployment insurance would come.

A.S.C. APPROVES PUMP STANDARDS

Standardization of pumps used on
 construction work as regards sizes
 and general specifications has re-
 sulted in the approval of the Associated
 General Contractors of America, which
 May 8 adopted a set of "Contractors'
 Pump Standards" prepared by the
 Contractors Pump Manufacturers
 Bureau, Munsey Building, Washington,
 D. C., which will be adhered to by all
 members of the bureau, Engineering
 News-Record reports. Two sizes of
 hand pumps will be designated as R-30
 and R-125. The former will displace
 3 g.p.m. or 500-lb. pressure with an
 engine speed of not over 1200 r.p.m.
 and 100 g.p.m. at 400 lb., engine speed
 not over 1500 r.p.m. The latter will
 displace 125 g. p. m. at 320 lb., engine
 speed not to exceed 1500 r.p.m. Three
 sizes of open-type suction diaphragm
 pumps will be designated as No. 3
 single, No. 4 single and No. 4 double.
 General characteristics of these units
 are:

	Displace- ment	Static Head (Gal. (Ft.) Per Hour)	Motor (H.p.)
Size			
single 10	4,000	1 1/2	
single 20	2,000		
single 10	8,000	2	
double 20	4,000		
double 10	12,000	3	
	7,000		

Pumps shall be designed and manu-
 factured to operate continuously at
 their rated capacities, and shall have
 guaranteed capacity 10 per cent
 greater. A standard rating plate on
 each unit shall state its size, rating
 and the fact that it complies with
 A.S.C. standards.

CEMENT MERGER RUMOR IS DENIED

No plans have been made and
 none are contemplated that in-
 volve the merger of the Pacific
 Coast Cement Company with any
 other cement company or compa-
 nies in the Pacific Northwest,
 Vice-President N. D. Moore stated
 at Seattle last Monday upon re-
 turning from a Coast division
 meeting of the national Portland
 Cement Association.

Mr. Moore said that while in
 San Francisco he had conversa-
 tions with representatives of other
 Pacific Northwest cement com-
 panies, but that nothing had come
 out of them that would substantiate
 any such reports as are cur-
 rent.

"There is nothing whatever I
 can say as to the situation at this
 time," he declared, "except that
 rumors to the effect that there is
 a merger in contemplation in which
 Pacific Coast Cement Company is
 involved are not true.

"I read a recent dispatch from
 San Francisco with reference to
 something of the kind being un-
 der way, but I think it must have
 been garbled in some way. If it
 had any foundation whatever, it
 must have referred to plants in
 the South, with which the situa-
 tion here has nothing whatever to
 do."

LEGISLATURE O. K.'S STREET PAVING BILL

Southern California's bill estab-
 lishing a debt limit on special assessment
 projects for street and other public
 improvements is in the hands of the
 Governor with Assembly concurrence
 in Senate amendments.

The Senate vote into the measure
 the "majority protest" clause carried
 in another bill which had been pro-
 posed by Assemblymen Lawrence Cobb
 and Frederick Houser of Los Angeles.

In its present form the bill carries
 the following provisions on special as-
 sessments for public improvements:

Any improvement project shall be
 automatically held up by majority
 protest from affected property owners.

Special assessments, if decided up-
 on, shall not exceed 50 per cent of
 the true value of the property to be
 improved.

Unanimous vote of the local legis-
 lative body to exceed the prescribed
 debt limit shall be nullified by ma-
 jority protest from the owners of af-
 fected property.

The bill also directs that complete
 data on each project shall be worked
 up in advance of any action and that
 estimates of property values, project
 costs, and similar information
 shall be placed in the hands of prop-
 erty owners with full opportunity for
 public hearings.

The bill grows out of serious over-
 assessments, particularly in Southern
 California.

STOCKTON REJECTS LOCAL LABOR LAW

After study by individual councilmen
 during the last week and hearing of
 arguments for and against the mea-
 sure, the City Council of Stockton voted
 down the proposed "Home Labor" or-
 dinance by a vote of eight to one.

C. C. Williams, secretary-manager
 of the Building Trades Council, and
 P. A. Klingler, steel contractor, spoke
 in favor of the measure. They de-
 clared that Alameda, Oakland, San
 Francisco, Fresno and Los Angeles
 have put up similar barriers to out-
 side contractors on public works, re-
 quiring them to employ all labor in the
 particular cities where contracts were
 awarded. This prevents the employ-
 ment of Stockton labor on any out-
 side contracts obtained by local con-
 tractors, they pointed out.

Attorney Hubert H. Briggs, speak-
 ing for the Builders' Exchange, op-
 posed the measure particularly on the
 grounds that it is a bad policy in
 view of the city's ambition to attract
 a larger population, to require new
 residents to live here 90 days before
 they can get employment on public
 projects.

He also declared that many local
 contractors do more than 50 per cent
 of their work outside the city and
 adoption of the law might influence
 other cities to set up additional bar-
 riers against Stockton labor.

HINKLE IS NAMED HOUSING DIRECTOR

Appointment of Warren Hinkle, li-
 censed architect, as State Housing Di-
 rector, was announced yesterday by
 the California Commission on Immi-
 gration and Housing.

The office was left vacant recently
 by the death of Robert Greig, who
 was killed in an automobile accident.
 It is a Civil Service position, but the
 Commission thought it inadvisable to
 continue without a Director until the
 next Civil Service examinations, and
 so temporarily appointed Hinkle, who
 was approved by J. E. French, chief
 of the State Industrial Division.

The work of harmonizing the efforts
 of building inspectors, health officers
 and architects will occupy Hinkle's
 immediate attention. He will have
 charge of such problems for all the
 territory north of Bakersfield, and
 will maintain an office at the State
 Building here.

Hinkle was formerly associated with
 John J. Donovan, Oakland architect,
 and more recently has had an office
 of his own in the practice of architec-
 ture.

New orders booked during the first
 quarter of 1931, as reported to the
 U. S. Bureau of the Census by 84
 manufacturers of electrical goods, were
 \$181,265,102, as compared with \$208,-
 955,413, for the fourth quarters of
 1930 and \$314,329,273 for the first
 quarter of 1930.

BIG BUSINESS GROUPS WEIGH PLANS TO STIMULATE BUILDING

(Reprint for The Business Week)

Building led the way out of depression in 1921. Remembering this, business men watch the construction industry closely just now for hopeful signs.

They are not numerous.

April building permits showed a rise somewhat larger than seasonal. Both Dun's and Bradstreet's make the most of this in their current reviews. The improvement is believed to be due to pickup in small home building and remodeling, but the figures cannot be broken down far enough to prove this conclusively.

Real estate men have noted a demand in some cities for well-built homes priced up to \$10,000. This demand, however, is narrowly localized.

Strong Backing

Of broader significance is the fact that three separate movements, fostered by strong groups, are directed toward stimulating construction and the real estate market.

Of greatest potential importance, but least likely to be accomplished in time to be useful in the present situation, is the effort to create a central mortgage bank, designed to make a better market for real estate securities. A second movement attempts to organize the great manufacturers of building materials and equipment into a corporation for financing residential building operations in large cities. Various large corporations are considering this seriously, but the project still is in the preliminary stages.

Old Plan Revamped

A third movement really is not new—the financing by manufacturers of home modernization programs—but there is reason to believe that the campaign is about to be pushed with new vigor, and with more corporations taking an aggressive part.

All three of these are efforts to improve a situation in the real estate and building field which not to mince words, is bad. Whatever these plans accomplish will be helpful; earnest work may make the situation better, but can hardly make it good.

Here are the three movements:

Central Mortgage Bank

Commercial banks, savings banks, building and loan societies have, in their vaults large blocks of mortgages, frozen solid. If there were a central mortgage bank to which these holdings could be taken for rediscount, capital could again be set in motion. For years, the U. S. Building & Loan League has been asking Congress to authorize the charter of a national rediscount bank to which member societies would furnish capital. Nobody in particular opposed the measure, but it has always curled up and died—one of the host of bills that just fail to attain consideration.

The National Association of Real Estate Boards is discussing a national rediscount bank for mortgages. Plans for some such institution are "under way." Both Secretary of Commerce Lamont and President Hoover are said to favor it. Tentative proposals have been submitted for Secretary Lamont's scrutiny. The subject will be thoroughly gone over at the association's convention in Baltimore this month.

A Regional System

It is suggested that the government authorize a central mortgage bank with regional branches, the central bank to be supervisory. Building and loan associations, banks, and mortgage companies would be members of the regional banks, would subscribe their capital, would follow their rules and appraisals. Regional banks would

purchase from members only first mortgages on urban residential property, long term and amortized, limited to 55% or 60% of valuation. The bank would then sell bonds secured by the mortgages and by its resources. The government would not furnish any capital or guarantee the bonds. Regional banks would be non-profit, service institutions. The Building and Loan League agrees in principle with the above, but differs on certain details.

Consummation of such plans takes time. The subject must be carefully studied, differences of opinion compromised. Probably this depression will be over before any such charter is granted.

All countries of Europe and many of South America have long had central mortgage banks. Usually local institutions sell them mortgages which secure bonds marketed to the public. In many instances the governments guarantee these securities. So strong was the demand for the bonds that, before the war, they carried a lower interest rate than the bonds of their governments.

Stood Firm in Storm

That is still true in some cases. None of these banks has been seriously shaken by present conditions. Foreign mortgage bonds have sold well in this country—our holdings now are about \$200 millions.

One of the country's greatest building and real estate operators is pushing the plan to get manufacturers of building equipment and supplies to subscribe to the stock of a corporation, national in scope, which shall stimulate and help finance urban residential projects. Details are well thought out; the plan parallels somewhat the central mortgage bank method. The largest of manufacturers are interested. Meetings have been held; the project is very much alive.

Those who doubt whether much building is needed just now, and who fear it will take a long time to create new financial machinery, pin greater faith on the modernizers.

On National Basis

Sears, Roebuck, the Security Finance Corp. of Washington, Crane Co. and many other separate concerns have gone into modernization of homes by instalment payments. But these are scattered and rival activities. A movement now on foot hopes to put instalment modernization on a national basis. Definite developments are soon to be announced.

A recent survey of the National Association of Real Estate Boards indicates where the existing demand for new homes is heaviest. Of all homes reported sold, 38% were in the \$5,000-\$9,900 range; 26% below \$5,000; 24% from \$10,000 to \$20,000; 12%, over \$20,000.

Razing the Slums

At least there can be no doubt as to the desirability of rebuilding the germ-breeding firetraps of our city slums. There is a definite move toward better apartments, parks, and playgrounds. Chicago is determined to raze obsolete and dilapidated structures before its 1933 World's Fair. Louisville plans small parks where now stand old mansions degenerated into down-town rooming houses. Salt Lake City is in the throes of a drive to tear down aged structures. Last year 276 buildings in Memphis were wrecked as unfit for habitation, 690 property owners were ordered to raze shabby structures. Philadelphia has torn down 178 tenements in three years. Since 1918, 57 old-law tenements in Queens Borough, New York, have been demolished. Pittsburgh and

Cincinnati are among the other cities which are replacing obsolete tenements with modern structures and park spaces.

BUILDING ACTIVITY ENCOURAGED BY POPE

According to word from Vatican City, Pope Pius told Cardinal Mundelein of Chicago in a farewell audience last Wednesday that he approves and encourages building activity to relieve unemployment. The Cardinal said he would speed up and expand the church building program planned for Chicago.

The Pontiff reviewed building activities sponsored by the Vatican, recalling that he had built 1500 parochial houses in southern Italy and approved construction of 2,000 more.

The Cardinal told him about conditions in Chicago and discussed, among other things, the general economic depression and the necessity for the church to assist in its relief.

HUTCHINSON ESTATE BEQUEATHED TO WIDOW

Dwight Hutchinson, East Bay paving contractor and material dealer, killed recently by explosion of dynamite in his automobile on the Tunnel road, left an estate of over a half million dollars. The estate was cleared with the filing of a petition for letters testamentary in his estate by his widow, Marie Dean Hutchinson.

Mrs. Hutchinson is named the sole beneficiary by Hutchinson.

Others named in the petition as survivors are Mollie Peixotto, Paris; Martha H. Ransome, Mt. Diablo; and Isabelle H. Pringle, 605 West Poplar Ave., San Rafael, all sisters of Hutchinson.

Fitzgerald, Abbott and Beardsley of Oakland are attorneys.

RIVERSIDE WILL AMEND PLANNING LAW

The Riverside City Planning Commission has drafted and recommended to council an amendment to the present city zoning ordinance which will permit owners of non-conforming property in residential zones to rebuild or repair their structures to the extent of enlarging them 50 per cent over the present size, on condition the owners meet certain requirements designed to make the stores more attractive to their respective neighborhoods.

These requirements include the one that stucco finish shall be used on the outside and that new wiring and plumbing be installed. This new provision, if adopted, will hold good until June 1, 1932. The effect of the amendment, which is known as the "neighborhood grocery" amendment, is to give a year's grace to owners of non-conforming business property, who cannot now repair or remodel more than 25 per cent of a building. Several hundred thousand dollars' worth of property throughout the city will be affected by the proposed legislation.

John M. Lessells, formerly manager of the Mechanics Division of the Westinghouse Research Laboratories, has been appointed manager of Engineering in the South Philadelphia Works of the Company, to succeed A. D. Hunt resigned. It has been announced by R. S. Peicht, director of Engineering. The appointment became effective May 1.

RUINOUS PRICE POLICIES IN BUILDING INDUSTRY DEPLORED

A working alliance between the nation's producers and architects is war on cheapness and avoid the ruinous price policies of the past in the building industry is urged by Bennett, president of the American Rolling Mill Company, Middletown, Ohio, in a statement made public by the American Institute of Architects. Declaring that the nation is entering a new period of prosperity in which changing tides "may revolutionize civilization, Mr. Chapple pledged to be architects the support of the Producers' Council, the assets of whose member companies, he says, aggregates \$23,500,000,000, whose employees number more than 2,000,000 men, and whose combined sales each year represents a colossal sum.

"The constant development of new materials and new processes to make more and better materials available is the past the Producers' Council must continue to play in the future as in the past," Mr. Chapple asserts. "The fight against cheap imitative materials facts every legitimate business and profession.

"Price and price alone brings ruination, and the Producers' Council is ready to join the American Institute of Architects in a war against more cheapness. We must stand together, ready to fight each other's battles, for the cause of good material and good architecture.

"It takes the courage of conviction to stand against the demands that are sometimes made for cheap construction, but the result is worth all the determined effort it costs. Especially is this necessary at this time as we start out on a new era following the drastic depression of the past eighteen months.

"We have been going through a psychology of fear. What we need most is a return to common sense. With one hundred and twenty million people, with an annual income of eighty-billion a year, and an annual savings of sixteen billion, and a total wealth of three hundred and forty billions, we ought to be congratulating ourselves.

"The attitude of mind explains everything. We complain of hard times, yet nobody would want to go back to conditions before the World War. We have learned many lessons. Perhaps the most valuable one is that we can appreciate as never before how dependent we are, one on the other. The workman depends upon his employer, the employer depends upon his workman. The manufacturer upon the buyer, and the buyer upon the manufacturer.

"The men who head these companies of producers make up the business leaders of the nation, business geniuses, whose names are known throughout the world. The companies that have built these great business enterprises have molded a new world and a new civilization.

"Their scientists are opening new pathways for the progress of mankind. Their research departments are creating and are spending millions of dollars in making available materials of proven merit."

Mr. Chapple describes the changing tides of business which affect the nation's architecture. These tides, he says, are made up of changing products, changing customs, changing habits, and changing methods of doing business.

"In the days before the Civil War," he continues, "all business was practically on a personal basis. There were no great corporations to carry on the complicated business of life. The development of the corporation replaced the old order of things, and invested

capital took the place of personal ownership.

"All to remember the travail we went through as corporate growing pains fixed themselves on the country. We rioted in trust-busting rages, but in the end the corporate scheme of business took root and today we are served by giants that were beyond the wildest imagination of economists a generation or two ago. And the public who fought the corporations now owns them.

"Then think of the changing tides of business caused by invention. The quill pen gave way to the typewriter; the sail boat gave way to the ocean liner; the horse and wagon gave way to the automobile; the canal gave way to the railroad; the rule of thumb gave way to research; the tallow candle gave way to electricity; the horse gave way to the tractor; the scythe gave way to the reaper; the reaper gave way to the combine; the cobbler gave way to the shoe manufacturer; the blacksmith gave way to the garage mechanic; the telegraph gave way to the telephone; the country store gave way to the chain store; the spinning wheel gave way to the loom; the shovel gave way to the trench-digger; the pitchfork gave way to the hayloader; the setting iron gave way to the incubator and brooder.

"And so it goes—changing tides, every one of which represents new business opportunities that have been quickly seized upon.

"And what of the future? Where is radio taking us? What will television bring? Theories abound the world in research that has already given us rayon to replace silk, and hundreds of synthetic products? What can we expect from the X-ray as it passes from medical science and surgery to divine the secrets of the atoms of metallurgy? What about airplanes and zeppelins? These are some of the new forces that represent changing tides that are still a long way from their crest.

"Nor is this the complete picture. Back of all these tides are still smaller tides representing the new uses of products. Take the iron and steel industry as one example. In Sangamon County, Illinois, was laid, last fall, the first metal base highway. It was the result of an idea that finally took root. It is too soon to count this anything more than an experiment, but it has been the beginning of every change in the tide of human affairs.

"Style changes, too, represent another phase of the restless tides of our daily lives. The soft collar replaced the stiff collar almost over night; corsets went out of style and the corset business went 'haywire.' Men used to think of shaving every day until the safety razor made it convenient; the barber business sank into despair, only to be reinstated by bobbed hair; the old read flannels have gone and E. V. D.'s represent softening more than simple letters of the alphabet.

"All these changing tides are bringing new ways to live that affect architecture perhaps as much as any other profession. For instance, the American Rolling Mill Company recently developed the continuous mill for rolling sheet metal, which has now been licensed to most of the big steel companies. You cannot grasp what this will mean in a few short years to the architects.

Since 1752 the old fashioned, laborious method of hand rolling of sheets remained the same. Human perspiration flowed like rivers of water and production was limited by many hu-

man factors. All this is now changed. Sleek, smooth running machines grab a six-ton, white hot ingot and in a minute and a half convert it into a sheet thirty to thirty-eight inches wide and two hundred feet long, and as thin as a dime.

"Variable factors of individual rolling by hand are eliminated. Tons and tons of sheet metal are now available. These things mean nothing to the architect? Consider what happened when inventive genius discovered a way to roll the structural steel, with which architects have changed the skylines of the cities. And what is true of the iron and steel industry is more or less true in every channel of human achievement."

U. P. CUTS LUMBER RATE FROM NORTH

Reduction in carload lumber rates from the Pacific northwest interior to the Hoover dam site are announced by A. S. Edmunds, assistant traffic manager of the Union Pacific.

The new rates will be 53 cents 100 pounds to Boulder Junction, making a through rate of 55 cents to Bismarck City, Edmunds said. The present rate is 62.5 cents. The 55-cent rate will apply to virtually all Union Pacific system points in Oregon and Washington, Edmunds said.

Edmunds said the new rate would permit interior sawmills to compete with tidewater lumber mills, which can ship their lumber by water to San Pedro and thence by rail to the dam site.

NOTED NOVELIST IS SUED BY CONTRACTORS

Gouverneur Morris, novelist, faces two suits at Salinas for collection of \$16,000.

One suit for \$16,000 was brought by S. H. and W. E. Hooke, claiming that amount was due as unpaid balance on \$40,000 improvements to Morris' palatial Monterey home.

The second suit, for \$12,000, was brought by subcontractors who included the Hookes as defendants. The second suit covered funds the Hookes sought from Morris in his own action. Attorneys said the payment of the original \$16,000 would probably settle both actions.

Attorneys also said they would attempt to eject Morris from his home if he did not settle the claims, which they said were six months past due.

Plant of the E. H. Bayley & Lumber Company on the northwest slope of Peavine Mountain near Reno, Nevada, was destroyed by fire May 16. The loss is estimated at \$60,000 of which \$25,000 is covered by insurance.

FREE SKILLED LABOR ON N. C. PRISON JOB

Free workmen will be used for skilled labor in the construction of the new \$400,000 state prison in North Carolina, although the contractor for the building will have to use prisoners for common labor. V. P. Loftis, secretary of the Carolinas Branch of the Associated General Contractors, announced, following a conference with state prison officials in Raleigh recently. A building committee is to be appointed by the Governor to draw up plans for the new prison. Loftis stated, and after the final details of the project are arranged, the committee will take competitive bids on the work. The Carolinas Branch, A. G. C., has pledged its cooperation with the committee in every way possible, Loftis said.

THE OBSERVER

What He Hears and Sees on His Rounds

James Clifford, general manager of the Sugar Pine Lumber Company at Pinedale, was elected vice president of that concern and the Yosemite Lumber Company at the annual meeting of the board of directors of the two milling institutions last week. Clifford has been affiliated with the Sugar Pine Lumber Company for the past two years, succeeding B. A. Cannon as manager.

Five electrical dealers of Santa Cruz will establish a central display room in the Rittenhouse Block, Church street and Pacific avenue, that city. The dealers who have combined in the enterprise are Cox Electric company, John Holt, Frank Carroll, Ervin Smith and the Soquel Electric of Soquel.

The Majestic Electric Appliance Company, Inc., with assets of \$175,000 and liabilities of \$225,000, has today been forced into bankruptcy by three creditors whose claims aggregate \$6300. Federal Judge Frank H. Kerrigan appointed R. W. Dennis as receiver.

The Governor of Montana has signed a law establishing a brick-making plant at the state prison. Bricks will be made by convict labor and are to be used within the prison limits, in order not to offer competition of free labor.

Contractor on \$7,000,000 Pittsburgh, Pa., post office project replaced 22 union structural ironworkers April 11 with non-union pilledrivers at \$1.50 per hour, which is the ironworkers' rate. Engineering Trades' Record reports, Building Trades' Council charges that the contractor is not paying prevailing rate on this federal project and that he is seeking to establish open shop.

President Hoover has directed the Department of Agriculture to tighten up its regulations governing granting of leases for lumbering operations on public lands, the effect of which will be to virtually eliminate any large operations of this type with the exception of pulpwood lumbering projects in Alaska.

Electrical workers of the Pacific Northwest Public Service Company of Portland, Ore., will refuse to submit to a 10 per cent wage reduction, it is announced by officials of the Electrical Workers' union. A meeting of more than 500 company electricians was held. The reduction was to effect union workers July 1.

Modeled after the federal water-power act, a new water appropriation code for the State of Oregon was enacted at the recent session of the legislature. This act creates a hydro-electric commission consisting of the state engineer and two commissioners appointed by the governor to serve without pay. The newly created commission will pass on all applications for appropriation of water from Oregon streams for power purposes. Under terms of the legislative act this body will exercise absolute jurisdiction over construction and financing of power projects with special authority over all power projects built by private capital. Members of the commission except the state engineer

will sit only as occasion demands to pass upon power applications. C. E. Stricklin is state engineer.

The Chicago Building Construction Employers Association has gone on record in favor of wage maintenance. Its statement calls upon public contract awarding agencies and all others interested to make sure that a reasonable wage scale is specified in all work.

Dr. George W. Dowrie, professor of finance at Stanford University, in addressing delegates to the Del Monte convention of the State Building and Loan League, declared that the building and loan business in California is suffering from the same set of ailments which are hampering agriculture and practically every other line of activity. But on the whole the situation is far from panicky, he added, and in most ways the building loan associations are in better position than most other lines of finance, he added.

Dr. Dowrie warned the building and loan executives that business conditions in California "will not improve permanently until overproduction of homes, subdivisions, agricultural products, and booster propaganda is eliminated. There are also the problems of unemployment, burdensome taxation, costly armaments and general chaotic economic conditions throughout the world to be considered.

Secretary Doak last Monday said the administration would consider general wage reductions by industry a violation of confidence justifying employees in asking wage increases.

The secretary referred to the agreement which President Hoover obtained from industry and organized labor late in 1929, to maintain the existing scale of wages during the depression.

Doak said he had been advised of no plans by employers for general reductions and had not been formally advised of the statement of President Green of the American Federation of Labor that if a general reduction were attempted labor would be justified in striking in opposition.

The U. S. Supreme Court last Monday dismissed the suit of the state of Arizona for an injunction forbidding the government from carrying out the Boulder dam water and power project on the Colorado river under the present allocation of water and power.

The United States government and six states of the Colorado river basin had filed a motion with the court asking dismissal of the injunction proceedings.

Arizona based its demand on the grounds that the allocation of water was unfair.

California was alleged to have obtained the lion's share of the benefits.

The decision is believed to remove the last hitch which might threaten the continuance of work on the project.

The dismissal was without prejudice to Arizona's right to bring another action should her rights appear to be threatened.

No money will be spent by Fresno county during the fiscal year 1931-

1932 for the paving of county highways. This, it was revealed, is the stand of four members of the board of supervisors. The economy measure is to be adopted in the effort to keep the basic rate down to at least its present level in the face of an estimated decline of not less than \$5,000,000 in the county's assessed valuation.

Approximately 1000 employees of the Empire steel plant at Mansfield, Ohio walked out last Tuesday when informed of a 15 per cent wage cut. Previously it had been announced the reduction would be only 10 per cent. Strike leaders said about 500 high workers would walk out later, causing complete suspension of operations.

A prediction that labor will survive depression and come through as powerful as ever is made by George M. Harrison, president of the International Brotherhood of Railway and Steamship Clerks. Shorter working hours and higher wages, said Harrison, are necessary so that consuming power keeps pace with producing power.

The plant of the Hamilton Window Frame & Door Company at Colma, San Mateo County, suffered a \$17,000 fire loss yesterday. Spontaneous combustion was blamed.

Redwood Lumber Company of Santa Rosa has been purchased jointly by three lumber concerns of that city—the E. U. White, Mead Clark and Sterling Lumber Companies.

Owens-Illinois Glass Company is reported to be investigating sites in Contra Costa County on which to establish a glass factory. Sites in the vicinity of Pittsburg are being favorably considered.

The plant of the Bakersfield Sandstone Brick Company at Bakersfield suffered a \$10,000 fire loss last Monday. Erick making machinery was badly damaged. The loss is partially covered by insurance, according to Jas. Curran, president of the company.

Langlais Electric Company of San Francisco will open a branch at 218 Forest Ave., Pacific Grove, next Monday. The branch will be in charge of B. A. Solomon and will carry a complete line of electrical fixtures and equipment.

Fred Camp has joined the Building Material Division, salesforce of the Berger Manufacturing Company and will represent that concern on the floor of the Builders' Exchange.

Ray H. Collins, for the past ten years associated with the Red River Lumber Company, has been named manager of the Reno, Nevada, branch of that company. Previous to his association with the Red River concern, he was with the Verdi Lumber Company and the Clover Valley Lumber Company.

Senator J. M. Inman's bill providing that the general prevailing rate of wages shall be paid on all public works was passed last Wednesday by the assembly. The lower house also approved a bill by Senator Thomas Maloney prohibiting employment of aliens by contractors, or subcontractors on public works, except in cases of emergency.

Hoisting engineers of Philadelphia are said to have offered to accept a wage cut in order to secure an agreement with employers.

ALONG THE LINE

B. J. Ornburn, designing engineer for the Montana state highway commission, has been appointed bridge engineer. Mr. Ornburn is a graduate of the University of Missouri and started his career as a bridge engineer with the Missouri state highway commission. Prior to going to Montana, he was with Ash-Howard-Needles & Tammen, consulting bridge engineers in Kansas City, Mo.

Reno, Nevada, will shortly appoint a city purchasing agent. It is understood the position will be filled by Guy Walts, assemblyman of the 1931 session of the Legislature.

Frederick Adams Reimer, 57, president of the American Road Builders' Association and a member of President Hoover's Permanent International Highway Commission, died in East Orange, N. J., last Monday.

George Sullivan has been reappointed city engineer of Santa Clara, Cal. He will receive a monthly salary and a commission of 5 per cent on all public improvements.

United States District Court at Los Angeles last Monday dismissed an involuntary petition in bankruptcy brought against the United States Building and Loan Association by 3 creditors.

W. H. Hollenbeck, 69, president of the Hollenbeck-Bush Planning Mill at Fresno, died in that city last Monday. Born in Winnebago, Illinois, Hollenbeck came to California 45 years ago as President of Pasadena for two years before he went to Fresno.

J. E. Steiger has been named chief deputy surveyor in the office of Geo. Deconber, county surveyor of Stanislaus County. Steiger fills the vacancy caused through the death of Travis Townsend. V. S. McMath of Riverbank, succeeds Steiger as draftsman.

DEMAND FOR MONEL METAL SINKS LOOMS

Public demand, indicated by the almost random sale during 1930 of over 10,000 custom-made monel-metal kitchen sinks, has induced International Nickel Co., Inc., to enter the field with a line of 10 standard models designed for mass production, says The Business Week.

Models are provided in 6 different sizes, listing at from \$140 to \$195 each. Compared to iron enamel equipment, working area has been increased 31% without greater overall dimensions, through elimination of the wide roll and curve.

Special machinery for the production of the line was designed and built by International Nickel and installed in the plant of Mullins Manufacturing Co., Salem, O., which will do the actual fabricating.

Sales will be handled by direct agents of International Nickel, who will sell to the wholesaler for distribution through regularly established plumbing supply channels. A half million dollars are to be spent in advertising.

HERE—THERE EVERYWHERE

The Governor of Colorado has signed a bill providing for the use of convict labor on state highway construction.

City of Denver, Colo., refuses to award a contract to a low bidder who was reported to have attempted to cut the carpenter's wage rate \$3 per day on a hanger unit at the municipal airport.

Bricks made from street refuse, which formerly were used in Germany mostly for pavements, have since 1928 been also used for building construction. In 1930 187 houses were constructed entirely from these bricks in the eleven German cities where this refuse is burned and the ashes pressed into bricks.

A. S. Holmes, city building inspector of Oakland, reports the issuance of 1470 building permits this year from January 1 representing the expenditure of \$1,076,593 in new construction in Greater Oakland. There have been 270 new residences built and 134 business structures.

Conditions of many labor camps in Salinas Valley are branded "deplorable" by Edward A. Brown, director of camp sanitation, California State Department of Industrial Relations. Unless conditions are remedied at once wholesale arrests will be made, he intimates.

Clare A. Parks has been placed in charge of the Seattle, Wash., office of the Asbestos Bureau, Inc., which includes in its membership the foremost asbestos firms in the Pacific Northwest. In addition to managing the bureau affairs, Parks will have charge of quantity surveys in connection with the use of asbestos and asbestos products in building construction.

The application of contractors for authority to reduce wages has been denied by the Colorado State Industrial Commission.

Building trades unions of Baltimore charge that contractors on two school projects are violating minimum wage laws. In one instance, a wage of \$17 per week under the prevailing rate was paid, according to the charge.

CONTRACTOR CANNOT COLLECT FOR PLANS

Owing to the fact that Prosper Bou, contractor of San Bruno, failed to comply with the state law regulating the practice of architecture in the state of California, he will not be permitted to collect for services in connection with plans which he prepared for the San Bruno city hall extension.

The State Board of Architectural Examiners, through its representative, A. L. Bolton, filed a protest with City Clerk Amil A. Bohm, against the payment of Bou from city funds and at the same time called the attention of City Attorney Rudolph Raspey to the fact that the state law would not permit of payment being made to Bou.

The State Board is supported in its contention by the findings of City Attorney Raspey, concurring with those of the State Board, and he will take the necessary steps to stop payment to Bou.

TRADE LITERATURE

Information regarding the design and use of the Jaeger truck mixer are given in a 20-page catalog TM-31, issued by the Jaeger Machine Co., Columbus, Ohio.

Physical qualities and methods of applying Timmair air-toughening steel welding rods are explained in a 4-page pamphlet issued by the Taylor-Wharton Iron & Steel Co., High Bridge, New Jersey.

Specifications and uses of the Model 631 Trackson McCormick Deering heavy-duty crawler tractor are covered in a 4-page folder, 304 prepared by the Trackson Co., Milwaukee, Wis.

New catalogues have been published by the Speeder Machinery Co., Cedar Rapids, Iowa, covering, respectively, the whirlwind 3-2-yd., the 1-3 1/2-yd. and the model 90 1 1/2-cu. yd. convertible excavators. All three publications are fully illustrated.

The Cooper-Bessmer Corporation, Mt. Vernon, Ohio, is distributing a folder which contains illustrations and specifications of the new stationary Type JT diesel engine. Bore is 11 1/2-in., stroke 15-in. Cylinders are 3, 4, 6 or 8 in number. Rated horsepower are 150-180; 200-240; 300-350; 400-450 when operating within the speed range of 300-550 r.p.m. with cast iron pistons. Although fuel economy, trim lines, enclosure, accessibility, and option of built-in accessories are emphasized points—the most noticeable innovation is the placing of the spray valves and driving levers in a position directly below the cam shaft, easily reached from the engine platform. Removal of the engine head can thus be accomplished without disturbing the fuel injection system. Copies of the folder can be secured by writing the corporation direct.

Catalog 31 of the J. D. Adams Co., Indianapolis, Ind., covers the complete line of road machinery manufactured by this company, including several new machines classified as leaning wheel graders, tandem drive motor graders, a trailer patrol and a retard mixer. The catalog contains 48 pages and is fully illustrated.

OREGON LUMBERMEN PLAN SALES AGENCY

Although no formal action was taken, lumbermen of the Columbia river district meeting in Portland, Oregon, last Saturday, had under consideration a suggestion that a co-operative organization be formed for the district to act as a selling agency on the Atlantic and Gulf coast.

Operators of mills in several Pacific Northwest centers discussed the Puget Sound Associated Mills, recently organized selling agency after which the Columbia river cooperative would be modeled.

Roy J. Sharp of Tacoma, secretary of the Puget Sound Association said 92 per cent of the manufacturers engaged in intercoastal trade belong to it. The associated mills he said, thru their company, will handle normally about 30,000,000 feet of lumber monthly and will push sales of their product in eastern markets.

WAGE RATE FOR C. G. BRIDGE FIXED

The present standard of wages will be maintained on the Golden Gate bridge project, it was agreed at a conference attended by representatives of the Golden Gate Bridge and Highway District, the labor unions and the Industrial Association of San Francisco.

It was further agreed that this standard scale shall be written into every contract issued for construction of the bridge.

The scale follows: Carpenters, \$9 a day; electrical workers, \$9; iron workers, bridge and structural, \$11; iron workers, reinforced concrete, rodmen, \$9; house smiths and ornamental, skilled in all branches, \$9; engineers, hoisting and portable, \$9; engineers on structural steel, \$11; laborers, \$5.50; painters, \$9; pile drivers, \$9; pile driver engineers, \$10; steam fitters, \$10; auto truck drivers, according to size and capacity of truck, from \$6 to \$5.50 cement workers, \$5.50; cement finishers, \$9, and caulkers, \$7.

The following additional clause is also to be inserted in all contracts, according to the agreement:

"Contractors' attention is directed to the condition prevailing that pile drivers and structural iron workers and certain other crafts are now working on a five-day basis, and also the following conditions concerning overtime:

"Crafts working on a five-day basis demand double time for Saturday and Sunday and other overtime work.

"Where three shifts are employed, seven hours' work constitute a day's work at the rate of eight hours' pay, contractors having the right to determine the number of men to be employed on each shift.

"Common laborers work six days per week, Mondays to Saturdays, inclusive, at straight time, and the hours are from 8 a. m. to 5 p. m., except where more than one shift is employed."

3-YEAR WAGE PACT SIGNED AT SEATTLE

An agreement, effective May 1, which provides for continuing the present wage scale in building operations for the next three years has been entered into by the Seattle Chapter, Associated General Contractors of America, and the Seattle Construction Council, both representing the employers, and the Seattle Building Trades Council, representing all union building craftsmen.

Senate Balks Salary Increase For Engineer

The Senate last Thursday refused to withdraw from the finance committee a bill which would increase the salary of C. H. Purcell, state highway engineer, from \$10,000 to \$15,000 per year.

The bill, along with several other salary increasing measures, was refused passage from the committee.

The motion to withdraw the bill was made by Senator Roy Fellom, San Francisco. Fellom told the senate the highway engineer's duties have increased rapidly and the position has become one of the most important in the state, with the supervision of \$100,000,000 worth of work.

He called attention to the fact that the highway engineer will supervise the construction of transbay bridges.

HIGHWAY BODY TO STUDY GRADE X-INGS

Plans for a study of the grade crossing situation in California that will cover every phase of the subject were discussed last Tuesday by Col. Walter E. Garrison, director of the Department of Public Works, and the members of the California Highway Commission. The study is being undertaken in accordance with a bill passed by the present legislature, and signed by Governor Rolph. It will be made cooperatively by the Department of Public Works and the California Railroad Commission.

The study will include railroad grade crossings built both upon the state and the county highway systems.

Following the conference at Tuesday's meeting of the California Highway Commission, C. H. Purcell, State Highway Engineer, was instructed to immediately proceed in cooperation with the State Railroad Commission to gather data showing the number and location of all railroad grade crossings in California; the approximate railroad and automobile traffic at these points; protective warning devices now installed; the accident record of each of these crossings.

With this data, it is believed that a program of grade crossing eliminations can be formulated that will make possible the early removal of all dangerous crossings from all roads in the state, and the eventual removal of all crossings, other possibly than spur tracks in more or less isolated districts.

The thorough character of the study that is contemplated is indicated by the fact that its cost is estimated at \$50,000. The report will be submitted to the legislature at its session in 1933.

Commenting on the conference, Earl Lee Kelly, chairman of the California Highway Commission, said:

"We are going to know by 1933 just how extensive the grade crossing problem is in California. We know what this problem is in our state highway system, and are making very rapid progress in the elimination of these crossings for the state system. There has not been the careful survey made of crossings on county roads and city streets.

"It has been said that the complete elimination of railroad grade crossings in California would cost a billion dollars. Before the next legislature meets, we will know what this cost is, and will not have to guess at it. Moreover, we will know the practical method of proceeding to eliminate them, whether by relocation of railroad or highway, or by building underpasses or overpass separation structures.

"We will also know how to better the protection of such crossings as can not be immediately eliminated.

"I feel that the bill for this study as signed by Governor Rolph constitutes a determined effort to solve the grade crossing problem in California, and marks a long step forward in the Rolph highway program."

L. A. REJECTS BOND PROPOSALS

The submission of a \$15,300,000 power bond proposition to the voters at the June 2 election was voted down by the City Council of Los Angeles following a conference between members of the council and power commission.

The bond would cover three propositions, one for a \$7,000,000 steam generating plant, a second for a \$2,000,000 extension to the city's present electric system, and a third for \$6,300,000 for the construction of an electric line to Boulder dam.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3509-S ENGINEER, preferably E. E. or M. E. graduate, not over 30, single, good personality and considerable mechanical ability, for service work and testing of hydraulic machinery. Must have experience in hydro-electric plant construction or operation. Salary about \$175 per month. Apply by letter with photo. Headquarters, S. F.

R-3559-S SALES ENGINEER, to sell sprinkler systems for outside and inside irrigation. Straight commission. Opportunity for right man. Location, San Francisco.

R-3569-S MECHANICAL ENGINEER experienced in the production of heavy machinery, to design and detail portable rock crusher. Opportunity for the right man to take financial interest and full charge of engineering in new company. Location, San Francisco.

R-3566-S MASTER MECHANIC and Factory Superintendent with an factory experience will be needed for new plant. Men with this experience please apply, stating age, employment record and salary required. Location, California.

R-3565-S JUNIOR COLLEGE Teacher with California credential to teach applied mathematics and surveying. Salary \$2400-2600 a year depending upon teaching experience. Apply by letter with photo and references. Location, Northern California.

BUILDING LOAN COMPANIES MERGE

George L. Eastman, president of the Fidelity Savings & Loan Association, announces consolidation of the Fidelity concern with the Pacific States Savings & Loan Company, bringing together assets of approximately \$109,000,000.

Eastman said a plan had been devised whereby the assets of his association will be taken over by the Pacific States. The plan is subject to the approval of the state building and loan commissioner, H. L. Carnahan.

The last published statements of the associations involved showed Pacific States' resources totaled more than \$72,000,000, while the Fidelity has more than \$37,000,000. Five branch offices of the Fidelity will be merged with Pacific States branches, Eastman said.

Taking a dose of its own medicine and thereby strengthening its no-advertising-signs policy, the U. S. Forest Service has decided to do away with all fire warning signs along main traveled roads in the National Forests of the California Region, according to an order issued by Regional Forester S. B. Snow. Fire warning signs will be posted hereafter only at entrances to the national forests. This order does not affect special restrictive fire signs relating to no smoking, camp fire permits, closed areas and the like.

Cocos Bay Lumber Co. proposes to double the storage capacity of its plant at Bay Point in Contra Costa County. A. V. Lucas, plant superintendent, reveals that storage quarters for 20,000,000 feet of redwood is to be provided.

NEED FOR BETTER HOUSING IS TOLD

"Eighty-five per cent of the population of this country wants better places in which to live and the market for home ownership has only been dammed up rather than chilled," said Charles H. Watts of New York, president of the Federal Industrial Loan Corporation and General Chairman of the American Construction Council's National Advisory Committee on Slum Clearance, speaking before the luncheon session of the Eighth Annual Spring Meeting of the American Construction Council held at the Biltmore in New York last week.

"The consumer is the gentleman you must eventually know, and if you fail to recognize his place in your picture at the top, your understructure, built upon satisfaction, will probably not last long. Anyone who does not take that into consideration is going to build a structure that will leave empty houses, empty apartments on his hands.

"No depression, no sense of failures of credit institutions, banks included, no sense of high prices and all that goes with it, is going to dampen that which is the bed-rock of the thing that you are planning for today." "No the consumer's credit desire," Mr. Watts stated, was illustrated by the more than \$66,000,000 that his company during the past year extended in small loan credits to over 400,000 families of this class of the country's population.

"This year in this country there will be \$700,000,000 of it extended to that 85 per cent of the population," he added.

"What is needed now," continued Mr. Watts, "is a plan that will link up the available money on one hand with the consumer on the other hand. There is a need for some one in between money and consumer, and it seems to me this Council ought to find a great deal of satisfaction within itself in shortening the distance between home ownership between these two folk who do not understand one another.

"The pulling down of our old rookeries and establishing that which is a decent place in which people are to live in their places, is, I know, one of the fundamental efforts of this Council. I recognize that right here in New York there is the possibility of doing this in a very large way. We need only the plan. We must pledge ourselves to this 85 per cent—the consumer. He is the market, and he waits on our constructive ideas."

ARBITRARY BUILDING CODE BASIS OF SUIT

A suit against the building code of Fort Wayne, Ind., which may result in legal precedents that will affect building codes in other cities of Indiana has been filed by Ralph Dunn, a contractor. He seeks an injunction and damages of \$25,000, naming the mayor, the city, the city attorney, the building commissioner, the board of public works and others as defendants.

The complaint alleges that the building code is invalid because it is an attempt to deprive the petitioner of his property without due process of law in violation of the federal and state constitutions. It also alleges that the code gives the building commissioner arbitrary power to grant or refuse building permits upon a mere whim.

It is charged the code does not grant any appeal from the ruling of the building commissioner as to whether or not drawings, plans and specifications for buildings are in compliance with the code.

MATERIAL PRICES CONTINUE DOWNWARD

Prices have continued to sag for a number of months, though there has been a scattering of advances in brick, lumber, aggregates and the like wherever there was sufficient buying to encourage a rise, says Engineering News-Record. This is an indication of what would happen to prices in the event of a revived demand for construction and a proof that prices are low.

The feature of the market continues to be cement. During the month a number of drastic reductions took place in an area wide enough to include Baltimore, Dallas and Seattle. These reductions amounted to 85c. in Baltimore, 51c. in Pittsburgh, 27c. in Dallas, 35c. in Kansas City and 55c. in Seattle. New York also has felt the effect of the price war, bitterest in the Middle West, and the present price is \$1.95, compared with \$2.10 on April 1, \$2.20 in May, 1930, and the previous low of \$1.82 in 1918. The current production rate is 37 per cent of the 200,000,000-lb. capacity, compared with 52 per cent at the end of the first quarter of 1930.

COUNTY MUST PAY FOR USE OF PLANT

No public authority has any right to exact consideration for extension of time on a contract, it was ruled by the supreme court of California, as a result of which George H. Oswald, Los Angeles contractor, was awarded rental at the rate of \$1000 a month for use of an asphalt paving plant by the city of El Centro, which had forced the contractor to lease it at a nominal rental of \$1 per month as a condition of allowing him ten days' additional time to complete a paving contract in that city.

The contract in question was awarded under the 1911 Act and amounted to about \$200,000. It was completed in 1924. Mr. Oswald protested against the city's demand for use of the paving plant but finally consented rather than have the bonds issued against the job tied up by refusal of the city to accept the work. Later he brought suit which was fought through to the supreme court which remanded it back to the superior court in El Centro to fix a reasonable rental for use of the plant. The only evidence offered was on the side of the contractor, who showed a reasonable rental would be \$1000 a month, which the court allowed for a period of 82 months.

BALDWIN ACQUIRES PELTON WATER WHEEL

Announcement is made that the Baldwin Locomotive Works of Philadelphia, Pa., has acquired all of the subsidiaries of Cramp-Morris Industries, Inc., of Philadelphia, which includes the Pelton Water Wheel Co. of San Francisco; I. P. Morris & DeLaVergne, Inc., and DeLaVergne Engine Co. of Philadelphia; the Cramp Brass & Iron Foundries Co., and the Federal Steel Foundry Co. of Chester, Pa.

The acquisition of these companies by the Baldwin Locomotive Works is in accordance with their policies of obtaining greater diversification of manufacture and is of interest to the Pacific coast as largely increasing the field of activity of the Pelton Water Wheel Co., whose local management remains unchanged.

The Pelton Water Wheel Co. is the largest manufacturer of hydraulic equipment west of Chicago, having been operating since 1889, designing and building impulse and reaction turbines, valves, governors and pumping

equipment. This company has furnished hydraulic equipment for some of the largest hydro-electric plants in the west, as well as many outstanding installations in South America, India, Japan and other parts of the world.

STRIKERS WIN IN WAGE CUT FIGHT

Empire Steel Corporation, of Mansfield, Ohio, and its 1600 employees reached an agreement last Friday ending a strike that had tied up plant operations here for several days.

Meeting virtually all terms laid down by the workers, the company agreed among other things to rescind a proposed wage cut, which was the general cause of the walkout.

The men quit when notices of 15 per cent reductions were posted declaring they had been led to believe the cut would be only 10 per cent. The company then offered to eliminate the added 5 per cent but the workers refused to accept any reduction and drew up a list of other demands.

Compromising on their demand that unskilled labor be paid a minimum of 46 per hour the workers accepted a 36 cent scale.

BUILDING CHIEFS ELECT OFFICERS

William D. Guion, building commissioner of Cleveland, Ohio, was elected president of the Building Officials' Conference of America at the seventeenth annual meeting of that body in Toronto, Ont., last month. Philip A. Mason, building supervisor of Hartford, Conn., was elected first vice-president; Wm. F. Hurd, commissioner of buildings, Indianapolis, Ind., second vice-president and John W. Weinmann, inspector of buildings, Washington, D. C., secretary-treasurer.

The convention was attended by eighty officials and representatives of various building material industries.

COURT HOLDS NEON SIGN PATENT VALID

The U. S. Circuit Court of Appeals in Cincinnati has handed down a decision holding the Claude Neon patents to be valid and infringed by the Sunray Gas Corporation.

The decision upholds the findings of the U. S. District Court in Cleveland. The District Court holds the corporate defendant liable for profits and damage and enjoined them from further infringement.

HARDWARE DEALERS OF SACRAMENTO ELECT

J. A. Curnow of Grass Valley will serve as president of the Sacramento Valley Retail Hardware Dealers' Association during the coming year. Curnow is also vice president of the California State Hardware Association.

Other new officers chosen are as follows: A. T. Jones of Grass Valley, vice president; G. W. Carey of Sacramento, secretary; C. M. Burchell of Wheatland, treasurer; L. Gardiner of Isleton, Luther Johnson of Roseville, L. Carpenter of Maxwell, Harold Woodworth of Sacramento, and B. G. Simms, also of Sacramento, directors.

Brazil's nation-wide highway program has been postponed because of the economic situation brought about by the coffee crisis and the political unrest of 1930, according to a statement issued by the U. S. Department of Commerce.

NORTH BERKELEY, Alameda Co., Cal. Solano Avenue.

One-story brick drive-in market with tile roof.

Owner—R. O. Long, 2122 Shattuck Ave., Berkeley.

Architect—Paul Dragon, Mercantile Bank Bldg., Berkeley.

Low Bidder—W. E. Lyons, 354 Hobart St., Oakland.

Sub-Contracts Awarded. Cost, \$250,000

SACRAMENTO, Sacramento Co., Cal. Two-story reinforced concrete and steel frame store.

Owner—S. H. Kress Co., Western Pacific Bldg., Los Angeles.

Architect—John Fleming, 1031 South Broadway, Los Angeles.

Contractor—Lindgren & Swinerton, Inc., California State Life Bldg., Sacramento.

Marble Work—Vermont Marble Co., 244 Brannan St., San Francisco.

As previously reported, excavation awarded to J. R. Reeves, 12th and American Rivers, Sacramento; piles to Raymond Concrete Pile Co., Hunter-Dulin Bldg., S. F.; structural steel to Minneapolis Steel Co., Sharon Bldg., S. F.; reinforcing steel to Thomas Scollan, 1939 T St., Sacramento.

Sub-Contract Awarded. Cost, \$25,000

STORE
OAKLAND, Alameda Co., Cal. Broadway.

One-story and basement Class C steel frame, concrete and hollow tile department store.

Owner—Isadore Weinstein, 1041 Market St., San Francisco.

Architect—Wm. Knowles, 1214 Webster St., Oakland.

Contractor—Jacks & Irvine, 74 New Montgomery St., San Francisco.

Metal Sash—Truscon Steel Co., Cal Bldg., San Francisco.

As previously reported, wood roof trusses awarded to Summerbell Truss Co., 354 Hobart St., Oakland, reinforcing steel to W. S. Wetenhall Co., 17th and Wisconsin Sts., San Francisco; lumber to Sunset Lumber Co., 400 High St., Oakland; structural steel to Judson-Pacific Co., 609 Mission St., San Francisco.

Preliminary Plans Being Prepared. Cost, \$—

STORE
OAKLAND, Alameda Co., Cal. Broadway near 19th Street.

One-story store (40x100-ft.)

Owner—Albert E. Kern and Samuel Hamburger.
Architect—Reed & Corlett, Oakland Bank Bldg., Oakland.

Sub-Bids Wanted.
ALTERATIONS Cost, \$35,000
SAN FRANCISCO Stockton and O'Farrell Streets.

Alterations to two-story and mezzanine floor store (Class C construction; structural steel in building will be re-used).

Owner—Imperial Realty Corp.
Architect—G. Albert Lansburgh, 140 Montgomery St., San Francisco.
Contractor—Barrett & Hill, 918 Harrison St., San Francisco.

Sub-bids are wanted on plumbing, heating, sheet metal, roofing and mill work.

Preparing Preliminary Plans.
STORE Cost, \$—
OAKLAND, Alameda Co., Cal. Broadway near 20th Street.

One-story store building (20x85; L-shape).

Owner—Harvey B. Lyon, 25 Crocker Ave., Oakland.
Architect—Reed & Corlett, Oakland Bank Bldg., Oakland.

Mill Work Bids Wanted.
ALTERATIONS Cost, \$35,000
SAN FRANCISCO Stockton and O'Farrell Streets.

Alterations to two-story and mezzanine floor store (Class C construction; structural steel in building will be re-used).

Owner—Imperial Realty Corp.
Architect—G. Albert Lansburgh, 140 Montgomery St., San Francisco.
Contractor—Barrett & Hill, 918 Harrison St., San Francisco.

Contracts Awarded.
OFFICE Cost, \$6000
SAN FRANCISCO Napoleon St. and Evans St.

One-story frame office building.
Owner—Chas. R. McCormick Lumber Co., 215 Market St.

Architect—J. E. Kraft & Sons, Pheasant Bldg.

Electric Work—Central Electric Co., 179 Minna St.

Plumbing—Anderson & Rowe, 45 Belcher Street.

Steel Work—Mortensen Const. Co., 608 Indiana St.

Concrete—S. A. Chase, 80 Douglas St. Reinforcing Steel—Gunn, Carl & Co., 444 Market St.

Structural Steel Contract Awarded.
STORE Cost, \$35,000
OAKLAND, Alameda Co., Cal. Broadway.

One-story and basement class C steel frame, concrete and hollow tile department store.

Owner—Isadore Weinstein, 1041 Marin St., San Francisco.

Architect—Wm. Knowles, 1214 Webster St., Oakland.

Contractor—Jacks and Irvine, 74 New Montgomery St., San Francisco.

Structural Steel—Judson Pacific Co., 609 Mission St., San Francisco.
As previously reported, wood roof trusses awarded to Summerbell Truss Co., 354 Hobart St., Oakland; reinforcing steel to W. S. Wettenhall Co., 17th and Wisconsin Sts., San Francisco; lumber to Sunset Lumber Co., 400 High St., Oakland.

Planned.
OFFICES Cost, \$300,000
BERKELEY, Alameda Co., Cal. Durant and Ellsworth Sts.

Ten-story class A medico-dental bldg. Owner—Withfield (corporation being formed).

Architect—Hyman & Appleton, 65 Post Street, San Francisco.

Sub-Contracts Awarded.
STORES Cost, \$1,000,000
OAKLAND, Alameda Co., Cal. NW 25th St. and Broadway.

Eight-story and basement class A reinforced concrete furniture display rooms and stores, 100x250-ft.

Owner—Pacific Stores Auxiliary Corp. Lessee—John Bruner Co., 15th and Clay Sts., Oakland.

Architect—Albert F. Roller, 1st National Bank Bldg., San Francisco.
Engineer—H. J. Tanner, Sharon Bldg., San Francisco.

Contractor—P. J. Walker Co., Sharon Bldg., San Francisco.

Sprinkler System—Turner Co., 329 Tehama St., San Francisco.

Heating & Ventilating—Herman Lawson, 465 Telama St., San Francisco.

Miscellaneous and Ornamental Iron—Michel & Vetter Iron Works, Harrison and 10th Sts., San Francisco.

Sidewalk Lights & Doors—F. H. Jackson Co., 415 Bryant St., San Francisco.

Steel Rolling Doors—Rolph Mills & Co., 525 Market St., San Francisco.

Kalmeid Doors—Forderer Corncie Works, 209 Potrero Avenue, San Francisco.

Sheet Metal—East Bay Sheet Metal Works, 1101 Market St., Oakland.

Masonry—W. A. Kamey, 323 Clementina St., San Francisco.

Tile (Interior)—Kane Tile Co., 3012 Harrison St., Oakland.

Marble—American Marble Co., 25 Columbia Square, San Francisco.

Sub-Contracts Awarded.
STORE Cost, \$5000
VALLEJO, Solano Co., Cal.

Rebuilding store (recently destroyed by fire).

Owner—Rhodes Electric Co., 328 Georgia St., Vallejo.

Architect—Not Given.
Contractor—S. J. Weeks, 331 El Dorado St., Vallejo.

Heating & Plumbing—R. G. Winchell, 511 Virginia St., Vallejo.

Painting—Fred Barnewitz, 1315 Napa St., Vallejo.

Electric Work—Owner.

Bids opened
STORE Cost, \$20,000
PACIFIC GROVE, Monterey Co., Cal.

One-story and mezzanine floor reinf. Concr. Dept. Store.

Owner—Rose Bros., Pacific Grove.

Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville, and W. W. Hastings, 232 Alvarado St., Monterey.

Following is a complete list of the bids received:

Ralph Sharpe, Pacific Grove.....	\$17,352
Fred McGarry, Monterey.....	17,778
George R. Dean.....	18,000
C. J. Raymond, Monterey.....	18,896

H. J. Cook, Carmel.....	22,350
H. Sino, Pittsburg.....	22,356

Bids held under advisement.

WHARVES AND DOCKS

LONG BEACH, Cal. — Consolidated Lumber Co., 122 W. Jefferson St., Los Angeles, awarded contract by city harbor commission at \$6602.50 for furnishing 1 c. b. Pier No. 1, Inner Harbor or Municipal Pier A, Outer Harbor, approximately 135,000 B. ft. 2x12-in. creosoted Douglas fir, rough. Specifications H. D. 54.

Preparing Plans.
MUSEUM, ETC. Cost, \$750,000
GRIFFITH PARK, Los Angeles Co., Calif.
Observatory, planetarium and museum of science.

Owner—Col. Griffith J. Griffith Memorial Fund.
Architect—John Austin and E. M. Ashley, Chamber of Commerce Bldg., Los Angeles.

The funds for this project, amounting to \$750,000, were provided through the will of the late Col. Griffith J. Griffith. The architectural contract is subject to the approval of the Security First National Bank and Van M. Griffith.

LONG BEACH, Cal. — R. D. Van Alstine, 110 East 9th St., Long Beach, consulting engineer for the Neptune Pier Co., has applied to the city building department for a permit to construct a trestle and creosoted pile wharf for three boat landings at Silver Spray Pier. The trestle will be 11x 184 ft. and the wharf 20x254 ft. The estimated cost is \$50,000. This is part of the Neptune Pier Co.'s \$1,000,000 pier project for which bids will be taken in the near future.

SAN FRANCISCO—Until May 26, 11 A. M., bids will be received by Constructing Quartermaster, Fort Mason, for repairs to torpedo wharf at Fort Winfield Scott. Specifications obtainable from above.

OAKLAND, Cal. — Duncanson & Harrison Co., deYoung Bldg., San Francisco, at \$21,844.40 awarded contract by City Port Commission, Oakland Bank Bldg., Oakland, to furnish and drive foundations for warehouse "C" Outer Harbor.

MISCELLANEOUS CONSTRUCTION

POMONA, Los Angeles Co., Cal. — Until 2 P. M., June 8, bids will be received by the Los Angeles County Supervisors for the construction of a steel and concrete grandstand at the Los Angeles County Fair Grounds, Pomona. The proposed structure will be 420x142 ft. by 79 ft. in height. It will seat 10,500. The building will contain dressing rooms, offices, rest-rooms, exhibit rooms, kitchen and cafeteria. Estimated cost \$320,000. Plans obtainable from Mamie B. Leatty, county clerk.

ALAMEDA, Alameda Co., Cal. — Following bids received by city council for resurfacing south tennis court at Lincoln Park:

(a) drain from net toward base; (b) drain from base toward net.
W. H. Larson, 301 37th St., \$1244.
Healey Moore Co., Oakland (a) \$.50 per lin. ft. for redwood board (a) \$.875 per ton for asphaltic mixture; (b) \$.25 per lin. ft. 2x8" redwood board; (11) \$.75 per ton asphaltic mixture.
Bids under advisement.

SAN MATEO, San Mateo Co., Cal. — City council rejects bids to furnish and install traffic signals at intersection of 12th Ave. and Hobart Ave. with El Camino Real and the insulation will be made by the city forces. Bids received were: City Imp. Co., \$1,599; Butte Elec. & Mfg. Co., \$2,086; alternate bid, \$1,750; L. N. Zant, San Mateo, \$2,095; Atlas Elec. Co., San Mateo, \$2,989.

Preliminary Plans Completed.
ARMORY Cost, \$60,000
SALINAS, Monterey Co. Howard and Salinas Sts. and Lincoln Ave.
One-story reinforced concrete armory (seating capacity 1,100 to 1,500).
Owner—State of California.
Architect—Keop & Campbell, Carmel.
Preliminary plans awaiting approval of state.

Contract Awarded
 PHONE STATION Cost, \$15,000
 POINT REYES, Marin Co., Cal.
 Reinforced concrete trans-Pacific telephone receiving station.
 Owner—Trans-Pacific Communication Company.
 Plans by Engineering Dept. of Owner.
 Contractor—MacDonald & Kahn, Financial Center Bldg., San Francisco.

Preparing Working Drawings.
 STAGE BLDGS. Cost each \$100,000
 CULVER CITY, Los Angeles Co., Cal.
 Washington Blvd.
 Two frame and stucco sound proof stage buildings.
 Owner—R. K. O. Theatrical Studios, Washington Blvd., Culver City, Wash.
 Plans by Eng. Dept. of Owner.

SAN FRANCISCO—Until June 1, 3 p. m., under Proposal No. 726, bids will be received by Leonard S. Leary, city purchasing agent, 270 City Hall, to furnish sprinkling systems for the
 (a) Ocean View Playground;
 (b) Potrero Hill Playground;
 (c) St. Mary's Playground.
 Specifications and further information obtainable from above.

BOULDER CITY, Nev.—Until June 5, 2 p. m., under Specification 524-D, bids will be received by U. S. Bureau of Reclamation, Las Vegas, Nev., to construct Pumping Plant No. 2 for the Boulder City water supply, Boulder Canyon Project, Arizona-California-Nevada. The location of the work is approximately 2½ miles northeast of Boulder City, Nevada.

The work consists of the construction of concrete foundations and the erection of the building which is of steel frame construction with stucco walls on metal lath and clay tile roof, involving approximately the following quantities:

hump sum, construction of building 17x 30-ft.;
 125 cu. yds. excavation, common;
 5 cu. yds. excavation, solid rock;
 30 cu. yds. backfill;
 25 cu. yds. concrete.

Materials will be furnished by the Federal Government. Specifications obtainable from above office.

SACRAMENTO, Cal.—Until May 29, 10 A. M., bids will be received by H. W. Hall, county clerk, to install sprinkling system for lawn at the county hospital grounds. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Specifications obtainable from County Engineer, Chas. Deterding.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—General Electric Co., 562 11th St., Oakland, at approx. \$600 awarded contract by East Bay Municipal Utility District to furnish a quantity of electric lamps for district use.

BERKELEY, Alameda Co., Cal.—Until May 26, 10 a. m., bids will be received by Florence E. Turner, city clerk, to furnish rock and screenings to be delivered as ordered, during the fiscal year commencing July 1, 1931. Certified check \$100 required with bid. Specifications and further information obtainable from clerk.

BERKELEY, Alameda Co., Cal.—Until May 26, 10 a. m., bids will be received by Florence E. Turner, city clerk, to furnish sand as ordered to the Corporation Yard, Allston Way and West street, during the fiscal year commencing July 1, 1931. Certified check for \$100 required with each bid. Specifications and further information obtainable from clerk.

BRIDGES

EUREKA, Humboldt Co., Calif.—Elmer C. Gardner, Eureka, at \$6,174 and \$30 yd. for additional concrete, awarded contract by county supervisors to construct reinforced concrete bridge over the Mattole river at Petrolia. Complete list of bids follows: Elmer C. Gardner.....\$6,174 Ernest McKee.....6,285 H. Padgett.....6,498 Chas. Winkler.....6,537 Guerin Bros.....6,769 Smith Bros.....6,800 Fred J. Maurer.....7,960 Structure will be 88-ft. in length over all, involving 53 yards class B concrete and 111 yds. class A concrete.

EUREKA, Humboldt Co., Calif.—Ernest M. McKee, Eureka, at \$4,187 awarded contract by county supervisors to construct reinforced concrete bridge across Eaton slough near Ferndale, 90-ft. in length, involving 145 cu. yds. class A concrete. Complete list of bids follows: E. M. McKee.....\$4,187 H. Padgett.....4,394 Chas. Winkler.....4,835 Fred J. Maurer.....5,032 Smith Bros.....5,580 H. H. Anderson.....6,340

SANTA ROSA, Sonoma Co., Cal.—Bids will be asked at once by county supervisors to construct timber bridge over McClelland Gulch, near Stewart's Point in the 5th Road District. E. A. Peugh, county surveyor.

SAN JOAQUIN COUNTY, Cal.—Until June 10, 2 P. M. bids will be received by State Highway Commission to construct nine timber bridges and widen two bridges between Stockton and Turner Station.

MODESTO, Stanislaus Co., Calif.—County supervisors abandon proposal to widen bridge over Dry Creek on the Waterford Highway, declaring the cost, estimated at \$18,000, as being too high. Geo. Macomber is county surveyor.

OCEANSIDE, San Diego Co., Cal.—The Oceanside Mutual Water Co. plans to construct a dam and reservoir near Calavera east of Carlsbad, on a site of 232 acres. The proposed dam will be 49 ft. in height and cost \$160,000. Henry Kressman, president of the company, states that the company proposes to finance the project with a \$150,000 5-year loan.

LYON COUNTY, Nev.—Until June 10, 2 P. M. bids will be received by S. C. Durkee, state highway engineer, Carson City, to construct portion of state highway in Lyon County, between Wilson's and the Mouth of Wilson Canyon, a length of 1.12 miles. The work will consist of grading and construction of a concrete and steel bridge over the West Walker river together with the construction of minor structures. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from engineer on deposit of \$100, of which \$10 is returnable. Certified check 5% required with bid.

PORTLAND, Ore.—F. T. Fowler, city bridge engineer, is completing

plans and bids will be asked shortly by the city commissioners to construct the East Sixteenth Street Viaduct across Sullivan's Gulch. The structure will be 331 ft. long and with a width on the basis of an 80-ft. street with 56-ft. roadway and two 8-ft. sidewalks. Main arch span will rise 50-ft. and there will be three of hinge-arch type construction. The cost is estimated at \$120,000 of which \$115,000 is for the viaduct and \$15,000 for the approaches. Lloyd Corp., property owners in the vicinity of the project, will pay one-third the cost, the city, one-third and the O. W. R. and N. R.R., one-third the cost.

LOS ANGELES, Cal.—Contract for the construction of the Sixth Street viaduct was awarded by the Los Angeles Board of Public Works May 15. The award was made on the basis of Alternates 2, 3 and 4, as follows:

All work except structural steel (Alternate No. 4) to J. F. Knapp, 5301 Horton St., Oakland, at \$1,272,525.

Fabrication and delivery of the structural steel (Alternate No. 2) to the Virginia Bridge & Iron Co. 536 S. Hill St., at \$112,330.

Erection of the structural steel (Alternate 3) to Allen Bros., Inc., 1625 S. Alameda St., at \$25,368.

List of the quantities which will enter into the construction of this bridge and appendances follows:

8,600,000 lbs. reinf. steel;

47,000 cu. yds. class F concrete;

500 cu. yds. class G concrete;

370 15-ft. concrete piles (precast or cast in place);

1,200 tons more or less structural steel;

3,000 cu. yds. more or less grading, including fill;

2,900 sq. ft. curb;

23,000 sq. ft. concrete gutter and local depressions;

35,500 sq. ft. cement walk;

sanitary sewer, storm drain, 8-inch and 3-inch asphalt concrete pavement as per plans;

ornamental handrails, etc.;

72 concrete centrifugally cast standards with double bronze lanterns.

This bridge will be of the girder span type with structural steel river span, a total length of 3600 ft. The bridge proper will be 46 ft. and at the approaches 56 ft. wide. East of the river the bridge will be 60 to 68 ft. above the street level. Merrill Butler, room 630 City Hall, chief bridge engineer, Los Angeles, is the designer of the bridge.

CAJON, San Bernardino Co., Cal.—Sharp & Fellows Contracting Co. Central Bldg., Los Angeles, awarded contract by Santa Fe Railway for construction of two trestle structures, one at Gish and the other at Alamy on the Santa Fe main line, about 3 and 5 miles, respectively, north of Cajon, bet. San Bernardino and Summit. The contract includes excavation, concrete abutments and backfill. The steel superstructure of bridge span will be built by the railway company.

SAN FRANCISCO.—Barrett & Hilt, 318 Harrison St., at \$644,280 awarded contract by Board of Public Works to construct bascule bridge over the channel in Third St. to be financed jointly by the City and County of San

Francisco and the State Harbor Commission.

The structure will be a single leaf bascule bridge, 140 ft. span, 80 ft. overall width; 163 ft. between fenders, with 6 ft. sidewalks. Trussions will be made for two street railway tracks and the Belt Line Railroad in addition to vehicular traffic.

SAN LEANDRO, Alameda Co., Cal.—City Engineer W. A. Richmond preparing plans for new bridge to span the creek in Park St. Two designs are being prepared, one for a 40-foot width and the other for an 80-ft. width. The county, according to tentative agreements, will share in the cost.

SAN JOAQUIN COUNTY, Cal.—As previously reported, bids will be received June 10 by State Highway Commission to construct nine timber bridges and widen two bridges between Stockton and Turner Station. Project involves:

(1) 1 only, timber d-tour bridge complete;

(2) 1 lot, existing bridges to be removed;

(3) 1600 cu. yds. structure excavation;

(4) 345 cu. yds. class B Portland cement concrete;

(5) 110 cu. yds. class A Portland cement concrete (structures);

(6) 675 cu. yds. class A Portland cement concrete (pavement);

(7) 91,000 lbs. reinf. steel;

(8) 290 M. ft. B. M. redwood timber, dense select all-heart structural grade;

(9) 235 M. ft. B. M. redwood timber, select all-heart structural grade;

(10) 1 lot miscellaneous items of work.

See call for bids under official proposal section in this issue.

SANTA BARBARA COUNTY, Calif.—Neves and Harp, Santa Clara, at \$18,002 awarded contract by State Highway Commission to remove deck of the seven 164-ft. 6-in. through steel truss spans of the bridge across the Santa Ynez river about 1 mile south of Buclton and constructing laminated timber floor and surfacing the bituminous macadam. Complete list of unit bids published in issue of May 18.

TRINITY COUNTY, Calif.—F. H. Nielson, Orland, at \$29,089.96 awarded contract by State Highway Commission to construct bridge across North Fork of the Trinity River near Helene, composed of one 150-ft. through steel truss span and two 47-ft. 2-in. concrete girder spans on concrete piers and abutments. Complete list of unit bids received on this project published in issue of May 14.

ORANGE COUNTY, Cal.—Need Construction Co., 809 Avalon Blvd., Wilmington, at \$59,947 awarded contract by State Highway Commission to construct bridge across Santa Ana River about two miles north of Newport Beach, consisting of three 60-ft. 2-in. steel truss spans to be replaced with concrete girder spans and widening the reinforced concrete girder approach spans consisting of two 21-ft. spans, eight 29-ft. spans and two 21-ft. spans. Complete list of unit and total bids received on this project published in issue of May 18.

WOODLAND, Yolo Co., Cal.—Yolo County Supervisors are considering the purchase of bonds of the Yolo-Sutter Joint Highway District to finance construction of a highway bridge over the Sacramento River at Knights Landing. The bridge, according to tentative estimates of Edward von Geldern of Yuba City, would cost \$186,285.

SACRAMENTO, Cal.—Sacramento County Supervisors have requested Yolo County Supervisors to assist in financing construction of a new bridge across Sutter Slough in Supervisor Marty's District. Structure would be a combination railroad and highway bridge and would cost \$132,000. The Sacramento County Supervisors are willing to share one-half the cost with Yolo County. The Sacramento Northern Railroad has agreed to pay the remaining half.

SAN FRANCISCO.—Mission Concrete Co., 270 Turk St., \$115,433.14, submitted low bid to the Board of Public Works to construct the Sloat Blvd Viaduct at crossing of Sunset Blvd. Monson Bros., at approximately \$127,848.45, next low bidder. Twenty-one bids were submitted. Complete list of unit and total bids will be published in tomorrow's issue.

TULARE COUNTY, Cal.—J. S. Metzger & Son, 332 W. Jefferson St., Los Angeles, at \$36,290 submitted low bid May 20 to State Highway Commission to construct four and widen two reinforced concrete slab bridges between Goshen and Kingsburg, varying in length from 39 ft. to 105 ft. Complete list of bids follow:

J. S. Metzger & Son, L. A.	\$36,290
L. C. Clark and E. C. Dougherty,	
Visalia	36,442
George J. Ulrich Constr. Co., Modesto	37,294
Frederickson & Watson & Frederickson Bros., Oakland	39,642
Oberg Bros., Los Angeles	46,653
Thermotte Con. Co., San Joaquin	46,653

..... not totaled

SAN RAFAEL, Marin Co., Cal.—Until June 9, 11 A. M., bids will be received by Rob E. Graham, county clerk, to construct a reinforced concrete bridge at the Stewart Ranch on the Nicastro Valley road in Road District No. 5, involving:

(a) 186 cu. yds. Class "A" cement concrete to be placed;

(b) 21,000 lbs. reinforcing steel in place.

Plans obtainable from County Surveyor Rodney Messner at San Rafael.

DREDGING, HARBOR WORKS & EXCAVATIONS

SOUTHERN CALIFORNIA.—The State Assembly has voted \$800,000 for the next biennium for food control work in Los Angeles and San Bernardino counties.

LONG BEACH, Cal.—Until 10 A. M., May 28, bids will be received by the Port Manager, Room 30, City Hall Annex, Long Beach, for dredging and filling in the Outer Harbor, Long Beach, under Specifications No. H. P. 55, involving approximately 400,000 cu. yds. Certified check or bond, 10%

STOCKTON, San Joaquin Co., Cal.—River Sand & Gravel Co., First National Bank Bldg., Stockton, at \$45 per cu. yd. submitted lowest bid to U. S. Engineer Office, Sacramento, for removing approximately 2500 cubic yards of material from Mormon Channel. Following is a complete list of bids received:

River Sand & Gravel Co., Stockton	\$ 45
-----------------------------------	-------

American Loading Co., S. F. 1.40
Pacific Coast Loading Co., S. F. 1.70
Bids bid under advisement.

MACHINERY AND EQUIPMENT

EUREKA, Humboldt Co., Cal.—Until May 28, 2 P. M., bids will be received by W. H. Pierce, superintendent of equipment, Shop No. 1, State Highway Commission at Eureka for the purchase of one CHC 20, Universal Shovel, 4-30, Model E, full crawler. Same may be inspected at the Division of Highway Yards at Eureka. Further information obtainable from above.

PHOENIX, Ariz.—O. S. Stapley Co., Phoenix, submitted low bid to Arizona Highway Department at \$7552.60 for furnishing 8-ft. road king graders.

OILFIELDS, Fresno Co., Cal.—Until May 28, 4 P. M., bids will be received by C. N. Ayers, clerk, Oil King Union Grammar School District to furnish and deliver one school bus chassis and body, as follows:

One 6-cylinder bus chassis, not less than 190-in. wheel base, single rear tires, equipped with brake booster.

One school bus body, seating capacity, 40 elementary school passengers, coach type body with rear door for emergency.

Certified check or bidder's bond for 10% required with bid. Allowance is to be made for 1925 Dodge-Graham bus of 20-passenger capacity. Further information obtainable from clerk.

OKLAND, Cal.—Allis-Chalmers Manufacturing Co., Rialto Bldg., San Francisco, at \$245 awarded contract by East Bay Municipal Utility District to furnish one 20-hp. tractor.

PLACERVILLE, El Dorado Co., Cal.—Until May 29, 6 p. m., bids will be received by Dr. W. A. Rantz, secretary, El Dorado County High School District, to furnish one school bus chassis and body for seating approximately 30 pupils. Chassis and body may be bid separately if desired. Specifications obtainable from secretary.

SAUSALITO, Marin Co., Cal.—Until May 29, 8 p. m., bids will be received by S. G. Ratto, clerk, Sausalito School District, to furnish one new White, Mack, G. M. C., Reo or the equivalent of either, 20-passenger school bus. Delivery to be made on or before August 7th. Specifications and further information obtainable from clerk at 911 Water street, Sausalito.

GALT, Sacramento Co., Cal.—Until June 4, 1:30 P. M., bids will be received by Lucille M. Thompson, clerk, Oakview School District, to furnish school bus, 50-passenger capacity. Specifications and further information obtainable from clerk at R. P. D. No. 2, Box 231, Galt, Calif.

PIPE LINES, WELLS, ETC.

KETTLEMAN HILLS, Cal.—The details of the contract for the construction of Section 2 of the natural gas pipe line between Glendale and Castaic, known as Section 2, have been announced by the Southern Fuel Co. The award of Sections 2, 3, and 4 were previously reported.

Section 2, which is for 31.5 miles of 26-in. pipe line, was awarded to the Mance-Robertson Ltd., 800 E 61st St., Los Angeles. The unit prices as shown in the contract, follow:

For pipeline laid in Sec. 2A, \$1.02 per lin. ft.

For pipeline laid in Sec. 2B, \$1.25 per lin. ft.

For cleaning and painting, class A, 12c; class B, 9.5 c; class C, 7.5c. Special work: Main line valves, \$150 each; 2-in. outlets, \$6; 6-in. outlets, \$12; 12-in. outlets, \$30; extra machine excavation, \$1 per cu. yd.; acetylene process welding on Sec. 2A, \$3.75 per hour.

LAS VEGAS, Nevada.—H. C. Keyes Kingman, Ariz., will file with the city commissioners on May 26 an application for a certificate of public convenience and necessity in connection with a gas plant he proposes building in Las Vegas. The plant will have a daily capacity of 300,000 cu. ft. and will include the installation of 17 miles of pipe and mains, not including laterals. It will cost approximately \$200,000.

SAN FRANCISCO.—Youldan Const. Co., Matson Bldg., at approximately \$137,000 is apparently low bidder to construct the San Joaquin Valley Pipe Line in connection with the Hetch Hetchy Water System. Other bidders and the estimated bid of each follows: Chas. Shea, \$4,150,000; Lindgren and Swinerton, \$4,550,641; McDonald and Kahn, \$4,722,000; American Concrete Co., \$4,900,000; Connolly and Hanahan, \$4,981,400; G. Atkinson, \$5,300,000; Thos. Havery, bid not estimated. A complete tabulation of the unit and total bids will appear in tomorrow's issue.

SEWERS AND SEWAGE DISPOSAL PLANTS

SIGNAL HILL, Los Angeles Co., Cal.—Currie Eng. Co., Anderson Bldg., San Bernardino, has completed plans for the sewerage treatment plant for the City of Signal Hill. The plant, estimated to cost \$70,000, will be of the trickling type. Plans have been forwarded to the state board of health for a permit.

COALINGA, Fresno Co., Cal.—Until June 1, 6 P. M., bids will be received by E. J. McCroskey, city clerk, to furnish 1,600 ft. of 6-in. sewer pipe and 30 6x4-in. wyres for same. Certified check 10% required with bid.

SANTA MARIA, Santa Barbara Co., Cal.—Santa Maria Const. Co., Pernell Barnett, Santa Maria, at \$6,506.07 awarded contract by city council to construct vitrified sewer extension in North Broadway, the work to be financed in two units, a portion under the 1911 Act and a portion from the City Treasury. Bids follow:

Santa Maria Const. Co.	\$ 6,506
Barrett & Barnett	7,979
H. E. Adams, Santa Barbara	9,935
Stroud Bros. & Seabrook, Bakersfield	10,199

Project involves:

1911 Bond Act
5650 ft. 6-in. vit. clay pipe sewer; 466 ft. 8-in. do; 519 ft. 10-in. do; 16 manholes; 4 flush tanks; 2 lampholes. To Be Financed From City Treasury
1540 ft. 12-in. vit. clay pipe sewer; 1941 ft. 10-in. do; 341 ft. 6-in. do; 500 ft. in. cast iron pressure line; 10 manholes; small pumping plant.

CONCORD, Contra Costa Co., Cal.—Until June 1, 8 P. M., bids will be received by W. E. Ballenger, town clerk, to construct sewage disposal plant improvement or sewage ponding system. Estimated cost \$2,500. Certified check 10% payable to Town required with bid. Specifications on file in office of clerk.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—City Engineer Robt. Klassen preparing plans for sanitary sewer system, including an outfall sewer for the city, and the lands of San Bruno known as the "new industrial area" of South San Francisco. The plans include rebuilding of the existing sanitary outfall sewer near Railroad avenue and Bayshore highway, and a storm water sewer system for industrial way and the lands extending toward industrial way. Plans are also to be prepared for a drainage ditch to take care of the storm waters emptying from Colma creek.

BOULDER CITY, Nev.—Hopping Bros, 307 S. Broadway, Pasadena, Calif., awarded contract by U. S. Bureau of Reclamation at Denver, for furnishing 165 sets of manholes, frames and covers for use on the Boulder City sewer project. The price was \$6.55 net per set f. o. b. Pasadena. The government reserves the right to increase the order by 25 per cent. The bids were opened April 29 by the purchasing agent, A. McD. Brooks, Proposal No. 3123-A.

FRESNO, Fresno Co., Calif.—E. W. Redman, Dudley St., Fresno, awarded contract by city council (110-D) to construct 6-inch vitrified clay pipe sewer in portions of Belmont Ave., including 4-inch vitrified clay pipe connections; two concrete manholes with c. l. frames and covers; 4-inch on 6-inch wye branches.

SAN BRUNO, San Mateo Co., Cal.—A. T. Conner, Redwood City, at \$2125 awarded contract by the city council to sewer El Camino Real bet. San Felipe Ave. and Crystal Springs Ave., involving 6-inch and 8-inch vitrified pipe sanitary sewer with 4-inch wye branches; 8 brick manholes. Complete list of bids follows:

A. T. Conner.....	\$2,125
C. C. DeGolyer.....	2,565
W. J. Tobin.....	2,643
Oakland Sewer Const. Co.....	2,655
Bay Concrete Co.....	3,158

LAGUNA BEACH, Orange Co., Cal.—Currie Engineering Co., Anderson Block, San Bernardino, has been retained by Laguna Beach city council to furnish that body with a report relative to a proposed sewer system and to prepare plans and specifications for such a system.

WESTMORELAND, Imperial Co., Cal.—Until 7:30 P. M., May 28, bids will be received by Westmoreland Sanitary District for construction of sewers in accordance with plans prepared by Currie Engineering Co., Anderson Block, San Bernardino, and the amount of which may be obtained from the engineer upon deposit of \$5, of which \$2.50 will be returned. The work, which is to be done under the 1911 act involves:

- (1) 20,000 ft. 8-in. sewer;
- (2) 1,000 ft. 10-in. sewer;
- (3) 1,000 ft. 12-in. sewer;
- (4) 51 manholes;
- (5) 7 flush tanks.

SAN JACINTO, Riverside Co., Cal.—Currie Eng. Co., Anderson Block, San Bernardino, has been appointed city engineer to design a small sewer system to be built in the near future.

MISCELLANEOUS CONSTRUCTION

OAKLAND, Cal.—City council has created a fund of \$200,000 to be used for the construction of a new low level tunnel connecting Alameda and Contra Costa counties and extending the Victory highway. The money will go toward the acquisition of right-of-way that will be required

on the Alameda side of the bore for a new highway.

WATER WORKS

LINDSAY, Tulare Co., Cal.—Lindsay Pump and Machinery Co., Lindsay, at \$1,530 awarded contract by city council to furnish and install direct connected pump on well in city park. Complete list of bids follows:

Lindsay.....	\$1,530.00
Dellon Water Wheel Co., S. F.....	1,610.00
Whitworth Pumps, Ltd., Alhambra.....	1,643.75
Byron Jackson Co., Berkeley.....	1,646.00
Sterling Pump Corp., Stockton.....	1,718.35
Stansfield Mc-Knight, Lindsay.....	1,965.00
Layne & Bowler, Los Angeles.....	1,968.00
Pomona Pump Co., Pomona.....	2,033.00
Villalobos & Job, Machinery Works, Porterville.....	2,048.00
Western Pump Co., Ltd., San Jose.....	2,376.70
Perless Pump Co., L. A.....	2,787.00

FORT ARMSTRONG, T. H.—Until June 1, 11 A. M., under Circular No. W-6616-41-60, bids will be received by Constructing Quartermaster, Fort Mason, for furnish and testing of green sand zeolite water softener at Fort Armstrong, T. H. (Hawaiian Department). Specifications and further information obtainable from Constructing Quartermaster at Fort Mason.

CALEXICO, Imperial Co., Cal.—An election will be held May 28 to vote on a \$20,000 bond issue for improvements to the water works system, including a 100,000 gallon steel tank and tower, enlargement of mains, and replacements.

VALLEJO, Solano Co., Cal.—Until June 1, 11 A. M., bids will be received by E. E. Edmunds, city clerk, to furnish water gate valves. Certified check 10% payable to city required with bid. Specifications obtainable from T. D. Kilkenny, city engineer.

COALINGA, Fresno Co., Cal.—Until June 1, 5 P. M., bids will be received by E. J. McCroskey, city clerk, to furnish:

- 2,000 ft. of 3-in. standard lapwelded pipe;
- 2,000 ft. of 1-in. galvanized pipe;
- 1,000 ft. of 6-in. sewer pipe and 30 64-in. wyes for same.

Certified check 10% required with bid.

CORNING, Tehama Co., Calif.—Until June 4, 8 P. M., bids will be received by E. L. Randall, city clerk, to furnish and install deep well turbine pump, motor, 8-in. standard pipe, with wiring, fittings and equipment in connection with municipal water system. Certified check 10% payable to City Treasurer required with bid. Plans obtainable from city engineer.

NAPA, Napa Co., Cal.—Residents in Browns Valley have petitioned the Napa city council to furnish water to that district for domestic purposes. Two miles of pipe and a pumping plant would be necessary. The cost is estimated at \$10,000. Petition has been referred to E. R. Hennessey, superintendent of the water department with power to act.

MODESTO, Stanislaus Co., Calif.—Boiler Tank & Pipe Co., 75th Ave. and Russett St., Oakland, at \$990 awarded contract by city council to furnish 2 steel sand traps complete. Complete list of bids follows:

Boiler Tank & Pipe Co.....	\$ 990
Boiler Co., Pittsburg.....	1,178
Modesto Iron Works.....	1,372
Bethlehem Shipbuilding Co.....	1,612
Kinnear Machine Works.....	2,194

Western Pipe & Steel Co.....	2,280
Moore Drydock Co.....	3,194

SAN BRUNO, San Mateo Co., Cal.—E. W. Redman, Dudley St., Fresno, at \$3,750.40 awarded contract by the city trustees to construct extension to municipal water system in Third Addn. Project involves: 6,000 feet 2-inch wrought iron pipe; 1,570 ft. 4-in. cast iron pipe; 9 2-in. valves; 7 4-in. valves; 1 hydrants. Next two low bidders were: Fred Turner, \$3,970.95; J. A. Fazio, \$3,990.25.

OAKLAND, Cal.—Until May 27, 8 P. M., bids will be received by John H. Kindall, Secretary, East Bay Municipal Utility District, 512 Sixteenth St., to furnish and erect two 222,000-gallon steel storage tanks. Specifications obtainable from above.

SAN BRUNO, San Mateo Co., Cal.—As previously reported, E. W. Redman, Dudley St., Fresno, at \$3,750.40 awarded contract by city council to construct extension to municipal water system in Third Addn. Project involves: 6,000 feet 2-inch wrought iron pipe; 1,570 ft. 4-in. cast iron pipe; 9 2-in. valves; 7 4-in. valves; 4 hydrants. Complete list of bids follows:

E. W. Redman.....	\$3,750.40
Fred Turner.....	3,970.95
J. A. Fazio.....	3,990.25
Martin Murphy.....	4,042

P. L. Carr.....	4,621
A. T. Conner.....	4,858
Geo. DeGolyer.....	4,882
John White.....	5,585

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., May 28, bids will be received by the Glendale city council for furnishing and delivering f. o. b. cars Glendale the following:

Item 1—One horizontal centrifugal pump capable of pumping against a 100-ft head, approximately 100 gallons of water per minute, and against a 310-ft head approximately 2100 gallons per minute. Pump to be constructed for direct connection to a four-pole, 50-cycle synchronous electric motor and have suction and discharge connections on opposite sides of pump.

Bidders to furnish specifications, over-all dimensions, guaranteed efficiency curve and delivery date on pump they propose to furnish.

Item 2—One horizontal, 4-phase, 4-pole, 50-cycle, 1000-volt, 100-degree, synchronous motor with direct connected exciter and exciter field rheostat.

Motor to have a capacity of 250 h. p. at 90% leading power factor.

Item 3—One automatic starting and control equipment for Item 2, with operating coil for 230 volts. Equipment to include an A. C. line ammeter, D. C. field ammeter and power factor meter.

Bidder to furnish specifications, over-all dimensions, guaranteed efficiency curves and delivery date of apparatus they propose to furnish. Bids on synchronous motor shall include guaranteed efficiencies of motor at $\frac{1}{2}$, $\frac{3}{4}$ and full load when operating at both utility and 90% leading power factor, a description of the mechanical design of the armature or starting winding, curves showing starting characteristics and a description of the insulation used in the motor he proposes to furnish.

Starting and control equipment shall comply with the rules and regulations of the Industrial Accident Commission of the State of California.

Certified check, 10%. G. E. Chapman, city clerk.

PLAYGROUNDS & PARKS

SAN FRANCISCO.—Until June 1, 3 p. m., under Proposal No. 726, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish sprinkling systems for the (a) Ocean View Playground; (b) Potrero Hill Playground; (c) St. Mary's Playground. Specifications and further information obtainable from above.

SACRAMENTO, Cal.—Until May 29, 10 A. M., bids will be received by H. W. Hall, county clerk, to install sprinkling system for lawn at the county hospital grounds. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Specifications obtainable from County Engineer, Chas. Deterding.

STREETS AND HIGHWAYS

OAKLAND, Cal.—Until May 25, 4:30 P. M., bids will be received by G. E. Hegardt, secretary, City Port Commission, 421 Oakland Bank Bldg., for oil macadam roadways in Outer Harbor District, involving 33,000 sq. ft. of pavement. Specifications obtainable from secretary.

SHASTA COUNTY, Cal.—Until June 1, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading Section A of Route 77, Mt. Shasta-Mt. Lassen National Forest Highway, Lassen National Forest and grading all of Route 6, North Approach Road connection, Lassen-Volcanic National Pk. in Shasta County, 10,252 mi. in length, involving: 53.6 acres clearing; 90,550 cu. yds. unclassified excavation; 253 cu. yds. do. for structures; 29,400 sta. yds. overhaul; 10,152 miles finish earth-graded road; 79.4 cu. yds. masonry; 1,974 lin. ft. C. M. pipe; 3,000 cu. yds. miles haul backfill material.

14 right of way monuments. Specifications obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to the Federal Reserve Bank of San Francisco.

SAN JOSE, Santa Clara Co., Cal.—Union Paving Co., Call Bldg., San Francisco, at \$178 sq. ft. awarded contract by county supervisors to improve the Alvis-Milpitas road in Supervisor District No. 3, involving 121,975 sq. ft. 5-in. asph. conc. pavement.

SAN JOSE, Santa Clara Co., Cal.—Until June 1, 11 A. M., bids will be received by Henry A. Pfister, county clerk, for macadamizing Curtner and Brooklyn Avenues in Supervisor District No. 4. Specifications obtainable from County Surveyor Robt. Chandler.

SAN JOSE, Santa Clara Co., Cal.—Until June 1, 10 A. M., bids will be received by Henry A. Pfister, county clerk, for macadamizing Second and Minna Sts. in the town of Campbell. Specifications obtainable from Robt. Chandler, county surveyor.

EUREKA, Humboldt Co., Calif.—County supervisors reject bids to widen Kneeland Hill road. Bids were:

Chas. Lambert.....	Cu. Yd.
Redwood Const. Co.....	32 c
H. C. Anderson.....	37 1/2 c
R. L. Hanson.....	38 c
Smith Bros.....	58 c

COLUSA COUNTY, Cal.—Until June 10, 2 P. M., bids will be received by State Highway Commission to grade

and pave with Portland cement concrete, 8.6 miles between Williams and Maxwell.

MERCED COUNTY, Cal.—Until June 10, 2 P. M., bids will be received by State Highway Commission to treat with heavy fuel oil to a width of 3-ft. on each side of the existing pavement, 27.5 miles between the foot of Pacheco Pass and the easterly boundary.

MONO COUNTY, Calif.—Until June 10, 2 P. M., bids will be received by State Highway Commission to treat with heavy fuel oil and cut-back asphalt as a dust palliative, 2.5 miles west between Leeving and 2 miles west 28

OAKLAND, Cal.—Proceedings have been started by the city council to reconstruct pavement on 12th St. m. involving an expenditure of \$30,000. Walter N. Erickstad, city engineer.

MONTREY COUNTY, Cal.—Pacific Tank Lines, Inc., Los Angeles at \$9,398 awarded contract by State Highway Commission to treat with heavy fuel oil to a width of 8 ft. on each side of the existing pavement, 10.1 miles between Chualar and Salinas.

NEVADA COUNTY, Calif.—Harms Bros., Galt, at \$5,162.50 awarded contract by State Highway Commission for the construction of underdrains at various locations in Nevada County, between Donner Lake and 1 mile west of Truckee.

SAN FRANCISCO — Pacific States Construction Co., Call Bldg., at \$28,167.25 awarded contract by Board of Public Works to pave Section C of Bayshore Blvd. Complete list of unit and total bids received published in issues of May 4 and May 11.

LODI, San Joaquin Co., Cal.—R. H. Crumley, Hotel Cecil, San Francisco, at \$81,297 awarded contract by city council to improve Cherokee Lane, involving grading and concrete paving. Complete list of unit and total bids received on this project published in issue of May 13.

TUOLUMNE, CALAVERAS and Alpine Counties, Cal.—Basalt Rock Co., Napa, at \$12,525.75 submitted low bid May 14 to R. E. Pierce, district engineer, State Highway Commission, Sacramento, to treat with light and heavy fuel oil, 25 miles between Long Barn and the foot of the Sonora Pass grade in Tuolumne County and for 15.5 miles in Calaveras and Alpine counties, between Big Trees and Lake Alpine: Basalt Rock Co., Napa.....\$12,525.75 D. McDonald, Sacramento.....12,516.75 Bids held under advisement.

GUSTINE, Merced Co., Cal.—Until May 25, 8 P. M., bids will be received by W. L. Chappell, city clerk, to fur-

nish from 400 to 500 yards of 14-in. chisel crushed rock down to pea gravel; delivered and spread with dump trucks on various streets, under supervision of Street Committee of City Board of Trustees. Specifications and further information obtainable from clerk.

LYON COUNTY, Nevada — See "Bridges," this issue. Bids wanted by State Highway, June 10 for grading and constructing steel and concrete bridge over West Walker River.

ORMSEY-LYON COUNTIES, Nev.—Jack Casson, Hayward, Calif., at \$16,314.73 awarded contract by State Highway Commission to furnish, heat and apply asphaltic fuel oil and mixing it with crushed rock or crushed gravel surface on 7.68 miles from Carson City to 2 miles east of Mound House. Dodge Bros., Fallon, Nev., bid \$16,978.25. Project involves: 163,516 gal. asphaltic fuel oil applied to roadway surface; 7.68 mi. mixing asphaltic fuel oil with crushed rock or crushed gravel surface; 7.68 mi. rebuilding and finishing shoulders. Note: The oil shall be delivered at the following railway siding and in the quantities shown: Carson City siding, 163,516 gallons. Average haul on entire contract, 3,357 miles.

WHITE PINE COUNTY, Nevada—Basalt Rock Co., Napa, at \$22,581.53 awarded contract by State Highway Commission to furnish, heat and apply asphaltic fuel oil and mixing it with a crushed rock or crushed gravel surface on 12.16 miles between Robinson Summit and Keystone. Engineer's estimate \$23,930.31. Project involves: 224,788 gal. asphaltic fuel oil applied to roadway surface; 12.16 mi. mixing asphaltic fuel oil with crushed rock or crushed gravel surface; 12.16 mi. rebuilding and finishing shoulders. The oil shall be delivered at the following railway siding and in the quantities shown: East Ely siding, 224,788 gallons. Average haul on entire contract, 12,482 miles.

ELKO COUNTY, Nevada — A. D. Drumm, Jr., Fallon, Nev., at \$48,553.21 submitted low bid to State Highway Commission to construct 23.35 miles of connection between Thousand Springs Creek and Little Salmon River. Bid taken under advisement. Project involves: 204,300 cu. yds. rdwy. excav.; 1200 cu. yds. struct. excav.; 11,000 cu. yds. selected borrow excav. in place; 339,463 yd. sta. overhaul; 23.36 mi. prepare subgrade and shoulders; 57,000 cu. yds. crushed rock or crushed gravel surface in place; lump sum furnishing water equipment; 4053 M gals. applying water; 80 cu. yds. class A concrete; 180 cu. yds. class B concrete; 2136 lin. ft. 18-in., 900 lin. ft. 24-in., 632 lin. ft. 30-in., and 116 lin. ft. 36-in. corr. metal pipe in place; 150 lin. ft. 18-in. and 35 lin. ft. 24-in. vit-

- (1) 104.3 cu. yds. excavation;
- (2) 71 lin. ft. concrete curb;
- (3) 68,710 sq. ft. concrete pavement;
- (4) 4 storm water inlets (type A);
- (5) 117 lin. ft. 12-in. conc. pipe conduit;
- (6) 74 lin. ft. 15-in. concrete pipe conduit;
- (7) 10 lin. ft. 8x24-in. corrugated iron and concrete culvert;
- (8) 1 concrete handhole with cast iron cover;
- (9) 29 cu. yds. of concrete retaining wall.

Street Improvement Act of 1913. Hearing June 18. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

HANFORD, Kings Co., Calif.—Until June 5, 2 P. M., bids will be received by E. F. Pickering, county clerk, to reconstruct approximately 12 miles of the county highway system, involving:

- (a) 749 cu. yds. earthwork, on curves;
- (b) 63,535 lin. ft. grading for shoulder and work and headboards;
- (c) 480 tons of asphalt concrete base, on curves;
- (d) 7,375 tons of asphalt concrete base material in shoulders and leveling course;
- (e) 13,985 tons asphalt concrete surf.

County has \$110,000 available for this work. Certified check or bid bond 10% payable to the Chairman of the Board of Supervisors required with bid. Plans obtainable from Coun-

ty Surveyor Roy May on deposit of \$10 returnable.

RIVERSIDE AND ORANGE COUNTIES, Cal.—Joint Highway District No. 15 will call for bids about June 3 for the construction of Section F of the Ortega Highway, 9.04 miles, beginning at Merrill Canyon in Riverside County and terminating at a point in Grand Ave. on the south side of Lake Elsinore. If the work is ordered at that time the board of directors will set July 8, at 2 P. M., as the time for receiving bids.

Section F may be bid on as a whole, but alternate bid may be submitted on four divisions of the 9.04 miles. The contract may be let for any one or all of these divisions. Davidson & Fulmer, engineers for the district, have announced the approximate quantities:

- (1) 47.5 stations clearing and grubbing;
- (2) 550,000 cu. yds. excav. roadway unclass.;
- (3) 3000 cu. yds. excav. structures unclass.;
- (4) 1000 cu. yds. excav. for channel changes, unclass.;
- (5) 300,000 sta. yds. overhaul (500-ft. free haul);
- (6) 5500 ft. 18-in. corr. metal pipe in place;
- (7) 1092 ft. 24-in. corr. metal pipe in place;
- (8) 290 ft. 30-in. corr. metal pipe in place;
- (9) 66 ft. 42-in. corr. metal pipe in place;
- (10) 25 reinf. conc. drop inlets complete;
- (11) 648 cu. yds. cement rubble in bridges at Sta. 296+00 and 418+00;
- (12) 96 cu. yds. reinf. conc. in culvert;
- (13) 500 cu. yds. dry rubble retaining wall.

The proposed highway will be graded to a width of 22 ft. and drained at this time, the surfacing to be laid at some later date. If the work is ordered June 3 plans may be obtained immediately after that date.

MONTEREY COUNTY, Cal.—Granite Construction Co., Watsonville, at \$7,934.60 awarded contract by State Highway Commission for 14 miles of bituminous surface treatment consisting of asphaltic road oil and screenings between San Lucas and San Lorenzo Creek.

BUSINESS OPPORTUNITIES

John Comstock, 2120 3rd St., Ocean Park, Calif., is desirous of contacting hardware, automotive, farm or garden tools concerns with view to representing them in Utah, Colorado and Wyoming.

C. L. Pottenger, Warren-Knight Co., 136 North 12th St., Philadelphia, Pa., manufacturers of surveying instruments, are interested in establishing sales agent here.

M. R. Sullivan, Cooper Oven Thermometer Co., Pequabuck, Conn., wishes to contact two advertising salesmen or distributing firms in San Francisco.

John F. Leinen Chemical Co., 1415 Folsom St., San Francisco, wants distributors to distribute its chemical products and exterminators.

ENGINEERS BILL VETOED IN N. Y.

A bill to amend the New York State multiple dwelling law to place engineers on a par with architects in the filing of plans for multiple dwellings in all cities where the law is effective was vetoed by Governor Roosevelt after having been passed by both houses of the legislature, Engineering News-Record reports.

The multiple dwelling law provides that plans for such dwellings are to be filed with the tenement house commissioner by the owner in person or by a registered architect acting as his agent. The amendment would have inserted the words "or by a professional engineer, experienced in the planning, designing, construction or alteration of such dwellings, buildings or struc-

tures" after the word architect. A similar bill, except for the qualifying phrase was presented to the New York legislature last year and was strongly opposed by the architectural profession because it would have permitted all engineers, whether or not experienced in building design, to file plans for multiple dwellings. Hence when the bill was submitted again this year the qualifying phrase was added. It still did not meet with approval of the architects. They desired some more definite limitation such as structural engineer. Engineers, on the other hand, oppose so restrictive a classification because it would prevent the filing of mechanical and electrical plans by engineers of those two branches of the profession.

The governor, in vetoing the bill, said:

"This seems to be a hastily drawn piece of legislation. It provides that licensed engineers, in order to file plans, must be experienced in planning, designing, construction, or alteration of buildings, and it is possible that the amendments brings registered architects within the same requirement.

"Who is to interpret the word 'experienced'? Is it the tenement house commissioner, or is it the department of education? The existing provisions of the education law make no adequate distinction between different classes of engineers. In view of the defects of the bill, it is necessary to disapprove it."

U. C. ARCHITECTURE DEPARTMENT AWARDS

Prof. W. C. Perry announces that nine prizes and medals have been awarded to students in the department of architecture of the University of California, for outstanding work in this field of study during the past year.

The annual prize offered by Delta Sigma Chi, honorary professional architectural fraternity, consisting of an order for books was won by E. Branch Chinn, graduate student registered

from Fresno, on the basis of a sketch for a bookplate.

The prize offered by Alpha Alpha Gamma, honorary professional architectural sorority, also an order for books, was won by Burton D. Cairns, graduate student registered from Palo Alto. Cairns was also chosen as the recipient of the medal offered by the American Institute of Architects for the student having the most distinguished record in his university work. With this medal went a copy of the book, "Mon. St. Michel and Chartres," by Henry Adams.

The prize offered by the Architectural Alumni Association for the student taking first place in the last senior problem competition, consisting of a book order, was won by Shepherd M. Johnson of Oakland. The title of Johnson's project was "A Hall for Honor Students."

The prize offered by the Architectural Association for the best single piece of work in graduate design was won by Vernon A. DeMars of Oakland. This prize was a check for \$55. DeMars was also awarded one of the school medals for specially distinguished work in the solution of a problem.

Other winners of school medals for specially distinguished work were: G. D. Christensen, senior from Ocean Park; Donald P. Smith, graduate student from San Diego, and Allen R. Johnson, graduate student from El Paso, Texas.

Francis J. Heusel, aged 24, Long Beach, Calif., instructor at the University of Illinois, won the Plym scholarship in architecture at the university against a field of more than 100 contestants. He is entitled to a years course in the Beaux Arts in Paris or the Academy of Arts at Rome. He will probably go to Paris.

In an effort to stimulate volume of business a number of mills have cut rail prices of uppers \$2 and common lumber 50 cents to \$1 per thousand, according to reports from Seattle.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

HOW

To reach the Construction Market
in one of the Wealthiest Sections of the World

THE tide of population is sweeping Westward. New structures of all kinds are under way and being planned. California is growing three times faster than the United States as a whole.

Leading architects, engineers, contractors and materials distributors are planning for the great new building program immediately ahead.

Wide awake manufacturers of building products and their advertising agencies are planning now to concentrate their selling energy in the great San Francisco metropolitan district.

Every architect in this district, practically every general and sub-contractor and materials dealer, reads the Daily Pacific Builder **every day**. To them it is just as necessary as Standard Rate and Data to an agency space buyer.

Founded forty years ago, Daily Pacific Builder counts among its constant readers hundreds of executives who direct the huge construction projects in this most prosperous market.

Write for analyses of circulation, rates and market data.

AVERAGE COST OF DWELLINGS HITS LOW

The average cost of dwellings per family in 257 cities for which comparative figures are available for the last 10 years was \$4385 in 1930, the lowest mark since 1924, according to data supplied May 8 by the Bureau of Labor Statistics, Department of Labor, to the U. S. Daily at Washington, D. C. The cities all have populations of 25,000 or more and the costs do not include the prices of lots.

For single-family homes the average cost of \$4998 per family last year was higher in these cities than at any time in the last decade, the bureau's figures show. The average of \$3857 per family for apartment houses, including those with stores in the buildings, was, however, at the lowest point in 10 years. That of \$3924 for two-family homes was lower than for any year since 1922. The latter classification includes one and two-family structures with stores.

A definite reason can not be given for the decline in the cost per family for dwellings. It was pointed out orally at the bureau. The type of construction and the building of cheaper homes may have been factors. Wholesale prices of building materials in 1930 were nearly 12 per cent lower than in 1924 and more than 7 per cent under the 1921 levels, it was stated.

Union wage rates per hour in the building trades in 1930 were, on the other hand, more than 21 per cent higher than in 1924 and more than 26 per cent above the 1921 figure. Although the bureau has no data on the trend of wage rates of nonunion labor in the building trades, it is believed that it follows the union wages.

MEET THE COLONEL

Colonel Walter E. Garrison of Lodi, director of the State Department of Public Works, brings to the department a long experience in matters with which the department is chiefly concerned. As one of the most extensive vineyardists in California, Col. Garrison knows the water problems of this state from the point of view both of a practical irrigationist, and of one who has been active in the development of water for irrigation. In highway matters Colonel Garrison has been a prominent proponent of the cause of good roads since the earliest state highway days. He has been

particularly active in the development of improved highways in Stanislaus and San Joaquin counties, where he has made his home since his birth.

Colonel Garrison also brings to the administration distinguished war record. He served with honor in the Philippines during the Spanish-American War. He was wounded twice in action in the World War, and his valor on the field of battle won for him an award from the French Government of the greatly coveted croix de guerre. He is now an active officer with the 181st Brigade, attached to the 91st Division.

C. O. Trussel and J. D. Fuller, formerly of Los Angeles, have leased quarters at 519 Blackstone Ave., Fresno, and will engage in the manufacture of window shades.

BUILDING INTERESTS IN CREDIT CONCLAVE

A credit conclave of the representatives of the building and building materials industries, including cement, lumber, brick and structural steel lines, numbering about 100 credit executives, will be one of the 22 credit group conferences which will feature the Credit Congress of Industry of the 25th annual convention of the National Association of Credit Men at Boston, Mass., June 22-27. It is announced by Elliot Balesier Jr., credit group director of the Association.

Building and building material lines, under the chairmanship of E. E. Odunkirk, credit manager of the Medusa Portland Cement Company of Cleveland, along with the other industry groups, will meet Friday and Saturday, June 26 and 27. The Credit Congress of Industry, of which this group is a part, has grown out of the credit group sessions which have been held at each convention since they were successfully introduced in 1924.

The purposes of the credit groups, under the supervision of the National Association of Credit Men, are to reduce credit losses, to better credit technique and to improve the organization of credit departments," Balesier said.

"Among the functions of the credit group are the co-operative handling of embarrassed or insolvent estates, the concentration of claims in case of difficulty, the consolidation of ledger experience and the standardization of terms and discounts. Another important phase of credit group work is the exchange of information concerning both credit and sales conditions, thus giving each member important data on which to base his business activity in all sections of the country."

JAMES A. CURRIE, CONTRACTOR, DEAD

James A. Currie, 54, building contractor and a member of the firm of Currie & Duglar of Bakersfield, died in a Bakersfield hospital last Wednesday following an extended illness.

Currie was born in San Francisco, and resided in Bakersfield for more than 20 years and was a prominent member of the Bakersfield B. P. O. E., No. 266, and F. O. E., Aerie No. 93.

Currie is survived by his mother, Mrs. R. Currie, who resides with a surviving brother, Robert Currie, both of Bakersfield, and a brother, Henry of San Francisco.

Stephens-Adamson Mfg. Co., Aurora, Ill., has published a 10-page illustrated booklet, describing conveyors, elevators, hoppers and batching equipment for central proportioning and concrete-mixing plants. The book contains diagrams of typical plant arrangements and features a new automatic photoelectric cell control for increasing the accuracy and economy of concrete mixtures.

BUILDERS' EXCHANGE CONFERENCE ORGANIZED

Walter F. Sorensen, president of the Orange County Builders' Exchange, was elected president of the Builders' Exchange Conference of Southern California at a meeting held in Santa Monica, last week.

Nine exchanges in Northern California were represented at the meeting, at which time the organization was organized. Each exchange will retain its identity although the entire group will form the body of the new organization.

Harry Green of Los Angeles was elected secretary and Frederic Sanford, secretary of the Orange County Exchange, was appointed chairman of a committee to draw up the constitution and by-laws for the organization. The object of forming the conference of exchanges is to better building conditions in the southern section and to recommend action to the state organization.

The next meeting of the new Conference will be held at Irvine Park on July 9.

CONTRACTORS SECURE PASSAGE OF FOUR BILLS AFFECTING CRAFT

Of the 3200 bills, amendments and resolutions introduced in the 1931 Legislature of California, about 60 bills were of direct interest to the contractor because they would affect the business of general contractors. There were probably 100 or more bills in addition which indirectly affected the contractor or were of great interest to the general contractor.

At the time this progress report is made (May 18) the Legislature has just adjourned, and there are before the governor for his signature or veto about 1400 bills which were passed by the Legislature. This report, therefore, gives only legislative action, for the governor has 30 days within which to sign or pocket veto these bills.

Contractors' Bills

There were four bills introduced and passed by the general contractor, and all four have been passed by the Legislature. They are as follows:

1. Senate Bill No. 375—Provides for prequalification of bidders on all public construction by the awarding body of any political subdivision of the state; this is patterned after the bill which has been in use by the Department of Public Works of the state and permissive.

2. Senate Bill No. 732—Amends the present contractors' license law to make it more workable and to correct several features which were objectionable to both the contractor and the department.

3. Senate Bill No. 894—Amends the present eight-hour law so that penalties and fines for breaking the law cannot be taken out of progress payments unless and until the contractor shall have had a hearing before either the awarding body or the Department of Industrial Relations.

4. Assembly Bill No. 1867—To increase the fees of contractors from \$5 to \$10 per month for license, and providing that a portion of the fee shall be expended for disseminating information regarding the work of the department.

Engineers and Architects

There were 5 bills presented which affected engineers and architects, and all five were finally passed by the Legislature. Three of these bills were introduced by the engineers and architects themselves, and the other two were legislative enactments which were similar to those affecting several other boards and departments of the state government.

1. Assembly Bill No. 487—Making changes in the workability of the act, relating particularly to powers of the Board of Architectural Examiners.

2. Assembly Bill No. 615—Making it unlawful to use the title of "Structural Engineer" except by registered civil engineers who have passed the examination of the Registration Board for structural engineers.

3. Assembly Bill No. 616—Defines the term "civil engineer" and the phrase "responsible charge of work"; also provides suspension clause prohibiting advertising as a civil engineer unless registered, and makes more workable several features of the Engineers' Registration Law.

4. Assembly Bill No. 1514—Making changes in date of expiration of terms of members of the State Board of Architectural Examiners.

5. Assembly Bill No. 1516—Making changes in date of expiration of terms of members of Engineers' Registration Board.

A summary of legislation affecting contractors, architects and engineers, and other interests in construction, was presented to the Southern California Chapter, Associated General Contractors of America, last week by Melville Dozier, Jr., manager of the Chapter, who with Floyd O. Booe, assistant manager of the Northern California Chapter, A. G. C., represented that organization at Sacramento, working in conjunction with Mr. Dozier. Following is a summary of the report presented by Mr. Dozier.—Editor.

Labor Bills

There were thirty labor bills introduced in this Legislature which were of vital interest to the general contractor, and of these eight were passed by the Legislature and 22 failed of passage.

It was necessary for the general contractors to oppose practically all of these 30 bills, and the eight which were finally passed were amended before passage to conform with the requests of the general contractors. The 22 bills which were defeated were all opposed in committee by representatives of the general contractors.

Of the eight labor bills which were passed, the two most serious ones were the prevailing wage and the alien labor bills, and in view of the present public attitude towards alien labor and also in view of the recent action of Congress by passing the Bacon-Davis bill regarding prevailing wage, it was inevitable that these two bills would pass the Legislature in some form. To reduce as much as possible the opposition of the general contractors, these bills were amended several times in committee to include the amendments proposed by the general contractors which were intended to relieve as much as possible the rigid responsibilities placed upon the contractor.

The eight labor bills which finally passed both houses of the Legislature are as follows:

1. Senate Bill No. 26—Providing for the payment of prevailing wage on public construction. Among other amendments this bill contained a provision that prevailing wage in each craft and class must be determined by demand by the awarding body and must be specifically named in the "call for bids."

2. Senate Bill No. 83 (alien labor bill)—The amendment to this bill made by the contractors eliminates the necessity for the contractor running an immigration bureau, and particularly provides that a hearing shall be held before any funds can be withheld from progress payments on account of infringement of the law. This same provision was also placed as an amendment in the prevailing wage bill and in the eight-hour bill, by representatives of the contractors.

3. Assembly Bill No. 450—Clarifies the law relating to the enforcement of the present law regulating the payment of wages and permits individual actions for wages and penalties.

4. Assembly Bill No. 451—Refers to the present act regulating the payment of wages, and provides for the payment of undisputed wage claims without condition within the time prescribed, leaving to the worker all remedies he may be entitled to under the act.

5. Assembly Bill No. 675—Requiring licensed contractors to report to the Registrar of Contractors the names of insurance carriers carrying workmen's compensation on their employees.

6. Assembly Bill No. 795—Repealing the present law fixing the minimum rate of compensation for labor on public work.

7. Assembly Bill No. 1059—Relating to the powers and duties of the Bureau of Labor Statistics.

8. Assembly Bill No. 1060—Relating to the scope of the acts in connection with the present law regarding payment of wages under the direction of the Bureau of Labor Statistics.

The following twenty-two labor bills were defeated:

1. Senate Bill No. 125—Defining and prohibiting trusts, monopolies and conspiracies against trade.

2. Senate Bill No. 383—Known during the past few legislative sessions as the "Spotter's bill," providing hearings before discharging employees by corporations employing special agents or detectives.

3. Senate Bill No. 401—Known as the anti-injunction bill—defining cases in which injunctions may and may not issue.

4. Senate Bill No. 534—Commonly known as the "Yellow Dog" bill. Prohibits contracts between employers and employees whereby either party undertakes not to join a labor union or employers' association during the life of the contract.

5. Senate Bill No. 620—Regarding legal residents and prohibiting their employment.

6. Senate Bill No. 744—Relating to the employment of labor in mines and tunnel excavations.

7. Assembly Bill No. 2—Relating to alien labor on public construction.

8. Assembly Bill No. 54—Relating to alien labor on public construction.

9. Assembly Bill No. 77—Relating to providing unemployment insurance.

10. Assembly Bill No. 273—Relating to serious unemployment and providing for a board to draw upon surplus funds of the state for relieving unemployment conditions.

11. Assembly Bill No. 676—Amending the contractors' license law by requiring applicants to give the names of unpaid wage claimants, judgment creditors, compensation insurance carriers, etc.

12. Assembly Bill No. 810—Another anti-injunction bill.

13. Assembly Bill No. 1031—Providing for the establishment and enforcement of safety laws on construction work.

14. Assembly Bill No. 1045—Licensing of elevator constructors and installers.

15. Assembly Bill No. 1116—Another legal resident bill.

16. Assembly Bill No. 1206—Making it a misdemeanor for a contractor to place an order for labor for public construction work with a private employment agency.

17. Assembly Bill No. 1223—Relating to construction, repair and maintenance of public property.

18. Assembly Bill No. 1353—Relating to alien vagrants.

19. Assembly Bill No. 1368—Another alien labor bill.

20. Assembly Bill No. 1418—Relating to performance of collective bargaining agreements of labor unions and employers.

21. Assembly Bill No. 1419—Relating to injunctions.

22. Assembly Bill No. 1420—Another bill relating to injunctions.

Day Labor Bills

While there were several bills, mostly affecting irrigation and other districts, which have day labor provisions, there were two principal bills before the Legislature for amendments which in the past were amended by the contractors to include the provision providing for competitive contract system. In these two bills as amended by the 1931 Legislature, the day labor provisions were retained as requested by the general contractors. These two bills were as follows:

1. Senate Bill No. 89—Relating to the Los Angeles flood control district.
2. Assembly Bill No. 183—Relating to the Metropolitan Water District.

Lien Laws

Several lien laws were introduced, but the four principal ones were introduced by the Material Dealers' Credit Association of Southern California. One of the four bills passed the Legislature, while the remaining three failed of passage. The bill which passed was as follows:

1. Assembly Bill No. 92—Relating to liens of mechanics and material men and making it lawful for the holder of any mortgage or other incumbrance to protect himself against failure of owner to perform his contract and pay his labor material bills.

The three lien laws which failed of passage were as follows:

1. Assembly Bill No. 994—Relating to actions for the enforcement of liens of mechanics and others upon real property.
2. Assembly Bill No. 996—Also relating to liens of mechanics and others on real property.
3. Assembly Bill No. 1104—Also relating to liens and providing that a surety bond must be required on every construction job, private as well as public.

Excavation and Underpinning

Two bills were introduced fixing the responsibility regarding excavation and underpinning, and both were objectionable. One bill was finally rewritten, however, to conform with the requests of the general contractors and was finally adopted. The other bill was killed in committee. The adopted bill was as follows:

1. Assembly Bill No. 775—Fixing a depth of 12 ft. above which the owner is responsible and below which the adjacent owner is responsible, if building below 12 ft.

The following bill was defeated:

1. Assembly Bill No. 409—Which related to the same subject, but was objectionable.

Assessment District Bills

Literally dozens of bills were introduced affecting assessment district acts, but only a few of them were serious to the general contractor. Four of these bills were finally passed, and four of them failed of passage.

One of the bills—Assembly Bill No. 218—was one of the most important bills before the Legislature, and was known as the "Debt Limitation" bill. This bill was finally amended by representatives of the general contractors.

Three other bills were introduced at the suggestion of the general contractors, to permit of development of assessment work in case Assembly Bill No. 218 should prove unconstitutional. These three bills were finally defeated.

Assembly bills passed were as follows:

1. Assembly Bill No. 218—Limiting the amount of special assessment to 50 per cent of the real value of the property, this arrangement to be made applicable to all existing assessment acts when 15 per cent of the ownership shall oppose assessment in excess of 50 per cent.
2. Assembly Bill No. 222—Amending the acquisition act of 1925 limit-

ing the amount of assessment, providing for majority protest, and relating to the manner of collections.

3. Assembly Bill No. 228—Amending the 1911 act relating to the method of payment for such work.

4. Assembly Bill No. 236—Amending the 1915 act along similar general lines.

The defeated assessment bills were as follows:

1. Assembly Bill No. 828—Making the boundary act of 1911 exempt from the special assessment investigation act of 1931, where demand for the employment of said act is not made by owners of 15 per cent of the area assessed, and regulating the procedure in the event that such request is made.

2. Assembly Bill No. 1414—Treating in similar manner the Street Act of 1889.

3. Assembly Bill No. 1478—Treating also in similar manner the Yroonman Act of 1885.

4. Assembly Bill No. 1904—Providing for preliminary investigations upon hearings of public improvements where the cost of such improvements is paid in whole or in part by special assessments, and providing for abandonment in case of majority protest. This was offered as a substitute for the "Debt Limitation" act.

Housing Act

The Housing Act was introduced late in the session, and provides for the building of certain wooden apartment houses in San Francisco, but it was defeated finally through pressure brought by the Immigration and Housing Commission and the general contractors. It was Assembly Bill No. 1371.

Morin Bill

The Morin bill, prepared by Attorney Morin of Pasadena, was again introduced, and provided for the recording of the condition of title and arrangements for financing of proposed construction or improvements on real property. This bill again failed to be passed out of committee. Senate Bill No. 276.

Motor Vehicles and Trailers

Four bills were introduced regarding motor vehicles and trailers which affected the general contractor or his equipment. All were defeated, and were as follows:

1. Senate Bill No. 546—Relating to registration fees to be paid upon trailers and semi-trailers.

2. Senate Bill No. 598—Also relating to registration fees upon vehicles and trailers.

3. Assembly Bill No. 1188—Providing for certain taxes upon trailers and semi-trailers in addition to registration fees.

4. Assembly Bill No. 1668—Prohibiting certain uses of trailers or semi-trailers.

ELECTRICAL WORKERS REJECT WAGE INCREASE

Six hundred members of the electrical workers' union of Chicago, last Wednesday turned down a wage increase announcement that "economic conditions will improve more rapidly if union labor does not ask for wage increases." The workers, members of local 134 employed by the Illinois Bell Telephone Company, voted against a wage increase of 25 cent a day as provided in the union contract. They urged union labor to adhere to a policy of demanding no raises, and accepting no cuts.

Bulletins describing the contractors' special elevating grader with 42-in. carrier and the model 37 road grader have been issued by the Austin-Western Road Machinery Co., 400 North Michigan Ave., Chicago, Ill.

DONOVAN EXONERATED BY ARCHITECTS' BOARD

Charges of unethical practice, brought against John J. Donovan, Oakland architect and a member of the state board of architectural examiners, by Fred Farris, Oakland contractor, were dismissed as groundless and Donovan "entirely exonerated."

President John Albert Evers of the state board said every angle of Farris' charge was gone into thoroughly and that it was found his allegations were wholly groundless. Donovan did not sit with the board.

Farris charged Donovan incorporated in specifications for public schools and private work the use of windows patented by Donovan and introduced letters in support of his charge.

Evers said the letters not only failed to support the charge, but brought inadvertently in the testimony that Farris represented and was interested in a firm manufacturing windows in competition with Donovan. It also was known, he said, that in every instance Donovan left to his client what kind of windows to use.

Donovan has constructed buildings at Eureka, Santa Cruz, San Jose and other cities.

An official report on the findings is to be issued later by the board.

"PREVAILING WAGE" DEFINED BY LABORITE

In reply to the question submitted him by the secretary of one of the California building trades councils, as to what is meant by the term "prevailing rate of wages," Secretary-Treasurer William Spencer of the Building Trades Department of the American Federation of Labor made the following answer:

"According to common usage, the 24th instant, beg leave to advise that the prevailing rate of wages is that paid to workers of the building industry on construction projects of a similar character in the several communities."

"For example, if a post office or a Federal building of any description is to be erected, construction of a like character, that is to say in point of magnitude and cost, forms the basis upon which the prevailing rate is obtained, or the commonly accepted rate paid by the employers to the different workmen in the building industry by agreement existing between employers and employee in which the regular wages are fixed, then that rate promptly becomes the prevailing wage."

"Under these circumstances there is little danger of your already established wage scale being impaired."

U. S. BUILDING UP SIX PER CENT

Based on reports from 346 cities having a population of 25,000 or over, the U. S. Bureau of Labor Statistics yesterday announced an increase of 6.2 per cent in the amount of building permits during April as compared with March.

There was an increase of 19.5 per cent in the estimated cost of new residential buildings, but a decrease of 2.3 per cent in the estimated cost of new non-residential buildings.

The estimated cost of the total building operations totalled \$161,709,271. The new buildings provided for 14,211 family dwelling units. This is an increase of 21 per cent as compared with March. More family dwelling units were provided during April last than for any month during 1930.

THE OBSERVER

What He Hears and Sees on His Rounds

Governor Rolph last Monday signed a series of labor bills including the measure assuring workmen the generally prevailing scale of wages on all public projects. Another in the approved series provides that, except in cases of emergency, only American citizens shall be employed in public works contracts. Appreciation of organized labor was expressed to the governor by Frank McDonald and John O'Connell, San Francisco labor leaders.

Solution of the present crisis will be found in the "six hour day or the five day week, or both," David B. Robertson, president of the Brotherhood of Locomotive Firemen and Engineers told members of the Brotherhood of Railroad Trainmen in convention at Houston, Texas, last Monday.

"This solution, of course, is founded on the maintenance of the present wage scale and no reduction in wages," Mr. Robertson said.

There are in the United States 12 international labor organizations which have a system of old-age pensions. Data supplied to the Bureau of Labor Statistics by 11 of these show that they had 13,049 pensioners in 1929 and paid in pensions during the year the sum of \$2,403,180. Of this amount more than one-third was paid by one organization—the International Typographical Union. During the 4-year period, 1927 to 1930, the number of persons cared for through the medium of old-age benefits by these organizations rose from 6,839 to 13,049, while the amount of benefits rose from \$2,362,476 to \$2,403,180, or 44 per cent.

Secretary Doak characterized as "very sound" the statement against wage cutting by James A. Farrell, president of the United States Steel Corporation.

Farrell, before a group of manufacturers in New York last week, called wage cutting "a pretty cheap sort of business."

"The statement by Mr. Farrell," said the secretary, "was very sound and came at a very opportune time."

"Many employers are maintaining wage rates throughout the country. This is very commendable."

"The Farrell statement was a proper one and came at a time when the matter was being thoroughly discussed and fitted in."

An amendment to the building ordinance to establish a standard concrete mix for construction in Sacramento, proposed by Thomas Scollan, city councilman and building material dealer, of Sacramento, has been adopted by the council.

The amended ordinance sets a generously low minimum of 1500 pounds as the test strength of all concrete construction.

Scollan points out the existing ordinance and says there shall be a standard but specifies none. His amendment is designed to protect home buyers and others from contractors who "cheat" by using weak concrete mixes. Scollan declares this practice is too widespread in Sacramento.

Officials of the Golden Gate Bridge and Highway District have rejected the proposal of the Loveland-Bylesby interests to construct the Golden

Gate Bridge. The Loveland-Bylesby Company offered to buy the \$53,000,000 bridge bonds at par and to build the bridge complete within that figure. The building committee of the directors recommended rejection of the offer on the grounds that the district could probably save millions by letting the contractors directly.

J. R. Shaw, president of the Shaw-Bertram Lumber Co., of Klamath Falls, Ore., announces the purchase of about 24,000 acres of timber from the Pickering Lumber Company. The tract, located 50 miles southwest of Klamath Falls on the Great Northern Railroad's extension into California, contains approximately 3,000,000,000 ft. of pine lumber. It will be held as a future lumber supply for the company's mill, Shaw said.

Building contracts for the first half of May show a slightly larger than normal seasonal decline. As reported by F. W. Dodge Corp., the average for the first thirteen business days of the month was \$2,953,600 for the month of April. The drop for the first half of May was 7.3 per cent from the April average, compared with a usual seasonal decline of 4.9 per cent.

A resolution definitely supporting the present 4-L wage scale based on \$3 a day and up for unskilled labor, in opposition to any wage cutting, was adopted last week by the directors of the Loyal Legion of Loggers and Lumbermen at the 25th semi-annual meeting in Portland, Ore. Twelve employees and 12 employers are members of the board of directors, the governing body of the organization. In his address to the board W. C. Rueckert, 4-L president, scored those lumber operators who are paying what he termed "poverty wages."

At a meeting of executives, secretaries and members of the Associated General Contractors of America in Washington May 8-9 in a session devoted largely to discussions of co-operation with other elements of the construction field and to selling construction service, O. W. Rosenthal, president of the National Association of Building Trades Employers, outlined the plan for construction investment trusts. The plan is to issue shares in the investment trusts, the shares representing certificates of interest in thousands of buildings. Control of construction from within would be the result, and longer amortization of building loans, much needed, would follow. He declared the public trust would make the shares a sound investment and that the wide diversification of types of construction represented by the investment investment.

Col. W. A. Starrett, vice-president of the Associated General Contractors of America, begs construction not to sell itself short. This is what is done when general contractors submit bids containing prices of sub-trades below the figures submitted by sub-contractors, depending upon beating down the bids to the expected price after the contract is secured. He says the general contractors are fooling themselves only, the sub-contractors submitting first figures high enough to

allow for reduction upon later demand.

Bureau of Census figures on average prices of lumber paid by contractors delivered on the job as of April 1 at Los Angeles were: No. 3181B, Douglas fir, 2x4—16, \$21.50 per M; No. 1 common boards, 1x6, \$20.50; Douglas fir No. 7 v g flooring, 1x4—10 to 16, \$24.50; red cedar shingles \$4.40.

An investigation is under way by the Federal Trade Commission to determine whether there have been any price fixing agreements or illegal combinations among manufacturers and salesmen of material used in government buildings.

Beginning of development of a future source of steel is announced by the University of Minnesota. This source is an estimated billion tons of low grade ore in the Mesabi range, which is yielding already the richest store of the nation's high grade ores. The amount of low grade ore will be measured and mapped and its types classified. Some of these ores are magnetite requiring magnetic separation, some can be brought to higher grade simply by washing, others require crushing or roasting, while some depart in different ways from present shipping standards.

New orders for 689 steel boilers were placed in April, 1931, according to reports submitted to the Bureau of the Census by 73 manufacturers, comprising most of the leading establishments in the industry, as compared with 630 boilers in March, 1931, and 1017 boilers in April, 1930.

The Nevada State Highway Department, working in conjunction with the United States Bureau of Public Road, expects to have approximately \$2,600,000 in road projects under way by July 1, 1931. This figure includes twenty-two projects begun since the first of the year and three hold-over projects from last year. The program is being financed by Nevada's \$1,043,000 share of the emergency advance fund appropriated by the last congress as a relief measure and from the state's regularly allocated federal aid fund and the state highway fund.

California Portland Cement Company has filed a complaint with the State Railroad Commission against The Atchison, Topeka and Santa Fe Railway Company, Los Angeles & Salt Lake Railroad Company, Pacific Electric Railway Company, and Southern Pacific Company, alleging that defendant carriers collected an excessive rate for the transportation of numerous carload shipments of petroleum residuums from points of origin in Los Angeles County to the complainant's plant at Colton, San Bernardino County, and asking the Commission to award reparation to complainant in the amount such charges exceeded the rate found reasonable by the Commission.

Mt. Shasta Pine Mfg. Co. has filed a complaint with the State Railroad Commission against Southern Pacific Railroad Company, alleging that defendant carrier collected the rate of \$18.50 per car for the transportation of 36 cords of logs from Fernow Spur on the Black Butte-Klamath Falls line of defendant to Barnard, one mile south of the town of Mt. Shasta. Complainant asks the Commission to order defendant to refund the sum of \$4.00 per carload on account of alleged overcharges.

ALONG THE LINE

Walter W. Cooper, who recently completed his contract as rate expert for the East Bay cities and other California municipalities, has assumed his position as supervisor of rate proceedings for the Railroad Commission, with the title of Director of Research. Cooper will have charge generally of the preparation of cases before the Commission and will maintain a constant check on rate structures and earning conditions of the utilities.

San Jose city council has authorized the employment of Harland Bartholomew of St. Louis, city planning expert, to map a civic center for that community.

Walter Altevogt, contractor who attempted suicide in San Jose several days ago, is reported to be on the road to recovery. Previous to going to San Jose, Altevogt operated as a general contractor in Martinez.

Appointment of Eric Cullenward, former San Francisco and Los Angeles newspaperman, as secretary of the State Highway Commission, is announced today by the State Department of Public Works. Cullenward succeeds George Mansfield, who resigned after having been secretary for several years. Fred Seymour of Sacramento was appointed superintendent of prison camps, effective June 1.

Prof. A. H. Hoffman of the Agricultural Engineering Division, College of Agriculture, Davis, Calif., died in a Sacramento hospital last Tuesday, after an illness of two weeks. He was 57 years old.

Allen H. Stem of St. Paul, 75, nationally known architect and designer of the \$20,000,000 Grand Central Terminal in New York City, died in that city last Tuesday after a three-week illness.

Captain H. E. Nurse, construction engineer in charge of the Federal bombing base to be constructed in Marin Meadows, near San Rafael, has leased quarters in the Star Theatre Building, San Rafael, and with the completion of remodeling will establish his office quarters.

Chas. Butner, architect, formerly maintaining headquarters in Fresno, has moved his offices to the Glikberg Bldg., Gabilan and Main Sts., Salinas. Butner's Salinas office was formerly handled by the late William Stranahan, engineer.

A new edition of the "Handbook of Concrete Construction" has been issued by the Universal Atlas Cement Co., 208 S. La Salle St., Chicago, Ill. This pocket-size volume contains 208 pages and many illustrations. It is written from a practical rather than a technical standpoint to provide, in convenient form, useful information in both plain and reinforced concrete. The list price is \$1 per copy.

Railings, fences and special construction using pipe and fittings are the essential construction material are described in a 76-page illustrated catalog issued by the Vulcan Rail & Construction Co., Maspeth, N. Y. Detailed drawings and photographs show a large number of unusual jobs carried out by the company in various parts of the country.

HERE—THERE
EVERYWHERE

California highway work provided employment for 7857 men during April, according to information compiled by President Hoover's committee on employment according to news dispatches from Washington, D. C. During April contracts for constructing 91 miles of highway at a cost of \$3,736,082 were awarded, the committee revealed. Included in this program, it was announced, was 14 federal aid projects, the cost of which aggregates \$1,666,698.

Awards of contracts totaling \$155,629,594 for public and semi-public construction projects broke all records last week, it is announced by the President's emergency employment committee. This brings the total amount of contracts for this kind of work reported since December 1 to \$1,353,693,507.

Records of the Construction Section of the Census of Distribution show that 1,194 contractors in Virginia have filed reports for construction business done in 1929. Of this number 337 contractors each reported construction work of \$25,000 or more. The number of contractors reporting a year's business of less than \$25,000 was 857. Of this number, 717 classified themselves as to the type of work handled, while 140 failed to do so. An analysis of the reports of these 717 contractors reveals that 251 reported themselves as general contractors. The general contractors classified as to types of work handled show 212 engaged in building construction, 34 as highway and street contractors, and 5 miscellaneous. Sub-contractors whose report showed their year's business as less than \$25,000 numbered 466.

Edward D. Boyer, technical service manager of the New York office of the Universal Atlas Cement Co., has announced his retirement from active business. Mr. Boyer joined the Atlas organization in 1902. He is a director and former president of the American Concrete Institute and a past-director of the American Society for Testing Materials, and has been for many years a member of the Portland Cement Association's technical problems committee.

Builders' Service Co., of Mountain View, has filed articles of incorporation. The company will deal in building materials and supplies of all kinds and will issue 15,000 shares of stock of par value of \$100 per share. The directors, each of whom hold one share of the stock, are: J. E. Carter of Palo Alto, August Landet of Sunnyvale, J. T. McPheters, Arthur Olson and E. D. Minton, all of Mountain View.

Two hundred and fifty building trades workmen who walked out at Houston, Texas, on May 1 because of an attempt to cut their wages \$2 a day, agreed to go back to work under a compromise agreement for a \$1 reduction.

Bulletin 71-J of the Sullivan Machinery Co., 400 North Michigan Ave., Chicago, Ill., treats of air-made wells and Sullivan air-lift pumping. This method combines the special well-construction engineering of the Air-Made Well Co. of Kansas City, with Sullivan air-lift equipment and methods. It has proved successful in many cases in developing a water supply from shallow sand and gravel strata.

ENGINEERING SOCIETIES
EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUitter 1684).

R-3576-S. SALES ENGINEER, preferably young, C. E. graduate with sales personality and some experience, either in sales or operations, to sell induction motors. Personal interview in San Francisco required. Salary and expenses.

R-3577-S. SALESMAN, preferably single and experienced in the motor business, to sell a line of motors, pulleys, transformers, etc. Compensation on commission basis only. Territory, Northern California. Headquarters, San Francisco.

R-3568-S. MECHANICAL ENGINEER, experienced in the production of heavy machinery, to design and detail a portable rock crusher. Opportunity for the right man to take financial interest and full charge of engineering a new company. A \$1000 investment required. Location, San Francisco.

R-3566-S. MASTER MECHANIC AND PRODUCTION SUPERINTENDENT with can factory experience will be needed for new plant. Men with this experience please apply, stating age, employment record and salary required. Location, California.

R-3572-S. ENGINEER, over 40 years of age, with general construction experience, for special work in connection with a trade paper. Must be adaptable and willing to start for moderate salary. Permanent opportunity. Location, San Francisco.

W-2370 CIVIL ENGINEER for research work on cement. Apply only by letter. Location, New York State.

CEMENT OUTPUT IS
LOW, REPORTS SHOW

The ratio of operations to capacity of American Portland cement mills continues to show a decline as indicated by the figures for the twelve months ending April 30. According to statistics released by the Bureau of Mines of the Department of Commerce, the ratio of operations to capacity for the last twelve months was 57.7 per cent. The ratio percentage for the twelve months ending April 30, 1930, was 60.9 per cent and for twelve months ending March 30, 1929, was 71.1 per cent.

During the month 11,245,000 barrels were produced, 11,184,000 barrels were shipped, and stocks on hand at the end of the month were 29,736,000 barrels. Production in April, 1931, was 16.8 per cent less and shipments 16.2 per cent less than in April, 1930. Stock at the mills were 3.7 per cent less than a year ago.

ENGINEER HONOR
SOCIETY ELECTS

Election of officers to the University of California Chapter of the True Beta Phi, national engineering honor society, was held at the last regular meeting of the organization on the Berkeley campus recently. The newly elected officers will serve for the school year 1931-32.

Those elected are: President, I. Morgan White, Oakland; vice-president, Louis R. Goldsmith, San Diego; treasurer, Wesley F. Getts, San Francisco; corresponding secretary, Henry C. Kruger, San Francisco; recording secretary, Raymond E. Gauthier, San Francisco; and cataloguer, Irwin T. Wetzel, San Francisco.

GOVERNOR SIGNS BILLS FOR S. F. BAY BRIDGE PROJECT

Impressive Ceremonies Mark Signing of Measures—Eighty Local Draftsmen Will be Employed at San Francisco Headquarters in Connection With \$75,000,000 Project—State Highway Engineer Purcell Hopes to Complete Engineering Details Within Twelve Months

With approval of three bills, Governor Rolph last Monday paved the way for immediate action on the San Francisco Bay bridge project.

Impressive ceremonies, participated in by large delegations from San Francisco and Alameda Counties, marked the signing of the measures.

"This day will long be remembered by San Francisco and all California," said Governor Rolph. "We are approving the final legislation necessary for construction of the \$75,000,000 bay bridge. It is an epochal event, for this vast project is everybody's bridge, and all Californians united in work-

ing from the west, with a few outstanding key men in bridge construction work imported from the East. He indicated a staff of from sixty to eighty draughtsmen will shortly be working at headquarters to be secured in San Francisco.

Governor Rolph paid a special tribute to United States Senator Hiram W. Johnson, Congressman Florence P. Kahn and other members of the California delegation in Congress for obtaining Federal approval of the bridge. State Finance Director Rolland A. Vandegrift and Col. Walter E. Garrison, State Director of Public Works, expressed satisfaction with the present fiscal and engineering arrangements.

C. H. PURCELL,
State Highway Engineer

ing for its speedy realization."

The first of the three bills advances \$750,000 in State funds for immediate preliminary engineering work. This advance will be returned to the State general fund after the first sale of revenue bonds to finance actual bridge construction.

The second measure clarifies details of the toll bridge authority act of 1929 under which revenue bonds are to be issued for the bay bridge. This bill is designed primarily to increase marketability of the bonds.

The last of the bills provides that the State Department of Public Works may take over the bay bridge project for the purpose of maintenance.

State Highway Engineer C. H. Purcell said it is hoped all preliminary engineering work can be completed within the next twelve months.

Immediate attention also is to be given to questions of bridge approaches and kindred problems, both in San Francisco and the East Bay district.

For the first time on a project of this magnitude, Purcell said, designing draughtsmen will be recruited

MORE SCENERY DUE TO BE UNCOVERED

Maintenance crews of the Southern Pacific Company have been instructed to co-operate with State and County highway crews in removing signs erected along the right-of-way, F. L. Burckhalter, General Manager of the Southern Pacific Company yesterday informed A. Emory Wishon, Chairman of the Statewide Highway Committee of the California State Chamber of Commerce.

Under Wishon's leadership, there is a two weeks campaign now on, concluding May 31, which tend to clear down all signs illegally placed on the property adjacent to highways. It is estimated that 50,000 signs will be removed as the result of this campaign.

"We believe the undertaking to clean up signs along the highways of California which tend to obstruct scenery, is a splendid piece of work on the part of the State Chamber of Commerce," stated Burckhalter. "Many miles of our rails parallel highways and we will gladly join in the movement. We feel this house cleaning will add to the enjoyment of travelers in general."

BANKRUPT METAL FIRM LISTS ASSETS

The San Francisco Iron and Metal Company, which recently filed its petition in bankruptcy, yesterday filed its schedule listing liabilities of \$258,533 and assets amounting to \$516,422.

The liabilities, the schedule reveals, consist chiefly of unsecured claims which amount to \$252,583. Of the assets, \$485,222 consists of unliquidated claims. These include a note for \$148,554 held by Harry Silberman, Sr., former president of the company, and one for \$53,315 held by E. Silberman.

The concern formerly figured in charges of income tax evasion during the war period and now has a suit for damages pending against John P. McLaughlin, collector of internal revenue, for alleged unjustified seizure of the company's assets by McLaughlin. The tax claims were settled in Washington.

A.G.C. AIMS TO AMEND DAVIS-BACON FEDERAL WAGE BILL

Eighty executives, secretaries and members of the Associated General Contractors of America met in Washington May 8 and 9 in a session devoted largely to discussions of co-operation with other elements of the construction field and to selling construction service.

The recently enacted Davis-Bacon bill, requiring payment of prevailing wages on federal building work, brought forth considerable comment and discussion. Two amendments to the bill are proposed by the A.G.C., the one to be pushed to be decided upon by a committee. One of the amendments would have the prevailing wages stated in the specifications or in the call for bids; the other would do this and in addition provide for protection of the contractor in case wages went up during the life of the contract, the government assuming the extra cost of labor and, likewise, the government would receive the benefit if wages dropped in a similar period. It was pointed out that the Davis-Bacon bill has already been interpreted to apply not only to the contractor's forces but to all employees of firms furnishing or making materials entering into the work. It was also revealed that at present the bill carries no penalty.

Bulletin No. 227 of the Engineering Experiment Station of the University of Illinois contains the report of an investigation to determine the effect of various gases present in the furnace during the smelting of dry process enamels for cast iron. In the investigation these dry process enamels were subjected to the following smelter atmospheres: sulphur dioxide, sulphur dioxide and reducing conditions. The effect of these atmospheres on the quality of the enamel after it had been burned on cast iron test pieces was determined.

From the results obtained it was found that composition played an important part in the resistance of dry process enamels for cast iron to the effect of reducing smelter atmospheres and reducing smelter atmospheres with sulphur dioxide present. The high-lead enamels were less resistant to reducing conditions and reducing conditions with sulphur dioxide present than the low-lead enamels tested. It should be possible to develop leadless enamels that would be resistant to any reducing conditions found in plant smelting practice. Tin oxide was less readily reduced than antimony oxide. Careful quenching and washing removed the sulphate formed by smelting in the presence of high percentages of sulphur dioxide, and no scumming or sulphur pock marks resulted from that source. Since, in the investigation, only gases in high concentrations caused defects to appear, it is probable that many of the black specks encountered in commercial smelting are due to carbon or other foreign materials being trapped in the enamel.

Copies of Bulletin No. 227 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

The difficulties attendant upon the completion of the Sydney, Australia, harbor bridge appear to be typical of a project on which an attempt is being made to save the general contractor's profit, says The Constructor, A. G. C. publication. Unforeseen costs arising in connection with the construction of the bridge have strained the finances of New South Wales considerably, it is reported. Originally, the bridge, including approaches, was estimated to cost \$28,000,000, but so far it has cost \$34,000,000 and the latest estimate for its completion is \$41,000,000. The bridge should be open for traffic late in 1931.

LOWER RENTS, FEWER RENTERS. HIGHER TAXES HIT REAL ESTATE

"The building industry is not likely to repeat its 1921 feat of leading business out of the valley," says The Business Week. "Its sister, real estate, must in fact be listed among the factors that are retarding recovery."

Continuing, Business Week says: "Real estate is a local business. There are towns and cities where conditions are good today, and there are neighborhoods that are doing well in cities that are flat. Any generalizations must make allowance for these exceptions. But speaking by and large, rental incomes from both business and residential property throughout the country are shrinking, and vacancies are rising."

Estimates of vacant space run from 3% to 25% according to locality. One careful estimator puts the decrease in rents at 5%. Taxes, on the other hand, tend to increase.

Because individual incidents attract only local attention the extent of foreclosures, both for mortgage defaults and tax delinquencies, has not been generally understood.

Mortgage-holders have taken over a great number of large buildings, most conspicuous, perhaps, the hotel and apartment-hotel type, put up in boom enthusiasm.

Tax foreclosures have been fewer of late. The situation, several states have been, or are, considering measures of relief by postponing due dates of taxes, but are hampered by their own financial difficulties.

A vicious circle results as forced selling in a depressed market further depresses that market, bringing more forced selling.

The crisis, at least in many regions

does not appear to have been reached yet, acute as are present conditions. Several observers are inclined to expect it some time this summer or in the fall.

The situation has had serious repercussions on real estate credit. Large numbers of mortgage bonds have been defaulted, many mortgages are unpaid. Banks with loans on real estate naturally have suffered, such loans explain many of the smaller bank failures. Insurance companies, savings banks, and building and loan associations have all been hit. Due to tax collection difficulties, more municipal securities are already in default than ever before, and many more are now very close to the edge.

This condition in the real estate field very largely removes the interest in and demand for new construction, and accounts for the current low level of building.

Almost no mortgage securities have been brought out this year. Other lending agencies are making loans at a much lower appraised basis than in the last year or two. Mortgage rates have declined but little, while second mortgage money is, at the present time, scarcely obtainable.

It is often said that large amounts of idle money are available for real estate financing. This is true enough. But it is available only for the highest grade properties, and up to a most conservative percentage of an ultra-conservative appraisal. For these gilt-edged mortgages, there is a lively demand. But the terms imposed obviously bar the big speculative builders who have been in the habit of going ahead on a 20% or 25% equity.

STANDARD CONCRETE MIX ORDINANCE APPROVED BY SACRAMENTO CITY COUNCIL

An ordinance amending sections 2604 and 2704 of Ordinance No. 316 Fourth Series, passed January 13, 1927, and entitled, "An Ordinance Regulating the Erection, Construction, Enlargement, Alteration, Repair, Moving, Removal, Demolition Conversion, Occupancy of Buildings or Structures in the City of Sacramento. Providing for the Issuance of Permits and Collection of Fees Therefor, Providing Penalties for the Violation Thereof, and Repealing Ordinance No. 389, Third Series, Passed June 17, 1919, Ordinance No. 12, Fourth Series, Passed September 8, 1921, Ordinance No. 122, Fourth Series, Passed July 26, 1923, Section 8 of Ordinance No. 117, Fourth Series, Passed April 9, 1923, Ordinance No. 648 Old Series, Passed April 11, 1904, Ordinance No. 256 Old Series, Passed April 14, 1890, and All Other Ordinances, or Parts of Ordinances, in Conflict Herewith."

BE IT ENACTED BY THE COUNCIL OF THE CITY OF SACRAMENTO: SECTION 1. Section 2604 of Ordinance No. 316, Fourth Series, passed January 13, 1927, is hereby amended to read as follows:

Section 2604. Monolithic concrete construction containing not more than two-tenths (2-10) of one (1) per cent of reinforcement shall be classed as plain concrete.

Materials for bearing walls and piers of plain concrete shall be mixed in proportions of one (1) part of Portland cement to not more than three (3) parts of sand and five (5) parts of coarse aggregate, by volume, or a mixture of fine and coarse aggregates giving an equivalent strength and density.

Coarse aggregate shall consist of crushed stone, washed gravel, or crushed slag, eighty-five (85) per cent of which is retained in the No. 4 screen, and shall be graded in size from small to large particles. The particles shall be clean, hard, durable, and free from deleterious materials.

Cement for plain concrete shall conform to the requirements of the Standard Specifications and Tests for Portland Cement of the American Society for Testing Materials (Serial Designation C9-21).

Fine aggregate shall consist of washed sand, washed stone screenings or other similar inert materials, or combination thereof, having clean, hard, durable uncoated grains and free from injurious amounts of dust, lumps, soft or flaky particles, shale, alkali, organic matter, loam, or other deleterious substances; and shall range from fine to coarse. Not less than ninety-five (95) per cent shall pass a No. 4 sieve, and not more than thirty (30) per cent shall pass a No. 60 sieve, when tested according to current standard practice prescribed by the American Society for Testing Materials.

One of three mortar briquettes made from the washed sand should develop the same strength at 28 days as one to three mortar briquettes made from Ottawa sand at 28 days when the mortar in both sets of briquettes is of the same consistency and cured under like conditions.

Concrete Mix, viz, washed sand and washed gravel premixed before delivery shall be composed of fine aggregate which shall conform to the specification for fine aggregate under paragraph 5 of this section and coarse aggregate which shall conform to the

specification for coarse aggregate under paragraph 3 of this section; the fine and the coarse aggregate to be mixed in such proportion that 60% of the ultimate dry mix shall be coarse aggregate.

The strength of monolithic concrete if "concrete mix" is used as the aggregate shall be not less than 1500 pounds per square inch at the age of 28 days. The proportion of "concrete mix" to cement, by volume, shall be not more than six parts of concrete mix to one part of cement.

SECTION 2. Section 2704 of Ordinance No. 316, Fourth Series, passed January 13, 1927, is hereby amended to read as follows:

Section 2704. (a) Portland Cement. Portland cement shall conform to the Standard Specifications and Tests of Portland Cement (Serial Designation C9-21) of the American Society for Testing Materials.

(b) Concrete Aggregates. Concrete aggregates shall consist of washed sands, washed gravels, crushed rock, air-cooled blast-furnace slag, or other inert materials having clean, strong, durable, uncoated particles and shall meet the approval of the Building Inspector. Aggregates containing soft, friable, thin, flaky, elongated or laminated particles totaling more than three (3) per cent by weight, and containing shale in excess of one and one-half (1½) per cent, or silt and standard sieve in excess of two (2) crusher dust finer than the No. 100 per cent shall not be used. The percentages shall be based on the weight of the combined aggregate as used in the concrete. When all three groups of these injurious materials are present in the aggregates, the combined amounts shall not exceed 5 per cent by weight, of the combined aggregate. Aggregates shall not contain strong alkali, or organic material which gives a color darker than the standard color when tested in accordance with the standard colorimetric test of the American Society for Testing Materials.

The maximum size of the aggregates shall be not larger than one-fifth (1-5) of the narrowest dimension between forms of the member for which the concrete is to be used, or larger than three-fourths (¾) of the minimum clear spacing between reinforcing bars, or between bars and forms. Maximum size of aggregate is defined as the clear space between the sides of the smallest square opening through which ninety-five (95) per cent, by weight, or the material can be passed.

(c) Water. Water used in mixing concrete shall be clean and free from injurious amounts of oil, acid, alkali, organic matter or other harmful substances.

(d) Metal Reinforcement. Metal reinforcement shall conform to the requirements of the Standard Specifications for Billet-Steel Concrete Reinforcement Bars of structural or intermediate grade (Serial Designation A15 14) of the American Society for Testing Materials. Hard grade billet-steel meeting the requirements of the above specification (A15-14) requirements of the Standard Specifications of the American Society for Testing Materials may be used for bars three-fourth (¾) inch in size and smaller, or for larger sizes where no bending is required. The provision in the above mentioned specifications for machining deformed bars before testing shall be eliminated.

Metal reinforcement, to receive the rating of "deformed bars" which permits the use of higher bond stresses than for plain bars, shall show a bond strength of twenty-five (25) per cent greater than that shown by plain bars of equivalent cross-sectional area.

(e) Storage of Materials. Cement and aggregates shall be stored at the

work in a manner to prevent deterioration or the intrusion of foreign matter. Any material which has been damaged shall be immediately and completely removed from the work.

Passed: May 14, 1931.

Effective: June 13, 1931.

C. H. S. BIRNELL, Mayor.

Attest: H. G. Denton, City Clerk.

WESTERN FEDERAL PROJECT PROGRAMMED

President Hoover announces that the estimated cost of new construction approved by the federal board of hospitalization will total \$17,757,000.

New construction approved some time ago and now under contract amounts to \$7,092,152.27.

The projects for which contracts have not been let but which have been approved by the board of hospitalization included:

Salt Lake City \$400,000; Helena, Mont. \$330,000; Walla Walla, Wash., \$105,000; Wichita, Kan., \$750,000; Los Angeles, \$550,000; Lincoln, Neb., \$110,000; Oregon (site not selected), \$1,000,000; American Lake, Wash., \$300,000; Boise, Idaho, \$250,000; Albuquerque, N. M., \$1,250,000; Leavenworth, Kan., \$1,500,000.

Projects have been approved and now are under contract at American Lake, Wash., Tucson, Ariz., Waco, Texas, among other cities.

The estimates include all manner of building activities, ranging from refrigeration and tile floors to new buildings.

BUILDING PERMITS DECREASE IN L. A.

During the first 20 days of May, 1931, the Los Angeles city building department issued 1516 permits with an estimated valuation of \$2,039,256. For the corresponding period in May a year ago the number of permits issued was 1860 and the estimated valuation \$4,750,059, while for the first 20 days of April, 1931, the number of permits issued was 1590 and the estimated valuation was \$2,310,951.

Los Angeles' building total for the current year up to and including May 20 was \$17,186,278 as compared with \$11,855,872 for the corresponding period last year.

ENGINEER LEAVES \$175,000 TO U. C.

A scholarship for girls and a professorship of United States history will be established through a fund of \$175,000 bequeathed the University of California by the late James Wm. Byrne, according to announcement by President Robert Gordon Sproul.

Byrne, a member of the class of 1838 was a civil engineer. He died in March 1930.

Under terms of the bequest, \$25,000 is to be used for scholarships. The remaining \$150,000 is to be used for the establishment of the Margaret Byrne Professorship of American History.

STATE PLUMBERS ELECT OFFICERS

Jack V. Young of San Francisco, was elected president of the State Association of Merchant Plumbers at the closing session of the 30th annual convention in San Diego, last Thursday.

Other officers elected are: Jack Speer, Santa Barbara, vice president; Jack Hawley, Sacramento, re-elected treasurer, and Frank C. Schilling, Jr., Los Angeles; R. W. Timmons, Richmond, and R. L. Walters, Bakersfield, executive board members.

Selection of the 1932 convention city will be made later.

LUMBER TO CLINCH 5-YEAR PLAN WITH TEN BIG SALES CAMPAIGNS

Indicative of what an aggressive trade association can do for, and of the support it can get from, its industry, even during a depression, is the record of the National Lumber Manufacturers' Association. Not satisfied with the successful completion this year of a 5-year promotion campaign during which \$1,000,000 has been spent annually to push the sale of lumber against competitive products, the association proposes to extend its activities, to increase its annual expenditures 50%. It has a complete campaign prepared to promote the use of lumber wherever possible.

The purpose of the association, as stated by its able manager, Dr. Wilson Compton, is "to enable sharply competing regions and groups to work in the same harness toward objectives of mutual interest; and to give to the lumber industry, as far as practicable, a united front in its resistance to encroachments of 'substitute' materials."

Except in the instances where "exaggerated individualism prefers independence to profits" this plan has been successful. Inter-industry warfare over the rival claims of various kinds of lumber produced from different regions has been diminished, and the industry is concentrating its efforts to fight cement, steel, and other competitors.

The ultimate aim of the association, as indicated by Dr. Compton, is to obtain mutual agreement among the regional associations which make up the national body as to the several species and grades of lumber suitable for particular uses, to concentrate the promotional activities of the national

body behind these uses, to restrain competitive regional associations from negative public criticism of the suitability of any species thus agreed upon. To complete this program national grade-marked standards are sought as well as a national system of inspection for softwoods similar to that already established for hardwoods.

The practical program for permanent trade promotion submitted to the association at its recent annual meeting calls for 10 coordinated campaigns to be carried on simultaneously. These will deal with home building, farm building, retail cooperation, building codes and architecture, industrial construction, fabricated industrial uses, box and crating container uses, railway and car construction, highway construction, government lumber uses. In this group is combined 90% of the total lumber markets.

Each program is complete in itself; has a complete outline of suggested activities under the heads of research, promotion, advertising, and publicity; each is directed at a vital lumber market. Factors considered in the development of this long-range plan include: export lumber trade promotion; rating important lumber markets according to their potential volume; initiating research based upon known consumer buying habits and needs of the industry; revision of present distribution methods; development of sales appeals which will the lumber and wood products directly to the self-interest of the buyer in each market; stimulation of acceptance by lumber manufacturers of responsibility for aid in national and regional promotional efforts.—(The Business Week).

CRUSHING STRENGTH OF CONCRETE PAVEMENT BASE CONSTRUCTION CITED

The cylinder crushing strength which is required for the concrete used in pavement bases in cities varies from 1000 lbs. per sq. in. to 4000 lbs. per sq. in. at 28 days, according to Charles E. Reppert, city engineer of Pittsburgh in a recent survey of paving practices in 20 large cities in the United States made by the American Road Builders' Association.

Slightly more than 1/4 of the cities require that the concrete shall show a crushing strength of not less than some figure between 2000 and 3000 lbs. per sq. in., says Mr. Reppert. Four cities permit the strength to be less than 2000 lbs. per sq. in. while many have no strength requirements to be met.

One of the requirements of the concrete used in bases, where the temperature of the base gets well below the freezing point of water, is that it shall be so dense that the water in the pores will not freeze and disrupt the materials forming the concrete. Concrete having a crushing strength of between 2000 and 3000 lbs. per sq. in. evidently satisfies this condition as the cities having the colder weather require the concrete to be within this range, while the lower strength of the concrete are used in those cities having a warm climate.

The maximum economy in the building of a concrete foundation can be secured only through the accurate proportioning of the aggregates, cement and water. Only two of the survey cities do not definitely require the accurate proportioning of the ma-

terials.

Only seven of the survey cities do not require that the concrete mixer be equipped with a tining device. These cities may have exceptionally dependable contractors so that mechanical devices are not necessary to insure that the concrete is always thoroughly mixed. Tining devices, however, seem to be considered more certain.

A mixing time of from 1 to 1 1/2 min. is the most generally used. No city reported the requirement of less than 1 min. Only three cities require over 1 1/2 min.

The longer mixing time makes the concrete more workable and permits the use of less water to produce cement that can be easily placed and without the separation of the water. It has been found that a long mixing time is an advantage in the preparing of central mixed concrete, as it makes the concrete more liable to separate during its transporting.

The consistency of the base concrete when it is placed is considerably stiffer than that used for concrete building work. The required "slump" of a standard cone, in almost every case, comes between 1 and 3 in. Well proportioned and thoroughly mixed concrete having almost no "slump" can be easily placed in a concrete base with a little light tamping.

The surveyed cities seem to be about equally divided on the question of using, for pavement bases, concrete which runs into place and one that requires some tamping to place it properly.

SURVEY INDICATES DEMAND FOR MODERATE PRICED HOME

Actual home buying now going on shows a strong preference for houses whose building cost is under the \$5000 mark. A price ranging from \$5000 to \$5900 for the home, land and building together, is proving the one right now most popular. That is indicated by a study which has just been made by the National Association of Real Estate Boards of the most recent 10,108 home sales made by members of its Brokers Division.

The reports of sales were from 100 firms in 76 cities, supplemented by city-wide reports from 6 real estate boards. The reports are drawn from 26 states, the District of Columbia, and one Canadian Province. The houses sold included both new and old structures.

Homes sold (land and buildings) were divided into 18 groups according to their price range. Of the sales, 10.2% (1041 sales) were reported for the group with a price range \$6000 to \$6900. From this peak group the curve drops at once to the group of between \$4000 and \$4900 price range, in which were 1008 sales, close to 10% of the total number. Then it goes back and gives third place to the group between these leaders, homes with a price range from \$5000 to \$5900, inclusive, for which 988 sales were reported.

The largest incidence of sales, in fact 30.4% of all sales, were thus in the price range \$4000 to \$4900, inclusive. It is estimated that on an average from 20% to 30% of the cost of the home (land and buildings) is in the price of the land. This means

therefore that the group of properties moving most rapidly at the present time are those in which the cost of the building ranges just under \$5000. Making a composite picture of the three highest groups it is seen that the range of most sales is of homes in which building values are from \$3000 to \$5000.

Even this is not all the story of present day preference for the small and inexpensive house. Descending from the peak group the curve swings once briefly to the other side. The price range \$7000 to \$7900, inclusive, takes fourth place, with 845 sales. But the price mark \$8000 seems to be a line of demarcation. From this point the advantage is again with the cheaper houses. A price range of under \$8000 on a home (building and land) means approximately a range in which building cost or building value falls under \$6000. Sales in the groups under \$5000 in price total 549. This is 54.37% or well over half of all sales.

The report on the whole shows a rather general distribution of sales in the various price brackets, and it is noticeable that homes in the highest price group, \$35,000 and over, show 366 sales, 3.62% of all transactions reported. Homes in the price range \$30,000 to \$34,900, the least popular group, sold in proportion to those in the most popular bracket in the ratio of 1 to 6. Homes in the highest price range, \$35,000 and over, showed in comparison with homes in the lowest price range, \$2900 and less, sales in the ratio of one to two and one-fourth.

doubling of capacity of the State Refrigeration Terminal at China Basin.

A fireproof warehouse, including shops and garage, and costing about two hundred thousand dollars, is planned for the sea-wall lot, now vacant, at Bryant and Spear Streets. The warehouse will be occupied jointly by the State Purchasing Department and the Harbor Board for their respective stores.

Perhaps most important of all of the projected developments is that of providing new, larger and better pier facilities both north and south of the Ferry Building. North of the Ferry Building it is the intention to remove eight old piers. In place of these piers there will be constructed six new piers. The present piers which are to be torn out are from 600 to 800 feet long and from 100 to 150 feet wide. The new piers, entirely fireproof in their construction, will be from 800 to 1000 feet long and from 100 to 250 feet wide. South of the Ferry Building a new pier is proposed which will be known as 52, just south of the line of Mission Rock.

Important development is projected for Islais Creek. A wharf 500 feet long will be built eastward on the south side of Islais Creek from the end of the present 1300 feet wharf to the eastern terminus of the present solid fill. On the north side of Islais Creek west of the Third Street Bridge a wharf some 1500 feet long will be built from Third Street to the Southern Pacific Railway tracks.

Other plans, as announced by Chief Engineer Frank G. White, in behalf of the Harbor Board, call for the development of a cotton terminal back of the new outer wharf at Islais Creek. This construction will not be attempted until the cotton business of the port has developed sufficiently to warrant it.

Plenty of funds are available to President P. W. Meherin and his associates, Commissioners Joseph J. Tynan and Joseph A. Moore, of the Harbor Board, for the contemplated improvements. A balance of about two million dollars remains from the 1913 harbor bond issue, besides which there is available the 1930 harbor bond issue of ten million dollars which has not yet been touched.

Five directors were elected by the Pasadena Builders' Exchange for three-year terms at the annual meeting last week. They are: George L. Throop, building material dealer; Clifford Ward, plastering contractor; Frank Hampel, brick contractor; G. O. Sypherd, tile and marble company, and A. R. Benedict, plumbing contractor. Throop and Benedict were re-elected. Officers for the coming year will be chosen at a meeting this week.

Larsen and Larsen, general contractors, formerly located at 544 Russ Bldg., announce the removal of their offices to a new quarters at 629 Bryant Street.

Samuel M. Shortridge, United States Senator, will address the regular weekly luncheon-meeting of the San Francisco Electrical Development League today at the Palace Hotel. Senator Shortridge will speak on matters of national significance, his topic being "This Country of Ours."

Mrs. Beatrice Woodruff Weeks, San Francisco society matron and the widow of Charles Peter Weeks, noted San Francisco architect, died in Panama last Thursday. The late Charles Peter Weeks was the architect for the Fairmont, Mark Hopkins, Sir Francis Drake Hotels and other notable San Francisco structures.

The following table shows number and per cent of sales in various price ranges:

Price Range	Number of Sales	Percentage of Sales
\$ 6,000 to 6,900 incl.....	1,041	10.29
4,000 to 4,900 incl.....	1,008	9.97
5,000 to 5,900 incl.....	988	9.77
7,000 to 7,900 incl.....	815	8.35
2,900 or less.....	826	8.17
3,000 to 3,900 incl.....	791	7.82
8,000 to 8,900 incl.....	596	5.89
10,000 to 10,900 incl.....	554	5.28
13,000 to 14,900 incl.....	532	5.25
15,000 to 16,900 incl.....	449	4.44
20,000 to 24,900 incl.....	356	3.56
17,000 to 19,900 incl.....	352	3.57
9,000 to 9,900 incl.....	387	3.81
35,000 and over.....	366	3.62
12,000 to 12,900 incl.....	304	3.
25,000 to 29,900 incl.....	263	2.6
11,000 to 11,900 incl.....	230	2.27
30,000 to 34,900 incl.....	166	1.64

EXTENSIVE BUILDING PROGRAM OUTLINED BY HARBOR COMMISSION

Plans for the expenditure of between four and five million dollars in improvements on San Francisco Harbor within the next three or four years have been adopted in tentative form by the Board of State Harbor Commissioners.

The program includes extensions of and more modern equipment for the State Belt Line Railroad, new piers, a new State warehouse, and raising back to grade and repaving portions of the Embarcadero and of other streets under State control, abutting the waterfront.

Of particular importance is the new pier construction inasmuch as the Dollar Line, the Matson Line, the Panama Mail, and other steamship lines, must have added berthing accommodations for the new ships which they contemplate putting into the

world trade, with San Francisco as the home port.

The Belt Line Railroad will be extended across the Third Street Bridge when the latter is reconstructed, so as to serve piers as far south as the Islais Creek-India Basin District. The Third Street Bridge is to be rebuilt by the Harbor Board and the City of San Francisco jointly. Bids for the construction have already been received. The nine steam locomotives now operated by the State Belt Line Railroad will be replaced as fast as practicable by new Diesel electric locomotives which are not only more economical of operation, but are less noisy and smoky.

Contracts have already been let for raising back to grade and repaving four blocks of the Embarcadero south of the Ferry Building, and also for the

APARTMENTS

Plans Being Completed.

APARTMENTS Cost, \$20,000
SAN FRANCISCO. Monterey Blvd.
 Two-story and basement frame and
 stucco apartments and store (4
 4-room apts.)
 Owner—Withheld.
 Architect—J. A. Porporato, 619 Wash-
 ington St., San Francisco.

Segregated Figures Being Taken.

APARTMENTS Cost, \$125,000
OAKLAND, Alameda Co., Cal.
 Three-story and basement frame and
 stucco apartments (21 2 and 3-
 room apts.)
 Owner—Withheld.
 Architect—W. J. Wilkinson, 4268 Pied-
 mont Ave., Oakland.

Preparing Working Drawings.

APARTMENTS \$45,000
SAN MATEO, San Mateo Co., Cal.
 Three-story and basement frame and
 stucco apartments (15 2 and 3-
 room apts.)
 Owner—Moore Constr. Co., % Realty
 Investment Co., Room 310, 101
 Post St., San Francisco.
 Architect—Edwards and Schary, 605
 Market St., San Francisco.
 Composition tile roofing, steam heat-
 ing system.

Plans will be ready for bids in about
 two weeks.

Structural Steel Contract Awarded.

APARTMENTS Cost, \$50,000
SAN FRANCISCO. Buchanan Street
 near Jackson Street.
 Three-story and basement frame and
 stucco apartments (twelve 3- and
 4-room apts.; steam heat, composi-
 tion roof).
 Owner and Builder—T. I. Strand, 471
 Colon Street.
 Architect—R. R. Irvine, Call Bldg.
Structural Steel—Golden Gate Iron
 Works, 1541 Howard St.

Preparing Working Drawings.

APARTMENTS Cost, \$75,000
SAN FRANCISCO. Jefferson and
 Webster Streets.
 Three-story and basement frame,
 stucco and brick apartments (18
 2, 3 and 4-room apts.; 18 garages;
 tile and composition roof).
 Owner—Ben Liebman, 1555 Francisco
 St., San Francisco.
 Architect—R. R. Irvine, Call Bldg.,
 San Francisco.

Preparing Working Drawings.

APARTMENTS Cost, \$85,000
SAN FRANCISCO. North Point and
 Fillmore Streets.
 Three-story and basement frame,
 stucco and brick apartments (18
 2, 3 and 4-room apts.; 18 garages;
 tile roof).
 Owner—Ben Liebman, 1555 Francisco
 St., San Francisco.
 Architect—R. R. Irvine, Call Bldg.,
 San Francisco.

Preparing Working Drawings.

APARTMENTS Cost, \$75,000
SAN FRANCISCO. Jefferson and Fill-
 more Streets.
 Three-story and basement frame,
 stucco and brick apartments (18
 2, 3 and 4-room apts.; 18 garages;

Bids are wanted for:

(1) general contract.

(2) electric work.

(3) plumbing and gas fitting.

(4) mechanical equipment.

Plans obtainable from the Bureau of Architecture, 2nd floor, City Hall.

SAN JOSE, Santa Clara Co., Calif.—Architect E. N. Curtis, 35 W. San Carlos St., San Jose, in a report to the county supervisors estimates the loss in the recent county courthouse fire at \$300,000.

The architect based his estimate on the fact that a partial survey of the interior of the building revealed the loss was more than \$100,000. He declared that when he estimated the cost of rebuilding the courthouse walls and exterior features of the building, the loss will be approximately \$300,000.

Architect Curtis is basing his figures on the cost of rebuilding the courthouse to its former state—not that such action is contemplated—but because it was requested by insurance adjusters to enable them to settle \$55,000 insurance on the building and contents.

Completing Plans.

CITY HALL Cost, \$100,000
BEVERLY HILLS, Los Angeles Co., Calif.

Three-story and basement reinforced concrete City Hall (8-story tower).
Owner—City of Beverly Hills.

Architect—Koerner & Gage, 468 N. Camden Drive, Beverly Hills.

Bids held under advisement.
 The bid of Stacey-Sommers was read over the protest of that firm, the ruling of the Board of Trustees, on advice of their architect, being that, inasmuch, as two of the bids had been read before the request for the withdrawal of the bid had been made, story were in duty bound to read it. The Board ruled that the firm of Stacey-Sommers could appear before the next meeting of the Board of Trustees and request that their bid be not considered.

Millwork—Pacific Mfg. Co., 2610 The Alameda, San Jose.
Lumber—Southern Lumber Co., 1402 S 1st St., San Jose.
Painting—C. W. Lynds, 1886 Park Ave. San Jose.
Plumbing—Mark Cox, 1091 Carolyn, San Jose.
Plastering—W. G. Newman, 1423 Glen Una, San Jose.
Glass—Cobbledick-Kibbe, 1271 Cherry St., San Jose.
Structural Steel—R. Hellwig, 577 W Santa Clara St., San Jose.
Roof Work—Bush Roofing Co., Saint Claire Bldg., San Jose.
Brick Work—Frank Fillen, 1140 Martin, San Jose.
Concrete Work—J. C. Bateman, 585 Hedding, San Jose.

Plans Being Prepared.

MARKET Cost approx. \$75,000
SAN FRANCISCO. S Market St. bet. 4th and 5th Sts.
 Remodel store for market.
 Owner—Shannon Bros, 945 Market St.
 Architect—Dodge Riedy, Pacific Bldg.

THEATRES**Completing Plans.**

THEATRE Cost, \$250,000
LOS ANGELES, Cal. Florence and Compton Aves.
 Reinforced concrete and stucco theatre (auditorium seating 2000).
 Owner—Fox West Coast Theatres.
 Architect—S. Charles Lee, 2404 W. Seventh St., Los Angeles.

Preparing Plans.

THEATRE Cost, \$150,000
BEVERLY HILLS, Los Angeles Co., Calif.
 Reinforced concrete open air theatre.
 Owner—Passion Pantheon, Ltd.
 Architect—Don Uhl, California Bank Bldg., Beverly Hills.

Contract Awarded.

THEATRE Cost, \$65,000
PALO ALTO, Santa Clara Co., Cal.

University Ave., near Cowper St. (62x150 feet).

Two-story concrete theatre and store (to seat 1000; Gothic type).

Owner—United Artist Theatres of Calif., Jos. M. Schenck, vice-president, 1966 S-Vermont St., Los Angeles.

Architect—Walker & Eisen and C. A. Balch, Western Pacific Bldg., Los Angeles.

Contractor—Henry I. Beller Constr. Co., 6513 Hollywood Blvd., L. A.
 Monolithic concrete exterior finish; hot air heating system, gas furnace, composition roof.

Contract Awarded.

THEATRE Cost, \$150,000
RICHMOND, Contra Costa Co., Cal. S. Macdonald Ave., bet. Seventh and Eighth Streets.

Class A concrete theatre (to seat 1200).
 Owner—United Artists of California, 1966 S. Vermont St., Los Angeles, (Lewis Anger in charge).

Architect—Walker & Eisen and C. A. Balch, Western Pacific Bldg., Los Angeles.

Contractor—Henry I. Beller Construction Co., 6513 Hollywood Blvd., Los Angeles

Plans Being Prepared.

THEATRE Cost, \$60,000
VALLEJO, Solano Co., Cal.
 Two-story Class A reinforced concrete theatre and store.
 Owner—United Artists Corp., Los Angeles.

Architect—Walker & Eisen and C. A. Balch, Western Pacific Bldg., Los Angeles.

Monolithic concrete exterior finish, concrete and wood floors, wood, metal lath and plaster interior partitions, composition roofing, hot air heating system and gas furnace.

Completing Plans.

THEATRE Cost, \$80,000
BERKELEY, Alameda Co., Cal. Shattuck Ave. and Bancroft Way.
 Two-story Class A reinforced concrete theatre and store (to seat 900).
 Owner—United Artists Theatres of California (Jos. M. Schenck, vice-president), 1966 S-Vermont St., Los Angeles.

Architect—Walker & Eisen and C. A. Balch, Western Pacific Bldg., Los Angeles.

Monolithic concrete exterior finish, wood interior partitions, composition roofing, concrete and wood floors, hot air heating system, gas furnace.

Plans Completed.

THEATRE Cost, \$125,000
SAN JOSE, Santa Clara Co., Cal. NE First and San Salvador Sts.
 Two-story Class A reinforced concrete theatre and store building.

Owner—Mrs. Norman M. Parrott and Morey B. Fleming.

Lessee—United Artists Corp., 1966 S. Vermont St., Los Angeles.

Architect—Walker & Eisen, 1031 South Broadway, Los Angeles.

Monolithic concrete exterior finish, steel studs, metal lath and plaster interior partitions, concrete and composition roofing, concrete floors, hot air heating system, gas furnace.

Bids Opened—Held Under Advice

THEATRE Cost, \$500,000
ALAMEDA, Alameda Co., Cal. North Central Ave. W Park St.

Structural steel frame and reinforced concrete theatre (to seat 2200; 126 by 210 ft.)

Owner—Alameda Amusement Co.
 Architect—Miller & Pfleger, 580 Market St., San Francisco.

Announcement will be made within a week.

Electrical Contract Awarded.
ALTERATIONS Cost, \$50,000
OAKLAND, Alameda Co., Calif. 445
 Twenty-third Avenue.
 Alterations to class C steel frame and
 concrete theatre (wood joists).
 Owner—Golden State Theatre & Real-
 ty Co., 25 Taylor St., San Fran-
 cisco.

Architect—Reid Bros., 105 Montgom-
 ery St., San Francisco.
 Contractor—A. J. Hopper, 1769 Pleas-
 ant Valley Road, Piedmont.

Electrical Work—Matsen, Seabrooke
 Co., 415 Broadway, Oakland.

Heating, painting and decorating
 contracts will be awarded within one
 week by architect. Other sub-contracts
 previously reported.

Sub-Contracts Awarded.
ALTERATIONS Cost, \$25,000
WATSONVILLE, Santa Cruz Co., Cal.
 Remodel theatre.

Owner—Fox California Theatre,
 Douglas Graham, Mgr 1, Watson-
 ville.

Private plans.
 Contractor—Alfred J. Hopper, 1769
 Pleasant Valley Ave., Piedmont.

Plastering—John Hallstrom, 1049
 Meredith Ave., San Jose.

Painting—M. Santocmo, 59 Monte-
 rey Blvd., San Francisco.

Heating and Ventilating—National
 Theatre Supply Co., 121 Golden
 Gate Ave., San Francisco.

Work will involve complete remodel-
 ing and redecorating in addition to a
 new marquee, Spanish type organ
 loft, carpets, grapes and new seating.

WHARVES AND DOCKS

 received by State Board of Harbor
 Commissioners for roofing shed on
 Pier No. 39, involving approximately
 300 squares:

J. W. Bender Roofing Co., 18th and Bryant St.	\$4.89
Malott & Peterson	4.93
United Roofing Co.	4.94
Alta Roofing Co.	5.11
R. S. Smith	5.44
Phoenix Siltmpton Co.	5.44
Jones Bros, Ashcroft Roofing Co.	5.50

Bids held under advisement.

May 22, 1931

Plans To Be Prepared.
PIER EXTENSIONS Cost, \$—
SAN FRANCISCO Piers 42 and 44
 Extension to Pier 42 (approximately
 115 ft. each).

Owner—State of California (Harbor
 Commission), Ferry Bldg., S. F.
 Engineer—Frank White, Ferry Bldg.,
 San Francisco.

OAKLAND, Cal.—M. B. McGowan,
 Cal. Bldg. Co., San Francisco, awarded
 contract by Pacific Coast Aggregates
 Co. to cast 569 reinforced concrete pile
 followers, each 10 feet long, to be used
 in connection with foundations for
 Warehouse C on the Oakland water-
 front, for the City Port Commission.
 Duncan-Harrison Co., San Fran-
 cisco, are the general contractors on
 the foundation work.

MISCELLANEOUS CONSTRUCTION

Plans Being Prepared.
ROADHOUSE Cost, \$8500
MT. VIEW, Santa Clara Co., Cal.
 One-story frame roadhouse (landscape
 work, etc.)

Owner—Withheld.
 Plans by G. G. Shimamoto, 1551 La-
 guna St., San Francisco.

SAN FRANCISCO.—Meyer Rosen-
 berg, 1755 San Bruno Ave., awarded
 contract by Roman Catholic Arch-
 bishop, 1100 Franklin St., for grading

of the proposed College for Women
 near Turk St. and Masonic Ave. H.
 A. Minton, architect, Bank of Italy
 Bldg. The contract involves approxi-
 mately 175,000 cu. yds. of rock and
 sand excavation.

Plans Being Prepared.
GAMBLING RESORT Cost, \$—
RENO, Nevada, Block bounded by
 Center, Pine, State Sts. and
 Paving Park.

Remodel residence for gambling cas-
 sino and pleasure resort.
 Owner—E. Dodge (attorney), Reno.
 Architect—Ray Smith, Reno.
 Architect—George Koster, Arcade
 Bldg., Reno.

Following the completion of this
 work it is the intention of the owner
 to erect a modern hotel, a cabaret and
 other pleasure structures on the
 property.

Contract Awarded.
LABORATORY Cost, \$150,000
PASADENA, Los Angeles Co., Calif.
 E. California Street.

Reinforced concrete and stucco bldg.
 Owner—California Institute of Techn-
 ology.

Architect—Mayus, Murray & Phillips,
 Bertram G. Goodhue, 2 W 47th St.,
 New York City.

Contractor—Wm. C. Crowell, 465 So.
 Broadway, Pasadena.

SAN FERNANDO, Los Angeles Co.,
 Cal.—National Flying Service, Ltd.,
 Helen Lee, president, Lankershim
 Blvd., north of Victory Blvd., con-
 templates erecting a hangar, repair
 shop and administration building on
 a thirteen-acre tract in the San Fer-
 nando Valley.

BERKELEY, Alameda Co., Calif.—
 Pacific Coast Aggregates, Inc., Broad-
 way and Water Sts., Oakland; Contra
 Costa Building Materials Co., 898 Gil-
 man St., Berkeley, and J. A. Davies,
 162 El Camino, Berkeley, submitted
 identical bids to the city council to
 furnish sand as may be required by
 the city during the fiscal year com-
 mencing July 1, 1931. The bids fol-
 low: A-1, \$1.20; 1-3M, \$1.75; 4-3M, \$1.75;
 N-T, \$1.35. Delivered Alston Way and
 West St.

Arrowhead Gravel Co., San Jose, bid
 \$1.35 on N-T.
 Bids taken under advisement.

BERKELEY, Alameda Co., Calif.—
 Following bids received by city coun-
 cil to furnish rock and screenings as
 may be required for the fiscal year
 commencing July 1, 1931:

Pacific Coast Aggregates, Inc.,
 Broadway and Water Sts., Oakland,
 \$1.25 per ton for rock and screenings,
 f.o.b. Corporation Yard.

Oakland Building Materials Co., 5000
 Broadway, \$1.72 per cu. yd. for rock,
 1 1/2-in. to 3/4-in. screen with alt. for
 fine eye screen, \$1.76 cu. yd. f.o.b.
 company quarry.

REDWOOD CITY, San Mateo Co.,
 Cal.—Until June 1, 3 P. M., bids will
 be received by B. E. Myers, city clerk,
 to furnish and install traffic signal and
 control system at intersection of El
 Camino Real with Main St., Woodside
 Road and Redwood Ave., commonly
 known as "Five Points." Certified
 check 10% payable to city required
 with bid. Specifications on file in of-
 fice of city clerk.

Segregated Figures Being Taken.
BARN Cost, \$20,000
EAST OAKLAND, Alameda Co., Cal.
 One-story frame and stucco barn
 (horses and stock).
 Owner—Withheld.

Architect—W. J. Wilkinson, 4268 Pied-
 mont Ave., Oakland.

Preliminary Plans Being Prepared.
RACING COURSE Cost, \$1,000,000
NEAR REDWOOD CITY, San Mateo
 Co., Cal. On Woodside Road, one-
 half mile below "Five Points."

Clubhouse, administration building and
 grandstand, all of Mission type for
 construction; horse racing course;
 polo grounds, etc.

Owner—Fair Oaks Racing & Polo Club
 represented by Gene Normile, et
 al, St. Francis Hotel, San Fran-
 cisco.

Architect—Austin Moore (Willis Folk
 & Co.), 277 Pine St., San Francisco

Completing Plans.
REMODELING Cost, \$50,000
PALO ALTO, Santa Clara Co., Calif.
 Stanford Campus.

Remodeling Stanford stadium (replace
 wooden stairs with concrete; addi-
 tional toilet facilities).

Owner—Stanford University, Palo Alto
 Engineer—Shirley Baker, 58 Sutter St.
 San Francisco.

Bids will be taken in about 10 days.

Segregated Figures Being Taken.
ALTERATIONS Cost, \$30,000
SAN LEANDRO, Alameda Co., Cal.

Alterations and additions to two-story
 and basement frame and stucco
 undertaking establishment.

Owner—Temporarily Withheld.
 Architect—W. J. Wilkinson, 4268 Pied-
 mont Ave., Oakland.

SAN QUENTIN, Marin Co., Calif.—
 Schrader Iron Works, 1247 Harrison
 St., San Francisco, at \$6,985 awarded
 contract by State Purchasing Depart-
 ment, Sacramento, for structural steel
 for new laundry building at San Quen-
 tin.

Following is a complete list of bids:
 Schrader Iron Works, S. F. \$6,985
 Michel & Pfeffer Iron Works,
 San Francisco 7,273
 Mortensen Const. Co., S. F. 7,295
 Monarch Iron Works, S. F. 7,475
 Judson Pacific Co., S. F. 7,500

BERKELEY, Alameda Co., Calif.—
 Until June 2, 10 A. M., bids will be
 received by Florence E. Turner, city
 clerk, to furnish cement in carload
 lots, f.o.b. Corporation Yard, Alston
 Way and West St., during the fiscal
 year commencing July 1, 1931. Cer-
 tified check \$100 required with bid. Spec.
 obtainable from clerk.

Plans Being Prepared.
BUILDING Cost, \$5000
ALBANY, Alameda Co., Calif. San
 Pablo Avenue.

One-story frame and stucco dining
 hall (40x60-ft.)

Owner—Withheld.
 Architect—C. L. Brown, American
 Bldg., Oakland.

STOCKTON, San Joaquin Co., Cal.
 Standard Fence Co., 432 Bryant St.,
 San Francisco, at \$1,569.33 submitted
 lowest bid to city clerk to construct a
 chain link protection fence at Ameri-
 can Legion Park.

Following is a complete list of bids:
 Standard Fence Co., S. F. \$1,569
 Turner Hardware & Implement
 Co., Stockton 1,694
 Camlin Fence Co., S. F. 1,675
 Geo. C. Smith, Stockton 1,897
 Anchor Post Fence Co., S. F. 1,903
 E. R. Jamieson Co., S. F. 1,995
 Meyers & Barnett Hardware Co.,
 Stockton 2,033
 California Wire Cloth Co., S. F. 2,100
 Bids held under advisement until
 June 1.

SAN FRANCISCO.—Mission Con-
 crete Co., 270 Turk St., at \$115,432
 awarded contract by Board of Public
 Works to construct Sloat Boulevard
 Viaduct in connection with the Sun-
 set Blvd. Project. Complete list of

unit and total bids received on this project published in issues of May 22 and 25.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco or Phone Garfield 8744:

21075—Paints. San Francisco. Belgian manufacturer of white and colored enamel paints wishes connections for the sale of his products on the Pacific Coast.

21077—Mechanisms. San Francisco. French manufacturer of a complete line of large and small mechanisms seeks an agent in San Francisco.

21080—Representation. Vienna, Austria. Firm wishes to be appointed as representative of some American motor oil manufacturer or handler, whose products they could handle in Austria.

21081—Chain and Rolled Wire. San Francisco. Manufacturers of chain and rolled wire in Prague, Czechoslovakia, is seeking representation in San Francisco.

Cdenkirk Manufacturing Co., 214 Hippodrome Bldg., Cleveland, Ohio, is interested in securing concern interested in taking on the manufacture of an improved switch stand on a royalty basis.

Saul J. Baron Corp., 116 Forsyth St. New York City, manufacturers and distributors of various commodities for the soda fountain trade, restaurants, cafeterias and food concessions, is desirous of making contact with such concerns as are especially interested in reaching the New York market.

Leon F. Bink, General Delivery, Medford, Oregon, traveling in automobile wishes to contact manufacturer in this city who would be interested in having their merchandise represented in Northwestern territory.

B. O. Schmaling, General Manager, Amerca Metal Cabinet Co., Aurora, Ill., manufacturers of steel letter files, storage cabinets, blue-print cases, transfer cases, typewriter tables wishes to contact reliable steel furniture dealers on the West Coast to distribute their line of equipment.

D-3593, Manufacturers' Service Co., Houston, Texas., manufacturers agents wish to contact local firms with view to representing them in South.

J. Jirak, 299 Madison Ave., New York City, is desirous of establishing contact with some manufacturer in San Francisco, or elsewhere on the Pacific Coast, who is seeking distribution for his product in the East.

Frank N. Shaffer, The Chamber of Commerce of Pittsburgh, Pittsburgh, Pa., represents a manufacturer of high grade portable electric tool, wishes to establish sales agency in this city.

F. E. Stocking, California distributor of "Jiffy Couplings," 85 S Craig Ave., Pasadena, Calif., desires to connect with three salesmen who have experience in selling the hardware trade in San Francisco, Oakland and Fresno territories.

Our friend, Frederic W. Sanford, secretary-manager of the Orange County Builders' Exchange, in the current issue of his exchange bulletin cites ten reasons for the existence of a Builders' Exchange.

One reason is to eliminate the dishonest, unscrupulous and incapable factors who discredit the standing of the industry."

Eliminate the other nine reasons. If a Builders' Exchange can rid the industry of the thousands of undesirable now "stealing" a living from it—we should have such an organization in every community in the state.

LEGAL ASPECT OF DETERMINING WHAT IS LOCAL STANDARD WAGE

The Facts and the Question: A contractor has entered into a contract with a county for the construction of a court house. The specifications provide that the contractor shall pay "standard wages." The contractor works under open shop conditions. The carpenters have insisted that the contractor should pay the union scale of wages which is higher than the prevailing wages paid open shop carpenters. The question is asked whether there are any decisions as to the meaning of the "standard wage."

Discussion: A careful search has revealed no decisions in which the words "standard wage" have been defined by the courts. The word "standard" has been considered by courts in various connections. In the case of Penn Steel Casting & Machine Co. v. Wilmington Mill & Lumber Co., 41 A. (Del.) 236, 238, the court said:

"A standard *ex vi termini* (by force of the term) implies a measure or test which has the general concurrence and recognition of the class of persons engaged in the particular business or trade under consideration."

In the case of University v. Polk, Etc. Co., 87 Iowa 36, 88, the court held that the phrase "standard grade" was elastic and must be construed in view of the surroundings of the parties when they entered into the contract.

These decisions but follow the general rule, that, in the interpretation of contracts, the cardinal purpose of each is to arrive at the intention of the parties. It is a familiar rule of law that all courts, in the consideration of a contract, endeavor to ascertain first what was the agreement of the parties and then to enforce such agreement if what the parties intended and agreed upon is clearly expressed and can be ascertained from the contract itself, outside facts or

parade evidence will not be considered, but if there is an ambiguity or doubt as to what the agreement of the parties really was then the court will consider other facts, including the circumstances surrounding the parties at the time the contract was made in an effort to ascertain what the parties meant when they used certain words in the contract.

Applying these rules, it would appear that if there is anything in the other parts of the contract indicating that the words "standard wage" meant union wage scale, then the contractor would be obliged to pay that wage. If, on the other hand, there is nothing in the contract indicating such an intention, or the contract, for example, clearly gives the contractor the right to perform the contract with non-union labor, there would seem but little reason to require the standard wage to be held to be the union wage scale, but the standard wage would seem to be the prevailing wage for similar services in the community where the work was to be performed.

Of course, if the union wage scale was the prevailing wage scale of that community, it would become the standard wage under the contract not because it is a union wage scale but because it is the prevailing wage of the community. If there is nothing in the contract to indicate what the parties meant by the use of this term, but there was clear evidence that both parties intended that the same meant the union wage scale, then it would seem that the standard wage, as used in the contract, was the same as the union wage scale, but if there was not such a clear intention upon the part of both parties to the contract, it would seem difficult to require the contractor to pay the union wage scale unless, as above stated, it was the prevailing wage for similar services in the community where the work was to be performed.

AMERICAN ROLLING MILL COMPANY MARKETING NEW METAL CRIBBING FOR RETAINING WALL CONSTRUCTION

The American Rolling Mill Company of Middletown, Ohio, has announced another new use for sheet-metal—Armo Ingot Iron Cribbing for retaining walls.

The new metal cribbing is of a simple yet effective design. The wall is built up from standard formed galvanized sections, either six or eight feet in length, and held together by a sturdy interlocking device. Exhaustive experimental tests have been made for compression, shearing and bending of the units, both separately and when locked together.

From the engineering standpoint there are numerous advantages. First is economy of installation, as well as greater speed. The wall is in service as soon as installed, without waiting an interval for curing. The units are built four-th of the way for the known designs. This reduces transportation costs, and reduces the factor of expense in handling. It also eliminates the necessity for special handling equipment. The wall may be erected by unskilled labor.

The sturdy metal units may be dropped without fear of breaking or chipping. Being non-porous, they do not assimilate water and do not spall under freezing and thawing conditions as do some installations. Neither does settlement of the foundation soil crack the cribbing wall, when properly erected. Because the units are

light in weight, they can be placed on foundation soils which would require a pile or caisson sub-foundation if a heavy mass wall were constructed.

Another utilitarian quality of the new design is its flexibility. The metal cribbing can be dismantled and relocated without the loss of a single unit. The height of the wall can also be increased if it is necessary to raise the grade. The face of the wall need not be a straight line for it can be curved if desired.

Metal cribbing will be exceptionally useful for emergency installations. The standard sections can be stocked and their lighter weight will permit rapid transportation, handling, and installation when washouts or slides occur.

Where closed face walls are desired, the engineers have designed galvanized metal filler plates which fits in between the units, and prevents the backfill from filtering through.

The new cribbing will be used for railroad and highway retaining walls, for bridge wingwalls, and for river and harbor bank protection work. Another type of installation where it will prove extremely helpful is for underwater crib foundations, for large sections can be bolted together before submerging.

Distribution is in the hands of the Ingot Iron Railway Products Company of Middletown, Ohio.

Engineering News Section

BRIDGES

MENDOCINO COUNTY, Cal.—Until June 17, 2 P. M., bids will be received by State Highway Commission to construct bridge across the Russian River about 2 miles south of Ukiah, consisting of two 125-ft. timber truss spans and eight 19-ft. timber trestle spans and for grading and surfacing with bituminous treated crushed stone or gravel, 170-ft. of roadway approach.

CLARK COUNTY, Nevada.—Dodge Bros., Fallon, Nev., at \$18,221 awarded contract by State Highway Commission to construct reinforced concrete bridge approximately 1000 feet long, including approaches, over the Virgin river at a point between Mesquite and Bunkerville. Project involves:

- (1) 8300 cu. yds. roadway excav.
 - (2) 2000 cu. yds. structure excav.
 - (3) 75,604 yds. sta. overhaul.
 - (4) 1260 cu. yds. class A concrete in place.
 - (5) 1775 cu. yds. class D concrete in place.
 - (6) 1 corr. metal pipe culvert extension in place.
 - (7) 1504 lin. ft. standard timber guard rail in place.
 - (8) 8 monuments in place.
 - (9) 2 furnish and install posts for F. A. markers.
 - (10) 0.35 mile finishing roadway.
 - (11) 490,700 lbs. reinf. steel in place.
 - (12) 11,600 lbs. expansion rockers and plates in place.
 - (13) 7053 lin. ft. furnish timber piles.
 - (14) 5020 lin. ft. driving timber piles.
- Other bidders were: Utah Const. Co., \$138,995; Gibbons & Reed, Burbank, Calif., \$141,016; engineer's estimate, \$115,515. A complete tabulation of the bids received will be published shortly.

SACRAMENTO, Cal.—Until June 8, 10 A. M., bids will be received by H. W. Hall, county clerk, to construct a reinforced concrete bridge over Linda Creek, southeast of Rio Linda on the Dry Creek road. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from Charles Deterding, county engineer.

WOODLAND, Yolo Co., Cal.—County supervisors contemplate repairs to the Knights Landing Bridge across the Sacramento river. Surveys are now being made.

SAN JOSE, Santa Clara Co., Cal.—Thermotite Constr. Co., 530 Stockton Ave., San Jose, at \$13,978 submitted low bid to city council to construct reinforced concrete bridge over Guadalupe river at Home and West Virginia Sts. Project involves 425 cu. yds. concrete. Following is a complete list of bids received:

Thermotite Const. Co., San Jose	\$13,978
Neves & Harp, Santa Clara	\$14,843
L. C. Clark and Chas. Dougherty, Visalia	14,984
George Owens, San Jose	15,790
J. B. Carlson, San Jose	16,193
R. O. Summers, San Jose	16,193
John Doyle, San Jose	16,742
Chas. C. Collins and Wm. Martin, San Francisco	17,050
Sullivan & Sullivan, Oakland	17,898
June 1.	

Low bid held under advisement until!

SAN JOSE, Santa Clara Co., Cal.—City Engineer Wm. Popp making surveys for bridge at either San Augustine street, Fox avenue or Handline street, over Guadalupe Creek or Julian St. over the Coyote Creek to replace present wooden structure.

TULARE COUNTY, Cal.—J. S. Metzger & Son, 332 West Jefferson St., Los Angeles, at \$36,290 awarded contract by State Highway Commission to construct four and widen two reinforced concrete bridges slab bridges between Goshen and Kingsburg, varying in length from 30 to 105 ft. Complete list of unit and total bids on this project published in issue of May 25.

SAN FRANCISCO.—Mission Concrete Co., 270 Turk St., at \$115,423 awarded contract by Board of Public Works to construct Sloat Boulevard Viaduct in connection with the Sunset Blvd. Project. Complete list of unit and total bids received on this project published in issues of May 22 and 25.

VENTURA COUNTY, Calif.—Mitty Bros. Const. Co., Detweiler Bldg., Los Angeles, at \$282,303 submitted low bid May 27 to State Highway Commission to construct a deck plate girder bridge across the Santa Clara river about 1 mile south of Montalvo, consisting of twenty-one 86-ft. spans on concrete piers and abutments. Following is a complete list of bids:

Mitty Bros. Const. Co., L. A.	\$282,303
Owl Truck Co., Compton	298,530
H. M. Baruch Corp., L. A.	305,691
Macco Const. Co., Clearwater	304,156

Lynch-Cannon Eng. Co., L. A.	317,307
Merritt, Chapman & Scott, San Pedro	318,903
Oberg Bros., Los Angeles	320,749
Gen Engineering Co., Ltd., L. A.	326,288
Bodenhamer Const. Co., Oakland	326,288
land	332,151
Robinson-Roberts Co., L. A.	341,676
Rocca & Caletti, San Rafael	355,098

STREET LIGHTING SYSTEMS

SAN JOSE, Santa Clara Co., Cal.—City council has started proceedings to install electroler system in Fourth St., between San Fernando and San Carlos Sts. John J. Lynch, city clerk. Wm. Popp, city engineer.

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Co., San Carlos and Dupont Sts., San Jose, at \$35,310 (approx. \$6.30 per front foot) awarded contract by city council to widen West Santa Clara St., including the installation of an electroler system, from Market St. to the Los Gatos Creek Bridge.

MACHINERY AND EQUIPMENT

SAN JOSE, Santa Clara Co., Cal.—Until June 1, 8 P. M., bids will be received by C. B. Goodwin, city manager, to furnish a gasoline motor driven combined pumping engine and hose wagon. It is required that the pumping capacity be not less than 1000 gals.

of water per minute at 120 lbs. net pump pressure and that the apparatus be constructed as to carry at least 1,000 feet of 2½-inch double-jacket hose, all equipment, and eight men, without injury to the apparatus. In all other respects it is required that the apparatus shall be built and furnished to conform to the "Specifications for Gasoline Automobile Combination Pumping Engine and Hose Wagon" issued by the Committee on Fire Prevention and Engineering Standards, National Board of Fire Underwriters, 1929, a copy of which is on file with the City Clerk. Certified check 10% required with bid. Further information obtainable from the city manager.

SAN FRANCISCO.—Anderson & Cristofani at \$27,543.50 awarded contract by City Purchasing Agent, under Proposal No. 704, to furnish twin screw patrol boat for the Police Department.

SAN FRANCISCO.—Until June 9, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish four 4-door sedans of 2600-pound class. Specifications obtainable from above.

MANTECA, San Joaquin Co., Cal.—California Motor Coach Co., at \$1900 for body and \$2870 for Mack chassis, awarded contract by trustees of the Manteca High School District to furnish school bus.

EQUIPMENT

TURLOCK, Stanislaus Co., Cal.—Until June 16, 8 P. M., bids will be received by A. P. Ferguson, city clerk, to furnish 500 ft. standard fire hose, together with standard couplings, guaranteed pressure 400 lbs. and for five years against defective material and workmanship; No. 11 threads, double jacket, 66 threads both inside and outside; the first class grade of upriver Para rubber or its equal. Certified check 10% required with bid. Samples must accompany bids. Further information obtainable from city clerk.

RESERVOIRS AND DAMS

HUNTINGTON PARK, Los Angeles Co., Cal.—Until 8 P. M., June 1, bids will be received by city council to construct 3,000,000-gallon cut and fill type reinforced concrete reservoir with wood roof. Will be 220x140 ft. and 20 ft. deep. Est. cost \$20,000. Plans obtainable from city engineer, Howard S. McCurdy. Certified check or bond, 10%. W. P. Mahood, city clerk.

PIPE LINES, WELLS, ETC.

SAN FRANCISCO.—Youldall Const. Co., Matson Bldg., at \$4,046,479 awarded contract by Board of Public Works to construct San Joaquin Valley Pipe Line in connection with the Hetch Hetchy project. Pipe will be furnished by the Western Pipe & Steel Co. of San Francisco. A complete list of the unit and total bids published in issue of May 22.

WATSONVILLE, Santa Cruz Co., Cal.—City Engineer H. B. Kitchen has completed specifications and bids will be asked at once by M. M. Swisher, clerk, to drill emergency water well,

capable of producing 1200 gals. per minute at Second St. and Van Ness Ave.

SEWERS AND SEWAGE DISPOSAL PLANTS

WHITTIER, Los Angeles Co., Cal.—Black & Veatch, consulting engineers, 307 S Hill St., Los Angeles, completing plans to improve sewage disposal plant for odor control, involving reinforced concrete aeration tank two horizontal centrifugal pumps direct connected to electric motors, air blower, chlorination equipment requiring about 30-lbs. of chlorine a day. Est. cost, \$26,000.

SONOMA, Sonoma Co., Cal.—Until June 3, 3 P. M., bids will be received by H. W. Gottenberg, city clerk to furnish and deliver:

70 ft. cast iron soil pipe, extra heavy 6-inch.

Three 6-in. Tees, salt glazed sewer pipe.

154 4-in. Wyes on 6-in. sewer pipe.

3,440 ft. 6-in. salt glazed sewer pipe.

Three 24-in. manhole castings, covers and rings.

Specifications on file in office of clerk.

FAIRFIELD, Solano Co., Calif.—City votes bonds of \$6,000 to finance reconstruction of outfall sewer. A. M. Jensen, engineer, 68 Post St., San Francisco.

BALLARD, Wash.—Bids will be asked shortly by city council to construct intercepting sewer; estimated cost \$600,000. The sewer is designed to intercept sewage that at present is emptying into the Lake Union ship canal and divert it to an outlet west of the government locks in deep water. The project is known as the 38th Ave. NW intercepting sewer. It will follow the foot of streets from which sewers empty into the canal and along the route of Shilshole Ave.

MISCELLANEOUS CONSTRUCTION

SACRAMENTO, Cal.—Lindgren & Swinerton, Inc., California State Life Bldg., Sacramento, and Standard Oil Bldg., San Francisco, at \$59,000 submitted low bid to city council to construct the H Street subway, the city of Sacramento and the Southern Pacific Railroad to each share one-half cost. Complete list of bids follows, all being taken under advisement:

Lindgren & Swinerton	\$59,000
McGivray Const. Co., Sacto.	60,780
Holmes Const. Co., Sacto.	66,183
Frederickson & Watson,	
land	66,400
George Pollock	77,340
G. Gould, Stockton	83,900

Project involves:

178 30-ft. untreated wooden piles; 7250 cu. yds. excavation; 700 cu. yds. backfill; 9000 cu. yds. bow levee fill; 35,000 lbs. reinf. steel and mesh; 950 cu. yds. class A concrete; 950 cu. yds. class B concrete; 66.25 tons 33-in. steel girder beams; 6 tons structural steel floor girders; 16,800 sq. ft. concrete pavement; 3960 sq. ft. 3- and 4-in. sidewalk; 300 lin. ft. 2-in., 2-rail pipe railing.

Project consists of an underpass, bow levee and flood gates. Main structure, for underpass, to have gravity-type abutments built on piling. Deck to provide for three tracks, and consisting of 16, 33-inch 202-lb. Bethlehem, steel beams, with a clear span of 38 ft., topped with a 10-in. concrete slab with 1-in. of bituminous waterproofing. Five foot concrete walkways outside of and paralleling tracks. Vehicular portion to consist of 30-foot

California State Highway Commission standard concrete pavement, with 14 feet of vertical clearance, and one 7-foot pedestrian walk. Drainage to be disposed of by means of a sump and an automatically controlled electric pump. Bow levee to enclose the vehicular lane between the main structure and the flood gate structure—a distance of about 200 feet. Top of bow levee to be about 13 feet above natural ground, with crown width of 13 ft. and 2:1 side slopes. Flood gate structure to have conformed retaining walls and to be equipped with 2 steel gates 10 feet high, hinged at the walls and meeting at the roadway center line when closed.

WATER WORKS

VALEJO, Solano Co., Cal.—Until June 1, 11 A. M., bids will be received by A. E. Edgumbe, city clerk, to install 24-inch cast iron pipe line in Napa road and right of way and for alterations of a control house in Vallejo Township. Certified check 10% payable to city required with bid. Plans obtainable from T. D. Kilkenny, city engineer.

ST. HELENA, Napa Co., Cal.—Following contracts awarded by city council to furnish 6-inch cast iron pipe and connections; also lay pipe line from Pond's Well:

Pipe Fittings—C. G. Clausen, 825 Folsom St., San Francisco, \$6,971.33.
Construction—P. L. Burr, 320 Market St., San Francisco, \$3,543.
Valves—Rousselle Valve Co., 55 New Montgomery St., San Francisco, \$216.55.

Meter (one 6-inch meter)—Neptune Meter Co., 320 Market St., San Francisco, \$255.

ANAHEIM, Orange Co., Cal.—Until 5 P. M., June 9, bids will be received by city council to furnish one deep well turbine pump. The bowl of the pump is to be installed in the well 150 to 170 ft. below the surface. The pump is to have a capacity of 1000 G.P.M. against a total head of 280 ft. or 1500 G.P.M. against a 200-ft. head. Certified check 10%. Edward B. Merritt, city clerk.

LA VERNE, Los Angeles Co., Cal.—Until June 5, 7 P. M., bids will be received by Perry A. Yoder, city clerk, to furnish and install one motor driven, direct connected, deep well turbine pump with pump house and tower complete; pumping equipment to have capacity of 900 G.P.M. against a head of 350-ft. Plans on file in office of clerk and obtainable from Black & Veatch, consulting engineers, 307 S Hill St., Los Angeles.

EXETER, Tulare Co., Cal.—Pomona Pump Co., Pomona, at \$194 awarded contract by city trustees to furnish and install one deep well turbine pump, one horizontal centrifugal

booster pump and testing and developing one well.

SANTA BARBARA, Cal.—American Cast Iron Pipe Co., 412 W. 6th St., Los Angeles, awarded contract by city council at \$14,006.50 for furnishing cast iron water pipe and specials for a period of one year as follows:

Class B sand cast bell and spigot water pipe or 150-lb. pressure sand spun well and spigot coated water pipe, in the following sizes:

(1) 11½ ft. 8-in.;
(2) 26¼ ft. 16-in.;
(3) 62 ft. 12-in.;
(4) 118 ft. 14-in.;
with fittings, etc.

The prices bid for pipe, etc., follow:
American Cast Iron Pipe Co., \$14,006.50; 8-in., \$815; 10-in., \$2515; 12-in., \$8200; 14-in., \$1980.

R. W. Wood & Co., \$14,827.86; 8-in., \$1972; 10-in., \$2641.03; 12-in., \$8554.73; 14-in., \$2079.99.

C. G. Clausen & Co., \$17,151.80; 8-in., \$957.65; 10-in., \$2956.11; 12-in., \$19,382.57; 14-in., \$2262.41.

Pacific States Cast Iron Pipe Co., bid on three items only: 8-in., \$903.12; 10-in., \$2860.15; 12-in., \$9269.76.

SANGER, Fresno Co., Cal.—Byron-Jackson Pump Co., 6th and Carlton Sts., Berkeley, at \$156 awarded contract by city trustees to furnish and install deep well turbine pump on cement foundation at Plant No. 2, Block 31, Sanger. Pump for 14-inch standard double well casing; setting 80-ft. from base of discharge head to top of bowl assembly and equipped with 10-ft. of suction pipe, also screen of standard make; electrically controlled automatic oiler to be furnished with pump; pump capacity shall not be less than 700 gallons per minute at a total head of 200 feet of which 52 feet will be estimated well head; pump to be direct connected to a vertical auto-start electric motor, designed to operate under 440 volts, 3-phase, 60-cyc current. Complete list of bids follows:

Peerless Pump Co.	\$1048
Pelton Water Wheel Co.	1220
Pomona Pump Co.	1121
Winthrop Pump, Ltd.	1235
Fairbanks-Morse Co.	1242
Byron-Jackson Co.	1156
Pacific Pump Works	1290
Layne Pump Co.	1320
Sterling Pump Co.	1382
Kimball-Krough Co.	1500
Submersible Pump Works	2191

*Add \$108 for development of the well by a test pump.

SAN BERNARDINO, Cal.—Until 11 A. M., June 1, bids will be received by county supervisors to construct a circular concrete water tank, 20 feet in diameter and 7 feet deep, in Sleepy Hollow, Carbon Canyon, approximately 6 miles from Chino. Walls to be not less than 6 inches thick and floor to be not less than 4 inches thick. The

interior is to be coated with not less than three coats of waterproof cement. Tank is to be equipped with 8-inch pressure gate and 10 feet of concrete glazed pipe. Certified or cashier's check for 5 per cent required. Harry L. Allison, county clerk.

FAIRFIELD, Solano Co., Cal.—City votes bonds of \$42,000 to finance improvements to water system, including sinking new deep well, construct tank and tower, install pump and extend water mains. A. M. Jensen, engineer, 68 Post St., San Francisco.

BOULDER CITY, Nevada.—Pacific States Cast Iron Pipe Co., Provo, Utah at \$27,016 awarded contract by U. S. Bureau of Reclamation to furnish approximately 9 miles of pipe in connection with Boulder City water system. Pipe ranges from 2-in. to 12-in. Complete list of bids published in issue of May 7.

SACRAMENTO, Cal.—Bids will be asked shortly by the city council for grading and clearing the site for the \$49,000 water sedimentation basins. The work will cost approximately \$5,000. Bids will be asked later for furnishing piling and for pile driving following which bids will be asked for the construction of the sedimentation basins proper. Plans for work are being completed by Henry Dewell, engineer, 55 New Montgomery Street, San Francisco.

VANCOUVER, B. C.—Bids will be asked shortly by the Greater Vancouver Water District to construct pressure tunnel 3000 ft. long under the First Narrows of Vancouver Harbor. The work will consist of sinking two 400-ft. vertical shafts and excavating and lining the 7-ft. rock tunnel. Depth to rock at the north shaft will require pneumatic operations. The project also includes 1,000 ft. of 66 to 70-in. pipe line across Stanley Park. The work is an extension to the district's water-supply system.

STREETS AND HIGHWAYS

BERKELEY, Alameda Co., Calif.—American Bitumuls Co., Union Oil Co., and Shell Oil Co., at \$13,000 per ton, submitted identical bids to the city council to furnish not to exceed 1,000 tons of emulsified 95% road oil, L. O. Corporation Yard Spur, Berkeley, deliveries to be made from July 1, 1931.

SAN BENITO-MONTEREY-SAN LUIS OBISPO AND SANTA BARBARA COUNTIES, Cal.—Until June 10, 2 P. M., bids will be received by L. H. Gibson, district engineer, State Highway Commission, Bank of Italy Bldg., San Luis Obispo, for painting traffic stripes for designating traffic lanes on 254.26 miles in the above counties between the northerly boundary of San Benito County and the southerly bound-

dary of Santa Barbara County and between San Juan Bautista and Hollister in San Benito county.

SAN LUIS OBISPO COUNTY, Cal.—Until June 5, 2 P. M., bids will be received by L. H. Gibson, district engineer, State Highway Commission, Bank of Italy Bldg., San Luis Obispo, to treat with heavy fuel oil on each side of existing pavement, 2.3 miles between Arroyo Grande and Pismo. Specifications obtainable from engineer.

NAPA, Napa Co., Cal.—Ray E. Errington, Napa, at \$175.70 awarded contract by city council (\$59) to improve 5th St. bet. River St. and Soscol Ave., involving grading, concrete curbs, two-course emulsified asphalt macadam pavement, 40 ft. wide.

FRESNO-KERN COUNTIES, Cal.—Pacific Tank Lines, Inc., Los Angeles, at \$3206.50 submitted low bid to E. E. Wallace, district engineer, State Highway Commission, Fresno, to treat with light fuel oil as a dust palliative, 15.4 miles in Fresno county, between the west boundary and 2 miles east of Parkfield Junction and in Kern county, 8.2 miles between the west boundary and 2 miles west of Maricopa. Complete list of bids follow:

Pacific Tank Lines, Los Angeles	\$3206.50
Stewart & Nuss, Fresno	3339.00
Civil Crane Service, L. J.	3471.50
Hartmann Constr. Co., Bakersfield	3577.50
Kern Constr. Co., Bakersfield	4213.50
Wm. J. Schmidt, Berkeley	4478.50

MARIPOSA COUNTY, Cal.—A. Teichert & Son, Inc., 1846 37th St., Sacramento, at \$14,616 submitted low bid May 25 to E. E. Wallace, district engineer, State Highway Commission, Fresno, to cover with a bituminous surface treatment consisting of asphaltic road oil and screenings, 12.5 miles between Lerenes on the Bridgeburg grade and El Portal. Wm. J. Schmidt, Berkeley, only other bidder at \$17,225.

FRESNO, Fresno Co., Calif.—City council declares intention (H-D) to improve Coast Ave. bet. Olive Ave. and Elizabeth Ave., involving grading, cement concrete sidewalks, curbs and driveway approaches. 1911 Act. Hearing June 11. H. S. Foster, city clerk. Jean L. Vincenz, city engineer.

SAN JOSE, Santa Clara Co., Cal.—See "Street Lighting Systems," this issue. Contract awarded to San Jose Paving Co. for widening West Santa Clara St.

CARSON CITY, Nev.—Isbell Const. Co., Carson City, at \$82,866 awarded contract by State Highway Commission for oiling, widening and reconditioning Clear Creek Highway from Carson-Minden highway to Spooners

Station. Engineer's estimate \$92,300. Other bids: Nevada Rock and Sand Co., Reno, \$87,200; Dodge Bros., Fallon, Nev., \$89,987.

BERKELEY, Alameda Co., Calif.—Until June 2, 10 A. M., bids will be received by Florence E. Turner, city clerk, to furnish cement in carload lots, L. O. Corporation Yard, Alhston Way and West St., during the fiscal year commencing July 1, 1931. Cert. check \$100 required with bid. Spec. obtainable from clerk.

MONO COUNTY, Cal.—Until June 17, 2 P. M., bids will be received by State Highway Commission to surface with crusher run base and bituminous treated crushed gravel or stone, 12.9 miles between Sonora Junction and 4 miles south of Coleville.

NEVADA COUNTY, Cal.—Until June 17, 2 P. M., bids will be received by State Highway Commission to surface with crusher run base and bituminous treated crushed gravel or stone (plant mix), 8.8 miles between Truckee and Hinton.

TRINITY-SHASTA COUNTIES, Cal.—Until June 17, 2 P. M., bids will be received by State Highway Commission for bituminous treatment on 32.0 miles between Weaverville and Tower House.

MINERAL COUNTY, Nev.—Dodge Bros., Fallon, Nev., at \$65,016 awarded contract by State Highway Commission for grading, constructing structures and placing gravel surface on 10.42 miles between Hawthorne and Dutch Creek. Project involves:

- (1) 59,300 cu. yds. roadway excav.
- (2) 700 cu. yds. structure excav.
- (3) 20,200 cu. yds. selected borrow excavation in place;
- (4) 75,998 yds. spa. overhaul;
- (5) 10.42 mile prepare subgrade and shoulders;
- (6) 32,900 cu. yds. crushed rock or crushed gravel surf. in place;
- (7) 500 cu. yards crushed gravel or crushed rock in stockpile;
- (8) lump sum, furnish water equip.;
- (9) 2256 M. gals. apply water;
- (10) 86 cu. yds. class B concrete in place;
- (11) 972 lin. ft. 18-in. corrugated metal pipe in place;
- (12) 800 lin. ft. 24-in. do.;
- (13) 220 lin. ft. 36-in. do.;
- (14) 46 monuments in place;
- (15) 10.42 miles finishing roadway;
- (16) 650 lin. ft. remove & reconstruct fence.

Isbell Const. Co., Carson City, only other bidder at \$72,305. Engineer's estimate \$77,730. A complete list of the unit bids received on this project will be published shortly.

COLUSA COUNTY, Cal.—Until June 17, 2 P. M., bids will be received by State Highway Commission to grade and pave with Portland cement concrete 4.1 miles between 4 miles south of Williams and Williams.

SAN JOSE, Santa Clara Co., Cal.—City council declares intention (6364) to improve Filomena Ave. from San Pedro St. to a point 402 ft. westerly and a portion of San Pedro St., involving grading, 1 1/2-in. asph. concrete surface pavement on 3-in. asph. conc. base, cem. conc. curbs, gutters, walks and inlets, 8-in. vit. pipe drains, 1911 Act. Hearing June 15. John J. Lynch city clerk. Wm. Popp, city engineer.

SAN FRANCISCO.—Board of Public Works has repealed the ordinance ordering the improvement of Alamyndy Blvd. from Seneca to Ottawa Avenues, and authorized new proceedings to be started to provide for the improvement of the thoroughfare from Seneca to Naglee Aves. The cost is estimated at \$90,000.

HAWTHORNE, Nev.—A. D. Drumm Jr., Fallon, Nev., submitted low bid to Bureau of Yards and Docks, Navy Department, Washington, D. C., May 20, at \$15,413.33 for treating gravel roads at the Naval Ammunition Depot, Hawthorne, with asphaltic fuel oil, involving approximately \$3,000 sq. yds. A complete list of bids received will be published shortly.

SACRAMENTO, Cal.—Until June 8, 10 A. M., bids will be received by H. W. Hall, county clerk, for grading and paving Del Paso Blvd. from the North Sacramento city limits to Ben All Road. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Specifications obtainable from County Engineer Chas. Deterding.

MENLO PARK, San Mateo Co., Cal.—Until June 2, 8 P. M., bids will be received by Fannie I. Kurtz, city clerk (31-2) to improve Oak Grove and Cherry Aves., Laurel and Mills Sts., and Glenwood Ave., involving:

- (1) 3,000 cu. yds. excavation;
- (2) 1,200 cu. yds. embankment;
- (3) 40,620 sq. ft. 1½-inch Emulsified asph. pave. on 4-in. rock base;
- (4) 30,000 sq. ft. resurfacing;
- (5) 7,193 lin. ft. concrete curb;
- (6) 72 driveway entrances;
- (7) 6 part circle culverts;
- (8) 390 lin. ft. sewer connections;
- (9) 44,825 sq. ft. concrete sidewalks.

1911 Act. Bond Act 1915. Estimated cost, \$20,000. Specifications obtainable from Bert J. Mehl, city engineer.

SONOMA, Sonoma Co., Cal.—Until June 6, 7:30 P. M., bids will be received by H. W. Gottenberg, city clerk for asphaltic oil surfacing on six miles of streets, involving:

- (a) 50 barrels light oil;
- (b) 20 tons heavy oil;
- (c) 150 tons rock;
- (d) 100 tons screenings.

Certified check 5% required with bid. Specifications on file in office of clerk.

SAN FRANCISCO.—Bureau of Engineering, Dept. of Public Works, completes specifications to improve Wawona St. between 19th and 20th Aves. Estimated cost \$450. Project involves:

- (a) 450 lin. ft. 8-in. V.C.P. sewers;
- (b) 220 lin. ft. 8-in. V.C.P. sewers;
- (c) 1 trick manhole;
- (d) 125 lin. ft. 6-in. V.C.P. side sewers;
- (e) 12,000 sq. ft. asph. conc. pavement; 2-in. asph. conc. surface with 6-in. class F concrete base.

KERN COUNTY, Cal.—Pacific Tank Lines, Inc., 722 S-San Pedro St., Los Angeles, at \$3100.50 submitted low bid to F. G. Sommer, dismission, Risner, State Highway Commission, Bakersfield, for treating with heavy fuel oil as a dust palliative, 11.4 miles between Canebreak and Route 23, involving 1590 bbls. Complete bid listing follows:

Pacific Tank Lines, Inc., \$1.95; total, \$3,000.50.
Gilmore Oil Co., Ltd., 2.69; total, \$3,323.10.
California Road Oil Service Co., Ltd., \$2.34; total, \$3,726.60.
F. W. Nightbert, \$2.81; total, \$4,467.90.

ELKO COUNTY, Nevada—Utah Constr. Co., Ogden, Utah, at \$137,171.21 awarded contract by State Highway Commission to furnish, heat and apply asphaltic fuel oil and mixing it with crushed rock or crushed gravel surface on 31.44 miles between Elko and Death. Bids taken under advertisement. Project involves: 552,681 gals. asph. fuel oil applied to roadway surface; 31.44 mi. mixing asph. fuel oil with crushed rock or crushed gravel surface; 31.44 mi. rebuilding and finishing shoulders.

MONTEREY, Monterey Co., Cal.—City council declares intention 3137 to improve David Avenue, between Hawthorne and Pine Sts., and from Pine St. to west city limits, involving paving with 1½-in. asphalt macadam surface on existing water-bound macadam base; 24 1-inch house connection sewers. 1911 Act. Bond Act 1915. Hearing June 16. Clyde A. Dousey, city clerk.

SHASTA COUNTY, Cal.—Until June 11, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading and surfacing a portion of Section B of Route No. 1, The Loop Route, Lassen Volcanic National Park, 0.711 miles in length, involving:

- (1) clearing;
- (2) 5,600 cu. yds. unclass. excavation;
- (3) 18 cu. yds. unclass. excavation for structures;
- (4) 1,500 sta. yds. overhaul;
- (5) 300 cu. yds. crushed rock for surfacing;
- (6) 3 cu. yds. masonry;
- (7) 142 lin. ft. corrugated metal pipe in place.

Specifications obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to the Federal Reserve Bank of San Francisco.

SAN LUIS OBISPO COUNTY, Cal.—Until June 4, 2 P. M., bids will be received by L. H. Gilson, district engineer, State Highway Commission, Bank of Italy Bldg., San Luis Obispo, to treat with heavy fuel oil on each side of the existing pavement, 9.1 mi. between Atascadero and Paso Robles. Certified check 10% payable to the Director of Public Works required with bid. Specifications obtainable from the engineer.

SAN FRANCISCO.—C. B. Eaton, 715 Ocean Ave., only bidder, awarded contract by Board of Public Works to improve crossing of Fitzgerald Ave. and Jennings St. and Jennings Street bet. Fitzgerald and Glisan Ave., involving: 195 lin. ft. armored concrete curb, \$1; 660 sq. ft. 1-course concrete sidewalk, \$20; 4 brick catchbasins, \$19.90; 90 lin. ft. 6-in. V.C.P. culverts, \$2; 32 lin. ft. 12-in. V.C.P. sewer, \$3; 68 lin. ft. 6-in. V.C.P. side sewer, \$1; 6,113 sq. ft. asph. concrete pavement 2-in. asph. concrete surface on 6-in. class F concrete base, \$30.

SAN FRANCISCO.—Board of Public Works rejects bids received May 20 to improve crossing of Quintara and 33rd Ave. and Quintara between 33rd and 34th Aves., involving grading; curbs; walks; sewers and asph. conc. pavement. C. L. Harney, Call Bldg., was low bidder at \$3,063 but this bid was rejected due to the unbalancing of the bids on the various items. These bids published in issues of May 22 and May 25. New bids have been ordered received to be opened on June 3, 2:30 P. M.

- Project involves:
- (1) 600 cu. yds. excavation;
 - (2) 94 lin. ft. armored concrete curb;
 - (3) 3 brick catchbasins;
 - (4) 105 lin. ft. 10-in. V.C.P. culvert;
 - (5) 345 lin. ft. 21-in. V.C.P. sewers;
 - (6) 16 V or branches on 21-in. V.C.P.
 - (7) 40 lin. ft. 8-in. V.C.P. sewer;
 - (8) 3 brick manholes;
 - (9) 660 sq. ft. 1-course concrete sidewalk;
 - (10) 4893 sq. ft. asphalt concrete paving, consisting of 2-in. asphalt concrete wearing surface and 6-in. class F concrete base.

SAN FRANCISCO.—E. J. Treacy, Call Bldg., at \$5,911 awarded contract by Board of Public Works to improve Ingerson Ave. bet. Ingalls and Hawes Sts. and intersection of Redondo Ave.,

involving grading, asph. conc. pavement, etc. Complete list of unit and total bids published in issues of May 22 and 25.

SAN JOAQUIN COUNTY, Calif.—N. M. Ball, Porterville, at \$195,891 submitted low bid May 27 to State Highway Commission to improve highway between Turner Station and Stockton, 7.1 miles to be graded and 4.9 miles to be paved with Portland cement concrete. Following is a complete list of the bids:

Hannan Co., San Francisco	107,439
J. A. Raish, San Jose	not listed

SUTTER-BUTTE COUNTIES, Cal.—Jones and King, Hayward, at \$68,487 submitted low bid May 27 to State Highway Commission to place 11,000 tons treated rock borders on 13.2 mi. between Yuba City and Biggs Road. Following is a complete list of bids:

Jones & King, Hayward	\$68,487
F. W. Nightbert, Bakersfield	71,363
Clark & Henry Co., S. F.	79,438
Southern Call Roads, L. A.	79,703
J. E. Johnston, Stockton	81,255
A. Teichert & Sons, Sacramento	86,278
Granite Const. Co., Watsonville	86,782
Hemstreet & Bell, Marysville	86,892

KERN COUNTY, Cal.—Pacific Tank Lines, Inc., 722 S-San Pedro St., Los Angeles, at \$3100.50 (\$1.95 bbl.) awarded contract by State Highway Commission to treat with heavy fuel oil as a dust palliative, 11.4 miles be-

between Canebrake and Route 23, involving 1590 bbls. Complete list of unit and total bids reported in issue of May 25.

SAN FRANCISCO.—Meyer Rosenberg, 1755 San Bruno Ave., awarded contract by Roman Catholic Archbishop, 1100 Franklin St., for grading of the proposed College for Women near Turk St. and Masonic Ave. H. A. Minton, architect, Bank of Italy Bldg. The contract involves approximately 175,000 cu. yds. of rock and sand excavation.

SACRAMENTO COUNTY, Cal.—Basch Bros., 20,550 Normandie Ave., Tolerance, at \$189,565.50 awarded contract by State Highway Commission to grade and pave with Portland cement concrete, 7.2 miles between Brighton and Mills. Complete list of unit and total bids received on this project published in issue of May 27.

SANTA CRUZ, Santa Cruz Co., Cal.—Until June 5, 2 P. M., bids will be received by H. E. Miller, county clerk, to construct a portion of the Coast Road, about 4 miles north of Davenport in the Seaside Road District. Project involves:

- (1) 9000 cu. yds. roadway excavation without classification;
- (2) 120 lin. ft. corrugated metal culverts, 12-in. dia. in place.

Certified check 10% required with bid. Plans obtainable from Lloyd Bowman, county surveyor, on deposit of \$5, returnable.

SAN FRANCISCO.—Bureau of Engineering, Dept. of Public Works, 3rd floor, City Hall, completes specifications to improve Hyde Street between Chestnut and Bay Sts. Estimated cost, \$27,000. Project involves:

- (1) 1000 cu. yds. excavation;
- (2) 1300 cu. yds. embankment;
- (3) 1500 cu. yds. class B 2500-lb. concrete, in walls, etc.;
- (4) 62,000 lbs. bar reinforcement;
- (5) 450 lin. ft. 12-in. V.C.P. sewer;
- (6) 200 lin. ft. 6-in. V.C.P. side sewer;
- (7) 9 12x6-in. V. branches;
- (8) 2 brick manholes;
- (9) 2 brick catchbasins;
- (10) 90 lin. ft. 10-in. V.C.P. culverts;
- (11) 36 lin. ft. 6-in. V.C.P. underdrain, in broken rock;
- (12) 100 lin. ft. armored concrete curb;
- (13) 160 lin. ft. 2x16-in. redwood curb;
- (14) 18,300 sq. ft. 6-in. class E concrete pave, 1-in. brick header;
- (15) 4,800 sq. ft. 1-course concrete sidewalk;
- (16) 2 brick catchbasins, reset;
- (17) 1800 sq. ft. 4-in. macadam sidewalk, with emulsified asphalt wearing surface;
- (18) 2500 sq. ft. 8-in. waterbound macadam pave, 3/4-in. emulsified asphalt wearing surface;
- (19) 100 lin. ft. 1 1/2-in. galvanized conduit in place, including couplings and plugs;
- (20) 1300 lin. ft. 1 1/2-in. black iron pipe conduit.

CLARK COUNTY, Nevada—Until June 10, 2 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, to furnish, heat and pipe asphaltic fuel oil and mixing it with crushed rock or crushed gravel surface from Las Vegas to 10 miles southeast, 10.18 miles in length, involving:

- (1) 262,778 gals. asphaltic fuel oil applied to roadway surface;
- (2) 10.18 mi. mixing asphaltic fuel oil with crushed rock or crushed gravel surface;
- (3) 10.18 mi. rebuilding and finishing shoulders;
- (4) 5200 sq. yds. oiling shoulders and side slopes, including furnishing 2600 gallons asphaltic fuel oil.

NOTE.—The oil shall be delivered at the following railway siding and in

the quantity as shown: Las Vegas Siding, 267,378 gal.; average haul on entire contract, 7.55 miles.

Plans obtainable from engineer and at file in the office of the U. S. Bureau of Public Roads, 461 Market St., San Francisco.

SAN JOAQUIN COUNTY, Cal.—C. W. Wood, P. O. Box 1435, Stockton, at \$41,535 awarded contract by State Highway Commission to grade and surface with bituminous treated crushed gravel or stone, 3.5 miles between French Camp and Stockton. Complete list of unit and total bids received on this project published in issue of May 26.

SAN MATEO COUNTY, Cal.—Hannahan Co., Standard Oil Bldg., San Francisco, at \$1937.13 awarded contract by State Highway Commission for cement concrete pavement at S. P. Railway Underpass near Colma. Complete list of unit and total bids on this project published in issue of May 27.

YOLO-COLUSA COUNTIES, Cal.—Fred W. Nichol, Bakersfield, at \$24,140.26 awarded contract by State Highway Commission for 8.7 miles of bituminous treated rock borders between Dunnington and 1/2 mile south of Arbuckle. Complete list of unit and total bids on this project reported in issue of May 25.

MENDOCINO COUNTY, Cal.—Jas. W. Bertram, Hopland, at \$7131.25 submitted low bid to F. W. Hazelwood, district engineer, State Highway Commission, Eureka, to surface with untreated crushed gravel or stone, 2.1 miles between Piercy and the north boundary. Following is a complete list of bids received, all referred to Sacramento office for action:

Jas. W. Bertram, Hopland \$ 7,131.25

Tieslau Bros., Berkeley 8,636.75

Smith Bros., Eureka 10,993.00

Minnesota's Minimum Wage Rates Announced

The first job on which Minnesota's minimum wage ruling is to be effective will be the Moorhead Teachers' College. The scale drawn up for this work will vary somewhat on other jobs depending on the rate of wages in the communities where the work is done. Local labor is to be used on all jobs where competent craftsmen are available, the Department of Administration and Finance states. The minimum rates on the Moorhead job are as follows: Electricians, \$1.25 per hour; plumbers, \$1.12 1/2; bricklayers, \$1.25; painters, 85 cents; sheet metal workers, 85 cents; plasterers, \$1.00; cement finishers, 65 cents; carpenters, 80 cents; building laborers, 50 cents; plaster tenders, 55 cents.

Uses of the Ateco hydraulic dirt mover are featured in a 12-page bulletin 131, issued by the American Tractor Equipment Co., Oakland, Cal., and Peoria, Ill.

A new catalog illustrating and describing in detail a complete line of core drills, supplies and equipment has just been issued by Sprague & Henwood, Inc., Scranton, Pa.

Bars, plates, structural shapes and rail steel products of the Inland Steel Co., First National Bank Building, Chicago, Ill., are listed in a 48-page pocket-size catalog, "Sizes We Roll and Standard Extras."

Catalog 495 of the Jeffrey Mfg. Co., Columbus, O., describes six principal types of spiral conveyors and accessories including the following: sectional flight, helical, mixer, cut flight ribbon and cast iron.

The Oakland School Board can recommend that the "prevailing wage" scale be paid by contractors on school buildings, but it has no legal authority to enforce such a rule or to force contractors to employ local citizens.

This was the explanation of the board's position by J. W. Edgar, secretary, following a report from the Alameda county building trades council of complaints that a lower scale is being paid on the Fremont high school job.

Charles R. Gurney, secretary-treasurer of the building trades council, presented the matter at a school board meeting. He said his organization had been informed that the firm of Charles D. Vezev & Sons is paying \$8 a day to the majority of its carpenters on the Fremont school job, whereas the prevailing rate is \$9. The hoisting engineer is paid \$5 a day, which is \$4 beneath the scale, and laborers are paid lower than the scale, according to complaints Gurney said.

W. E. Wakeley, superintendent of buildings, is to make an investigation of the wage scale at the Fremont school and report back next Tuesday night to the school board.

But the school board can only recommend to the contractor that he pay the prevailing wage, if it is disclosed he is not, according to Edgemont.

Oakland school contracts are set under state laws, Edgemont explained, which provide for letting jobs to the lowest bidder, but give the board no authority to specify what wage shall be paid or whom the contractors shall employ.

San Francisco has such authority under its county charter, he pointed out, which permits the writing in of "prevailing wage" clauses in building contracts and provides work must go to citizens.

Members of the board, Edgemont said, expressed themselves in favor of all the points brought up by Gurney, but found themselves unable to do more than recommend employment of citizens and maintenance of the wage scale.

Economies of floor and roof construction using Stalex, a wire reinforcing mesh with integral fiber back, forcing that combines reinforcement and form, are outlined in a 24-page illustrated catalog issued by the National Steel Fabric Co., Union Trust Bldg., Pittsburgh, Pa.

Reverend Alfluresid Co., 27 East Water St., Cincinnati, Ohio, has issued three pamphlets dealing with the uses of Fluoresid, a Duroc, a waterproof for concrete, Duronic, a special type of hard aggregate for concrete floors, and Lapidensin, a waterproof preservative for brick, stone and stucco.

Adrian D. Joyce, president of the Glidden Co., manufacturers of paints and varnishes, chemical and pigments and foods, declares the financial statement for the first six months of the fiscal year will show a profit. He added that Glidden's business made an upturn in March, and prospects for the balance of the year are favorable.

The Elaw-Knox Company has acquired the exclusive sales and manufacturing rights of the "Ateco" line of earth-moving machinery from the American Tractor and Equipment Company of Oakland, Calif., for the United States, east of the Rocky Mountains and for all other countries. The line includes hydraulically operated earth movers, bulldozers, scarifiers, tamping rollers and combination outfits.

From and after June 1, 1931, the San Francisco Department of Electricity will approve the use of electrical metallic tubing insofar as it is permitted by the 1950 Code, and the changes as recommended by the Electrical Committee of the National Electrical Code. The announcement is made by Ralph W. Wiley, chief of the department.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

HOW

To reach the Construction Market
in one of the Wealthiest Sections of the World

THE tide of population is sweeping Westward. New structures of all kinds are under way and being planned. California is growing three times faster than the United States as a whole.

Leading architects, engineers, contractors and materials distributors are planning for the great new building program immediately ahead.

Wide awake manufacturers of building products and their advertising agencies are planning now to concentrate their selling energy in the great San Francisco metropolitan district.

Every architect in this district, practically every general and sub-contractor and materials dealer, reads the Daily Pacific Builder **every day**. To them it is just as necessary as Standard Rate and Data to an agency space buyer.

Founded forty years ago, Daily Pacific Builder counts among its constant readers hundreds of executives who direct the huge construction projects in this most prosperous market.

Write for analyses of circulation, rates and market data.

\$1,903,200 ROAD PROJECTS APPROVED

Highway construction projects involving an expenditure of \$1,903,202 and including a reduction of 3.8 miles in the distance between Sacramento and Oakland have been approved by the State Highway Commission. It is announced by C. H. Purcell, state highway engineer.

The Sacramento-Oakland project will cost \$319,600. In addition, the route between Sacramento and Oakland will be reduced another five miles, or a total of 8.8 miles, when the Kline-Edwards bills, providing a new road through the American canyon become effective.

Under the plan approved by the commission, the new route will leave the present highway west of Fairfield, Solano county, near the Solano County Hospital, and continue in a southerly direction, paralleling the electric railroad, to Cordelia.

The expenditure of \$931,000 for rerouting the Coast highway between Los Alamos and Santa Maria in Santa Barbara County, which will reduce the distance between these cities, was approved by the commission.

Rerouting of the Golden State highway through Ekersfield at a cost of \$642,000 was authorized and the commission also approved a plan for the state to assume jurisdiction of the streets in the city of Sonoma for maintenance. These streets are a continuance of the state highway through Sonoma.

PROGRAM OF PUBLIC WORKS IN BELGIUM

The Belgian government has a program of public works which, with other projects now under consideration, will involve an expenditure exceeding \$100,000,000.

The most important is construction of the Albert Canal, to link Antwerp directly to the River Meuse at Liege, work on which was started in 1930. The construction will take eight years and will cost \$30,000,000.

A tunnel under the Scheldt at Antwerp to cost \$9,000,000 has been started. In Brussels a \$20,000,000 plan is under consideration for reconstructing the railway system, involving the modernization and enlargement of the stations and the construction of a uniting line with six tracks and a station in the center of the city.

Railway electrification is being investigated, particularly on the Brussels-Antwerp and Brussels-Luxembourg lines, and large orders will be placed shortly for rolling stock for the various railroads. Rapid progress is being made in Brussels on the construction of the Charleroi Canal.

International Road Machinery Exposition will be held July 20-26 at Los Angeles. This new show is under the direction of E. G. Lenzner, P. O. Box 338, Watts Station, Los Angeles.

Surveyor and Aide Given Jail Sentence

Probation under drastic terms for a period of five years was granted by Superior Judge L. W. Fulkerth at Modesto to John H. Hoskins, former Stanislaus County surveyor and Henry C. Greene, one of his assistants. Both had pleaded guilty to altering county payrolls.

Under terms of the probation, each man must serve two years in the county jail and restore within ten days the sum of \$5212 taken by the padding of payrolls. They also must pay an additional \$800 for a special audit made of the books of the surveyor's office under the term of Hoskins.

Attorney Thomas C. Boone, counsel for the accused, said both sums will be paid within the ten days.

Failure to make both payments, totaling \$6012, will be construed as a violation of terms of the probation. Judge Fulkerth declared and both men will go to San Quentin Prison.

The two-year jail term was said by court attaches to be the longest ever given in a probation case.

Development of Rigid Conduit for Electrical wiring

For the purpose of inquiring into the experience which has attended the use of rigid conduit as a protective electrical raceway the Electrical Testing Laboratories of New York have prepared a critical history of the development of rigid conduit, which has just been published by the Trade Extension Committee of the Rigid Conduit Section of the National Electrical Manufacturers Association.

While an academic study of the origin of this important electrical raceway, this book has much of interest and value to architects, electrical engineers, contractors and inspectors. It reveals the various attempts to eliminate hazards that developed in the early days when slightly protected wiring was buried behind plastered walls, in damp places and in positions subject to mechanical abuse. It points out the trial and failure of pasteboard and thin wall metal tubings of various types; the attempt to use a wood lined metal tubing and finally the successful employment of heavy wall mild steel conduit with suitable protective coatings which was "approved" by the first National Electric Code in 1897 and which has been employed to the present day with practically no changes in form or characteristics.

The document will have a particular appeal to the serious student of electrical products and their proper use. Copies of the Report may be secured by writing to George H. Sicard, Secretary, Rigid Conduit Section, Utica, New York.

MAY BUILDING TOTALS \$2,853,671

Building operations in San Francisco for the month of May, 1931, involved an expenditure of \$2,853,671, according to John B. Leonard, superintendent of the Bureau of Building Inspection of the Department of Public Works. During the month 530 permits were issued.

May, 1930, totals registered 570 permits for improvements valued at \$2,881,119. During April, 1931, 703 permits were granted for construction costing \$1,837,433.

Building operations undertaken during the first five months of this year involved an expenditure of \$10,324,887 as compared with \$10,316,120 for the corresponding period in 1930. During the past five months 2,758 permits were granted as compared with 2845 permits for the same period in 1930.

The May, 1931, operations include construction in connection with the War Memorial and Opera House Project, estimated at \$1,000,000.

Following is a segregated report of the May, 1931, activities:

	No.	Amount
Class B	2	\$ 210,000
Class C	14	308,630
Frames	150	855,731
Alterations	331	1,68,702
Public Bldgs.	1	1,000,000
Govt. Bldgs.	2	310,608
Total	530	\$2,853,671

LUMBER ORDERS BELOW PRODUCTION

Orders for lumber received at the mills during the week ended May 16 were approximately 9 per cent under production. It is indicated in telegraphic reports from 775 leading hardwood and softwood mills to the National Lumber Manufacturers Association. This is the third successive week and the fourth week this year showing an unfavorable order-production ratio, though the curb has been low. Production for the latest week reported by these mills amounted to 234,257,000 feet. Shipments were 4 per cent above this figure. A week earlier orders reported by 787 mills were 8 per cent below and shipment 1 per cent below total of 237,137,000 feet. Comparison by cut of mill figures of reports for the latest week with those for the equivalent period a year ago shows—for softwoods, 457 mills, production 34 per cent less, shipments 21 per cent less and orders 34 per cent less than for the week in 1930; for hardwoods, 206 mills, production 42 per cent less, shipments 15 per cent less and orders 21 per cent under the volume for the week a year ago.

Tice Lumber and Planing Mill in Del Monte Avenue, Monterey, suffered a \$10,000 fire loss last Wednesday. The loss is partially covered by insurance.

PREVAILING WAGE BILL IS SIGNED BY GOVERNOR ROLPH

The people of the State of California do enact as follows:

Section 1. Not less than the general prevailing rate of per diem wages for work of a similar character in the locality in which the work is performed, and not less than the general prevailing rate of per diem wages for legal holiday and overtime work, shall be paid to all laborers, workmen and mechanics employed by or on behalf of the State of California, or by or on behalf of any county, city and county, city, town, district or other political subdivision of the said state, engaged in the construction of public works, exclusive of maintenance work. Laborers, workmen and mechanics employed by contractors or subcontractors in the execution of any contract or contracts for public works with the State of California, or any officer or public body thereof, or in the execution of any contract or contracts for public works with any county, city and county, city, town, township, district or other political subdivision of said state, or any officer or public body thereof, shall be deemed to be employed upon public works.

Sec. 2. The public body awarding any contract for public work on behalf of the State of California, or on behalf of any county, city and county, city, town, township, district or other political subdivision thereof, or any public works, shall ascertain the general prevailing rate of per diem wages in the locality in which the work is to be performed, for each craft or type of workman or mechanic needed to execute the contract, and shall specify in the call for bids for said contract, and in the contract itself, what the general prevailing rate of per diem wages in the said locality is for each craft or type of workmen needed to execute the contract, also the general prevailing rate for legal holiday and overtime work, and it shall be mandatory upon the contractor to whom the contract is awarded, and upon any subcontractor under him, to pay not less than the said specified rates to all laborers, workmen and mechanics employed by them in the execution of the contract. The contractor shall forfeit as a penalty to the state or political subdivision, district or municipality on whose behalf the contract is made or awarded, ten dollars for each laborer, workman, or mechanic employed, for each calendar day, or portion thereof, such laborer, workman or mechanic is paid less than the said stipulated rates for any work done under said contract, by him, or by any subcontractor under him, and the said public body awarding the department of industrial relations or by said awarding body; and provided, further, that in all cases of contracts with assessment or improvement districts, where full payment is contract shall cause to be inserted in the contract a stipulation to this effect. It shall be the duty of such public body awarding the contract, and its officers and agents, to take cognizance of complaints of all violations of the provisions of this act committed in the course of the execution of the contract, and, when making payments to the contractor of moneys becoming due under said contract, to withhold and retain therefrom all sums and amounts which shall have been forfeited pursuant to the herein said stipulation and the terms of this act; provided, however,

Governor Rolph has signed Senate Bill No. 26, known as the "prevailing wage bill," passed by the Legislature, and it will go into effect August 14 next, 90 days after adjournment of the Legislature. This bill provides that on all public works in California the wages to be paid shall not be less than the "general prevailing rate" in the locality where the work is being done. This prevailing rate of wages is to be determined by the contracting authority, is to be inserted in the advertisement for bids and is finally to be incorporated in the contract for the work involved. A penalty of \$10 per each violation of the law is provided.

that no sum shall be so withheld, retained or forfeited, except from the final payment, unless as a result of an investigation by either the division of labor statistics and law enforcement of the state made in the form of a single warrant, or other evidence of full payment, after completion and acceptance of the work, the awarding body shall accept from the contractor in cash a sum equal to, and in lieu of, any amount required to be withheld, retained or forfeited under the provisions of this section and said awarding body shall then release the contractor or payment in full. It shall be lawful for any contractor to withhold from any subcontractor under him sufficient sums to cover any penalties withheld from him by the awarding body on account of the said subcontractor's failure to comply with the terms of this act, and if payment has already been made to him the contractor may recover from him the amount of the penalty or forfeiture in a suit at law.

Sec. 3. The contractor and each subcontractor shall keep, or cause to be kept, an accurate record showing the names and occupations of all laborers, workmen and mechanics employed by him, in connection with the said public work, and showing also the actual per diem wages paid to each of such workers, which record shall be open at all reasonable hours to the inspection of the public body awarding the contract, its officers and agents, and to the chief of the division of labor statistics and law enforcement of the state department of industrial relations, his deputies and agents.

Sec. 4. Construction work done for irrigation, utility, reclamation, improvement and other districts, or other public agency or agencies, public officer or body, as well as street, sewer and other improvement work done under the direction and supervision or by the authority of any officer or public body of the state, or of any political subdivision, district or municipality thereof, whether such political subdivision, district or municipality thereof operates under a freeholder's charter heretofore or hereafter approved or not, also any construction or repair work done under contract, and paid for in whole or in part out of public funds, other than work done directly by any public utility company pursuant to order of the railroad commission or other public authority, whether or not done under public supervision or direction, or paid for

wholly or in part out of public funds, shall be held to be "public works" within the meaning of this act. The term "locality in which the work is performed" shall be held to mean the city and county, county or counties in which the building, highway, road, excavation or other structure, project, development or improvements is situated in all cases in which the contract is awarded by the state, or any public body thereof, and shall be held to mean the limits of the county, city and county, city, town, township, district or other political subdivisions on whose behalf the contract is awarded in all other cases. The term "general prevailing rate of per diem wages" shall be the rate determined upon as such rate by the public body awarding the contract, or authorizing the work, whose decision in the matter shall be final. Nothing in this act, however, shall be construed to prohibit the payment to any laborer, workman or mechanic employed on any public work as aforesaid of more than the said general prevailing rate of wages, nor shall anything in this act be construed to permit any overtime work in violation of section 6530 of the Penal Code.

Sec. 5. Any officer, agent or representative of the State of California, or of any political subdivision, district or municipality thereof, who wilfully shall violate, or omit to comply with, any of the provisions of this act, and any contractor, or subcontractor or agent or representative thereof doing public work as aforesaid, who shall neglect to keep, or cause to be kept, an accurate record of the names, occupations and actual wages paid to each laborer, workman and mechanic employed by him, in connection with the said public work or who shall refuse to allow access to same at any reasonable hour to any person authorized to inspect same under this act, shall be guilty of a misdemeanor, and upon conviction shall be punished by a fine of not exceeding five hundred dollars, or by imprisonment for not exceeding six months, or by both such fine and imprisonment, in the discretion of the court.

Sec. 6. If any section, sentence, clause or part of this act, is for any reason held to be unconstitutional, such decision shall not affect the remaining portions of this act. The Legislature heretofore declared that it would have passed this act, and each section, sentence, clause, or part thereof irrespective of the fact that one or more sections, sentences, clauses, or parts be declared unconstitutional.

IRON GATE POWER DAM TO GO AHEAD

Preliminary work on the Iron Gate power dam on the Klamath River in Siskiyou County, will be started shortly by the California Oregon Power Company. Camps for construction crews are now being located.

Actual construction will be started on the dam in the Fall. Application has been made to the federal power commission to construct the 160-foot capacity of the first unit will be 14,000 horsepower. This can be raised by future construction to about 40,000 horsepower. Several hundred men will be employed on the project for about eighteen months. The cost of construction is estimated at \$5,000,000.

ARCHITECTS WILL SHARE IN FEDERAL BUILDING PROJECTS

Calling upon President Hoover to protest the alleged reluctance of the treasury department to turn over preparation of plans and specifications to outside architects is slowing up the federal public buildings program, a delegation representing the Associated General Contractors, the American Institute of Architects and the American Engineering Council was informed that approximately 75 per cent of this work has been placed in private hands according to Paul Wooton, Washington correspondent for Engineering News-Record.

A report by the treasury department to the President reveals that the drawings for most of the large projects have been assigned to private architects. While only 55 of the 201 projects now in the drawing stage have been placed in the hands of private architects, these total \$169,017,023, compared with a total of \$46,171,700 for the 143 projects that the supervising architect has in hand. Of the 46 projects over \$1,000,000 which have been taken up for drawings since March 31, 1930, 22, to cost \$163,983,023, have been assigned to architects outside the department.

As a result of the White House conference it has now been decided that as new sites are accepted all jobs that the supervising architect's staff can not handle within 30 to 60 days will be assigned to private architects.

BOARD IS NAMED ON BUILDING CODE

Under a provision of the uniform building code adopted recently by the City of Stockton, City Manager Walter B. Hogan appointed a board of examiners and appeals, composed of five members, to deal with operation and regulation by the code.

The members are Peter L. Sala, architect; William J. Scott, building contractor; Warren H. Atherton, lawyer; Henry Ohm, civil engineer, and Chas. W. Gulick, instructor in engineering at the College of the Pacific.

William A. Curtis, city building inspector, as an ex-officio member and secretary of the board, will have authority to call meetings.

NEW GARBAGE PLAN HITS SEA DUMPING

Three proposals for the disposal of garbage has been submitted to the San Francisco Board of Supervisors by the Health Committee. The three proposals are:

1.—That the incinerator shall be constructed on plans submitted by the City Engineer.

2.—That an incinerator shall be constructed on plans submitted by the bidders.

3.—Disposal of garbage by any plan other than dumping at sea.

The matter will come before the board for discussion next Monday.

Although there is still a surplus of workers, employment conditions in California have improved during this month and the increase is expected to continue, the Pacific Division of the U. S. Department of Labor reports.

Thomas Hamlin, art stone contractor, has been elected president of the Pasadena Builders' Exchange. H. O. Clarke was elected vice-president and George L. Throop, treasurer. George W. Israel was re-elected secretary-manager.

GYPSUM PRODUCTION SLACKENS IN 1931

Production of the gypsum industry in 1930 fell below the level for the preceding year, according to a statement made public by the United States Bureau of Mines, Department of Commerce, based on reports received from 56 operators in 16 States and collected in co-operation with the Geological Surveys of Iowa, Kansas, Michigan, New York, Oklahoma, South Dakota, Texas, and Virginia.

The quantity of gypsum mined in the United States in 1930 was 3,471,393 short tons, a decrease of 1,541,739 tons, or 31 per cent compared with 1929. This production, however, was greater than that of any year prior to 1922 and was more than 10 per cent larger than that of 1929.

The total value of the calcined and uncalcined gypsum sold by producers was \$27,063,181, a decrease of \$4,241,185, or 14 per cent compared with 1929. The quantity of gypsum sold by producers without calcining in 1930 was 989,591 short tons, a decrease of 76,106 tons, or 7 per cent, compared with 1929, and was valued at \$1,836,234 or \$1.91 per ton, a decrease of \$210,525, or 10 per cent, in value and of 6 cents per ton; the quantity of calcined gypsum sold by producers was 2,191,376 tons, a decrease of 1,170,291 tons, or 55 per cent and was valued at \$25,165,226. This was a decrease of 14 per cent in total value compared with 1929.

New York continues to be the largest producer of gypsum. The production of crude gypsum in that State in 1930 was 912,070 tons, a decrease of 29 per cent from that of 1929. This was 26 per cent of the entire quantity mined in the United States. New York is also the largest seller of gypsum, marketing 275,294 tons without calcining, or 28 per cent of the United States total, and 573,602 tons calcined, or 32 per cent of the total. These figures represent a decrease of 8 per cent in the uncalcined and 23 per cent in the calcined gypsum compared with 1929. Other important States in the production of crude gypsum in 1930 were Michigan, 519,225 tons, or 43,017 tons; Texas, 459,245 tons; and Ohio, 255,237 tons. These five States reported 73 per cent of the total production of crude gypsum in 1930.

Possibility of the formation of a public utility district to include the lands of the Corcoran Irrigation District and the city of Corcoran, 20 miles south of Hanford, loomed last Wednesday, following a mass meeting of citizens. Establishment of a natural gas plant or smaller unit with natural gas as fuel, is proposed.

Sixth annual convention of the Northwestern Section, International Association of Electrical Inspectors will be held in the Chamber of Commerce headquarters in Salem, Ore., October 5, 6 and 7. It is announced by W. M. Hamilton, secretary of the association.

New construction at California's state institutions, totaling \$2,900,000 for the next biennium, is provided in the budget approved by Dr. J. M. Toner, state director of institutions. The general budget includes \$3,151,000 for general support during the forthcoming fiscal year in addition to the building allowances.

Permits for six new buildings costing \$40,400 were issued during the month of May in Alameda. Permits for alterations and repairs to standing structures, 48 in number, involved an expenditure of \$9,982, bringing the total operations for the month to \$50,382.

STATE REALTY LICENSES DROP

California's "army" of real estate brokers and salesmen has suffered a marked decrease in 1931, according to figures released by the State Division of Real Estate.

Licensed salesmen total 13,473 as compared to 25,237 in the State a year ago, while the number of licensed brokers totals 18,877 this year as against 19,275 in 1930.

The grand total of salesmen and brokers of 31,350 compares rather unfavorably with 44,512 in 1930; 55,812 in 1929; 62,751 in 1928 and 65,570 in 1927, the peak year.

As a result of the falling off in licenses issued the revenues of the division have fallen off to an extent that the division is facing the necessity of cutting its office force.

The most favorable factors in the immediate outlook for the building industry are the low cost of construction and the rising volume of residential building, says the Union Trust Co., Cleveland. During the first quarter of 1931 the floor space of new homes built exceeded the same period last year by 2 per cent.

"The record for non-residential construction and for the public work is less favorable, the decline continuing in these fields," says the bank in its magazine Trade Winds. "Building material costs are from 10 per cent to 20 per cent below the levels of one year ago."

"Conditions for the construction or purchase of a home have not been more propitious in the past 14 years with land and material prices at near bottom levels. However, the prospective home builder faced with curtailed earning and uncertain employment is delaying his purchase of a home. Improvement in general economic conditions should be reflected immediately in an accumulated demand for new homes."

"In the non-residential field, including commercial buildings, factories, public buildings, hospitals, institutions and churches, there has been a marked decline in activity caused by unfavorable business conditions. Financing is difficult to obtain, and many industrial concerns are being hit the burden of excessive plant capacity."

"Public works, embracing highway construction, public utility extensions and other projects by private and public corporations have been curtailed as the result of increasing tax rates or insufficient financing. Many governmental units are faced with large deficits resulting from delinquent taxes. While recent surveys showed a need for an expenditure of some \$4,500,000 in public projects, less than one-fourth are actually going forward."

Current consumption of common brick, according to a report of the Common Brick Manufacturers' Association of America, is running close to the output, the plant supplying the market shipping approximately 16,000,000 bricks a week, an increase of about 60 per cent over last year. Since January 1 the average demand has been about 35 per cent higher than in 1930, while shipments recently have run close to 100 per cent ahead of last year.

A. B. Tarpey, president of the Fresno Irrigation District, will be recommended to Governor Rolph by the directors of the Fresno County Chamber of Commerce, as Fresno district representative on a special citizens' committee to study the state-wide water plan. The Governor has requested representative bodies throughout the state to select desirable appointments.

THE OBSERVER

What He Hears and Sees on His Rounds

In issuing a building permit to a contractor, the City of Vallejo is not concerned in whether the contractor has a state license, the city council was advised by City Attorney Russell F. O'Hara. Compliance with local ordinances, is the only necessity. The opinion was rendered following receipt of an inquiry from Roy V. Morris, secretary of the Vallejo Builders Exchange, asking if it was legal to issue a permit under such circumstances.

James W. Doherty, real estate operator, announces organization of the Realty Investors Corporation of San Francisco, capitalized for \$250,000. The company will engage in rebuilding and modernizing structures in the Mission District.

Wage reductions were branded as "unsound and false economy" by Vierling Kersey, state director of education in a report to Governor Rolph.

"The result of such actions is to make conditions worse instead of better. The maintenance of adequate salary levels guarantees continued spending and will eventually aid in stabilizing economic conditions," Kersey stated.

Kersey also attacked the proposal to reduce the pay of teachers and other public employes, pointing out that the pay of teachers "has just reached a fair level."

Instead of looking down at motion pictures as you do now, you may some day be looking up to them if an idea presented at the Society of Motion Picture Engineers by Ben Schlender, New York theatre architect, is adopted.

Schlender's plan is to reverse the slope of the theatre floor, making it slant upward to the screen instead of down as it now is. The architect says the sight lines as they are fixed in the present type of theatre cause the spectator to sit with much bodily discomfort and frequently with a distorted view of the screen. Schlender said:

"Persons sitting on the orchestra floor must tilt their heads backward to see the screen. In the balcony, the seat angle makes it necessary for the patron to pitch his body forward. Study has shown that it is impossible to correct these faults without entirely disregarding the present theatre form and creating a new one."

A live topic of discussion among the civil engineers of California is the possibility of reaching a saturation point in the profession. The state's registration has risen to more than 5000 professional civil engineers, a ratio of almost one to the thousand of population. This is sufficient reason for the speculation.

"Under ordinary conditions do the direct and indirect requirements of every thousand of population require the time of a professional civil engineer?" asks Engineering News-Record. Continuing that publication says:

"The medical calling had an old-fashioned rule of thumb that one physician per thousand is about all the traffic can bear. That was before the day of the specialist and the clinic, and today the tolerable ratio is no doubt higher. Perhaps engineering is emerging into the clinical stage. When a run-down sewage-disposal plant calls for the advice of a foundation ex-

pert, a structural diagnostician, a hydraulic consultant on circulation, and finally a sanitary expert to prescribe a change in dosage, the analogy is not beyond reason. Perhaps it is not proper to enter on discussion of the important professional question in this vein; but the knowledge that at least one state has a 1:1000 ratio between civil engineers and population should provoke critical reflection."

"Californians sometimes fail to appreciate the importance of the state that has for its purpose the prohibition of tenement dwellings and insistence upon standards in construction that represent reasonable room, attention to sanitation, and the relation to health that add to longevity," says Will J. French, director of the State Department of Industrial Relations. "The Division of Housing and Sanitation is in continual conference with building authorities in California's cities and counties. For instance, in Vacaville it is proposed that a building ordinance be adopted. Bad housing conditions in the Filipino quarter of Santa Maria necessitated stern action, and steps will be taken to institute abatement proceedings against four hovels. The recently-appointed Sanitary and Housing Inspector of Santa Barbara has been in consultation with Division officials, so that the requirements of the Act will be followed. Conditions in Broderick, Yolo County, were found to be bad, and the Director of the Office of the County has given State help in preparing an ordinance to meet the grave needs. In the West Hollywood area and in northern San Diego County it was necessary to make changes. Fifteen plans were checked in various parts of California during April, involving an estimated expenditure of \$262,500."

Recommendations of the employment stabilization committee of the California State Chamber of Commerce, include:

1. Give wage earners every reasonable assurance of the safety of their jobs.
2. Hold layoffs to a minimum, distributing any excess work to additional employes where feasible.
3. Stagger or rotate employment, or place some jobs on shorter hours, in order to spread work to as many as possible.
4. Study possibilities of spreading work to a greater number of employes consistent with efficient operations, with voluntary time off, or extra vacations, etc.
5. Review past business for indications of fields in which extra effort may be concentrated for profit.
6. Lengthen average employment periods by more accurate planning of production.
7. Accumulate maintenance work for slack periods.
8. Study possibilities of exchanging labor between departments, plants, etc., where feasible.

Simplified Practice Recommendation R1-29 on vitrified paving brick has been reaffirmed by the standing committee of the industry, without change for another year. This recommendation has been instrumental in reducing the number of sizes and varieties from 66 to 8, or 91 per cent.

California labor for California public construction!

This is the labor policy heralded by Col. Walter Garrison, director of public works, as the state's speed-up program of highway and building construction swung into full momentum.

Employment of American citizens on public works who have been residents of California for at least a year, preference to married men in such employment and maintenance of prevailing wage scales—these were the major points in the state's labor program.

Public construction representing an expenditure of more than \$5,000,000 is in progress throughout the state, with bids being opened this month on additional projects aggregating \$2,000,000.

"The new state labor program will affect thousands of workers, particularly, California residents with families," Col. Garrison declared. "Contractors as a rule are responding in fine spirit to the program."

When contracts are awarded, contractors are sent notices of the state labor policy which read, in part:

"Governor Rolph is much concerned with unemployment and urges you to favor married men as the basis of business depression falls heaviest on them."

"In this connection we also favor the policy of employing citizens who have been residents of the state for at least a year."

"It is also our belief that the wages paid on state contracts should be the prevailing wage in the locality."

Los Angeles with a total of \$3,095,700 and 2290 permits issued maintained first place in building permit listings for the month of May, San Francisco, with 530 permits involving an expenditure of \$2,533,617 landed in second place. Six places followed with 526 permits for improvements valued at \$1,060,890. Portland runs fourth with 361 permits aggregating an expenditure of \$439,985. Other Pacific Coast cities report as follows: San Diego, 28 permits, \$431,610; Spokane, 178 permits, \$132,735; Boise, Idaho, 63 permits, \$28,284; Salem, Ore., 37 permits, \$23,292; Eugene, Ore., 59 permits, \$18,282.

American engineers are getting big salaries from Russia to teach the Russians mass production in order to undersell American manufacturers in their own markets. This was the statement made to the Tacoma Lumbermen's Club by August Anderson, Chicago attorney, who has just returned from his third visit to Russia since the war. With forced labor, Russians can cut lumber and lay it down on the Atlantic Coast cheaper than the West Coast mills can manufacture it, Anderson said.

A statement issued by the foreign construction division of the U. S. Department of Commerce dealing with post-war housing places the estimate of actual cost of construction of dwellings in the whole world for the decade 1920-1930 at more than \$36,000,000,000. Practically all the European governments have either extended direct aid or instituted measures to promote the building of homes for workers.

The application of the city of Seattle, Wash., for a franchise to extend its city water system beyond the north city limits in competition with the Mount Rain Lakes Water Co., has been denied by the King County commissioners. The water company, backed by Ulen & Co., of New York, plans a construction program, ultimately costing \$5,000,000, to provide water facilities for the district between Seattle and Everett.

ALONG THE LINE

Ben Mack Jenkins, pump manufacturer of Caruthers, Fresno County, has filed a voluntary petition in bankruptcy in the U. S. District Court at Los Angeles. Jenkins lists liabilities of \$8,237.68 and assets of \$15,631.

Dayton-Dowd Co., Quincy, Ill., has appointed M. B. MacNellie as Western sales manager, with headquarters at San Francisco. He was formerly with Fairbanks, Morse & Co. as manager of the pump division.

G. A. Dahmeyer, 1013 S Third St., San Jose, will operate in that district under the firm name of Century Elec. Company.

Cork Insulation Company of New York City has opened distribution headquarters for the Pacific Southwest territory on Everett Place in the Central Manufacturing District of Los Angeles. A full line of Corinco cork products will be carried in the new plant and all engineering and contracting operations undertaken by the company in Southern California and Arizona will be served from this branch headquarters. P. G. Hooper is in charge of the branch.

A. M. Girolami, James H. McFarland and Q. Palenacci will operate from 375 Wheeler Ave., San Francisco, under the firm name of Paramount Concrete Company.

Empire Steel Corporation of Cleveland, Ohio, fifth largest producer of steel sheets in the country, went into voluntary receivership last Thursday, with Carl H. Henkel, president, appointed the receiver. Henkel will take over operations of the company pending liquidation or reorganization.

Leo Van Gelder, 689 Santa Ray Ave., Oakland, will operate from 3905 Piedmont Ave., Oakland, under the firm name of New Way Plumbing Company.

Truscon Steel Co., Youngstown, O., announces the appointment of Garrett A. Connors as vice-president, director of purchases, in recognition of his 24 years of service as an executive in the production division. Mr. Connors will maintain headquarters at Youngstown.

In Great Britain, where the housing problem has been most acute, the government has spent vast sums for the erection of dwellings and has granted special subsidies to municipalities to enable them to reduce rents to tenants. In London alone the 1931 program of the city councils provides for the erection of 13,378 houses and 11,700 suburban cottages at an outlay of approximately \$37,000,000.

The London five-year plan, 1931-1935 calls for 34,670 houses at a total estimated cost of \$106,000,000. The cost is repaid in rent over a twenty-year period.

Secretary of Commerce Lamont announces that representatives of the lumber, pulp and paper industries will meet on June 10 with the timber conservation board to study causes of existing economic conditions in the lumber industry and take steps to correct them. The board was appointed by President Hoover to study production conditions in the forest industries.

TRADE LITERATURE

Irving F. Smith, for 23 years in the hardware business in the East Bay district, has been named manager of the San Mateo Hardware Company at Third Avenue and E Street, San Mateo.

Charles H. Bettis and Ben A. Dore, prominent eastern architects with offices in New York, Chicago and Detroit, are in Los Angeles for a visit and contemplate transferring their activities to the Pacific Coast. Both have been identified with some of the largest hotel and theater projects in the east and have expressed themselves as satisfied with the outlook on the Pacific coast and particularly in Los Angeles.

Henry J. Hockelberg, 62, retired general contractor of Fresno, died in that city last Thursday. Hockelberg was born in Aviston, Ill., and went to Fresno in 1888 and for the past twenty-five years operated as a general contractor in the San Joaquin Valley section.

Huston D. Mills, office engineer and secretary of the board of directors of the Nevada State Highway Commission, will succeed Wm. A. Young, assistant state highway engineer, who has resigned effective June 15 to assume a position with Dodge Bros. of Fallon, Nevada, road contractors. W. T. Holcomb, chief draftsman will succeed Mills and George R. Egan, at present bridge engineer, will be made chief draftsman.

Guy Wilfrid Hayler, city planning expert of San Francisco, has just completed a study of development in the area between Redwood City and Palo Alto for the David D. Bohannon Organization which firm has control of the properties known as Belle Haven City, now being developed for residential purposes together with large industrial frontage on San Francisco Bay. Mr. Hayler's report is largely in the form of graphic diagrams and shows an awakening in the real estate field in the Bay region.

Wm. T. Loesch, president of the California State Builders' Exchange, has appointed P. M. Sanford of Richmond a member of the Legislative Committee of that organization. W. A. Brown, secretary of the Richmond Builders' Exchange, has been named a member of the Accident Prevention Committee.

Byron Jackson Co., Berkeley, Calif., announces the return of W. R. Layne to its sales force after an absence of a year.

Footage of piling exported from Oregon in 1930 exceeded that for 1929, but the export value decreased, a summary issued by the Portland, Ore., office of the bureau of foreign and domestic commerce shows. Oregon shipped 1,340,690 lineal feet of piling valued at \$158,923 to six foreign countries last year.

National Lumber Manufacturers Association at its recent annual meeting in Chicago elected the following officers: President, A. C. Dixon, Eugene, Ore.; vice-president, W. M. Ritter, Washington, D. C.; E. A. Frost, Shreveport, La., and R. B. White, Kansas City, Mo.; secretary and manager, Wilson Compton, Washington, D. C.

ZONING LAWS TO
BENEFIT BUILDING

Stimulus to building operations in Oakland will result from the adoption by the city council of amendments to the city zoning ordinance that Oakland Real Estate Board reports. The proposed amendments, suggested by a committee appointed by the realty board, were introduced at last Wednesday's city council session.

Sections of the new zoning ordinance which have been held to impose burdensome restrictions would be abolished by these amendments and a third section modified as to front yard setback lines for multi-family housing.

Restrictions governing the erection of buildings in single-family and multi-family housing as to side yard and rear yard space will be only those imposed by the state housing act, it is explained. This will permit building operations to proceed on the same basis which obtained prior to the adoption of the zoning ordinance.

A set-back line of five feet for inside lots and of three feet on all frontages for corner lots applicable to multi-family structures is to be substituted for the more drastic provisions specified in the present zoning ordinance.

The committee which formulated the amendment recommendations was appointed by Fred T. Wood, president of the real estate board, and is composed of the following: Frank H. Ayers, Harry P. Fisher, Edwin K. Hussey, Walter L. Kelly, Ralph A. Knapp, William A. Davis, Willis C. Lowe, Richard H. McCarthy, James J. McElroy, Carl C. Replogle, Bestor Robinson, Charles H. J. Truman.

Comprised in the report made to the realty board by this committee is the following:

"It is estimated that approximately \$2,000,000 of projected new building construction was stopped by the enactment of the zoning ordinance because of unnecessarily burdensome restrictions and unanticipated provisions of the ordinance. Approximately half of this probably now will be revived and carried forward to completion.

"Many of the projects then held up, for which definite financing had been arranged and to which financing concerns were committed, can not now be revived because of recent changes in policy on the part of the financial houses. It is believed, however, that \$1,000,000 worth of new construction will be commenced shortly after the proposed amendments become effective.

Several other amendments to the ordinance have been proposed by the committee and have been taken under consideration by Commissioner Thompson but the three given first and second readings on Wednesday are the only ones urged at this time. The committee has reported. Others are to be offered to the city planning and zoning commission which it is anticipated will be created after July 1 when the city manager form of government becomes operative.

President R. Arthur Wood of the Chicago Stock Exchange, told delegates to the Illinois Bankers' Association convention that "we are to blame" for the present depression, and that it is time to "consider soberly our mistakes of the past and to avoid a repetition."

Colorado Fuel and Iron Company, largest industrial enterprise west of the Missouri river with the exception of the railroads, on June 1, came out flatly against wage reductions as an expedient during the economic depression.

SAN FRANCISCO BUILDING PERMITS FOR MAY, 1931, CLASSIFIED

	No. of Permits	Est. Cost	No. of Families

OIL BURNER MEN PLAN ORGANIZATION

Plans for the formation of more than 2000 oil burner dealers into one of the largest trade associations in the country are announced by Lional L. Jacobs, vice president of the American Oil Burner Association and chairman of the board of governors of the dealer division. The new organization will be a division of the American Oil Burner Association and will operate under its officers and directors but it will be managed by its own executive board.

Oliver P. Harris who has had wide experience in sales promotion work and dealer activities has been appointed managing secretary. He will carry out the organization plan as adopted at the annual convention of the American Oil Burner Association in Philadelphia last month. The initial membership roll will be composed of the 3000 dealers handling products of manufacturer members of the A. O. B. A. The potential membership list is 7500 and it is expected that other dealers will become members in the near future.

One of the first activities of the new association will be the organization of local oil burner associations and the direction of co-operative newspaper advertising campaigns through these local associations in the different localities. Another major function will be the fight on obsolete ordinances carried on in conjunction with the manufacturer members. Dealers in each city where out-of-date or unjust restrictions exist will be organized for a fight in that locality.

Other activities of the division include advice and assistance to dealers in meeting unfair advertising and unfair competition; market research work and the distribution of engineering data pertaining to oil burner installations.

Harris, managing secretary, was formerly director of sales for the Petroleum Heat & Power Company, of New York.

TIMBER MERGER DEAL IS RATIFIED

Merging of the Pacific county holdings of the Weyerhaeuser Timber Company with other Willapa Harbor lumber and timber companies in Washington State was ratified by the stockholders of the Weyerhaeuser Timber Company at the annual meeting held in the offices of the company at Tacoma last Thursday.

The election of trustees and officers also took place, the changes in the past year's list being only those made necessary by the death of George S. Long, vice-president, and E. W. de Long, assistant treasurer.

The merger, which was ratified, is that of the timber holdings tributary to Willapa Harbor, with the holdings of the Raymond Lumber Company, the Lewis Mills and Timber Company and the Willapa Lumber Company.

The board of trustees elected consists of F. S. Bell, William Carson, A. W. Clapp, E. P. Clapp, H. S. Irvine, W. L. McCormick, C. R. Musser, F. W. Reimers, H. J. Richardson, F. E. Weyerhaeuser and J. P. Weyerhaeuser.

The elective officers are F. S. Bell, president; A. W. Clapp, vice president; F. E. Weyerhaeuser, vice president; W. L. McCormick, vice president; H. S. Irvine, treasurer; A. D. Orr, assistant treasurer; F. L. Titcomb, general manager; W. L. McCormick, secretary; H. J. Richardson, assistant secretary; Geo. S. Long Jr., assistant secretary; A. W. Clapp, general counsel. The appointive officers are C. H. Ingram, assistant general manager; Minton Davis, manager.

BUILDING INDUSTRY AND REALTORS SHOULD COOPERATE AND REORGANIZE HOME BUILDING PRODUCTION METHODS

The home building and allied industries are organized and operated as though they were producing consumption goods whereas they are really producing capital goods and all those in these industries will prosper more when this principle is realized, said Arthur C. Holden, A. I. A., prominent New York architect, speaking before the Home Building and Supply Division of the National Association of Real Estate Boards at its 24th annual convention in Baltimore last week.

The error of architects, builders and real estate men in operating their various businesses with the idea that when a man buys a home he is buying it, and the way in which these industries permit blighted areas to house the public at cheap rents, is curtailing advancement in all three businesses, and is responsible for the hard times felt in many quarters in these fields, according to the speaker.

The surplus that comes from depreciation and obsolescence is more dangerous than the surplus from new home construction, said the speaker.

A man pays for the use of a home not for the home itself, and the ability of the public to pay rent should be computed every year and used as a basis in producing new structures and in regulating their cost, said the speaker.

Asked to address his audience from the viewpoint of an architect, Mr. Holden was expected to describe new features that might stimulate the home building business. He declared, however, that it was useless to "doil up" American homes any further until architects, builders and realtors get together and reorganized production methods.

Architects, builders and realtors do work very hard trying to produce well built and designed homes in well developed areas as cheaply as possible with all their work based on the idea that the public wants these homes and reach their first snags when the public fails to buy them.

He declared that the business of designing and building homes and developing land on which to put them is no different when it comes to selling these homes than the business of growing and selling wheat, and called attention to the fact that real estate, for which there is no use or which is not immediately usable, is of no more real value than wheat stored in a grain elevator which cannot be sold. The fact that it costs so much to produce the unsold wheat has very little to do with the price that the wheat growers receive, he said.

Mr. Holden asserted that the country is producing few new homes that the bulk of the population can afford, that the majority of American families get their homes, not from the building industry but from those who are holding land for expected rise in prices, as for instance, when a blighted area in which the land price is high. The buildings in these areas are rented for such low sums their over crowding is permitted. The consequences are harmful economically, as well as socially, and no industry should allow its worn out machinery to be bought up by speculators for sale to its clientele at depreciated prices, said the speaker.

He scored the practice of depending upon borrowed outdoor light from neighboring property, and said that the failure to make provision for garden space in apartment house developments affected earnings over a long period.

He criticized the practice of permitting land owners to obligate cities to

open new streets without any study as to their economic necessity. He said that this practice is a drain upon the pocket of cities in cities like Dallas, Texas, and Schenectady, N. Y., where "ill considered developments" are impossible because mere petitions cannot secure the desired improvements.

Architects have begun to study the kind of homes that people live in, how they are produced and financed, and are trying to cooperate with builders and realtors in giving the public a better product for less money. Mr. Holden who was consulting architect to the New York State Board of Housing in 1926 and who was special adviser to the New York Committee to Examine and Revise the Tenement Law and who was a member of the Hoover conference on Home Building and Home Ownership as a member of the Committee on Types of Dwellings and the Committee on Construction, said:

"What we, in our industry, produce is not consumption goods as such. What we actually produce is capital goods. Many of our troubles and difficulties come from our failure to distinguish between consumption goods and capital goods.

"When a man buys a home he doesn't consume it, he uses it. What he pays for is not for the home itself, in the same sense that he pays for a bushel of wheat, but he pays for the use of the home. We, in the building industry, could very well take a lesson from the United Shoe Machinery Corporation. Here is an industry which produces capital goods which are in themselves, not strictly speaking, consumable, although, of course, it is recognized that machinery just like the home, does ultimately wear out. The policy of United Shoe Machinery, has been to rent its product rather than to sell it. This policy has been a remarkable safe-guard to the shoe machinery industry, because this rental system created a direct index of the actual use made each year of the machine which was produced. Had the United Shoe Machinery Corporation conducted its business on an out and out sales basis, it might have fallen into the same error so frequently encountered by us in our industry of creating homes.

"It might have for a while received profits from the purchase prices which were so attractive that they tempted the industry to continue to produce capital goods at a high price irrespective of whether or not the use of these goods could be balanced by economic considerations.

"Now let us try to apply this parallel to our own industry. Where a man buys or rents a home his motive is to secure the use of that home and he actually engages to pay for its use in rent. This rent may be paid directly to the owner or it may be paid to himself in the form of loss of interest on his capital. The danger in our industry in the sale of homes is that the profit derived from this sale does not immediately reflect the economic rent which can be paid for the use of the home.

"When an industry, however, which is based on the production of capital goods, is organized on the same basis as one which produces consumption goods the industry is liable to the error of premature expansion.

"If we were to translate every piece of property which is now used and set upon it a rental value based on the use that is made of it and then add up all these rental items we would get a figure for the total rent fund which would correspond from the eco-

nomic point of view with the total price received for the wheat crop of the nation. If we want to discover a means which represents the capital value of all of the real estate in America we should capitalize at the prevailing rate of interest the total rent roll of the nation. Now, if we wish to have a balanced industry the price at which we carry real estate must not exceed this total figure of the capitalized rent fund.

"It is unfortunate that in our industry there is no exact measuring unit which is parallel to the bushel of wheat. Some real estate is as usable as wheat, some is not immediately usable. Real estate returns vary according to the degree which it is desirable or usable, yet all real estate may be said to be potentially usable. So is wheat stored in the granary or, potentially usable, or coffee in a warehouse in Brazil, or sugar cane in the warehouses of Cuba and when this potential reserve becomes so great that it can be dumped on the market and break the price of the product, the ensuing year then that potential reserve becomes a danger in itself.

"The impression has too long prevailed that we could depend upon selling our real estate for its future potential use. It is ultimately disastrous in the case of wheat, in the case of coffee or in the case of sugar. It is many times more disastrous in the case of real estate.

"As a group of men who are dependent for our livelihood upon the use which the public makes of real estate and especially upon the use which the public makes of homes we ought to know how much the public is able to pay each year in rent. We have been inclined to avoid this issue and to assume that we could make enough profit to meet production each year and to keep up production at a rate which will enable us to carry on indefinitely. We are often deluded by the fact that land seems to be continually increasing in value and to depend upon this increase in real estate is only an increase in price, to make up our deficit. With real estate, however, there are definite limits to what the public can pay for the use of real estate just as there are economic limits to what the public can pay for wheat. The rent fund or the total amount that can be paid every year for rent bears an economic relation to the economic status of the community, of the nation and, in the final analysis, of the whole world. It varies with the barometer of economic conditions.

"We have come to a point today where it is well recognized that one of the most serious problems which confronts the industry concerned with the building of homes is the formation of a definite policy with respect to blighted areas. The day has gone by when these blighted areas are the concern only of the philanthropic minded and the social reformer. Today we can recognize the economic as well as the social danger of blighted areas.

"We do not know how many families live in depreciated properties of this class. We do know that numerically the largest group of property owners live in homes for which they pay from \$30.00 to \$50.00 per month either in rent or in charges for which they themselves are responsible as owners. For the rural population the rent is still lower. We know from our own costs today that we are producing few new homes which the bulk of the population can afford. Our market, so to speak, is principally confined to the higher income group which is numerically very much smaller.

"Here is the source of the greatest friction between rent payers and property owners. This friction affects the whole building industry. Its social and economic consequences are harmful

to the community. It is not good policy to expect those who can afford small amounts in rents to pay these small amounts for make-shift homes, especially when the greater part of the payment is absorbed by the burden of carrying high priced land and the living facilities furnished are acknowledged to be of the depreciated type.

"We, who are in the home building industry ought to be the beneficiaries of this great public who are large in numbers even though the individual rent paid is small. Again, we should think of the lesson taught us by the United Shoe Machinery Corporation. Picture again to yourself the development of this company had its policy been to allow its worn out machinery to be bought up by speculators for sale to its clientele at depreciated prices. Picture the economic waste of carrying a worn out product on the market. Picture the economic futility of depreciated equipment undertaking the work of the nation.

"I want to emphasize over and over again that the surplus which we need to fear is this surplus which comes from depreciation and obsolescence rather than the surplus from well designed and newly constructed homes. We know something of the despair of the farmer when he tries to compete against constantly produced surplus thrown on the market at a depreciated price. It makes it impossible for him to earn a fair return for what he produces. We are in a worse situation in the building industry, because the building industry is producing capital goods not consumption goods. We should attempt to re-orient our industry so as to assure the payment to it of the actual return due to the industry through the annual use of our product.

"Our cities and towns are constantly being besieged to open up new streets and to put in new facilities. The economic price of these facilities is not considered. It only takes a petition from the requisite number of land owners to obligate the municipality to undertake new street openings. Houses are built on this new land which can never of themselves earn enough rent to pay for the street facilities which they require. The burden of both rapid municipal and town expansion is to drain upon the taxpayer of the older districts and yet we close our eyes to the fact that orderly planning is necessary. In America we can only think of a little regulation here and a little regulation there.

One-twelfth the total area of California, or 8,372,000 acres, has been burned over in the past ten years (1921-1930) by forest, brush and grass fires, causing damage estimated at \$14,424,000 and costing \$10,736,000 for fire prevention and suppression according to official figures for Federal, State and other agencies issued by the U. S. Forest Service in San Francisco. This ten-year record, according to Regional Forester S. B. Shaw, shows a gradual increase in the percentage of man-caused fires as compared with those started by lightning. According to ten-year averages, the three causes of fires that are increasing are careless smokers, neglected electric burners and incendiaries. In 1930, when the losses and acreage burned were far below normal, fires caused by man amounted to 2769 out of a total of 4219, or 89 per cent as compared with a ten-year average of 81 per cent.

Austin, Texas, in voting for the Uniform Building Code of the Pacific Coast Building Officials' Conference, became the 93rd city to adopt the measure and the fourth city in the state of Texas to take such a step.

TRAFFIC CONGESTION PROBLEM SOLVED WITH HUGE TERMINALS

Construction of huge terminals fed by water, rail and truck transportation to serve industries now scattered throughout city areas, is the most enlightened solution to the traffic congestion now rapidly straining all our big cities, Colonel William A. Starrett, president of The Starrett Corporation, told members of the National Association of Real Estate Boards meeting in Baltimore yesterday. Levelling criticism at existing structures within our cities will get nowhere, Col. Starrett said, because traffic is a problem in itself which must be solved as such.

Citing authoritative figures to show that financial losses to a community due to traffic congestion assumed huge proportions and in New York City reached \$1,000,000 per day for trucking losses alone, Col. Starrett placed responsibility for much of this congestion at the door of manufacturing and industrial enterprise in ill-suited localities which he said added to the burden because over-the-sidewalk deliveries to trucks. One example which he cited of a midtown industrial establishment showed rental costs of 75 cents per square foot with unnecessary trucking and handling charges amounting to an additional 30 to 40 cents per square foot—charges which might be avoided had the establishment been served by rail. In this connection he said:

"The truth is that sidewalk truck delivery is a make-shift growing out of numerous causes, one of which is our original failure to realize the tremendous availability of traffic congestion that motorization would eventually be destined to correction eventually, either by drastic legislation or by the voluntary provision by the owners in these congested areas of suitable trucking space within the property building line."

The solution offered by Col. Starrett is already being adopted and is fact by the Starrett interests. The Starrett-Lehigh Terminal is now being constructed at 26th-27th Streets, 11th-13th Avenues, New York and the Colonel believes it to be the forerunner of similar construction to relieve congestion not only in New York but in other large cities where the grouping of industrial enterprises is both a sound business proposition and an advantage to the community. His comments upon it were as follows:

"It seems to us that no other solution is feasible, bearing in mind the necessity that many industries have for proximity to the large, congested areas which they must in part serve. Moreover, it is an answer to the problem of movement of employees, who cannot at present be taken to remote factory locations. City life in many aspects is very agreeable to industrial employees and while certain great industries properly remove themselves to remote locations there is still strong demand that the large cities shall continue in convenient locations for industries that, in large measure, made them.

"When water and rail and automotive transportation can be joined up in a great terminal where, under the same roof, executives, sales and clerical forces, display rooms, manufacturing storage, assembly and distribution can all be carried on in a single terminal unit, we have obtained a measure of relief from unnecessary transportation and, to a certain extent, have defeated the major affliction of modern metropolitan life—traffic congestion."

The lengths to which design and facilities go to make the Starrett-Lehigh Terminal an outstanding structure to reduce traffic congestion and reduce costs of industrial operation was clearly brought out in the description of the building given by Colonel Starrett. It is 19 stories high with 18 and 9 story wings, having a cubic foot capacity of over 26,000,000 and a floor area of 1,800,000 square feet which will afford a straight line production of more than 600 feet on certain floors. Six tracks of the Lehigh Valley Railroad give a capacity for 52 mobile cars at one time and permit direct access to motor trucks within the terminal. Being fed by water, rail and truck transportation and having an unusual location, it gives outstanding facilities for distribution to all of New York City and the state as well as New Jersey and Long Island.

Every floor in this structure is equivalent to the ground floor. Motor trucks drive into the elevators, are hoisted to the designated floors to unload in depressed loading pits and then make exit on another street. Freight arriving by rail is handled by electric trucks on special loading platforms and likewise carried to designated floors by elevators. Three elevators handle truck shipments and are so large as to accommodate any size of loaded truck.

Another unique feature of this building is its lighting. Cantilever construction allows supporting columns to be set back 8 and 9 feet from the exterior walls so that windows are continuous frames without pillars. This assures maximum daylight for all activities carried on within the terminal and they will cover a wide range—manufacturing to administration, with such special services as a barber shop, cafeteria and a first aid hospital.

According to Colonel Starrett, the terminal involves an investment of \$10,000,000 and will provide facilities at such rates, compared with other buildings, as to answer the demand for more economy in production.

Lumber Shippers To Correct Trade Abuses

Puget Sound Associated Mills, newly-formed cooperative selling and merchandising company organized to handle lumber shipments to the Atlantic and Gulf Coasts, will start June 16, says The Business Week.

Its membership is made up of 24 sawmills, regular shippers in the inter-coastal trade. It will handle 30 million feet of lumber a month.

This organization hopes to assist in stamping out the doubtful practice of some shippers of speculating in space and forwarding unsold consignments of lumber which frequently have been auctioned at Eastern centers at such low prices as to upset the entire market structure. It plans to sell either f.a.s. or c.i.f., working closely with the steamship lines as to space and rates, and forwarding only such consignments as have been sold in advance.

Formation of this agency follows closely the recent expansion of the export selling agencies in the Pacific Northwest, controlling 95% of lumber moving to foreign markets from this section. Already the effect has been a firming in export prices.

Being Done By Day's Work By Owner
SOCIAL HALL Cost, \$10,000
CARMEL, Monterey Co., Cal.
One-story frame and stucco social hall
Owner—Monterey Catholic Parish,
Monterey.
Architect—Swartz & Ryland, Spazier
Bldg., Monterey.

Bids To Be Taken Shortly.
SUNDAY SCHOOL Cost, \$135,000
HONOLULU, T. H.
Two-story concrete Memorial Sunday
School (30 rooms).
Owner—St. Andrews Parish.
Architect—C. W. Dickey, Honolulu.
Stucco exterior finish, interior par-
titions to be of concrete blocks, slate
roofing, concrete floors, standard
plumbing goods, Oregon pine and oak
interior finish.

Date of Opening Bids Postponed Un-
til June 8, 5 P. M.
CHURCH Cost, \$20,000
SACRAMENTO, Sacramento Co., Cal.
SW 38th St. and 4th Ave. (72x125
feet).

One-story reinforced concrete and
stucco church (seat 250; tile roof).
Architect—Wm. E. Coffman, Forum
Bldg., Sacramento.

Following contractors will submit
bids:
Gene Kenyon, Sacramento.
M. R. Peterson, 1544 37th St., Sacra-
mento.
Guth & Fox, 1528 27th St., Sacra-
mento.
W. E. Truesdale, 2116 H St., Sacra-
mento.
Anton Johnson, 2649 Marshall St.,
Sacramento.
Chas Unger, 4532 T St., Sacramento
E. A. Corum, 2665 Donner St., Sacra-
mento.
George Hudnutt, 1915 S St., Sacra-
mento.

Taking Sub-Bids.
CHURCH Cost, \$40,000
SAN FRANCISCO. Bush Street near
Divisadero Street.
One-story frame church
Owner—West Side Christian Church.
Architect—Bertz, Winter & Maury,
210 Post St., San Francisco.
Contractor—Jacks & Irvine, 31 New
Montgomery St., San Francisco.

Factories and Ware- houses

WOODLAND, Yolo Co., Cal.—Pack-
ing shed and equipment of G. H.
Hecke on ranch three miles south of
Woodland destroyed by fire with a
loss of \$20,000. Will be rebuilt at once.

Contract Awarded.
AUTO SHOP Cost, \$3000
SANTA CRUZ, Santa Cruz Co., Calif.
River Street extension.
One-story reinforced concrete auto re-
pair shop.
Owner—E. C. Kramer, 54 Pacific Ave.,
Santa Cruz.
Plans by Builders.
Contractor—Kenyon Bros., Los Gatos
Highway, Santa Cruz.

Plans Being Figured.
BUILDING Cost, \$7000
SAN FRANCISCO. E Tara N Geneva
One-story concrete factory.
Owner—Bode Gravel Co., 235 Alabama
Street.
Engineer—H. P. Davis, % San Mateo
Feed & Fuel Co., 840 San Mateo
Drive, San Mateo.

To Be Done By Day's Work.
ALTERATIONS Cost, \$16,800
SAN FRANCISCO. S Fulton Street E
Webster.
Alterations & additions to warehouse.
Owner—Cereal Products Refining Co.,
Fulton and Webster Sts.
Engineer—H. H. Soule, % owner.
Work involves removing present

frame boiler room and warehouse and
replacing with reinforced concrete
structure.

Roofing Contract Awarded.
PACKING PLANT Cost, \$20,000
LINDEN, San Joaquin Co., Cal.
One-story and basement packing plant
(wooden frame, concrete base-
ment; capacity 1200 tons).
Owner—San Joaquin Valley Walnut
Growers' Assn., Linden, Calif.
Plans by John Cavanaugh, 219 N. Sutter
St., Stockton.
Contractor—J. J. Cavanaugh, 219 N.
Sutter St., Stockton.
Roofing—Summerbell Truss Co., 354
Hobart St., Oakland.

Preparing Plans.
WAREHOUSE Cost, \$200,000
HONOLULU, T. H.
Reinforced concrete storage ware-
house.
Owner—Honolulu Const. and Draying
Co., Honolulu, T. H.
Architect—C. W. Dickey, 405 S. M.
Damon Bldg., Honolulu.

OAKLAND, Cal.—George W. Woolf,
795 Alcatraz Ave., Oakland, at \$295
submitted low bid to City Port Com-
mission for electric wiring for Ware-
house AA, located on W 14th St. Pier.
The complete list of bidders follows:
Geo. W. Woolf.....\$2,095
Pacific Electric Motor Co.....2,283
Kenyon Electric Co.....2,550
G. W. Coupe.....2,577
T. L. Rosenberg Bros.....2,635
Matson-Seabrooke Co.....2,695
C. W. Gates.....2,729
G. Stanley Pierce.....2,850
Scott-Pattner Electric Co.....2,864
E. C. Hiestar.....2,944
Kerr & Clifford.....3,610
City Improvement Co.....3,700
Bids held under advisement.

Bids Opened.
HOG BARN, ETC. Cost, \$—
STOCKTON, San Joaquin Co., Calif.
Agricultural Park, County Fair
Grounds.
Livestock building and hog barn.
Owner—County of San Joaquin, Eu-
gene D. Graham, county clerk,
Stockton.
Architect—Peter Sala, 2130 N. Com-
merce St., Stockton.

Following is a complete list of bids:
J. R. Leighton, 813 Bedford Road,
Stockton, \$9779 (1) add \$2001 (2) add
\$2061 (3) add \$1286 (4) add \$1200 (5)
\$960 (6) \$60.
Carl Nelson, Stockton, \$9847 (1) \$2,-
650 (2) \$2650 (3) \$774 (4) \$847 (5) \$800
(6) \$50.
L. Uchels, Ripon, \$10,125 (1) \$2750 (2)
\$2750 (3) \$1375 (4) \$1255 (5) \$1100 (6)
\$52.

H. E. Vickroy, Stockton, \$12,000 (1)
\$3377 (2) \$3377 (3) \$982 (4) \$1080 (5)
\$1670 (6) \$55.
William Buck, Stockton, \$10,992 (1)
\$2850 (2) \$2850 (3) \$1351 (4) \$1258 (5)
\$1115 (6) \$60.

Bids held under advisement. Alternates
are for certain additions to the
buildings.

OAKLAND, Cal.—Until June 8, 4 30
p. m. bids will be received by G. E.
Hegard, secretary, City Port Com-
mission, 424 Oakland Bank Bldg., for
electric wiring for light and power for
the Inland Waterways Terminal.
Specifications obtainable from secretary.
Taking Segregated Figures.
ADDITION Cost, \$—
OAKLAND, Alameda Co., Cal. 4701
Grove Street.
Brick and concrete addition to clean-
ing plant (30x40x12-ft.).
Owner—John F. Snow Cleaning and
Dyeing Works, 4701 Grove Street,
Oakland.
Architect—R. C. Schuppert, 4637 Park
Blvd., Oakland.

Sub-Contracts Awarded.
WAREHOUSE Cost, \$—
SAN FRANCISCO. 18th and York Sts.
Three-story frame and reinforced con-
crete warehouse and packing
plant.
Owner—Challenge Cream & Butter Co.
Architect—Edgely Riedy, Pacific Bldg.
Contractor—Monson Bros., 475 6th St.
Reinforcing Steel—Concrete Engineer-
ing Co., 1280 Indiana St.
Roofing—Alta Roofing Co., 976 Indiana
Street.
Concrete—Ready Mix Concrete Co. 576
Berry St.
Miscellaneous Iron—Patterson & Kos-
ter, 280 13th St.
Rolling Doors—Rolph Mills & Co., 525
Market St.
Electrical Work—Kuchel and Sievers,
468 5th St.
Steel Sash—Detroit Steel Products Co.,
Hunter-Duoin Bldg.

Taking Bids on General Contract.
LAUNDRY PLANT Cost, \$50,000 with equipment
OAKLAND, Alameda Co., Calif. 730
29th Street.
One-story and mezzanine floor steel
frame and brick laundry (175x280).
Owner—Oakland Laundry Co., (C. B.
Calow), 730 29th St., Oakland.
Architect—Miller & Warnecke, Finan-
cial Center Bldg., Oakland.
Mezzanine floor will provide class-
rooms, offices, lockers and showers.
As previously reported Moore Dry-
dock, Oakland, low bidder on steel.

Foundation Contract Awarded.
SACKING PLANT Cost, \$15,000
SHELL POINT, Contra Costa Co., Cal.
One-story steel frame sacking plant.
Owner—Shell Oil Co., Shell Bldg., San
Francisco.
Plans by Eng. Dept. of Owner.
Foundation—Baret & Hilp, 918 Har-
rison St., San Francisco.
A. Cole, Shell Point, is in charge
of construction.

FLATS

Plans Being Prepared.
FLATS & BUNGALOW Cost, \$20,000
SAN FRANCISCO. Location withheld
Two-story and basement frame and
stucco flats (2 6-room flats) and
one-story frame and stucco bungal-
ow (7 rooms).
Owner—Withheld.
Architect—Richard R. Irvine, Call
Bldg., San Francisco.

Garages and Vehicle Stations

Prospective Bidders.
SERVICE STATION Cost, \$7500
SAN FRANCISCO. Third and Harri-
son Streets.
Frame and stucco service station.
Owner—General Petroleum Co., 1924
Broadway, Oakland.
Plans by Owner's Engineers.
Lindgren & Swinerton, 225 Bush St.
Cahill Bros., 206 Sams St.
Reavey & Spivock, Shell Oil Bldg.
Gauley & Yaunt, 293 22nd Ave.
Clinton Stephenson Const. Co., Ltd.,
Monadnock Bldg.
Paul Speldel, 185 Stevenson St.
Bids close June 5th, 5 P. M.

Plans Completed.
SERVICE STATION Cost, \$7000
SACRAMENTO, Sacramento Co., Cal.
Fifteenth and N Sts.
Service station (steel frame construc-
tion).
Owner—General Petroleum Co., 1924
Broadway, Oakland.
Plans by Owner's Engineers.
Ready for bids in about one week.

Completing Plans.
SERVICE STATION. Cost, \$15,000.
REDWOOD CITY, San Mateo Co., Cal.
Bayshore Highway.

HOSPITALS

Contracts Awarded.
ADMINISTRATION BLDG. Cost \$—
MILWAUKEE, Kern Co., Cal.

Administration building and cottages for California Institution for Women.

Owner—State of California.
Plans by State Department of Public Works, Division of Architecture.

Geo. B. McDougall, state architect
Public Works Bldg., Sacramento.

The buildings are two stories with concrete floors and walls, concrete and tile partitions, wood roof construction and tile roof.

The Administration Building has a total floor area of approximately 20,500 square feet.

The cottages, two of which are included in this contract, have a floor area of approximately 10,500 sq. ft.

General Work
Wm. Rohlbacher, Santa Ana—\$124,850
Electric Work

R. R. Jones Elec. Co., 1124 Fair Oaks, Pasadena \$6,800.

Heating and Ventilating
Hickman Bros. 910 E Anaheim, Long Beach, \$23,361.

Plumbing
Thos. Haverly, 316 E 8th St., Los Angeles, \$17,105.

Contract Awarded.
HOSPITAL Cost, \$1,263,900
(exclusive of equipment and furnishings).

SEATTLE, Wash. Beacon Hill.
Class A concrete and steel Marine Hospital (320-bed capacity, stone and terra cotta trim).

Owner—United States Government.
Architect—John Graham and Bebb & Gould, associate, Dexter - Horton Bldg., Seattle.

Contractor—N. P. Severin Co., 222 W. Adams St., Chicago, Ill.

The tower will be 16 stories in height with wings seven stories in height. The north half of the main building will be 13 stories and the south half 11 stories. This is due to the slope of the site. The structure will be 256x135 feet in ground area. This contract includes all work except elevators, dumb waiters and lighting fixtures.

CALIFORNIA.—A program of expansion and improvement at California's state hospitals, involving the expenditure of \$1,436,500, is announced by Dr. J. M. Toner, state director of institutions. Included in the amounts is \$194,000 for the construction of two additional units at the Stockton State Hospital, and \$160,000 for the reconstruction of wards at the Mendocino State Hospital. Also, \$100,000 has been set aside for remodeling activities at the Napa State Hospital.

Other allocations are \$455,000 to the Agnews State Hospital, Santa Clara County, for a new ward building and employees' quarters; \$159,000 to the Norwalk State Hospital, Los Angeles, for new buildings for farm patients; \$182,000 to Pacific Colony, Los Angeles County, for a girls' industrial building

and new wards; and \$100,000 to the Patton State Hospital for additional wards.

Bids Opened.

NURSES' HOME Cost, \$250,000
HONOLULU, T. H.
Three-story concrete nurses' home (75 rooms, 25 baths).

Owner—Queen's Hospital.
Architect—C. W. Dickey, Honolulu.
Stucco exterior finish, interior partitions of cement blocks, terra cotta tile floor, concrete floors, electric elevators, standard plumbing goods, Oregon pine interior finish.

Bids Being Taken—Close June 30, 10:30 A. M.

ADDITION Cost, \$17,000
OAKLAND, Alameda Co., Cal. 18th and Poplar Streets.

Addition to detention home.
Owner—County of Alameda.
Architect—H. H. Meyers, Kohl Bldg., San Francisco.

Plans Being Completed—Bids To Be Asked Shortly.

HOSPITAL Cost, \$200,000
FRESNO, Fresno Co., Cal.
Fireproof County Hospital units.
Owner—County of Fresno, D. M. Barnwell, county clerk.

Architect—Swartz and Ryland, Brix Bldg., Fresno.

Bids will be asked on two units, one being the west wing, two stories in height, estimated to cost \$150,000, and the other, a one-story contagious ward estimated to cost \$50,000.

The crippled children's and surgery annex will be 50 by 160 feet at the north and south axis of a "T" shaped wing whose east and west leg will be 36 by 60 ft. A basement will be provided for the south half of the axis.

The basement will be housed the physiotherapy and hydrotherapy departments. A pool 10 by 18 ft. will be included as a necessity in the treatment of paralyzed or weakened muscles.

The first floor, which will be on a level with the floor of the present main structure, is to be set aside entirely for pediatric and orthopedic cases and will house beds for 60 children. There will be two 10-bed wards, two 6-bed wards, on 8-bed admittance ward; 4-bed ward for acute cases, and two single-bed, soundproof wards for severe cases of chorea. In addition there will be a central nurses' station, utility and treatment rooms, bath rooms and other accommodations.

The surgery unit on the second floor will consist of two major operating rooms 15 by 13 ft., a minor operating room 12 by 13 ft., and an orthopedic operating room of the same dimensions. In between, provision will be made for sterilizing rooms, two anesthesia rooms, a surgeon's "scrubup" room, a general service room, a room for the preparation of plaster casts, rest rooms and showers for surgeons and nurses.

In addition, there will be quarters to furnish supplies for the whole hospital; three wards of 10, 6- and 4-beds for patients after operations; and utility and nurses' stations. The exterior design will follow the present stucco, tile-roofed administration building.

The contagious unit is to be erected south and west of the west annex and will not interfere with future extensions westward.

HOTELS

Plans To Be Prepared.
HOTEL, RESORT, ETC Cost, \$—
PYRAMID LAKE, Nevada (33 miles NE of Reno; 2½ acre site).

Contractor—Macdonald & Kahn, Financial Center Bldg., San Francisco.

Lumber, Millwork and Roofing—Henry Hess Co., 229 2nd St., San Rafael.

Painting—Aristo Painting Co., 473 Bryant St., San Francisco.

Hardware—E. M. Hundley, 662 Mission St., San Francisco.

Sheet Metal—Fire Protection Products Co., 1191 16th St., San Francisco.

SAN FRANCISCO.—Until June 17, 12 noon, bids will be received by W. W. Felt Jr., secretary, Golden Gate Bridge and Highway District, 722 Financial Center Bldg., to furnish Portland cement to be used in the construction of the Golden Gate Bridge; such bids to be opened at 2 P. M. on the same day by the directors of the district in the Chambers of the Board of Supervisors, City Hall. Specifications obtainable from the office of the Chief Engineer of the district, 700 Financial Center Bldg.

Preparing Plans.
MORTUARY Cost, \$25,000
OAKLAND, Alameda Co., Cal. Tele-

graph and 30th Avenues.
Two-story mortuary building.

Owner—Oakland Undertaking Co., 3007 Telegraph Ave., Oakland.

Architect—Raymond De Sanno, 2584 Milvia St., Berkeley.

SACRAMENTO, Cal.—City Manager Jas. S. Dean and his golf committee has approved plans to finance a municipal 18-hole golf course for Sacramento at a cost of \$100,000. Plans worked out by City Manager Dean and the committee, composed of Tom Monk, chairman; John H. Miller and Tom P. Scollan, call for appointment of a "holding" corporation of seven or nine Sacramento men, who will operate on the golf course in the same manner the stadium committee worked. Construction will probably start in 30 days and the course ready for play in about a year.

June 1, 1931
ALTO CAMP Cost, \$71,000
RENO, Nevada. Entrance to Reno on Carson-Reno Highway.

Bungalow auto camp.
Owner—Withheld.

Plans by Elmer E. Feig, Guaranty Trust Bldg., Portland, Ore.

Contractor—S. E. Anderson, 659 Planders St., Portland, Ore.

The camp will be in three units, forming a single group of 71 individual dwellings. Two of the units will be U-shaped and the third triangular in design.

REDWOOD CITY, San Mateo Co., Calif.—Butte Electric & Mfg. Co., 956 Folsom Street, at \$1,420 awarded contract by City Council to furnish and install traffic signal and control system at intersection of El Camino Real and Main St., Woodside Road and Redwood Ave., commonly known as "Five Points." City Improvement Co., Berkeley at \$1,498 only other bidder.

SAN FRANCISCO.—Until June 8, 2:30 p. m. bids will be received by Veda B. Young, secretary, Playground Commission, 376 City Hall, for fencing and back stops at Aptos Playground at Aptos and Ocean ave-

nues for fencing and back stops at the Ocean View Playground Montana and Playhouse streets. Certified check 10% payable to secretary required with bid. Specifications obtainable from the secretary's office.

SAN FRANCISCO.—Until June 15, 3 P. M., under Proposal No. 729, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish ready mixed concrete required during the fiscal year 1931-32. Specifications obtainable from above.

Completing Plans.
RECREATION BLDG. Cost, \$14,000
BERKELEY, Alameda Co., Cal. Kin-

ney Park.
One-story and basement frame and stucco recreation bldg. (the roof).

Owner—City of Berkeley.
Architect—James V. Flacke, Mercantile Bank Bldg., Berkeley.

Expect plans to be ready for bids in about one week.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—June 11, 12 noon, bids will be received by W. W. Chappell acting city clerk, to furnish and deliver during the fiscal year ending June 30, 1932, the following materials and equipment: Asphalt, emulsified, automobile tires and tubes; batteries, brooms, brick, street brooms, castings, cement, chairs, coal, compression tests (concrete cylinders); concrete, mixed and dry; corrugated iron culverts, corrugated iron pipe; fire hose (for sewers); fuel oil; distillate and gasoline; incandescent lamps; kerosene; lubricating oils, kerosene lamps, lacquer, quarry waste, refuse containers, repair (permanent pavements); sewer pipe, shovels, signs, stone, stone chips, screenings, steam, steel gratings (catchbasins). Specifications and further information obtainable from city clerk.

BERKELEY, Alameda Co., Calif.—Four bids, all identical, were submitted to the city council to furnish cement to the city for the fiscal year commencing July 1. The bid was \$2.64 per barrel, with 10c allowance on sacks. Bidders were:

Jas. A. Davis Co., 517 Fairmont, Berkeley.

Pacific Coast Aggregates, Inc., Broadway and Water Sts., Oakland.

Contra Costa Building Materials Co., 508 Gilman St., Berkeley.

Henry Cowell Lime & Cement Co., 81 Franklin St., Oakland.

OAKLAND, Cal.—Until June 8, 4:30 p. m. bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg., for blue printing service for the fiscal year 1931-32. Specifications obtainable from secretary.

BERKELEY, Alameda Co., Calif.—City Manager Hollis R. Thompson announces funds will be provided in the 1931-32 budget to finance purchase of two modern motor driven tamping machines for the assessor's office and adding machines and dating equipment for the office of the auditor.

Data book No. 2 of the Truscon Steel Co., Youngstown, Ohio, entitled "Modern Road Construction," devotes 128 pages to modern concrete paving practice, with specific reference to products of the company used in this type of work. These include welded steel fabric, dowel plates, road forms, expanded metal, curb bars, guard posts, highway crossings and drainage accessories. The book is priced at \$1 per copy and contains many illustrations.

Engineering News Section

BRIDGES

SAN FRANCISCO.—Until June 17, 12 noon, bids will be received by W. W. Felt Jr., secretary, Golden Gate Bridge and Highway District, 722 Financial Center Bldg., to furnish Portland cement to be used in the construction of the Golden Gate Bridge; such bids to be opened at 2 P. M. on the same day by the directors of the district in the Chambers of the Board of Supervisors, City Hall. Specifications obtainable from the office of the Chief Engineer of the district, 700 Financial Center Bldg.

MONTREY COUNTY, Cal.—Until June 24, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete bridge across Granite Creek about 14 miles south of Monterey, consisting of one 127-ft. open spandrel arch span, two girder spans each approximately 44 ft. long and two girder spans, each approximately 36 ft. long.

RIVERSIDE COUNTY, Cal.—Until June 24, 2 P. M., bids will be received by State Highway Commission to widen that existing multiple span arch bridge across the Santa Ana River near Riverside, by constructing alongside the existing bridge a multiple span reinforced concrete arch bridge consisting of two 95 ft. spans, two 102 ft. spans and one 106 ft. span on concrete piers and abutments with pile foundations.

SACRAMENTO, Cal.—Lindgren & Swinerton, Inc., California State Life Bldg., Sacramento, and Standard Oil Bldg., San Francisco at \$59,000 awarded contract by city council to construct the H Street subway, the city of Sacramento and the Southern Pacific Railroad to each share one-half cost. Project involves: 179 30-ft. untreated wooden piles; 7250 cu. yds. excavation; 700 cu. yds. backfill; 9000 cu. yds. low levee fill; 35,000 lbs. reinf. steel and mesh; 950 cu. yds. class A and 580 cu. yds. class B concrete; 66.25 tons 33-in. steel girder beams; 6 tons structural steel floor girders; 16,800 sq. ft. concrete pavement; 2960 sq. ft. 3 and 4-in. sidewalk; 300 lin. ft. 2-in., 2-rail pipe railing.

SAN BERNARDINO, Cal.—Until 11 A. M., June 15, bids will be received by county supervisors to construct steel bridge at Redlands Junction at Barton Ave. and San Timoteo Creek. The estimated cost is \$18,000. The bridge will be a steel span of 109 ft. with a 27-ft. roadway and three traffic lanes. The structure will have 3-ft. pedestrian lanes on each side. The floor will be of steel I-beam type construction. Plans obtainable from the county surveyor, Howard L. Way, on deposit of \$5. Certified check, 5%.

SAN BERNARDINO, Cal.—Until June 15, bids will be received by county supervisors to construct steel bridge at Redlands Junction at Barton Ave. and San Timoteo Creek. Est. cost, \$18,000. The bridge will be a steel span of 109 ft. with a 27-ft. roadway and three traffic lanes. The structure will have 3-ft. pedestrian lanes on each side. The floor will be of steel I-beam type construction.

Howard Way, county surveyor.

SACRAMENTO, Cal.—E. R. Jamieson, Box 857, Sacramento, at \$2,485 submitted lowest bid to county clerk, to construct the Stoll Bridge, north-east of Rio Linda.

SACRAMENTO, Cal.—Authorization to the Western Pacific Railway to seek permission from the state reclamation board and the U. S. war department to build the Sutter slough bridge in Yolo county on basis of Sacramento county participation has been granted by the Sacramento County Supervisors. Similar action is expected of the Yolo County Supervisors. The proposed bridge will be a combined rail and vehicular traffic structure.

LONG BEACH, Cal.—San Francisco Bridge Co., 14 Montgomery St., San Francisco, and 111 W. 7th St., San Francisco, submitted the low bid for Beach Harbor Commission at \$124,608.50 for dredging and filling in the Outer Harbor, under Spec. No. H. D. 55, involving:

(1) 415,000 cu. yds. dredging.	(2) 130 lin. ft. cressoted bulkhead or curtain wall.	(3) 1750 tons chinking and sealing rock.
(A) San Francisco Bridge Co.	(B) Standard Dredging Co.	(C) Total
(A) .. \$ 285	(B) \$295	(C) \$ 40
(B) .. 2585	300	400
		131,367.50

SAN FRANCISCO.—Until June 17, 11 A. M., under Specification No. 6542, bids will be received by Public Works Officer, Twelfth Naval District, 100 Harrison st., for improvement to water front at the Receiving Ship Station, Yerba Buena Island, San Francisco Bay, involving repairs to the sea wall. Specifications obtainable from above office on deposit of \$10, returnable, checks for same to be made payable to the Chief of Bureau of Yards and Docks.

APACHE COUNTY, Ariz.—W. E. Callahan Construction Co., Dallas, Texas, submitted low bid, at \$137,168 for alternate number one and \$136,183 for alternate number two to C. H. Sweester, district engineer, U. S. Bureau of Public Roads, Phoenix, Ariz., to construct the Rio Fuero and Dry Creek bridges on Petrified Forest National Monument Highway, Route No. 1, Apache County. Quantities of materials listed in issue of May 18.

Following are the three low bidders:

W. E. Callahan, All. office	\$137,168
McClure & Denison	141,889
Gist & Bell	156,239

All bids held under advisement, but it has been recommended that the

contract be awarded to W. E. Callahan Construction Co., on the 2nd alternate.

SAN FRANCISCO.—New bids will be requested by the Board of Public Works to construct the Third street bridge over the Channel. This was assured yesterday afternoon at a meeting in the city hall, attended by members of the Board of Public Works, the City Attorney's Office, the State Board of Harbor Commissioners and W. B. Strauss, inventor of the Strauss type bascule bridge upon which type the contract was awarded to Barrett and Hilp. The contractors it is understood, stand ready to relinquish their contract thereby permitting a new call for bids to be issued at once.

RIVERSIDE COUNTY, Calif.—As previously reported, bids will be received June 24, 2 P. M., by State Highway Commission to widen the existing multiple span arch bridge across the Santa Ana River near Riverside, by constructing alongside the existing bridge a multiple span reinforced concrete arch bridge consisting of two 95-ft. spans, two 102-ft. spans and one 106-ft. span on concrete piers and abutments with pile foundations. The project involves:

- (1) 4200 cu. yds. struc. excav.
- (2) 10,450 lin. ft. furnishing untreated Douglas fir piles, including test piles;
- (3) 425 lin. ft. furnishing cressoted Douglas fir piles;
- (4) 435 each driving untreated and cressoted Douglas fir piles including test piles;
- (5) 765 cu. yds. class A Portland cement conc., placed by tremie;
- (6) 2040 cu. yds. class A Portland cement concrete (structure);
- (7) 1440 cu. yds. class B Portland cement concrete;
- (8) 90 cu. yds. class E do;
- (9) 520,200 lbs. reinforcing steel;
- (10) 1110 lin. ft. existing railing to be removed;
- (11) 650 lin. ft. temporary timber railing;
- (12) 1 lot, existing pylons, end posts and lamp posts to be removed and reset;
- (13) 1300 cu. yds. arch fill;
- (14) 1200 lin. ft. pre-cast railing;
- (15) 475 tons 8-in. concrete (base, leveling and type A surface course);
- (16) 1 lot miscellaneous items of work.

SACRAMENTO, Cal.—Capitol Lumber & Wrecking Co., Sacramento, at \$500 awarded contract by county supervisors to wreck the old Natomas Trestle which has been abandoned because of the new American River Bridge.

WOODLAND, Yolo Co., Cal.—Yolo County supervisors will seek authorization of the U. S. War Department to construct two bridges over sloughs at Merritt Island.

PLACERVILLE, El Dorado Co., Cal.—Hector Williamson, Placerville, at \$1,800 awarded contract by the county supervisors to construct a reinforced concrete girder bridge for the South Approach of the Coloma Bridge on the South Fork of the American River. A. B. Hauser, Stockton, at \$2,431 only other bidder.

MONTEREY COUNTY, Calif.—As previously reported, bids will be received June 24, 2 P. M., by State Highway Commission to construct a reinforced concrete bridge across Granite Creek about 14 miles south of Monterey, consisting of one 127-foot open spandrel arch span, two girder spans, each approximately 44 ft. long and two girder spans, each approximately 36-ft. long. Project involves:

- (1) 750 cu. yds. rdwy. excav. without classification (detour);
- (2) 750 cu. yds. struc. excav.;
- (3) 860 cu. yds. class A Portland cement concrete;
- (4) 22 cu. yds. class E do;
- (5) 168 cu. yds. class F do;
- (6) 145,000 lbs. reinforcing steel;
- (7) 900 lbs. bronze expansion plates;
- (8) 1 lot miscellaneous items of work.

SAN LUIS OBISPO COUNTY, Cal.—L. C. Clark and C. E. Doughty, Visalia, at \$20,116 submitted low bid June 3 to State Highway Commission to construct a reinforced concrete girder bridge over San Marcos Creek about 7 miles north of Paso Robles, consisting of four 40-ft. spans on concrete bents and grading and paving approaches with Portland cement concrete. Following is a complete list of bids:

L. C. Clark and C. E. Doughty, Visalia	\$20,116
Bodenhamer Const. Co., Oakland	20,693
Oberg Bros., Los Angeles	21,514
Neves & Harp, Santa Clara	21,608
Lord & Bishop, Sacramento	21,953
Hanrahan Co., San Francisco	21,558
Robinson-Roberts Co., L. A.	22,740

DREDGING, HARBOR WORKS & EXCAVATIONS

NEWPORT BEACH, Orange Co., Cal.—Until 7:30 P. M., June 8, bids will be received by city council for dredger and winches. Channel north of U. S. Bulkhead line between U. S. Stations No. 116 and No. 117 in Newport Bay, involving 27,000 cu. yds. in accordance with specifications obtainable from city engineer, R. L. Patterson. Certified check, 10%. Alfred Smith, city clerk.

RICHMOND, Contra Costa Co., Cal.—Until June 8, 8 P. M., bids will be received by A. C. Farin, city clerk, for dredging the Ford Channel in the Richmond Inner Harbor for a width of 200-ft. and a minimum depth of 30-ft. City has \$20,000 available for this work. Bids will be taken on two propositions, one to dredge for a distance of 1,100-ft. and the other for a distance of 1,700-ft. Certified check 10% payable to city required with bid. Specifications obtainable from Edw. A. Hoffman, city engineer, on deposit of \$5, returnable.

MACHINERY AND EQUIPMENT

SEATTLE, Wash.—Lakeside Bridge and Steel Co., Milwaukee, at \$4,750 awarded contract by Bureau of Yards and Docks, Navy Department, Washington, D. C., to furnish and install 5-ton electric traveling crane at Naval Air Station, Seattle.

SAN FRANCISCO.—Wallace Young, 342 Arnonx Hotel represents engineering contracting firm, is in the market for tunnel equipment usable in a 10-ft. diameter, 20,000-ft. tunnel. If interested communicate with him direct.

OAKLAND, Cal.—Until June 8, 4:30 p. m. bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg., for tug hire for the fiscal year 1931-32.

Specifications obtainable from above office.

PLACERVILLE, El Dorado Co., Cal.—Until June 15, 7 P. M., bids will be received by Dr. W. A. Hantz, secretary, El Dorado County High School District, to furnish and deliver one 50-passenger school bus chassis and one 50-passenger school bus body. Bids may be submitted on either or both items separately. Certified check 10% required with bid. Specifications and further information obtainable from secretary.

BERKELEY, Alameda Co., Calif.—City Manager Hollis R. Thompson announces funds will be provided in the 1931-32 budget to finance purchase of truck equipment for the garbage department in addition to a scraper for the sanitary fill.

EQUIPMENT

SANTA CLARA, Santa Clara Co., Cal.—On recommendation of C. C. Quinn, fire chief, the city council authorized the purchase of 500 ft. of 2½ inch fire hose.

RESERVOIRS AND DAMS

SISKIYOU COUNTY, Cal.—Preliminary to starting work on the Iron Gate Power Dam on the Klamath River in Siskiyou County, construction camps are being established by the California-Oregon Power Co. The project will involve an expenditure of \$5,000,000. Actual construction on the dam will be started in the Fall. Application has been made to the Federal Power Commission to construct the 160-ft. dam. The capacity of the first unit will be 14,000-hp., to be increased by future construction to 40,000-hp.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor James S. James preparing plans for construction of a dam across Pederson Creek and a hook-up with the water system on the Pederson Ranch to supply the County Memorial Redwood Park. Estimated cost, \$10,000.

PIPE LINES, WELLS, ETC.

TAFT, Kern Co., Calif.—Petroleum Supply Co., of Taft, has been awarded contract by Golden Bear Oil Co. to construct 10.5 mile pipe line at Round Mountain lease on Sec. 9, 28-29, to the leading terminal. The line will be 5-in. pipe. The contract includes storage facilities of 11,000 barrels, pumps and boilers.

WATSONVILLE, Santa Cruz Co., Cal.—Until June 9, 8 P. M., bids will be received by M. M. Swisher, city clerk, for drilling water well on auditorium property at 2nd St. and Van Ness Ave. Specifications on file in office of clerk. H. B. Kitchen, city engineer.

LOS ANGELES, Cal.—Belyea Truck Co., 3128 E. 34th St., Los Angeles, awarded contract by Southern Fuel Co. for hauling and stringing approximately 163½ miles of 26-in. O. D. steel pipe from a point in the S. P. Ry. right of way ½ miles west of Sylmar to the south terminus of the 22-in. pipe line now installed. The prices were according to items as follows: (1) \$2.50 per ton, (2) \$3.50 per ton, (3) \$2.75 per ton.

SEWERS AND SEWAGE DISPOSAL PLANTS

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor James S. James

preparing plans for sewer system for County Memorial Redwood Park; estimated cost \$2000.

BOULDER CITY, Nev.—Until 3 P. M., June 29, bids will be received by the U. S. Bureau of Reclamation, Las Vegas, Nevada, for the construction of a sewer system for Boulder City, located about 25 miles southeast of Las Vegas, Nevada. For approximate quantities of work involved see item under Streets and Highways.

BERKELEY, Alameda Co., Calif.—Until June 9, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct sewer in Arlington Avenue from Thousand Oaks Blvd. to San Antonio Ave. Certified check 10% payable to city required with bid. Plans obtainable from Harry Goodridge, city engineer, on deposit of \$5, returnable.

PHOENIX, Ariz.—Contracts for constructing the new sewage disposal and treatment plant, trunk sewers, and a collection system under the recent \$317,000 bond issue awarded by city commission as follows:

Treatment and Disposal Plant, to Phoenix-Tempe Stone Co., P. O. Box 1645, Phoenix, at a total of \$493,774.40. The plant will include intake works, primary clarifier and drainage sump, channel and by-pass between clarifier and aerator, aerator and sludge return, channel between aerator and secondary clarifier, secondary clarifier and drainage sump, thickener, digester, sludge drying beds, control house, power house and equipment, gas holder, effluent structure, and miscellaneous items. The plant will have a capacity of 12,000,000 gallons per day.

Trunk Sewers, to Gogo and Rados, 10,024 S. Figueroa St., Los Angeles (O. L. 875), at \$230,350.68. The award was made on pipe selections as follows: up to and including 24-in. diameter—vitrified clay pipe; 24-in. to 48-in. diameter pipe—centrifugally cast reinforced concrete pipe; 54-in. diameter pipe—circular hand made clay pipe.

Collection System, to Hayner & Burns, Las Cruces, N. M., at \$32,241.62, using vitrified clay pipe exclusively.

BOULDER CITY, Nev.—Salt Lake Pressed Brick Co., Salt Lake City, awarded contract by U. S. Bureau of Reclamation at Denver for furnishing approximately 58,000 lin. ft. of sewer pipe, involving 20,000 ft. 4-in., 22,000 ft. 6-in., 7,500 ft. 8-in., 1600 ft. 10-in. and 7,000 ft. 12-in. for use on the Boulder City project.

REDWOOD CITY, San Mateo Co., Cal.—Plans for a new town site adjoining Menlo Park and Atherton, to be known as Belle Haven, are being promoted by the Bohanan Investment Company of San Francisco. Commercial buildings and residences, all to be built in the Mission style of architecture, have been laid out by Guy W. Hayler, engineer, and actual construction is expected to begin within thirty days.

MISCELLANEOUS CONSTRUCTION

SAN FRANCISCO.—City Engineer M. M. O'Shaughnessy in a report to the Board of Supervisors recommends construction of a system of subways under downtown streets to relieve traffic congestion.

Under the plan the present surface cars would be operated on a four track subway under Market street, McAllister to Sansome streets, and that a double track subway be start-

ed at Sansome street to form a loop at Battery street.

A double track subway extension is planned for the Market Street Railway from McAllister street west to a point between Franklin and Valencia streets.

Also, a double track branch subway is planned to lead out of Market street into McAllister street, terminating between Leavenworth and Hyde streets.

Another subway, a double track branch running out of Market street into O'Farrell and continuing to a point between Hyde and Larkin streets, also is recommended.

It was urged that legislation be adopted so that the property owners benefited will be required to pay not less than half of the cost of the subway system.

Authority is asked to make preliminary plans and estimates of the cost of cutting new streets through the long blocks south of Market street. An appropriation of \$5000 is asked for this purpose.

O'Shaughnessy asks that authority be granted for the collection of subsurface data for the routes proposed for subways and that \$25,000 a year be appropriated for several years for this purpose.

Financing of the project O'Shaughnessy asserts, could be accomplished by the city appropriating \$1,050,000 a year until \$10,500,000 had been raised.

In the meantime his plan calls for property owners being assessed to raise a similar amount.

According to the city engineer the tax rate would not have to be increased more than 10½ cents each year to provide the \$10,500,000 and the property owners benefited would not have to be taxed more than \$60 a front foot.

WATER WORKS

LOS ANGELES, Cal.—Until 11 a. m. June 9, bids will be received by city purchasing agent, Thomas Oughton, for furnishing motor-driven pumps under Specifications No. 479. The items are:

- (1) one horizontal direct motor-driven centrifugal pumping unit complete with motor and starter, capacity 1400 G. P. M., net operating speed 20 ft. supply head minus 6 to plus 4 feet, speed and motor capacity, optional to bidders;
- (2) one horizontal direct motor driven centrifugal pumping unit complete with motor and starter; capacity 2100 G. P. M., net operating speed 20 ft. supply head, minus 6 plus 4 feet speed and motor capacity optional with bidders.
- (3) one horizontal direct motor-driven centrifugal pumping unit complete with motor and starter; capacity 2500 G. P. M., net operating speed 20 ft. supply head minus 6 plus 4 speed and motor capacity optional to bidders;
- (4) one horizontal direct motor-driven centrifugal pumping unit complete with motor and starter; capacity 6000 G. P. M., total operating head 35 ft. supply head minus 10 to plus 3 feet; speed and motor capacity, optional to bidders.

SAN FRANCISCO.—Board of Supervisors has authorized the Bureau of Engineering, Department of Public Works, to prepare plans for the Red Mountain Bar siphon in connection with the Hetch Hetchy water system, estimated cost \$225,000.

VALLEJO, Solano Co., Cal.—C. H. Brown, Richmond, at \$6263 awarded contract by city council to install 24-inch water main leading from Fleming Hill reservoir to Vallejo. Rensselaer

Valve Co., Troy, N. Y., at \$605.50 awarded contract to furnish valves in connection with the line.

SAN FRANCISCO.—Board of Supervisors will provide appropriation of \$10,000 from the 1931 Public Parks and Squares Bond Fund for the purchase of the necessary clay and water pipe for a sprinkler system for the rehabilitation of the horse track in Golden Gate Park.

EXETER, Tulare Co., Cal.—Chicago Bridge & Iron Works, Rialto Bldg., San Francisco, at \$3,550 awarded contract by city council to furnish 200,000-gallon standpipe in connection with water system.

Martin Murphy, 1321 Milvia Street, Berkeley, at \$4,543 awarded contract to furnish and install cast iron pipe.

Following is a complete list of bids:

Standpipe	
California Steel Prod. Co., Oakland (welded).....	\$3,071
(riveted).....	3,373
North & Cold, Corcoran, 3,200	
Chicago Bridge & Iron Works	
San Francisco.....	3,350
Lacy Mfg. Co., Los Angeles.....	3,500
J. E. Pettijohn & Co., Delano.....	3,850
Boiler Tank & Pipe Co., Oakland 4,110	
Pittsburgh-Des Moines Steel Co., Pittsburgh, Pa.....	4,655
Western Pipe & Steel Co., S. F.....	4,335
Paint Standpipe	
Calif. Steel Products Co.....	\$ 967
Thompson Const. Co., Fresno.....	987
Boiler Tank & Pipe Co.....	1,020
Pittsburgh-Des Moines Steel Co., 1,100	
Lacy Mfg. Co.....	1,150

Trench and Backfill Pipe	
(4,700 lin. ft. 4-6- and 8-in. pipe)	
*P. L. Burr, San Francisco.....	\$4,172.40
Martin Murphy, Berkeley.....	4,454.00
Thompson Const. Co., Fresno.....	5,035.50
Stroud Bros. & Seabrook, Berkeley.....	5,534.50
E. W. Redman, Fresno.....	6,139.60
*Bid on welded pipe.	

LOS ANGELES, Cal.—Until 2 P. M. June 8, bids will be received by county supervisors for diamond drilling of east abutment of the San Dimas dam. E. C. Eaton, chief flood control engineer. The items to be bid on are:

- (1) 50 lin. ft. of holes, 175 ft. or less in depth, in any material, casing left in place, and including cost of casing;
- (2) 1450 lin. ft. holes, 175 ft. or less in depth, in any material, casing if used, removed from holes.

CHILKOOT BARRACKS, Alaska.—Until June 10, 11 A. M. bids will be received by Constructing Quartermaster, Fort Mason, San Francisco, for equipment for water supply system at Chilkoot Barracks, Alaska, consisting of pipe and fittings, insulation material, intake caisson, material for constructing trash strainer, crib and water filter. Plans obtainable from above office.

OAKLAND, Cal.—Steel Tank & Pipe Co., 1100 4th St., Berkeley, at \$3,635 submitted low bid to East Bay Municipal Utility District, to furnish and erect two 250,000-gallon steel storage tanks. Complete list of bids, all taken under advisement, follows:

Steel Tank & Pipe Co.....	\$3,635
Berkeley Steel Const. Co.....	4,160
Chicago Bridge & Iron Works.....	4,300
California Steel Products Co.....	4,353

BEELMONT, San Mateo Co., Cal.—Belmont Water District will call election in July to vote bonds of \$85,000 to acquire and improve a water system comprising half a dozen canyons which have been operating separately in the past. Construction of a new reservoir and installation of additional pumping equipment is contemplated. Geo. A. Kneese, Stafford Bldg.,

Redwood City, is engineer for the district.

LOS ANGELES, Cal.—Until 2 P. M. June 15, bids will be received by the county supervisors for diamond core drilling of the west abutment of the Big Santa Anita dam. E. C. Eaton, chief flood control engineer. The items to be bid on are:

- (1) 50 lin. ft. holes 150 ft. or less in depth in any material, casing left in place, and including cost of casing;
- (2) 950 lin. ft. of holes 150 ft. or less in any material, casing, if used, removed from holes.

BOULDER CITY, Nev.—Contracts for furnishing fittings, valves, pipe, and miscellaneous material for the water and sewer systems at Boulder City were awarded by the U. S. Bureau of Reclamation as follows:

Cast iron bell and spigot fittings, Spec. No. 3145-A, to Los Angeles Valve and Fitting Co., Los Angeles, at \$2265.37.

Fire hydrants, 55 2-nozzle, 2½-in. fire hydrants, Spec. 517-D, to Kennedy Valve Mfg. Co., Elmira, N. Y., at \$3255.75.

Thirty thousand pounds of lead, also lute, Spec. 517-D, to Crane O'Fallon Co., Denver; also cast iron couplings for meter boxes, gate valves and street washers.

Corporation stops, Spec. 517-D, to Muller Co., Decatur, Ill., at \$353.39; also 20,000 ft. copper service pipe at \$273.66; also valve yokes at \$282.10. Copper roundway curb stops, Spec. 517-B, to James Jones Co., Los Angeles, at \$581.25.

Copper pipe couplings, Spec. 517-D, to Standard Sanitary Mfg. Co., Los Angeles, at \$54.

Water meters to the Pittsburgh Equitable Meter Co., Los Angeles.

BOULDER CITY, Nev.—California Steel Products Co., 452 Bay Street, San Francisco, has been awarded the contract by the U. S. Bureau of Reclamation at \$292 for furnishing and erecting, including painting of a steel surge tank for the Boulder City water project, Spec. 523-D.

PLAYGROUNDS & PARKS

SACRAMENTO, Cal.—Following is a complete list of the bids received by county supervisors to install sprinkling system for lawns at the County Hospital grounds.

- (a) small spray heads; (b) revolving sprinklers.

Luppen & Hawley, Sacramento (a) \$.....; (b) \$2,044.84.

B. Varasio, Sacramento, (a) \$3,056.09; (b) \$1,673.25.

Northway Lawn Sprinkler Co., San Francisco (a) \$3,170.39 (b) \$1,821.06.

Carpenter & Mendenhall, Sacramento (a) \$3,379.44 (b) \$1,910.64.

West Coast Lawn Sprinkler Co., (a) \$5,680.90; (b) \$2,144.60.

Bids held under advisement until June 8th.

STREETS AND HIGHWAYS

OAKLAND, Cal.—City council declares intention to improve Madrone Path and a portion of Masterson street adjacent to Madrone Path, involving grading, cement sidewalks, reinforced concrete pipe conduit, 1911 Act. City will pay 2½% of the cost from General Fund. Hearing June 25, W. W. Chapkal, acting city clerk. Walter N. Frickstad, city engineer.

BOULDER CITY, Nev.—Until 10 A. M., June 30, bids will be received at the office of the U. S. Reclamation Bureau, Las Vegas, Nev., for grading, paving, constructing curbs, gutters,

sldwalks, sewer and water system for Boulder City, located about 25 miles southeast of Las Vegas. The work will involve the following approximate quantities:

120,000 cu. yds. excav., common, grading;

30,000 cu. yds. excav., rock, grading;

20,000 station cu. yds. overhaul;

94,000 lin. ft. curbs and gutters;

6,000 lin. ft. curbs;

46,200 sq. yds. 2-course asphalt concrete pavement;

43,800 sq. yds. 1-course asphalt concrete pavement;

128,000 sq. yds. oil treated gravel surf.

11,000 sq. yds. hardpan or gravel surf.

22,000 sq. yds. parking area surf.

180,000 sq. ft. concrete sidewalk;

190,000 sq. ft. gravel sidewalk;

52,000 lin. ft. excavating and back-

filling water pipe trenches;

53,600 lin. ft. excavating and back-

filling sewer trenches;

53,600 lin. ft. laying 4-in. to 12-in. sewer pipe;

165 sewer manholes, constructing;

49,600 lin. ft. laying 2-in. to 12-in. C. I. pipe;

85 5-in. fire hydrants, setting and connecting;

13 1½-in. street washers, setting and connecting;

155 ¾-in. and 1-in. curb stops and meter boxes, setting and connecting;

470 ¾-in. and 1-in. curb stops, setting and connecting;

10,000 lin. ft. ¾-in. and 1-in. copper service pipe, laying and connecting;

Materials to be furnished by the government and materials to be furnished by the contractor are described in the specifications, which may be obtained upon application to the U. S. Bureau of Reclamation, Las Vegas, Nev.; Denver, Colo., or Washington, D. C.

MONO COUNTY, Cal.—Pacific Tank Lines, Inc., 2730 S. Alameda St., Los Angeles, at \$24.99 per barrel submitted low bid to district engineer, State Highway Commission at Bishop for oiling highway from Deadman's Creek to Leevining and from Leevining to 5 miles over Tioga Pass. Gilmore Oil Co., at \$2.65 per barrel only other bidder.

SAN BERNARDINO COUNTY, Cal.—Griffith Co., Los Angeles Railway Bldg., Los Angeles, at \$99,112 submitted low bid June 3 to State Highway Commission to grade and pave with asphalt concrete, 2.2 miles through Upland. Following is a complete list of the bids:

Griffith Co., Los Angeles.....\$ 99,112

Steele Finley, Santa Ana.....104,180

Southwest Paving Co., L. A.....104,801

G. H. Oswald, L. A.....112,617

E. A. Johnson, Los Angeles.....116,967

Hall Johnson Co., Alhambra.....128,064

ALAMEDA, Alameda Co., Cal.—Bids will be asked shortly by city council to furnish 1,000 tons of screenings; 1,500 tons crushed stone; 6 tons of birdseye screenings; 2,000 bbls. road oil (Calo) and 2,000 tons of Bitumuls 95%. Above to be furnished as required by the city during the fiscal year 1931-32.

GILROY, Santa Clara Co., Calif.—City trustees start proceedings to improve approximately twenty blocks of streets in the residential district, including portions of 4th, 7th, Rosanna Sts., etc., involving grading; asphalt concrete pavement, etc. Raymond W. Fisher, city engineer. Quantities of materials involved will be published shortly.

FRESNO, Fresno Co., Calif.—Until July 3, bids will be received by D. M. Barnwell, county clerk, to pave 1½ miles of Mount Whitney Ave. between Riverdale and Lenore. Bids will be considered for either Jenseite or Per-

manite pavements involving approximately 1,500 tons. Estimated cost, \$20,000. Plans obtainable from Chris P. Jensen, county surveyor.

SISKIYOU COUNTY, Calif.—Healey Moore Co., 344 High St., Oakland, at \$25,792 submitted low bid June 3 to State Highway Commission to apply to existing roadbed bituminous surface treatment on 7 miles between 1.5 miles north of Yreka and the Klamath River. Dunn & Baker, Klamath Falls, Oregon, at \$27,245, only other bidder.

MONO COUNTY, Cal.—Macco Construction Co., Clearwater, at \$235,097 submitted low bid June 3 to the State Highway Commission to grade and surface with bituminous treated crushed gravel or stone, 12.2 miles between Yerbys and Casa Diablo Hot Springs. Following bids received:

Macco Const. Co., Clearwater \$235,097

Southwest Paving Co., L. A.....236,948

Hemstreet & Bell, Marysville.....237,262

Vanderlinden & Pierson, Cas-

cade.....338,646

Healy-Thibault Const. Co., San

Francisco.....340,987

Gibbons & Reed, Burkank.....243,572

G. W. Ellis, Los Angeles.....246,265

C. A. Bayles, Higgs.....259,137

Clark & Henry, S. F.....274,250

George Herz & Co., Ltd., San

Bernardino.....283,001

F. W. Nighbert, Bakersfield.....288,662

SAN BENITO-SANTA CLARA Cos.—Granite Const. Co., Watsonville, at \$51,404 submitted low bid June 3 to State Highway Commission to grade and surface with bituminous treated crushed gravel or stone surface, 4.7 miles between 3, 2 miles north of Hollister and Pacheco Pass Road. Following is a complete list of the bids:

Granite Const. Co., Watsonville.....\$51,404

Valley Paving Co., Fresno.....56,721

A. J. Raich, San Francisco.....63,791

Force Const. Co., Piedmont.....82,610

CALAVERAS COUNTY, Cal.—W. J. Schmidt, 79 Rock Lane, Berkeley, at \$17,065 submitted low bid June 3 to State Highway Commission for surface treatment on 15.5 miles between Murphys and Big Trees. Following is a complete list of the bids:

W. J. Schmidt, Berkeley.....\$17,065

Periera & Reeves, Tracy.....20,459

Geo. French Jr., Stockton.....20,725

A. Teichert & Son, Sacramento.....20,795

J. R. Reeves, Sacramento.....21,823

Healey-Moore Co., Oakland.....26,516

SACRAMENTO, Calif.—City council declares intention (2307) to improve alley between J and K, 28th and 29th Sts., involving grading; c. l. drains with vit. sewer pipe connections; construct vit. sewers; reconstruct manhole; install 1-in. water main connections, grading, hydraulic concrete pavement. 1911 Act. Bond Act, 1915. Hearing June 15. H. G. Denton, city clerk. Fred J. Klaus, city engineer.

APACHE-NAVAJO COUNTIES, Ariz.—Everly and Allison, at \$35,602, submitted low bid to C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, Phoenix, Ariz., for grading The Petrified Forest National Monument Highway, Route 1, in Apache and Navajo Counties, 16,320 miles in length. Quantities of materials listed in issue of May 18.

Following are the three low bidders out of eight that bid on the project:

Everly and Allison.....\$ 35,602

McCure and Denison.....104,379

Everly and Allison.....118,894

Everly and Allison's bid has been recommended for award.

BOULDER CITY, Nev.—Bids will be called within the next few weeks for the improvement of the streets of Boulder City, The U. S. Bureau of Reclamation at Denver is preparing plans and specifications for this work which will involve about 250,000 sq. yds. of pavement varying in width from 30 to 56 ft. There will be about 30,000 lin. ft. of curb, 18 miles of sidewalk (4 ft. wide in the residential districts and 12 ft. wide in the business section). The walk will be about half gravel and half concrete. This work will also include trenching and laying water and sewer lines. Specifications are being printed in Washington, D. C.

SAN JOSE, Santa Clara Co., Calif.—San Jose Paving Co., Dupont, San Jose, at \$23,683 awarded contract by County Supervisors for macadamizing Carter & Bookin Aves. in Supervisor District No. 4. Complete list of bids follows:

San Jose Paving Co., San Jose \$23,683

A. J. Raich, San Jose.....23,892

Union Paving Co., San Fran-

cisco.....24,896

SAN JOSE, Santa Clara Co., Calif.—A. J. Raich, Burrell Building, San Jose, at \$2,490 awarded contract by County Supervisors for macadamizing Second and Minna Streets in town of Campbell. Granite Construction Co., Watsonville, at \$3,841 only other bidder.

MONTREY, Monterey Co., Calif.—City council declares intention (3146) to improve Hoffman Ave. bet. Ocean View Ave. and Lighthouse Ave., and from Lighthouse Ave. to Hawthorne St. and Prescott Ave. from Ocean View Ave. to Lighthouse Ave. and from Lighthouse Ave. to Hawthorne St., involving paving with 1½-in. asphalt macadam surface. 1911 Act. Bond Act 1915. Hearing June 16. Clyde A. Dorsey, city clerk.

CARMEL, Monterey Co., Cal.—City trustees start proceedings to improve Mission St. bet. Ocean and 10th Aves. Estimated cost \$12,000. Involves storm sewers, curbs, gutters, paving. Bids will be asked about June 17.

MONTEREY, Monterey Co., Calif.—Until June 16, 7 P. M., bids will be received by Clyde D. Dorsey, city clerk (3128) to improve Teresa St. between Monroe and Harriet Sts., and between Clay and High Sts., involving grading, 2½-in. asphalt conc. base pavement with 1½-in. asphalt conc. surface; conc. curbs, gutters, sidewalks; 14 4-inch house connection sewers, 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bids. Plans on file in office of clerk.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor James S. James preparing plans to eliminate dangerous curves on the Woodside Road from Redwood City to Woodside and for rock and oil surfacing on the Alpine Road to the Memorial Park.

NAPA, Napa Co., Cal.—Ray E. Errington, Napa, at \$2219.93 awarded contract by city council to improve Jackson St., bet. Yajome and Lawrence Sts., involving asphalt macadam pave; curbs, etc.

SACRAMENTO, Cal.—Until June 15, 10 A. M., bids will be received by Harry Hall, county clerk, for paving 2 miles of road in Manzanita Ave. from Fair Oaks Blvd. to Madison Ave., and the construction of two concrete culverts at Madison Ave. Paving, estimated to cost \$7000; culverts \$800. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from County Engineer Chas. Deterding Jr.

SAN JOSE, Santa Clara Co., Cal.—Until June 15, 11 A. M., bids will be received by Henry A. Hyster, county clerk, for macadamizing Fruitdale Ave. from the Meridian Road to the San Jose-Los Gatos Highway. Specifications obtainable from Robert Chaudler, county surveyor.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor James S. James making surveys to extend California Drive from North Burlingame to San Bruno Ave. in San Bruno.

CHURCHILL COUNTY, Nev.—Until July 15, 2 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, to improve 10.14 miles in Churchill County between 5 miles south of Fallon and Salt Wells, involving furnishing, applying and mixing asphaltic fuel oil with roadway surface. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from engineer. Certified check 5% required with bid.

LYON COUNTY, Nev.—Until July 15, 2:30 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, to improve 8.61 miles in Lyon County between 5 miles north of Fernley and the Lyon-Churchill Coun-

ty line, involving furnishing, applying and mixing cut-back asphalt with roadway surface. Certified check 5% required with bid. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from engineer.

HAWTHORNE, Nev.—A. D. Drumm Jr., Fallon, Nev., at \$15,413 awarded contract by Bureau of Yards & Docks, Navy Department, Washington, D. C., for asphaltic road oiling at Naval Ammunition Depot at Hawthorne, Nev. Complete bid listing previously noted.

BERKELEY, Alameda Co., Cal.—A. J. Marin, 1400 Murray St., Berkeley, at \$7,022 awarded contract by city council to construct pathway between Euclid and Hildale Aves., involving: 40 cu. yds. excavation, \$2; 40 cu. yds. concrete, \$21.75; 1800 lbs. reinforcing steel, \$3.04.

ANTIOCH, Contra Costa Co., Cal.—City council declares intention (53-A) to improve portions of Empire Ave., involving grading, hyd. conc. pave, curbs, gutters, culverts and drains, 4 in., vitrified clay pipe sanitary sewers, piping for domestic water supply system, 1911 Act. Bond Act 1915. Hearing June 15, J. E. McElheney, city clerk. E. L. O'Hara, city engineer.

EUREKA, Humboldt Co., Cal.—Until June 17, 10 A. M., bids will be received by Fred M. Kay, county clerk, to furnish 2000 cubic yards or more of crushed rock for Martin's Ferry Road, same to be surfaced with crusher run 7½-feet wide and 6-inches thick, beginning at a point near French Camp and extending to Martins Ferry in Rd. Dist. No. 5. Certified check 5% required with bid. Specifications obtainable from Frank Kelley, county surveyor.

STOCKTON, San Joaquin Co., Cal.—Until June 15, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to improve the Holt road from Holt to the McDonald Island Rd. in Road District No. 1. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from Julius Manthey, county surveyor.

MENDOCINO COUNTY, Cal.—Until June 24, 2 P. M., bids will be received by State Highway Commission to improve 2.3 miles between Dry Creek Bridge and Christine, involving grading, surface with screened gravel and construct timber bridge.

HUMBOLDT COUNTY, Cal.—Until June 24, 2 P. M., bids will be received by Setate Highway Commission to surface with bituminous treated gravel, 8.1 miles between Big Lagoon and Freshwater Lagoon.

See call for bids under official proposal section in this issue.

SAN FRANCISCO.—Until June 17, 2:30 P. M., bids will be received by S. J. Hester, City Purchasing Agent, to extend Van Ness Ave. from Mission to Howard St. Cost, \$40,000, engineer estimate. Plans and specifications obtainable from above on deposit of \$10, returnable. Work involves:

- (1) 106,000 sq. ft. asphalt conc. pave., of ½-in. asphalt conc. wearing surf., 1½-in. binder course and 6-in. class F concrete base;
- (2) 170 tons conform pave., of 1½-in. asphalt conc. wearing surf. and 1½-in. binder course;
- (3) 28,000 sq. ft. concrete sidewalk (1 course);
- (4) 1850 lin. ft. armored conc. curb;
- (5) 800 lin. ft. 8-in. V.C.P. sewer;
- (6) 800 lin. ft. 12-in. do;
- (7) 16 8x6-in. Y or T branches;
- (8) 14 12x6-in. do;
- (9) 100 lin. ft. 10-in. V.C.P. culvert;
- (10) 200 lin. ft. 6-in. V.C.P. side sewers;
- (11) 9 brick manholes;
- (12) 6 brick catchbasins;
- (13) reconstruct high pressure hydrant line (hump sum bid);
- (14) 8 safety islands, of armored conc. curb, conc. sidewalk and conc. base for beacon (hump sum);
- (15) 4340 lin. ft. 1½-in. stand. black pipe conduit;
- (16) 6 standard warning beacons complete, 18 in., 9 warning reflectors and concrete base;
- (17) 18 standard 3-in. yellow reflectors
- (18) 10 wired type stop signs;
- (19) 7 junction boxes, complete;
- (20) 7 traffic turning buttons;
- (21) 80 metal lane markers in place;
- (22) 5 safety zone buttons, reflector type, in place;
- (23) 4 safety zone buttons in place;
- (24) 1030 lin. ft. 2-in. standard black pipe conduit;
- (25) 2020 lin. ft. 7-conductor lead and covered cable (6 conductors No. 14 wire R. C. and 1 conductor No. 10 wire R. C.);
- (26) 80 lin. ft. of 2-conductor (No. 10 wire R. C.) lead covered cable;
- (27) 1920 lin. ft. of 2-conductor (No. 12 wire R. C.) lead covered cable.

TULARE COUNTY, Cal.—Until June 18, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading Section A of the General Grand-Sequoia Park Approach Road in the Sequoia National Forest, 6.752 miles in length. Project involves:

- 47 acres clearing;
 - 181,000 cu. yds. unclass. excavation;
 - 778 cu. yds. unclass. excavation for structures;
 - 33,500 sta. yds. overhaul;
 - 6,752 miles finish graded road;
 - 384 cu. yds. class A concrete;
 - 40,600 lbs. reinf. steel;
 - 262 cu. yds. masonry;
 - 2,938 lin. ft. C. M. pipe in place.
- Specifications obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to the Federal Reserve Bank of San Francisco.

VALLEJO, Solano Co., Calif.—City council declares intention (173) to improve Arkansas St. between Sutter and Madera Sts., involving grading, 5-in. asphalt conc. pavement 28-ft. wide, combined concrete curbs and gutters, 4-in. vit. clay pipe house lateral sewers, 1911 Act. Hearing June 12. A. E. Edgumbe, city clerk. T. D. Kikenny, city engineer.

DOUGLAS COUNTY, Nevada.—See separate unit and total bid listing on 4.164 miles of grading on Glenbrook National Forest Highway in Tahoe National Forest, Nevada Contracting Co., Fallon, Nev., low at \$73,995.

PLACER AND NEVADA COUNTIES, Cal.—Until June 24, 2 P. M., bids will be received by State Highway Commission for bituminous treatment on 20.0 miles between Airport and Soda Springs.

SANTA BARBARA COUNTY, Cal. J. F. Knapp, Financial Center Bldg., Oakland, at \$11,782.50 awarded contract by State Highway Commission for treating with asphaltic road oil and screenings, 15.5 miles between Buckhorn Creek and the second crossing of the Cuyama River, involving, 230 tons asphaltic road oil, \$15.75; 1920 cu. yds. screenings, \$4.25. Complete list of unit bids published in issue of May 25.

HUMBOLDT COUNTY, Calif.—As previously reported, bids will be received June 24, 2 P. M., by State Highway Commission to surface with bituminous treated gravel, 8.4 miles between Big Lagoon and Freshwater Lagoon. Project involves:

- (1) 5000 cu. yds. selected material (shoulders);
- (2) 21,200 tons bituminous treated gravel surfacing.

PLACER-NEVADA COUNTIES, Cal.—As previously reported, bids will be received June 24, 2 P. M., by State Highway Commission for bituminous treatment on 20 miles between Airport and Soda Springs. Project involves:

- (1) 1430 barrels fuel oil;
- (2) 2040 tons cutback asphalt;
- (3) 1055 stations mixing cutback asphalt and surfacing materials;
- (4) 270 cu. yds. filler material;
- (5) 4750 tons untreated crusher gravel or stone shoulders.

MENDOCINO COUNTY, Calif.—As previously reported, bids will be received June 24, 2 P. M., by State Highway Commission to improve 2.3 miles between Dry Creek Bridge and Christine, involving grading, surface with screened gravel and construct timber bridge. Project involves:

- (1) 19 sta. clear and grub right of way;
- (2) 15 each, stumps removed and disposed of;
- (3) 67,000 cu. yds. roadway excavation without class;
- (4) 168,700 sta. yds. overhaul;
- (5) 2150 cu. yds. structure excav.;
- (6) 5700 cu. yds. screened gravel surfacing;
- (7) 320 cu. yds. class A Portland cement concrete (structures);
- (8) 112 cu. yds. class B do;
- (9) 35,600 lbs. bar reinf. steel (struc.);
- (10) 6425 lbs. structural metal;
- (11) 144 lin. ft. -in. corr. metal pipe;
- (12) 134 lin. ft. 15-in. do;
- (13) 944 lin. ft. 18-in. do;
- (14) 250 lin. ft. 24-in. do;
- (15) 100 lin. ft. 30-in. do;
- (16) 160 lin. ft. 8-in. perforated metal pipe underdrains;
- (17) 377 each, timber guide posts and culvert markers;
- (18) 65.8 M. ft. b.m. redwood timber, dense select all-heart struc.;
- (19) 8.2 M. ft. b.m. redwood timber, select all-heart structural;
- (20) 30 cu. yds. broken stone (bitum. macadam surface);
- (21) 2 tons asphalt road oil (bitum. macadam surface);
- (22) 430 barrels light fuel oil;
- (23) 118 stations finish roadway;
- (24) 44 each, monuments complete in place.

The state will furnish corrugated metal pipe, flood gates, spillway assemblies and cast steel frames and covers for drop inlets.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Names and addresses of the individuals or firms concerned in the following opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street. Phone GARfield 5744.

21084—Representation, Hong Kong, China. Trading company is desirous of acting as representative for local importers and exporters in China.

21085—Furniture, Hong Kong, China. Exporters of seagrass and rattan furniture are seeking a local market.

21089—Lamps, Tokyo, Japan. Exporters of electric lamps, such as automobile lamps, flash lights, etc., wish to contact interested importers.

21092—Representation, San Francisco. Party leaving for Chile and Colombia in June wants to represent San Francisco manufacturers, especially familiar with agricultural appliances.

21093—Cambria Steel, Victoria, B. C. Blacksmith wishes to procure Cambria steel for racing plates.

21094—Brushes, San Francisco. Director of Japan Brush Exporters Association is in San Francisco for a few days to meet exporters to Mexico, Central and South America, who can act as agents for tooth, hair, coat and other brushes of pig bristles and celluloid or bone handles. Samples available.

21095—Sales Agency, San Francisco. Firm in Vilvorde-Brussels, wishes to obtain the sales agency for Belgium of electric appliances and material.

Steadily increasing activity in residential building during the first quarter of 1931 and the first month of the current quarter is regarded as a distinctly beneficial indication with relation to the general business situation, according to Charles F. Crothers, vice president and general manager of California Mutual Building & Loan Association.

Activity in residential building is generally regarded, Crothers asserted, to be an indication of recovery from depression. During the first four months of 1931, residential building has shown an increase over each preceding month.

Salutis of residential building, following the exceptional activity between 1923 and 1928, has largely been eliminated, according to surveys made by competent organizations, and the ratio between supply and demand is reported nearly normal.

In line with the policy approved by President Hoover, temporary restriction of timber sales from the national forests, to relieve the lumber industry depression, has been ordered by the Forest Service.

Chief Forester Stuart announced instructions had been sent to all regional offices to make no sales during the present business situation where the value of timber sold is in excess of \$500, except under these conditions: To supply the needs of already existing sawmills which are dependent upon national forests for raw materials.

To furnish domestic paper mills with raw material needed to supply the domestic market with newsprint and other wood pulp products.

To dispose of wind-thrown, fire-damaged or other fire-killed and bug-infested timber.

"Assembly Bill No. 1752 broadens the powers of the State Fire Marshal by materially concerning the fire prevention equipment and design of State institutions and other structures where a large number of persons congregate either to live or work," says Will J. French, director of the State

Department of Industrial Relations. "Provision is made for orders, rules and regulations not inconsistent with any existing law, ordinance, and methods of enforcement are set forth in the statute, with reference to the means and adequacy of exits, and the installation and maintenance of fire alarm and extinguishment systems. Factories, asylums, hospitals, sanitariums, churches, school halls, theaters and amphitheatres, are named as in need of attention. The State Fire Marshal is to carry on educational work throughout California, and encourage the adoption of fire prevention measures."

Steel fabricators of New Jersey secured enactment of a law that requires all steel contracts on state work to be made direct with the state authorities.

Thus the steel fabricator is assured a fair price for his products, and the general contractor, the real cause of all the steel fabricator's worries, is deprived of the privilege of exploiting him. That, at least, is the theory.

"However," says Engineering News-Record, "if history repeats itself, actual developments may be somewhat different. One has only to consider the cement industry to obtain a picture of the working of the separate contract arrangement in so far as contract prices are concerned. When cement manufacturers achieved their independence from the general contractor and went to work for the owner in this instance the state highway department—they too visioned a bright future. But they found the owner quite as capable of bargaining for a low price as was the general contractor. To be sure, he operated somewhat differently—namely, by throwing out all bids and calling for new ones instead of personally conducting a price-cutting war among the several bidders. But the result was the same—the contract often was awarded for less than cost. It is hard, therefore, to be optimistic with the steel fabricators over their victory. One can sympathize with their feelings toward some general contractors who seek to increase their general manager fee by striking sharp bargains with their subcontractors. But merely substituting the owner for the general contractor is not a general panacea for the subcontractor's ills. Fair prices will be received only when the subcontractors display enough backbone to refuse to bid below cost."

On May 1st the State Division of Labor Statistics and Law Enforcement announced that wage claims had been settled affecting two Sacramento concerns, the California Cooperative Producers and the American Engineering Corporation, Ltd. The former was faced with 654 claims for the amount of \$25,481.19, and the latter had 28 former employees asking for \$2,760.69, a total of 682 petitions for the sum of \$26,191.88. The checks were forwarded to the Capital City on the day mentioned above.

The Division has reason to be proud of its good work. There is no doubt that the aggregate of 654 claims filed was by far the largest number against one employer. All of the \$26,191.88 was turned over in checks to the men and women whose labors entitled them to every cent. State of California does not charge fees to those who gained because there is a law available for their protection.

Establishment of better trans-continental freight rates has resulted in improving San Francisco's exporting and importing center, according to a statement by Willoughby M. McCormick of Baltimore, a founder of the United States Chamber of Commerce.

The Millwork Institute of California
 will hold a meeting at the Alexandria
 Hotel in Los Angeles June 12 and 13.
 A program is being arranged by Sec-
 retary Lester G. Sterrett. The In-
 stitute is now engaged in the publica-
 tion of architectural frame details in
 the interests of trade extension.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding
 positions listed in this column is
 obtainable from Newton D. Cook,
 Room 715, 67 Post Street, San
 Francisco. (Phone Sutter 1684).

R-3554-S CHIEF STATIONARY En-
 gineer, preferably with technical
 training and well up on combustion
 theory, for responsible position in
 large steam plant. Must be a man
 with experience in actual charge of
 operation of steam power plants.
 Salary \$275 per month to start. Ap-
 ply by letter with personal data, de-
 tailed experience and references.
 Location, Southern California.

R-3570-S SALES ENGINEER, pre-
 ferably young E. E. graduate with
 sales personality and some expe-
 rience, either in sales or operations,
 to sell induction motors. Personal
 interview in San Francisco required.
 Salary and expenses.

R-3518-S ASSISTANT PROFESSOR of
 Electrical Engineering, to teach fun-
 damentals and laboratory with some
 advanced work. Prefer graduate
 with a record of successful teaching
 experience and, if possible, some
 practical experience. Salary \$2200-
 2400 for nine months, starting Sept.
 1, 1931. Appointment for one year
 only with possibility of permanency.
 Apply by letter. Location, South-
 west.

W-2678-C-S (K-365) PLANNING En-
 GINEER, technical graduate, Ameri-
 can, not over 45, for research de-
 partment. Duties will be to corre-
 late personnel and equipment on the
 various research projects, to analyze
 the importance of each project to
 the manufacturing, commercial and
 other departments of the company
 and recommend priority of projects,
 and to observe progress of research-
 in process and make accurate re-
 ports to the Director of Research as
 to progress, methods employed and
 probability of successful consumma-
 tion. Candidates must have had spe-
 cific planning experience in indus-

try. Salary \$5000 a year or more.
 Apply only by letter. Location, East.
 R-3575-S ASSOCIATE or FULL PRO-
 FESSOR of Electrical Engineering,
 to carry on research work in agri-
 cultural engineering. Would not be
 required to do any teaching.
 Should be 35 to 40 years of age, ex-
 ceptionally well qualified in mathe-
 matics and physics and preferably
 with an advanced degree in engi-
 neering. Apply by letter with full
 details of training and experience,
 and photograph. Salary \$3600-4800
 per year. Permanent. Location,
 West.

W-2783-C-S MEN in all parts of the
 country with both electrical and me-
 chanical engineering background to
 handle sales of Photo Electric Con-
 trol Units on a liberal commission
 basis. These units have a wide in-
 dustrial application and the field for
 light-sensitive devices is rapidly in-
 creasing. Apply by letter. Head-
 quarters, New England.

Sale of the four-story Builders' Ex-
 change Building at the northwest cor-
 ner of Hobart and Webster Streets,
 Oakland, for cash and other consid-
 erations totaling \$310,000, is announced
 by Herbert Beckwith, vice-president
 of the Builders' Exchange Holding
 Corporation. Miss Ella Jacobs of San
 Francisco, is the purchaser.

Farm lands at Oakdale and Lock-
 ford, Calif., are listed as part of the
 purchase price of \$310,000. The lands
 comprise thirty-three acres west of
 Oakdale, planted to almonds and 165
 acres one mile west of Lockford, eighty-
 of which are vineyard.

Beckwith announced that as a fur-
 ther consideration, the holding cor-
 poration took a ten-year lease on present
 headquarters of the Builders' Ex-
 change on the first floor and mezza-
 anine floor, paying \$78,000.

"We sold the building because the
 Builders' Exchange intends to sepa-
 rate itself from all commercial en-
 terprises, such as building management,
 and adhere strictly to its function as
 a clearing house for building contrac-
 tors," Beckwith said.

A "Pittsburg" Auto-
 matic Water Heater
 installed in the Home
 indicates high quality

HOW

**to reach the Construction Market
one of the Wealthiest Sections of the World!**

THE tide of population is sweeping Westward. New structures of all kinds are under way and being planned. California is growing three times faster than the United States as a whole.

Leading architects, engineers, contractors and materials distributors are planning for the great new building program immediately ahead.

Wide awake manufacturers of building products and their advertising agencies are planning now to concentrate their selling energy in the great San Francisco metropolitan district.

Every architect in this district, practically every general and sub-contractor and materials dealer, reads the Daily Pacific Builder **every day**. To them it is just as necessary as Standard Rate and Data to an agency space buyer.

Founded forty years ago, Daily Pacific Builder counts among its constant readers hundreds of executives who direct the huge construction projects in this most prosperous market.

Write for analyses of circulation, rates and market data.

FOREIGN ENGINEERS GET TRAINING HERE

Engineers and highway superintendents from Pan-American countries are being trained in American road building methods through a scholarship plan supported by the American Road Builders' Association.

Two road builders from each of fifteen Pan-American countries will be appointed in 1931 for six months' study of American highway methods and equipment. These men are selected by the road department or commission of their native country to meet the following requirements: studies completed in an adequate school, under thirty years old, knowledge of English, good health, diligent, good character, and serious intention to make road building their profession. They will study and travel under the supervision of the American Road Builders' Association.

After a course of study in the association offices in which they become familiar with the extent and location of highway activities, the men visit state highway department's equipment and material manufacturing plants, and various federal, state, county and city road and street construction projects. The technical highway director of each country designates the class of work on which the student engineers specialize and complete reports are made by the students.

The men work in the various departments of road building operations and equipment manufacturing processes, in some cases, to become familiar with the details of the work and to obtain firsthand information about machines used.

A number of students are now in training and those that have completed the courses have returned to their native countries to assume responsible positions in highway departments, according to association officers. The successful operation of the training plan last year lead to its expansion to include more students from a larger number of countries.

CODE TO PERMIT BASEMENT GARAGES

Storage garages in the basements of hotels and apartments are permitted by a change made in the city building code of Memphis as an aid to the solution of the parking problem. As soon as the change in the code was made the Hotel Gayoso announced that it would equip 75 apartments in the hotel with garage space in the basement.

By the terms of the code garages must be fireproof and no gasoline will be permitted to be kept in them. Walls ceilings and floors must be of concrete. A blower system for air circulation with an alarm bell which will ring when the circulation stops and a sprinkler system with an alarm bell are required.

Theory and Practice With Building Lines

Building lines should conform to street width laid down in a major street plan. No existing building lines should be vacated until such a plan has been worked out. Building lines as an intermediate means of utilization in planning streets should be limited to a temporary adaptation to streets already laid out. They could not be used to protect front yards, this being the province of zoning. Building lines and zoning regulations should complement one another. Cities with building lines will be enabled easily to remake their horse-and-buggy thoroughfare plan to meet the demands of the motor age, whereas those with no building lines are finding themselves two generations behind the times.

**YEAR'S WAGE LOSS
TO LABOR IS TWO
BILLION AND HALF**

Both President Green of the federation and Secretary of Labor Doak said separately, however, that the losses due to wage cuts—known to have affected more than 125,000 workers in factories alone—had not been caused by large employers of labor.

"The wage standard has been holding up well," Donk said, "and I believe the larger firms should be congratulated. Although nearly 200 establishments employing 23,000 workers cut wages in April, this is a small percentage compared to the total number of firms and workers throughout the country. The wage-sniping appears to be of a local nature."

Agreeing that large employers "are in general maintaining wage rates and intend to continue," Green nevertheless reiterated a recent statement that workers should organize to combat any cut—striking if necessary.

Both Green and Doak attributed the general upholding of wage standards by the larger firms at least in part to President Hoover's conference in December, 1929, with prominent industrialists and labor leaders.

AMENDMENTS TO CONTRACTORS' LICENSE LAW OF CALIFORNIA

Two bills amending the contractors' registration law of California—Assembly Bill No. 1867 and Senate Bill No. 732—have received the signature of Governor James Rolph.

Assembly Bill 1867 is an emergency measure providing for financing the activities of the Registrar of Contractors and is effective with the signature of the Governor. It increases the license fee from \$5 to \$10 per year.

Senate Bill 732 amends the law to make it more effective.

Following is the text of the two measures:

Assembly Bill 1867

Section 1. Sec. 5 of Chapter 791, Statutes of 1929, entitled "An act providing for the registration of contractors," etc., approved June 13, 1929, is hereby amended to read as follows:

Sec. 5. To obtain a license under this act, the applicant shall submit, on such forms as the registrar shall prescribe, and in accordance with such rules and regulations as may be adopted by the registrar, an application in writing for such license containing the statement that the applicant desires the issuance of a license under the terms of this act. The information contained in such application forms shall include a complete statement of the general nature of the applicant's contracting business, and in addition, if the applicant is an individual, his name and address; if a copartnership, the names and addresses of all partners, and if a corporate association or other organization, the names and addresses of the president, vice-president, secretary and chief construction managing officer or officers, together with all other information which may be deemed necessary by the registrar.

No license shall be issued until the registrar of contractors has satisfied himself upon evidence presented and recorded as to the integrity of the applicant and that said applicant is qualified in the following respects to hold a license:

(1) That the applicant is of good reputation;

(2) That the applicant has never been refused a license or had a license revoked for reasons that should preclude the granting of the license applied for; provided, that no license shall be refused by the registrar of contractors without providing an opportunity to the applicant within 30 days to be heard and produce evidence in support of his application.

It shall be the duty of the registrar of contractors with the approval of the director of the department of professional and vocational standards, to adopt and promulgate such rules and regulations as he may deem necessary to carry out the provisions of this act. Said application shall be accompanied by a fee of ten dollars, and not to exceed five per cent of said license fee may be expended by the registrar for publicity and educational purposes in connection with the administration of this act. The fees received under this act shall be deposited in the contractors' license fund, which fund is hereby created. All moneys in said fund are hereby appropriated for the purpose of carrying out the provisions of this act.

Sec. 2. Inasmuch as this act concerns and is necessary to the immediate preservation of public health and safety for the reason that it is imperative, at the earliest possible date,

to provide adequate funds for the administration and enforcement of the provisions of the act hereby amended, the present funds therefor being insufficient and the existing rate of license being inadequate, and the rate in this act fixed will make possible the accomplishment of the intended object, this act shall take effect immediately.

Senate Bill No. 732

An act to amend Sections 2, 3, 4, 6, 7, 8, 9, 10, 11 and 12 of and to add new sections numbered 9A and 10A, to Chapter 791, Statutes of 1929, entitled "An act providing for the registration of contractors, etc.," approved June 13, 1929.

Section 1. Section 2 of Chapter 791, Statutes of 1929, entitled "An act providing for the registration of contractors, etc.," approved June 13, 1929, is hereby amended to read as follows:

Sec. 2. This act shall not apply to: (a) An authorized representative or representatives of the United States government, the state of California, or any incorporated town, city, county, city and county, irrigation district, reclamation district or other municipal or political corporation or subdivision of this state;

(b) Any construction or operation incidental to the construction and repair of irrigation and drainage ditches of regularly constituted irrigation districts, reclamation districts or to farming, dairying, agriculture, viticulture, horticulture, or stock or poultry raising, or clearing or other work upon land in rural districts for fire prevention purposes;

(c) Trustees of an express trust, or officers of a court, providing they are acting within the terms of their trust or office, respectively;

(d) Public utilities operating under the regulation of the state railroad commission on construction work incidental to their own business; or any construction, repair or operation incidental to the discovering or producing of petroleum or gas, or the drilling, testing, abandoning, or other operation of any petroleum or gas well, when performed by an owner or lessee;

(e) Sole owners of property building thereon dwellings intended for the use and occupancy of such owners and their families;

(f) Any work or operation on one undertaking or project by contract or contracts performed directly or indirectly by one contractor, and the aggregate contract price for which, for labor, material and all other items, is less than two hundred dollars, such work or operations being considered as of casual, minor, or inconsequential nature, provided, however, that the limitations of this section shall not apply in any case wherein the work of construction is only a part of a larger or major operation, or in which a division of the operation is made in contracts of amounts less than two hundred dollars for the purpose of evasion of this act, or otherwise; and provided further that the provisions of this section shall not apply to any work or operation connected with the sale or installation of any finished product, material, or article of merchandise, which is not fabricated into and does not become a permanent fixed part of the structure.

Sec. 2. Section 3 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 3. A contractor within the meaning of this act is a person, firm, copartnership, corporation, association or other organization, or any combination of any thereof, who for either a fixed sum, price, fee, percentage, or other compensation, other than wages, undertakes or offers to undertake such work and/or purports to have the capacity to undertake with another, to construct, alter, repair, add to, or improve any building, highway, road, railroad, excavation or other structure, project, development, or improvement, other than to personality, or to do any part thereof; provided, that the term contractor, as used in this act, shall include sub-contractor, but shall not include any one who merely furnishes materials or supplies without fabricating the same into, or consuming the same in the performance of, the work of the contractor as herein defined.

Sec. 3. Section 4 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 4. The administration of this act is hereby placed under the jurisdiction of the director of the department of professional and vocational standards, who shall have the power to procure such equipment and records and to appoint and fix the duties of such assistants as may be necessary to carry out its provisions, including a registrar of contractors (which office is hereby created), a deputy registrar of contractors, a secretary and investigators, who shall be compensated with the approval of the director of finance shall be fixed by, and who shall hold office at the pleasure of, the director of the department of professional and vocational standards. The positions of registrar, deputy registrar, secretary and two investigators are hereby declared to be exempt from the provisions of the civil service law.

Sec. 4. Section 6 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 6. Upon receipt of said application and of said fee, it shall be the duty of the registrar forthwith and within ten days to issue a license to the applicant permitting him to engage in business as a contractor under the terms of this act for the balance of the fiscal year following the application, provided the applicant has furnished such complete information and in such manner as may be required by the registrar in accordance with Section 5 of this act. The license issued under this act shall be signed by the licensee, shall be non-transferable, and shall be displayed in his main office or chief place of business, and satisfactory evidence of the possession thereof shall be exhibited by him upon demand.

Sec. 5. Section 7 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 7. All licenses issued under the provisions of this act shall lapse and expire June 30th of each year. Application for renewal of a current license at any time during June of any year shall authorize operation as a contractor of such licensee until actual issuance of such renewal license for the ensuing fiscal year. All applications for renewal of license shall be filed with the registrar of contractors not later than July 30th of each year; otherwise, such licenses shall be ipso facto suspended and shall be renewable only on the payment of

a fee of twenty dollars and unless so renewed shall remain suspended during the remainder of the fiscal year. After a license has been suspended as in this section provided, for the period of one or more fiscal years, a new application for license must be made and a new license issued in accordance with the provisions of Section 5 of this act. All licensees shall report all changes of personnel and addresses under this act, within 30 days after same shall occur, on such forms as the registrar shall provide in such cases.

Sec. 6. Section 8 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 8. The registrar shall maintain a list of the office of the department of professional and vocational standards in Sacramento, open to public inspection during office hours, a complete indexed record of all applications and all licenses issued and of all renewed licenses under this act, and of all terminations, cancellations and suspension thereof upon receipt of the sum of 50 cents; and such certified copy shall be received in all courts and elsewhere as prima facie evidence of the facts stated therein.

Whenever funds are available for that purpose, it shall be the duty of the registrar to furnish a list of contractors, with their addresses, registered under the provisions of this act, and of licenses issued, suspended or revoked, to such public works and building departments and public officials or public bodies as in his judgment may be deemed advisable.

Said lists of registered contractors, and of licenses issued, suspended or revoked, shall, whenever funds are available for that purpose, be furnished to the public officials hereinbefore enumerated at intervals of 90 days or less; such intervals to be as frequent as the registrar shall deem necessary. Copies of said lists may also be furnished by the registrar upon request to any firm or individual upon payment of such reasonable fee or fees as may be determined by the registrar.

Sec. 7. Section 9 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 9. The registrar of contractors may upon his own motion, and shall upon the verified complaint in writing of any person, investigate the actions of any contractor within the state and shall have power to temporarily suspend or permanently revoke a license issued under the provisions of this act if the holder, while a licensee hereunder is guilty of or commits any one or more of the following acts or omissions:

(1) Abandonment of any contract without legal excuse;

(2) Diversion of funds or property received for prosecution or completion of a specific contract, or for a specified purpose in the prosecution or completion of any contract, and their application or use for any other contract, obligation or purpose;

(3) Fraudulent departure from or violation of plans or specifications in any material respect, without consent of the owner or his duly authorized representative;

(4) Willful and deliberate disregard and violation of the building code of the state, or of any police or subdivision thereof or of the safety laws or labor laws of the state;

(5) Failure to keep records showing all receipts and disbursements of the licensee in all of his transactions as a contractor as that term is defined in this act;

(6) Misrepresentation of a material fact by applicant in obtaining a license;

(7) The doing of any willful fraudulent act by the licensee as a contrac-

tor in consequence of which another is substantially injured.

Sec. 8. A new section is hereby added to Chapter 791, Statutes of 1929, to be numbered 34, and to read as follows:

Sec. 34. Upon the filing with the registrar of a verified complaint charging a licensee with the commission within two years prior to the date of filing of such complaint of any act which is cause for suspension or revocation of license, the registrar must forthwith issue a citation directing the licensee, within 10 days after service of the citation upon him, to appear by filing with the registrar his verified answer to the complaint showing cause, if any he has, why his license should not be suspended or revoked. Service of the citation upon the licensee shall be fully effected by mailing a true copy thereof, together with a true copy of the complaint, by United States registered mail in a sealed envelope with postage fully prepaid thereon addressed to the licensee at his latest address of record in the registrar's office. Service of said citation shall be complete at the time of said deposit subject to the provisions of Section 1013 of the Code of Civil Procedure of this state. Failure of the licensee to answer shall be deemed an admission by him of the commission of the act or acts charged in the complaint and thereupon the registrar shall have power forthwith to suspend or revoke the license.

Upon the filing of the answer fully prepaid thereon addressed to the licensee at his latest address of record in the registrar's office, the registrar shall fix a time and place for the hearing and give the licensee and the complainant not less than five days' notice thereof. The notice may be served by depositing in the United States mail a true copy of the notice enclosed in a sealed envelope with postage thereon fully prepaid and addressed to the licensee and to the complainant, respectively, at his last known address. With the notice to the complainant there shall be attached or enclosed a copy of the answer. If either party has appeared by counsel, the notice shall be given, in like manner, to counsel instead of to the party.

Upon the hearing, the registrar shall hear all relevant and competent evidence offered by the parties and by the licensee, and shall have power to continue the hearing from time to time as in his judgment may be necessary or proper. After the hearing is concluded and the matter submitted, the registrar shall, within 10 days after such submission, render his decision in writing, suspending or revoking the license or dismissing the complaint, with a brief statement of his reasons therefor. He shall give to the complainant and the licensee, or their respective attorneys, notice of the decision, by mail, in the same manner as prescribed herein for the giving of notice of hearing. A decision of the registrar suspending or revoking a license shall not take effect until 20 days after such service of notice of the decision.

Within 20 days after such service of notice of the decision of the registrar suspending or revoking a license, the licensee may apply for a rehearing by filing with the registrar his petition in writing therefor. Within five days after such filing, the registrar shall cause notice thereof to be served upon the complainant by mailing a copy of the petition for rehearing to the complainant in the same manner as herein prescribed for the giving of notice of hearing.

The filing of a petition for rehearing by the licensee's action in suspending or revoking a license suspends the operation of such action and permits the licensee to continue to do business as a contractor pending decision or granting of the petition, and, if the petition be granted, pending de-

cision of the registrar upon rehearing.

In his order granting or denying a rehearing, the registrar shall set forth a statement of the particular grounds and reasons for his action on the petition and shall forthwith mail a copy of the order to the parties who have appeared in support of or in opposition to the petition for rehearing. If a rehearing is granted, the registrar shall set the matter for further hearing and cause the parties to appear in the same manner as prescribed herein for the giving of notice of an original hearing.

Within 10 days after submission of the matter upon rehearing, the registrar shall render his decision in writing and give notice thereof in the same manner as of a decision rendered upon an original hearing.

Within 30 days after service of notice of the order denying the rehearing or of the decision rendered upon the rehearing, any party aggrieved by the order or decision of the registrar may and thereupon shall cause appeal of the same to be taken to the supreme court of the state of California, in and for the county or city and county in which the person affected by such decision resides or has his place of business under the terms of this act, by serving upon the registrar a notice of such appeal and a demand certifying for a certified transcript of all the papers on file in his office affecting or relating to such decision and all the evidence taken on the hearing and paying therefor at the rate of 10 cents for each folio of the transcript and one dollar for each folio of the exhibit. Thereupon, the registrar shall, within 30 days, make and certify such transcript, and the appellant shall, within five days after receiving the same, file the same and the notice of appeal with the clerk of said court. Upon the filing of such appeal, the court shall be limited to a consideration and determination of the question whether there has been an abuse of discretion on the part of the registrar in making such decision.

When an appeal is taken to said superior court from the order or decision of the registrar suspending or revoking a license, such order or decision shall remain in effect pending final determination of the matter, unless the appellant shall file with the court a bond in a sum to be fixed by the court or by the judge thereof in favor of the appellant, the state of California and conditioned upon the faithful performance of all the obligations of said appellant as a contractor, pending the final determination of the matter on appeal and until the fulfillment by the contractor of any condition imposed by such order or decision of the registrar. Such bond shall be for the benefit of any person having dealings with said appellant in his capacity as a contractor, and any person so dealing with said appellant in such capacity shall have the right to continue and maintain an action thereon in his own name against such contractor and his sureties on said bond.

If such superior court shall determine that a contractor's license should be suspended or revoked, it shall by its judgment suspend or revoke such license. The clerk of such superior court shall within 10 days after the entry of any such judgment on appeal transmit to the registrar, by United States mail, a notice containing information as to the affirmation, modification or reversal of the order or decision of the registrar in the matter.

The suspension or cancellation of license as in this act provided may also be embraced in any action otherwise proper in any court involving the licensee's performance of his legal obligation as a contractor.

(Continued on page 7)

THE OBSERVER

What He Hears and Sees on His Rounds

Wage cuts affecting builders on the Decatur, Ind., post office and the U. S. Veterans' Hospital at Tucson, Ariz., are responsible for new controversies reported to the U. S. Conciliation Service, according to press dispatches from Washington, D. C.

The U. S. Department of Labor notes that employment increased 2.10 of 1 per cent in April while at the same time wages fell 1.5 per cent. Workers in 11 major industries increased by \$248 while payrolls in the same industries decreased by \$1,766,752.

The first criminal conviction in Oregon for violation of the engineers' registration law was secured in Multnomah County on May 14, when Andrew MacLean, of Portland, Ore., withdrew a plea of not guilty and entered a plea of guilty of practicing engineering without a license. A \$25 fine was imposed.

A suit said to involve millions of dollars in patent royalties has been filed in federal court at Carson City, Nevada, by the Caterpillar Tractor Company and Plince E. Holt, against the International Harvester Company and the International Harvester Company of America. The complaint alleges the plaintiffs own sixteen patents for the track laying device used by tractors and that the International Company has infringed on these patents. A restraining order and accounting, covering a long period of years, is asked.

Rep. Hamilton Fish of New York has protested to President Hoover against the underpayment of workers on barracks and other improvements at the United States military academy, West Point. Representative Fish said that the laborers are being paid 40 per cent below the standard union scale.

Rate reductions amounting to more than \$20,000,000 have been ordered by the Railroad Commission during the past four years, according to a report released recently. During the same period consumers have benefited to the extent of \$400,000 by voluntary reductions in utility rates.

Aliens will not be employed and Fresno county materials will be given preference in the construction of the \$150,000 crippled children's annex of the Fresno county general hospital, bids for which will be asked shortly by the Fresno county supervisors. Such provisions will be incorporated in the specifications. Only naturalized persons who have resided in California a year and in Fresno county six months will be employed in the work. Furthermore, no laborer will be allowed to work more than eight hours, and if this rule is violated, the contractor will forfeit to the county \$10 per day per laborer working over the eight-hour limit.

A survey to determine present practice in various plants and industries with respect to the speeds of driving and driven machinery is being made by means of a questionnaire by a committee on speeds of machinery working under the procedure of the American Standards Association.

Estimating classes for all engaged in the construction business have been started at Portland, Oregon, by the Builders' Exchange of that city. The classes were organized by C. C. Weideman of the Oregon Building Congress and will be held for three hours on the evenings of Tuesday and Thursday of each week. The 12 hours in the course will cost \$1.50 per person. Charles Burton is instructor. Classes are held in the Builders' Exchange rooms.

At the recent convention of the Oregon State Association of Master Plumbers, the public utility sale of appliances was condemned in a resolution declaring the practice unfair and urging that the matter be brought before state governmental authority.

The California State Department of Public Works, Division of Architecture, has under actual construction in the field approximately 50 major projects representing a total valuation of \$4,511,475. This construction valuation will provide employment for 1297 persons over a period of ten months, it is announced by Geo. B. McDougall, state architect.

Los Angeles seeks the 1932 annual convention of the National Association of Real Estate Boards. The southern metropolis points out that the Olympic Games will be held in that city next year beginning July 20th for a sixteen day period.

The industrial commission of Utah has adopted a building safety code for the state, to become effective July 1. The code prescribes regulations requiring modern and safe practice in building or demolition work and fixes penalties of \$50 to \$5,000 for violations.

Plumbers should sell themselves to the public in the opinion of R. D. Minkler, newly elected president of the Washington State Association of Master Plumbers. He cited an example of successful newspaper advertising by a plumber which read:

"Life's greatest blessing is health. The world's greatest progress has been in the Science of Sanitation. The plumber ranks in importance with the doctor or teacher. His calling is more than a vocation—it is a profession whose purpose is bringing more comfort and happiness into the lives of all people."

Too few members of the building industry realize the importance of going out for business, of sound salesmanship, of careful solicitation.

In a recent radio broadcast over the lines of the plumbing and heating NBC nation-wide hook-up to all membership, A. R. Herske, sales promotion manager for the American Radiator and Standard Sanitary Manufacturing Company, offered some advice which would profit almost every man in the construction industry. He said:

"This is the time to stop waiting for phone calls and start making home calls. It isn't a question of whether or not you like this modern method of selling. Today you either have to go out FOR business or go out OF

business. It's personal contact today that gets the contract, so let's quit worrying about meeting competition and start meeting prospects and remember, it can be done because it has been done."

Chambers of Commerce in leading cities of Oregon, Idaho and Washington have expressed a willingness to co-operate with the construction and industries committee of the Spokane Chamber in a program to decentralize the supervising architectural department in Washington, D. C.

J. J. Kinnear, chairman of the construction and industries of the Spokane chamber of commerce, said that a meeting of representatives from the three northwestern states probably will be held in September, to adopt a program affecting the architectural and material phases of federal building projects.

"We believe local architects should be employed when buildings are erected in the various cities, and further believe that local materials should be used in such buildings, he added.

The Convention of the National Association of Real Estate Boards at Baltimore last week authorized its president to confer with governmental authorities and request a study of the subject of establishing through federal legislation a system permitting the discount of mortgages on urban residences, and a study of long term and short term credit as applied to home financing. For the purpose solely of initiating discussion, the President of the National Association of Real Estate Boards was authorized to tender the services of five realtors for membership on and consultation with the committee to which these matters may be referred by governmental authorities and to furnish for purposes of investigation such tentative proposals as may secure the approval of the Board of Directors of the National Association of Real Estate Boards. No specific plan for a cen-

Declaring that wages must be reduced as a result of the present depression, Clarence F. Hamsher, president of the First National Bank of Los Gatos, Cal., in the current issue of "Bank Service," a house organ of the bank, asserts that a "new order of things is in adjustment, and the return from labor as well as the return on capital, as represented by the smallest shareholder in the largest corporation, must undergo some readjustment."

Writing at length on "When are conditions going to get better?" the bank president in his leading article, says in part as follows:

"Production by factory is reduced the cost of production per unit increases unless wages are reduced, and as wages are reduced, so is the purchasing power of individuals curtailed.

It is a vicious circle, but as commodity prices have come down, the price of labor must come down in proportion.

One thing absolutely certain is that a farmer cannot continue to pay the price he has been paying for common labor this year or for several years, until he can get a more adequate return for that which he produces.

We are passing through, and we will pass through it in due course of time, the most severe depression in history, and it exists and it shares the United States, but all over the world.

Economic changes are in the making. A new order of things is in adjustment, and the return from labor as well as the return on capital, as represented by the smallest shareholder in the largest corporations, must undergo some readjustment.

ALONG THE LINE

W. K. Adams of Redding has been appointed city engineer of Redding to succeed Carl F. May, resigned. Adams was formerly connected with the county surveyor's office of Shasta county.

Clyde Jenken has been appointed city engineer of Huntington Beach, succeeding Merwin Rossen, resigned. Jenken was formerly city engineer of Santa Ana. Harry Oymeyer, who has been acting city engineer of Huntington Beach, will be Jenken's chief assistant.

R. H. Ruiter, temporary assistant building inspector at Sacramento for the past two years, will be appointed in a permanent capacity to the post by City Manager Jas. S. Dean. The municipal civil service commission has certified Ruiter and two other men as being eligible.

August E. Roll, former city councilman of Santa Clara, has been appointed building and plumbing inspector of that municipality, succeeding T. T. Cunningham who resigned last month.

George Ellinwood Finnell, 37, high-way contractor of Sacramento, was killed last Monday when his automobile struck loose earth and overturned four times on the road near Vallejo. He was traveling alone from the bay region to Sacramento.

Finnell was a captain in the World War and was prominently identified with clubs and fraternal organizations in Sacramento.

Surviving him are his widow, Eliza; two children, Janet and George Ellinwood Finnell Jr., and his mother, Mrs. Genevieve Finnell.

Alfred I. Coffey, San Francisco architect, has forwarded a communication to the Santa Clara county supervisors asking that he be considered in the selection of an architect to prepare plans for the new county courthouse to replace the structure recently destroyed by fire.

The body of Joseph A. Close, an American engineer during the canal construction days, was found last Monday on his Gatun lake (Panama City) plantation with the head almost severed, apparently by the stroke of a bolo delivered from the rear. Panama police said they had no clue to the identity of the slayer. The slain man's wife and sisters are now on a cross-country tour of the United States from the west coast.

Ted Helmle has purchased the Lodi Hardware Store at 27 South School St., Lodi, from the Hardware Stores Corporation. Helmle managed the store for the past seven years.

B. L. Mullinix, formerly associated with J. J. Dunbar in the plumbing business at Sonoma, Calif., has established his own shop in Spain street, that city.

W. T. Mallingly, formerly connected with the Irving Kelley Plumbing Shop at King City, Calif., has opened the Star Sheet Metal Works in Bas-set St., that city.

Electric Equipment Co., operated by W. I. Rice and O. H. Linde, has opened new sales quarters at 8 West Pine Street, Lodi. The concern carries a complete line of electrical products.

BUILDING OFFICIALS SEEK NEW MEMBERS

Naming a supervising committee of four building inspectors and a solicitation committee of six others and planning to appoint a group of building material men to work with them, S. P. Koch of Berkeley, Central District chairman of the Pacific Coast Building Officials' Conference, has launched a membership drive for the Conference.

Building inspectors appointed to the central district steering committee are L. H. Anderson, Palo Alto; R. H. Barrett, Piedmont; A. J. Hurley, Richmond and John B. Leonard, San Francisco. The subcommittee consists of A. J. Hurley, Richmond; W. A. Curtis, Stockton; C. L. Baker, Modesto; Victor Becker, San Rafael; M. C. Woodruff, San Jose, and H. C. Weisenburger, Watsonville. In addition to supervising the committee of building material men, the above inspectors are responsible for obtaining Active Participating (city) memberships in the Conference from their district.

A. C. Horner, western manager, National Lumber Manufacturers' association, San Francisco, has been named general chairman of the membership committee working under supervision of the inspectors. In Mr. Horner's absence on a business trip, Koch postponed any announcement of appointments to the building material men's subcommittee. The material men are to secure Association and Subchapter members from building material manufacturers, dealers and trade associations.

\$5,000,000 BRIDGE PLANS ARE COMPLETE

The Narrows Bridge Co., Ltd., of Vancouver, B. C., has completed plans for a high-level suspension bridge, carrying four streets of traffic, to cross Burrard Inlet over the First Narrows, the gateway to Vancouver's Harbor.

The plan is an alternative to building a tunnel under the channel, which is considered impracticable at the moment. The estimated cost of the bridge is \$5,000,000. It will leave a free navigation channel of 1,400 ft. for marine traffic and will clear high water by 200 ft.

Construction of the bridge is in line with recommendations by a royal commission which considered the subject in 1927.

OREGON ARCHITECTS TO GET STATE WORK

That architectural work, affecting state buildings erected in the future, will be distributed among individuals and firms which heretofore have not been favored with state contracts was indicated by a statement made by Governor Meier of Oregon last week.

The statement was made by the governor while the state board of control was considering the remodeling of the state supreme court offices under a \$5000 appropriation authorized by the 1931 legislature. Knighton & Howell, Portland architects, have received the lion's share of these contracts, and have prepared the plans and specifications for virtually all of the larger state buildings erected in Oregon during the past ten years.

As a result of the governor's statement the work of remodeling the supreme court offices was deferred temporarily pending receipt of proposals from a large number of architects located in different parts of the state. These proposals probably will be considered by the state board of control at a meeting to be held early next week.

SEATTLE CEMENT PLANT IS LEASED

A deal has been completed by the Superior Portland Cement Company whereby that concern leases for a term of years, with option of a further lease, the plant of the Pacific Cement Company at Seattle.

The deal was brought about through a survey of the cement situation in the Northwest by Vice-President Crowell of Atlas Portland Cement Co., at the instigation of Tucker, Hunter, Dulin & Co., and of White Weld & Co., of New York.

Pacific Portland Cement Company, a subsidiary of the Pacific Cement Company, has a capacity of 1,000,000 barrels, while the Superior Portland Cement plant, located at Cement, Wash., has a capacity of 1,200,000 barrels.

The transaction just completed will give Pacific the advantage of Superior management, while Superior, on the other hand, will be able to ship its business from the most convenient point.

SEEK WITHDRAWAL OF SCHOOL CONTRACT

Cancellation of the contract for construction of the Rogers high school at Spokane, Wash., is being asked in petitions filed with the school board. The petitions were presented on behalf of organized labor.

"The investigation preceding the filing of these petitions was thoroughgoing and charges that the contractor, J. J. Lohrenz, is violating state statutes, which made it the duty of officials of the board to declare any contract 'canvassed' which violated these provisions are supported with affidavits," said F. Huffman, president of the carpenters' union.

The petition says that the contractor "willfully, continuously and daily is violating sections 5612 to 5617, Bonington's compiled statutes, declaring the public policy of this state, and providing that eight hours shall constitute a day's work, on all public improvements made by the state, or any of its political subdivisions, requiring his workmen on said school building to work more than eight hours each day."

L. B. A. C. WILL MAKE HONOR AWARDS

A competition for honor awards for buildings of special architectural merit erected during 1929 and 1930 is being sponsored by the Long Beach Architectural Club, Hugh R. Davies, president. The awards will be announced at a banquet to be held June 30.

Nat. Taper, George W. Kahrs and Kenneth Webb comprise the committee in charge of the competition. Sumner Spaulding, president of the Los Angeles Architectural Club, heads the jury on awards.

Reports numbering 4624 filed by Connecticut contractors, not including reports which, for various reasons, could not be tabulated, have been received by the Construction Section of the Census of Distribution of this number. 804 reported their 1929 business as \$25,000 or over, while 3387 filed reports indicating that their construction operations fell short of that amount. This latter class is made up of 121 general contractors and 256 sub-contractors. The reports of the general contractors show that 305 are engaged in building construction, 9 in street and highway operations, and 7 in miscellaneous work.

FREIGHT RATE PROTESTS FILED

Monolith Portland Cement Company has filed a complaint with the Railroad Commission against Southern Pacific Company, The Atchison, Topeka and Santa Fe Railway Company, Visalia Electric Railroad Company, California Central Company, Bay Point & Clayton Railroad Company, California Central Railroad Company and Yosemite Valley Railroad Company, alleging that defendant carriers collected during the last two years unjust and unreasonable rates for the transportation of numerous carloads of cement from Monolith to various points in California, and which rates are greatly in excess of those charged from the plants of competing companies in other parts of California. Complainant asks the Commission to issue its order requiring defendants to cease from charging rates for the transportation of cement in carloads from the plant of complainant at Monolith to points in California which are higher than those charged contemporaneously from plants of competitors, and to award reparation to complainant in the amount equal to the difference between the charges assessed and those found reasonable by the Commission.

R. E. Hazard Contracting Company has filed a complaint with the Commission against Southern Pacific Company, The Atchison, Topeka and Santa Fe Railway Company and San Diego & Arizona Railway Company, alleging that defendant carriers collected excessive rates for the transportation of a number of carloads of earth from Tom, Mono County, to Spring Valley on the San Diego & Arizona Railway Company in San Diego County, and asking the Commission to award reparation in the sum of 16½ cents per 100 pounds on such shipments.

L. A. COUNTY BUILDING IN MAY

During the month of May, 1931, the Los Angeles County Regional Planning Commission issued 349 permits for buildings with an estimated valuation of \$631,390 to be erected in the unincorporated territory of the county. During the first 5 months of 1931, the commission issued 2081 permits with an estimated valuation of \$5,601,054. Following is the report for May, 1931, classified according to use or occupancy of buildings:

	No.	Permits	Value
Single dwellings	116	5	\$361,450
Duplex houses	6	6	47,000
Apartment houses	2	2	101,300
Commercial buildings	32	32	41,300
Industrial buildings	7	7	16,900
Miscellaneous buildings	185	185	63,900
Totals	349	349	\$631,750

"If we are to emerge from the present period of depression it will not be because of governmental aid, it will not be because of any attempted revision of economic laws, but by reason of individual effort, enterprise and energy given their fullest expression, and in their results assured by governmental protection."

So says Edward D. Duffield, president of the Prudential Insurance Company.

One hundred men have returned to work at the New Castle, Pa., plant of the Lehigh Portland Cement Company, after the usual winter suspension of operations. Orders held by the company will permit operations several months.

PACIFIC COAST CITIES SPEND \$15,304,493 IN MAY BUILDING

Following is a compilation of May, 1931, building permit valuations for Pacific Coast cities together with the valuations for the corresponding period in 1930, as reported by building department executives in the cities named:

City	No.	May, 1931	Cost	May 1930
CALIFORNIA				
Alameda	54	\$ 50,382	\$ 44,919	
Alhambra	43	85,850	352,500

FIVE BILLION LOAN
URGED BY HEARST
TO END DEPRESSION

William Randolph Hearst, head of the Hearst newspapers, in a radio address last Tuesday night, urged the government to borrow \$5,000,000,000 to restore property and suggested that it could pay off the debt in five years by abolishing prohibition.

"This is not time to reduce the national debt through burdensome taxation, and thereby reduce prosperity," he said.

"It is a time to increase the national debt and increase the expenditure of the government in public works in the employment of labor, and thereby increase prosperity."

"Then out of prosperity to pay off the debt."

Prosperity, he continued, means increased incomes and values out of which the government would "eventually get even with moderate taxation," an increased income to pay off the loan.

"And," he added, "if the government desires further to increase its income let it end this folly of prohibition which does not prohibit, and substitute government control of the manufacture and distribution of alcoholic beverages, and so secure for itself on the basis of the figures of Canada's excise income, an additional income of a billion dollars a year."

"The excise income to the United States government of a billion dollars a year would in itself pay off in five years five billion dollars borrowed and spent to restore prosperity."

HOME BUYING IS
ON THE INCREASE

Subtle signs of good times in the making are seen in three major surges which are exciting public associations, according to the United States Building and Loan League, in its quarterly survey of coast-to-coast conditions. Borrowers are meeting their installment payments on home mortgages with unlooked-for promptness, dollars seeking investment in building and loan are mounting, and bargain-hunting in the for-sale residential areas has started, the league's member associations report.

The organization speaks for the leading savings, building and loan associations and cooperative banks in the country, on the basis of findings during the past ten days of inquiry.

The demand for building and loan shares has increased 25 per cent over 1930 in some areas, in other sectors it has grown so great that individual investments are limited to \$200, and in still other areas new accounts are being refused because of abundance of money in the association, says H. Morton Bodfish, executive manager.

The combination of plentiful money for first mortgage loans with bargain prices in residential real estate is showing its effect in increased home buying, especially noticeable in the last few weeks, several of the league directors in various sections of the country report. Home seekers give every indication of taking further advantage of this happy combination of circumstances during the coming months, the building and loan leaders agree.

Prosperity glimpses gleaned from the statements of the league's offices and directors included in the June list forecasts applied to continuing angles of the building and loan business.

The Mount Emily Lumber Company sawmill at La Grande, Ore., idle since December last, resumed operations last Thursday. Its owners said indications point to a continuous run for a long period of time.

AMENDMENTS TO CONTRACTORS'
LICENSE LAW OF CALIFORNIA

(Continued from page 3)

Sec. 9. Section 10 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 10. A judgment of suspension or cancellation of license by the superior court shall be subject to appeal or review in accordance with the provisions of law as to appeal from or review of judgments of superior courts, but there shall be no stay of execution of enforcement of such judgment pending such proceedings on appeal or review unless the appellant has deposited with the clerk of the court a bond in all respects conditioned as, and similar to, the bond required by Section 9a of this act.

The clerk of the court wherein said judgment has become final shall, within 10 days after the entry of such final judgment, transmit by United States mail, to the registrar, notice containing the information as to the affirmation, modification or reversal of the judgment of the superior court in said matter.

Sec. 10. A new section is hereby added to Chapter 791, Statutes of 1929, to be numbered 10a and to read as follows:

Sec. 10a. In any investigation, proceeding or hearing which under the provisions of this act he is empowered to institute, conduct or hold, the registrar, deputy registrars and investigators shall have the power to administer oaths, certify to official acts, issue subpoenas for the attendance of witnesses and the production of books, papers and records, and exercise all of the powers conferred upon the head of a department by the provisions of Section 333 of the Political Code. All of the provisions of said section are incorporated herein with the same force and effect as if herein set forth at length and wherever in said section the term "head of a department" or similar designation occurs, the same, for the purpose of this reference, means the "registrar of contractors."

Section 11. Section 11 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 11. After suspension of the license upon any of the grounds set forth in Section 9 of this act, the registrar shall renew the same upon proof of the compliance by the contractor with any provisions of the judgment as to renewal of such license or, in the absence of such

judgment or any provisions thereof as to renewal, in the sound discretion of the registrar. After cancellation of a license upon any of the grounds set forth in Section 9 of this act, such license shall not be renewed or reissued within a period of one year after final determination of cancellation and then only on proper showing that all loss caused by the act or omission by which the license was cancelled has been fully satisfied.

Sec. 12. Section 12 of Chapter 791, Statutes of 1929, is hereby amended to read as follows:

Sec. 12. Any person who acts in the capacity of a contractor within the meaning of this act without a license as herein provided, and any person who conspires with another person to violate any of the provisions of this act, is guilty of a misdemeanor, and shall be punished therefor, be punished by a fine of not to exceed \$500, or by imprisonment in the county jail for a term not to exceed six months, or by both such fine and imprisonment, in the discretion of the court.

No person engaged in the business or acting in the capacity of a contractor as defined by Section 3 of this act, shall bring or maintain any action in any court of this state for the collection of compensation for the performance of any act for which a license is required by this act without alleging and proving that such person was a duly licensed contractor at the time the alleged cause of action arose.

The word "person" as used in this section includes an individual, a firm, copartnership, corporation, association, or other organization.

Paramount Steam Turbine Co., Ltd., capitalized for \$200,000, has been incorporated in Oakland. Directors are: John L. Eastery of Healdsburg, Carl P. Piper, H. R. Battee and Edwin L. Battee of Oakland, and Mary A. Wood of Santariam, Calif.

Neon Sign Service Co., Ltd., capitalized for \$25,000, has been incorporated in San Francisco. Incorporators are O. Stuart Campbell, V. S. Redge, J. V. Ruff and Julian D. Cohn.

John Kaye has been appointed city electrical inspector of Sunnyvale, Calif. The position was recently created by the city trustees. An assistant to Kaye will be named shortly.

APARTMENTS

Grading & Structural Steel Contracts

AWARDED.
APARTMENTS Cost, \$150,000
SAN FRANCISCO. Walnut and Clay Streets.

Six-story and basement class C reinforced concrete and steel frame apartments (30 2- 3- and 4-room apts.)

Owner and Builder—L. Epp, 4745 Geary Street.

Architect—H. C. Baumann, 251 Kearny Street.

Structural Steel—Herriek Iron Works, 18th and Campbell Sts., Oakland.

Grading—L. Devincenzi & Co., 148 Blake Street.

Reinforcing steel and concrete bids wanted.

Plans Being Figured
APARTMENTS Cost, \$250,000
OKLAND. Alameda Co., Cal. East 12th St. near Third Ave.

Nine-story Class A reinforced concrete apartments and stores (56 2- and 3-room apts.; 1 5-room apt.; vacuum steam heating)

Owner—L. J. Newton, 1150 1st Ave., Oakland.

Plans by Thomas Keenan, 1440 Broadway, Oakland.

Taking Bids On General Contract.
APARTMENTS Cost, \$22,000
SAN FRANCISCO. W Castro Street S 21st.

Three-story and basement frame and stucco apartments (11 2- and 3-room apts., garages; composition roof).

Owner—F. A. Pachter, 1467 11th Ave.

Plans by Owner.

Sub-Contracts Awarded.
APARTMENTS Cost, \$150,000
SAN FRANCISCO. SE E 11th and Franklin Streets.

Seven-story reinforced concrete, steel and brick apartments (tar and gravel roof, electric stores and refrigerators; 53 2- & 3-room apts.)

Owner—Bargene Realty Co., 323 Monadnock Bldg.

Architect—Charles E. J. Rogers, Pheasant Bldg.

Structural Steel—McClintic-Marshall Co., 2050 Bryant St.

Lumber—Christiansen Lbr. Co., Fifth and Hooper Sts.

Contracts for reinforcing steel and ornamental iron will be awarded in a few days.

BONDS

REDWOOD CITY, San Mateo Co., Cal.—Redwood City Elementary School District votes bonds of \$85,000 to finance erection of an elementary school at Eagle Hill and a 3-classroom addition to the Garfield School.

Bond Election Defeated.
SCHOOL Cost, \$46,000
ARROYO GRANDE, San Luis Obispo Co., Calif.

One-story elementary school.

An election held June 6 to vote bonds of \$46,000 to finance erection of this structure failed to carry. The vote was 240 in favor and 201 against, a two-third majority being required to carry the proposal.

ISLETON, Sacramento Co., Calif.—City trustees will call election to vote bonds of \$9,500 to finance enlargement of firehouse.

CHURCHES

Electrical Contract Awarded.
CHURCH Cost, \$—
SAN FRANCISCO. Funston Ave. and Judah St. (St. Anne's Church).

Class A reinforced concrete church.

Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St.

Architect—Shea and Shea, 545 Montgomery St.

Electrical Work—Severin Electric Co., 172 Clara St., \$6,550.

As previously reported, heating and ventilating awarded to A. A. Pollia, 401 14th Ave.; general contract to S. Rasori, Cal Bldg., at \$186,000; plumbing to Dowd & Welch, 3558 18th St., at \$3958.

Plans Being Figured—Close June 12.
CHURCH Cost, \$15,000
DAVIS, Yolo Co., Cal.

One-story reinforced concrete church (seating capacity of 250; terra cotta tile roof; gas furnace, cast stone).

Owner—Roman Catholic Archbishop of Sacramento (Rev. J. A. Grealy, Parish Priest), Winters.

Plans by George Rossi, 865 Bayshore Highway, San Mateo.

Prospective bidders on the project include O. McDahl, Burlingame; J. A. Pausback, 1722 J St., Sacramento.

Completing Plans
CHURCH Cost, \$40,000
CHICO, Butte Co., Cal.

Two-story brick church building.

Owner—Bidwell Memorial Church. (Rev. R. C. LePorte, Pastor).

Architect—Charles F. Dean, California State Life Bldg., Sacramento.

Expect to be ready for bids about July 1.

The structure will be erected on the site of the old Presbyterian Church which was recently destroyed by fire.

A portion of the old church building will probably be used in the erection of the new structure.

To Be Awarded.
CHURCH Cost, \$20,000
SACRAMENTO, Sacramento Co., Cal.

SW 35th St. and 4th Ave. (72x125 feet).

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander

SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1246 Mission St. Underhill
 San Francisco 7042

First unit of mausoleum (reinforced concrete construction; marble and bronze interior).

Owner—Withheld.
Architect—Crim, Bessing & McGuinness, 488 Pine St., San Francisco.
Segregated bids will be taken in about two weeks. Excavation work is now under way by day's labor.

SAN FRANCISCO—Until June 17, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct concrete bents under existing 44-inch pipe line across Islais Creek, replacing present short bents. Estimated cost, \$3,000. Project involves:

- (a) 150 cu. yds. class B concrete;
- (b) 2,740 lbs. 8-in. square deformed reinforcing steel;
- (c) 230 lbs. 1/2-in. do.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from San Francisco Water Department, 425 Mason St., Room 701, on deposit of \$10, returnable.

Plans Being Figured—Bids Close June 20, 10 A. M.

RECREATION BLDG. Cost, \$14,000
BERKELEY, Alameda Co., Cal. James K. Kneely Park, bounded by 7th, 8th, Delaware and Virginia Sts.
One-story frame and stucco recreation building (tile roof).
Owner—City of Berkeley, Florence E. Turner, city clerk.
Architect—Jas. W. Plachek, Mercantile Bank Bldg., Berkeley.

Certified check 10% payable to city required with bid. Plans obtainable from the Building Department, City Hall, on deposit of \$10, returnable.

SACRAMENTO, Cal.—Diamond Match Co., Chico, at \$609.75 awarded contract by city council to furnish lumber for store stock at the Municipal Corporation Yard. Four other bids submitted.

SACRAMENTO, Cal.—Until June 18, bids will be received by H. G. Denton, city clerk, for grading site of new sedimentation basin in connection with municipal water filtration plant. Plans on file in office of clerk. Fred J. Klaus, city engineer.

Specifications Completed.

TRACK Cost, \$200,000
BERKELEY, Alameda Co., Cal. University Campus, Fulton and Bancroft Sts.

Reinforced concrete track stadium bowl to cost 20,000.

Owner—University of California.
Architect—Warren C. Perry, 260 California St., San Francisco.

Work involves two bleacher structures of reinforced concrete, team quarters, lockers and showers, toilet rooms, telephone and radio accommodations. A deposit of \$200 will be required for the plans, which will probably be available at the Controller's Office, California Hall, Berkeley, about June 16, and be opened about June 25. A certified check of 10% will be required with bids.

SAN FRANCISCO—Three identical bids were received by the Playground Commission, 376 City Hall, for fencing and backstops at Aptos Playground at \$3474.74.

The three identical bids were submitted by Standard Fencing Co. 452 Bryant St.; Anchor Post Fence Co., 460 5th St., and Kamlan Fence Co., 350 Bryant St. The other bids were: Hercules Fence Co., \$8654.81
West Coast Wire & Fence Co., \$5900.00

MISCELLANEOUS CONSTRUCTION

BERKELEY, Alameda Co., Calif.—Until June 16, 10 A. M., bids will be received by Florence E. Turner, city clerk, to furnish No. 10 solid single conductor, double braid weatherproof medium hard drawn copper wire; delivery f.o.b. Berkeley. Certified check \$100 required with bid. Specifications on file in office of clerk.

SAN JOSE, Santa Clara Co., Cal.—Until June 22, 8 P. M., bids will be received by C. E. Goodwin, city manager, to furnish radio equipment, as follows:

- (a) One 100-watt police alarm broadcast transmitter (RCA - BT - 3670 or equal).
- (b) Ten (more or less) police communication receivers.

Certified check 10% required with bid. Specifications obtainable from city clerk.

BERKELEY, Alameda Co., Calif.—Until June 15, 8 P. M., bids will be received by Clara P. Andrews, secretary, Board of Education, 2325 Milvia

St., to furnish stock ledger posting machine for school department. Specifications obtainable from secretary.

FRESNO, Fresno Co., Cal.—Until June 19, 11 A. M., bids will be received by H. S. Foster, city clerk, to furnish Mazda Incandescent Lamps for the term commencing July 1, 1931, and ending June 30, 1932. Certified check \$500 payable to city required with bid. Further information obtainable from city clerk.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco or Phone GARfield 5744:

21108—Marble, San Francisco. Firm in Prato, Toscana, Italy, desires to establish contact with reliable commission agents interested in handling marble, alabaster, artistic wood work and other Italian products.

21112—Manufacturing Rights, New York City. Firm in Germany which has been manufacturing fire-alarm equip. and is internationally known, desires to make arrangements for the manufacture of its equipment here in the United States.

21113—Canvas, San Francisco. Firm in Czechoslovakia is inquiring for list of importers of horse-hair canvas and camel-hair canvas.

21117—Cattle Hair, Osaka, Japan. Exporters of cattle hair suitable for making felt are anxious to contact felt manufacturers.

21118—Sewing Machines,—Osaka, Japan. Firm is desirous of importing second-hand Singer sewing machines Nos. 12-12, 15, 24-26, 30, 44-13, 46, 60-25, 60-28, 60-38, 69-6, 71-1, 71-3, 81-6, 91-20, 81-22, 82-3, 82-20, 95-10 and Union Special No. 6.

The King Co. (Attention Frederick Callher), Owatonna, Minn., manufacturers of ventilating, heating, drying and cooling systems and equipment, wish to secure a representative in this district.

Walter J. Thomson, 1514 South Wilton Place, Los Angeles, with importing and exporting agencies, wishes to contact San Francisco or Eastern concern with view to representing them in Southern California.

S. E. Williams (Electrical Contracting), 529 North Michigan Ave., Chicago, Ill., publishing magazine to be distributed among electrical contractors wishes to secure agent for distribution in this territory.

Wm. H. Hutchins, Gauthier & Hutchins, Inc., 251 So. Canon Drive, Beverly Hills, Calif., has facilities for representing local or Eastern manufacturers having suitable products to carry to the architects, lumber dealers, building material dealers, department stores and industrial consumers, for California, Oregon and Washington.

W. A. Underwood, Loring Coes Co., Worcester, Mass., manufacturers of all types of machine knives are looking for concern in San Francisco to act as distributing agency for their products.

J. W. Madden, 908 Westheimer St., Houston, Texas, has facilities for manufacturers or firms in San Francisco who wish to increase their business by forming new sales connections in Texas.

Langlotz & Co., 1 Hanson Place, Brooklyn, N. Y., can supply attractive line of porcelain enamel ash trays to party wishing to represent them.

R. Gillespie Co., Ware, Mass., manufacturers of telescopic and platform hoists wish to secure agent for this territory.

Engineering News Section

BRIDGES

SACRAMENTO, Cal.—Until June 15, 10 A. M., bids will be received by Harry W. Hall, county clerk, to construct reinforced concrete culverts in Madison Ave. Estimated cost, \$880.

Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from County Engineer Chas. Deterding, Jr., at Sacramento.

SAN FRANCISCO—Board of Public Works has officially rescinded the contract awarded to Barrett & Hilt to construct the Third Street bridge and has commissioned Jos. B. Strauss, Russ Bldg., to act as consulting engineer on the project furnishing general building plans for substructures and superstructure. The Strauss bridge will be erected without any royalty charges. Engineer Strauss to receive a total fee of five per cent of the entire cost of the substructure and superstructure in place. New bids will be asked upon completion of plans.

VENTURA COUNTY, Calif.—Mitty Bros. Const. Co., Detwiler Bldg., Los Angeles, at \$282,303 awarded contract by State Highway Commission to construct deck plate girder bridge across Santa Clara river about 1 mile south of Montalvo, consisting of 21 86-ft. spans on concrete piers and abutments. Complete list of unit and total bids received on this project published in issue of May 4.

SANTA CLARA COUNTY, Calif.—Until July 1, 2 P. M., bids will be received by State Highway Commission to construct reinforced concrete girder bridge over Coyote Creek at San Jose, consisting of six 34-ft. spans on concrete pile bents and concrete abutments and wing walls on pile foundations.

SAN LEANDRO, Alameda Co., Cal.—City Manager W. A. Richmond contemplates plans for bridge over San Leandro Creek in Park Street, a unit in the extension of Park St. to the north city limits, where it will join an extension of Russett St. The cost is estimated at \$35,000.

NAPA, Napa Co., Cal.—City votes bonds to finance construction of a new bridge in Third Street over the Napa river and another over the Brown St. crossing. For the Third St. bridge, bonds of \$35,000 were voted and for the Brown St. bridge, \$5000. The Third St. issue will finance one-half the cost, the remaining half to be contributed by the county and state.

VISALIA, Tulare Co., Calif.—Until July 6, 2 P. M., bids will be received by Gladys Stewart, county clerk, to construct reinforced concrete bridge No. 92 over White River on county highway between Ducor and Richgrove, involving:

- (1) 174.63 cu. yds. class A concrete in the bridge structure;
- (2) 3.02 cu. yds. class F concrete in the bridge structure;
- (3) 21.29 cu. yds. of class A concrete in the pavement;
- (4) 400.00 cu. yds. of earth fill on approaches;
- (5) 200 cu. yds. of lump sum bid).

All the material to be used in the

construction of the bridge will be furnished by the County of Tulare to B. B. Ducor, Calif., on the Southern Pacific Railroad Co.'s siding, excepting as otherwise stated in the specifications. Certified check 5% payable to the Chairman of the Board of Supervisors required with bid. Plans obtainable from County Surveyor T. W. Switzer on deposit of \$10, returnable.

SACRAMENTO, Cal.—E. R. Jamieson, Box 853, Sacramento, at \$2,484.35 awarded contract by county supervisors to construct the Stoll Bridge, northeast of Rio Linda.

SAN MATEO COUNTY, Cal.—Barrett & Hilt, 918 Harrison St., San Francisco, at \$95,188 awarded contract by State Highway Commission to construct an undergrade crossing under tracks of the Southern Pacific Railroad near Henderson Station, consisting of two concrete abutments with wing walls, installing drainage system, and pumping equipment, and grading and paving approximately 4 miles of roadway with Portland cement concrete. Complete list of unit and total bids on this project published in issue of June 2.

SACRAMENTO, Cal.—Geo. D. Hudson, 1915 S Street, Sacramento, at \$5,643.98 submitted lowest bid to the county supervisors to construct a reinforced concrete bridge over Linda Creek, southeast of Rio Linda on the Dry Creek road.

Following is a complete list of bids:

Geo. D. Hudson, Sacramento.....	\$5,643.98
P. F. Bender, Sacramento.....	5,650
R. J. Bean, Croville.....	5,671
Holden Const. Co., Sacto.....	6,432
J. Downer, Sacramento.....	6,522
Yoho & Dauger, Sacramento.....	6,754
McGowan Const. Co., Sacto.....	7,251
Pacific Properties & Const. Co., Oakland.....	7,593

Bids held under advisement.

CLE ELUM, Wash.—Until 10 A. M., July 10, bids will be received by the Bureau of reclamation at Yakima, Wash., for furnishing labor and materials and performing all work for construction of the Cle Elum Dam and clearing the reservoir site, Yakima Project, Wash. The work is located about 8 miles northwest of Cle Elum, Wash., on the Northern Pacific and Chicago, Milwaukee and St. Paul railways.

The principal items and estimated quantities involved are as follows:

- (1) 134,000 cu. yds. of stripping;
- (2) 25,500 cu. yds. of tunnel and shaft excavation;
- (3) 1,552,000 cu. yds. of excavation in open cut;
- (4) 35,000 cu. yds. of backfill;
- (5) 1,220,000 cu. yds. of earth and gravel embankment;
- (6) 44,000 cu. yds. of riprap and paving;
- (7) 11,200 cu. yds. of concrete in tunnel and shaft lining;
- (8) 20,300 cu. yds. of concrete other than tunnel and shaft lining;
- (9) 20,000 cu. ft. of pressure grouting;
- (10) placing 3,300,000 lbs. of reinf. bars
- (11) placing 3800 lin. ft. 6-in. to 30-in. drainage;
- (12) driving 12,800 lin. ft. sheet piling;
- (13) installing 575,000 lbs. of metal work;
- (14) 2700 acres of clearing.

Proposal guarantee, 10%.

SANTA CLARA COUNTY, Cal.—As previously reported, bids will be received July 1 by State Highway Commission to construct a reinforced concrete girder bridge across Coyote Creek at San Jose, consisting of six spans 34-ft. long on concrete pile bents and concrete abutments and wing walls on pile foundations. Project involves:

- (1) 1200 cu. yds. struc. excavation;
- (2) 4000 lin. ft. furnishing Douglas fir piles, including test piles;
- (3) 158 cubic, drive Douglas fir piles, including test piles;
- (4) 1600 lin. ft. reinf. conc. piles, including test piles;
- (5) 1100 cu. yds. class A Portland cement concrete;
- (6) 16 cu. yds. class E do;
- (7) 195,000 lbs. reinf. steel;
- (8) 170,000 lbs. bronze expansion plates;
- (9) 1 lot miscellaneous items of work.

SAN JOSE, Santa Clara Co., Cal.—Thermotte Const. Co., 580 Stockton Ave., San Jose, at \$13,978 awarded contract by city council to construct reinforced concrete bridge over Guadalupe river at Home and West Virginia Sts. Project involves in the main: 425 cu. yds. concrete.

Complete list of bids on this project published in issue of May 27.

REDWOOD CITY, San Mateo Co., Calif.—See "Streets and Highways," this issue. County Surveyor Jas. S. James estimates cost of highway routes, including bridge construction.

SAN JOAQUIN COUNTY, Calif.—Thermotte Const. Co., 580 Stockton Ave., San Jose, at \$57,537 submitted low bid June 10 to State Highway Commission to construct nine timber bridges and widen two bridges between Stockton and Turner Station. Complete list of bids follows:

Thermotte Const. Co., San Jose.....	\$57,537
J. F. Metzger & Son, L. A.....	57,615
Geo. J. Ulrich Const. Co., Modesto.....	60,555
Lord & Bishop, Sacramento.....	63,870
R. B. McKenzie, Red Bluff.....	64,882
Force Const. Co., Piedmont.....	65,270
Frederickson and Watson, Oakland.....	65,845
M. B. McGowan, San Francisco.....	71,038
Bodenhamer Const. Co., Oakland.....	72,662
Oberg Bros., Los Angeles.....	73,417
W. J. O'Neil, San Francisco.....	75,925

DREDGING, HARBOR WORKS & EXCAVATIONS

STOCKTON, San Joaquin Co., Cal.—Bids will be asked shortly by U. S. Engineer Office, California Fruit Bldg., Sacramento, for dredging in Stockton Channel, involving 1,435,000 cu. yds. of material. Further mention will be made of this work when bid opening date is set.

SAN FRANCISCO—Until June 29, 11 A. M., bids will be received by Constructing Quartermaster, Fort Mason, for dredging at S. Army Transport Docks at Fort Mason.

RICHMOND, Contra Costa Co., Cal.—Franks Contracting Co., 260 California St., San Francisco, at \$32,615 awarded contract by city council for dredging the Ford Channel in the

Richmond Harbor for a width of 200 feet and a minimum depth of 30-feet. City has \$20,000 available for this work. Bids will be taken on two propositions, (a) to dredge for a distance of 1,100 ft. and the other (b) for a distance of 1,700 ft. Certified check 10%.

Complete list of bids follows:
 Franks Contracting Co., Area (a) 19.8c yd., total \$26,845.50; Area (b) 16.7c, total \$23,615.10.
 American Dredging Co., (a) 19.55c, total \$27,523.29; (b) 16.9c, total \$23,065.70.

San Francisco Bridge Co., (a) 22½c, total \$29,510; (b) 21½c, total \$41,985.50.

LONG BEACH, Calif.—San Francisco Bridge Co., 14 Montgomery Street, San Francisco, at \$124,608.50 awarded contract by city council for dredging and filling in Outer Harbor, involving 415,000 cu. yds. dredging; 150 lin. ft. creel-dredged bulkhead or curtain wall; 1,750 tons chinking and sealing rock.

IRRIGATION PROJECTS

EL NIDO, Merced Co., Calif.—See separate bid listing on page five of this issue. Bids opened by directors of the El Nido Irrigation District to furnish and deliver lumber.

STREET LIGHTING SYSTEMS

WALNUT CREEK, Contra Costa Co., Calif.—Lighting concerns are conferring with the Greater San Ramon Chamber of Commerce regarding the installation of a modern street lighting system in Walnut Creek. Standards contemplated are 18 ft. 2-light type as installed in University Ave. in Berkeley.

SAN JOSE, Santa Clara Co., Calif.—City council declares intention (3371) to install 20 San Jose Design Duplex Electrolux poles in Fourth St. bet. San Fernando and San Carlos Sts., together with underground system 1911 Act. John J. Lynch, city clerk. Wm. Popp, city engineer.

SOUTH SAN FRANCISCO, San Mateo Co., Calif.—Proceedings have been started by the city council to install ornamental street lighting system in Grand Avenue for its entire length. Double-light standards will be installed, together with underground system.

SAN JOSE, Santa Clara Co., Calif.—Proceedings have been started by the city council to install electrolier system in all blocks in South First street. Wm. Popp is city engineer.

MACHINERY AND EQUIPMENT

FULLERTON, Orange Co., Calif.—Until June 16, 7:30 P. M., bids will be received by E. C. Hazmahlich, city clerk, to furnish tractor of 30 to 50-hp. or equal. Certified check 10% required with bid.

PUGET SOUND, Wash.—Until June 17 (time extended from June 3), under Specification 6842, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., to furnish 250-ton stationery hammer-head crane electrically operated; 20-ton traveling tower crane having gasoline electric power; and 10-ton traveling gantry crane and traveling revolving jib having gasoline-electric power at the Navy Yard, Puget Sound, Wash. Plans obtainable from above office on deposit of \$10.

MADERA, Madera Co., Calif.—Until July 7, 11 A. M., bids will be received

by L. W. Cooper, county clerk, to furnish one new 12-ft. Austin road grader, f.o.b. Madera. Further information obtainable from clerk.

COURTLAND, Sacramento Co., Cal.—Until July 2, 1:30 P. M., bids will be received by L. C. Peck, clerk, Bates Joint Union School District, to furnish

(1) Chassis for one 40-passenger school bus;
 (2) School Bus Body, 40-passenger capacity.

Separate bids are wanted on each unit. Further information obtainable from E. E. Hudson at Courtland.

PETALUMA, Sonoma Co., Cal.—Until June 22, 8 P. M., bids will be received by John A. Olmsted, secretary, Petaluma City School District, to furnish and deliver school bus, as follows:
 Item 1. For furnishing two 1½-ton truck chassis for school transportation as per plans and specifications on file at the office of the City Superintendent of Schools.

Item 2. For the construction and furnishing two 42-passenger bus bodies to be built on truck chassis owned by the Board of Education as per plans and specifications on file at the office of the City Superintendent of Schools in the high school building.

Each item must be bid for separately.

Certified check 10% required with bid. Further information obtainable from secretary.

PEARL HARBOR, T. H. (By Special Wire)—E. W. Kaltenebach Corp., Bedford, Ohio, at \$28,339 submitted low bid June 10, under Specification No. 6458, to Bureau of Yards and Docks, Navy Department, Washington, D. C., to furnish a 30-ton revolving crane at the Naval Submarine Base, Pearl Harbor.

Industrial Brown Hoist Co., Cleveland, Ohio, second low bidder at \$30,700; American Hoist & Derrick Co., St. Paul, \$31,554, third low bidder.

SAN FRANCISCO—Until June 22, 3 P. M., under Proposal No. 730, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish sheet metal shop supplies for School Department. Specifications obtainable from above office.

RAILROADS

OAKLAND, Alameda Co., Calif.—Informal bids are being received by City of Oakland Port Commission for laying spur tracks on the east side of Warehouse A.A. Est. cost \$900. Port Commission will furnish trucks.

FIRE EQUIPMENT

MADERA, Madera Co., Calif.—Until July 7, 10 A. M., bids will be received by L. W. Cooper, county clerk, to furnish one 2-ton Moreland Fire Truck fully equipped, f.o.b. Raymond, Calif.

SAN JOSE, Santa Clara Co., Calif.—Mack Truck Co. at \$12,500 awarded contract by city council to furnish one 1000-g. p. m. combination pumper and hose car for fire department.

ISLETON, Sacramento Co., Calif.—City trustees will call an election shortly to vote bonds of \$6,000 to finance purchase of motor fire truck and \$2,000 for purchase of other fire fighting equipment.

RESERVOIRS AND DAMS

SANTA BARBARA, Calif.—City desires proposal to issue bonds of \$2,000,000 to finance enlargement of the

Gibraltar Dam and provide improvements to the water supply system.

NEWPORT BEACH, Orange Co., Cal.—C. R. Browning, engineer, for the Irvine Co., has announced that construction of a dam at Newport Bay to care for flood waters from El Modena to El Toro, will start about July 1. The dam will be located at the old San Joaquin Gun Club, 0.75 mile east of the Irvine Co. The dam has been signed for a spillway capacity of 6500 second feet. The elevation at the base will be six feet. It will be 3½ ft. high. When the reservoir is full, it will stand 2½ feet. The reservoir capacity will be 12,500 acre feet. The dam will cost \$195,000. The engineer states that this will differ from most reservoirs in that there will be no outlet conduit from the dam but water will be pumped out of the reservoir and transported through pipe lines back into the valley. A 42-inch pipe will be used across the valley, and booster systems used.

PASADENA, Calif.—Bids for the construction of the Pine Canyon Dam will be called by the city directors within the next two months, according to an announcement by Samuel B. Morris, Pasadena city water superintendent and chief engineer. The state engineer's permit was received by the city June 8. Mr. Morris stated that the proposed dam, which will be built in the San Gabriel Canyon about four miles above Azusa, will be a concrete gravity type structure, 300 feet in height above the foundations, involving approximately 450,000 cu. yds. of concrete. The reservoir will impound about 40,000 acre feet.

PIPE LINES, WELLS, ETC.

COALINGA, Fresno County, Calif.—Hickey Pipe & Supply Co., Coalinga, at \$720 awarded contract by city council to furnish 2,000 ft. 3-in. lap welded pipe. Complete list of bids follows:

A. P. May, Inc., Coalinga.....	\$71.80
Hickey Pipe & Supply Co.....	720.00
Bunting Iron Works, Coalinga.....	740.00
J. A. Fazio, Oakland.....	756.47
Tay-Holbrook Co. San Francisco 807.80	
Walworth Calif. Co., S. F.....	969.60
*Bidding butt-weld.	

COALINGA, Fresno County, Calif.—Hickey Pipe & Supply Co., Coalinga, at \$200 awarded contract by the city council to furnish 2,000 ft. 1-in. galvanized pipe. Complete list of bids follows:

A. M. May, Inc., Coalinga.....	\$193.60
Bunting Iron Works, Coalinga.....	194.00
Walworth Calif. Co., S. F.....	199.80
Hickey Pipe & Supply Co.....	200.00
Tay-Holbrook Co., S. F.....	202.60
J. A. Fazio, Oakland.....	203.74

SOUTHERN CALIFORNIA—Welding Engineering Co., Bartlesville, Okla., awarded contract by Southern Fuel Co. at approximately \$125,000 for welding about 100 miles of 26-in. pipe line between Glendale and a point near valve No. 32 of the Southern California Gas Company's Taft-Los Angeles line. The contract provides the following prices: \$7.50 per generator hour, \$27 per unit per day when less than 100 generators are ordered on the line during any one day or fraction therefor.

SEWERS AND SEWAGE DISPOSAL PLANTS

BERKELEY, Alameda Co., Calif.—Martin Murphy, 1321 Milvia St., Berkeley, at \$4,612.55 awarded contract by city council to construct sewer in Arlington Avenue from Thousand Oaks Blvd. to San Antonio Ave. See com-

plete list of unit and total bids received in separate tabulation on page 5 of this issue.

BERKELEY, Alameda Co., Calif.—Until June 16, 10 A. M., bids will be received by Florence E. Turner, city clerk, to furnish sewer pipe, delivered in carload lots, f.o.b. Corporation Yard Allston Way and West St., for fiscal year commencing July 1, 1931. Certified check \$100 required with bid. Specifications on file in office of city clerk.

ISLETON, Sacramento Co., Calif.—City trustees will call an election shortly to vote bonds of \$15,000 to finance construction of sewers.

SAN MATEO, San Mateo Co., Cal.—City council declares intention (31-6) to improve allays in Block 8 of East San Mateo and in portions of the Bayshore Highway, involving construction of 6-in., 8-in., 10-in., 12-in., and 15-in. vitrified clay pipe sanitary sewers with wyes, brick manholes, 1911 Act. Bond Act 1915. Hearing June 22. E. W. Foster, city clerk.

SANTA MARIA, Santa Barbara Co., Cal.—Santa Maria Const. Co., Santa Maria, at approximately \$12,436.70 awarded contract by city council to construct sewers in N. Currier St., W. Fessler St. and N. Depot St., involving 341 ft. 6-in., 1,941 ft. 10-in., 1,540 ft. 12-in. vit. sewers; 9 manholes; 500 ft. 4-in. cast iron pipe and constructing pumphouse.

COALINGA, Fresno County, Calif.—Cross Lumber Co., Coalinga, awarded contract by city council to furnish (a) 1,600 ft. 6-in. sewer pipe at \$264 and (b) 30 6x4-in. wyes for same at \$27.30. Complete list of bids follows:

	(a)	(b)
San Joaquin Mat. Co.	\$308.00	\$23.00
H. C. Muddox Co., Inc.	308.00	23.00
Gladding McBeir & Co.	336.00	25.20
J. A. Fazio, Oakland	336.00	25.20
Cross Lumber Co.	364.00	27.30
Hickey Pipe & Sup. Co.	364.00	27.30
N. Clark & Sons	560.00	42.00

LONG BEACH, Cal.—Plans have been completed and a resolution of intention will be passed at once by the city council for the North Long Beach Sewer System to be known as Pump Sewer District No. 11. Proceedings for this work are under the 1911 Act. The district embraces all of North Long Beach north of the Virginia Country Club. According to the engineer's estimate the system will involve about 214,746 lin. ft. of sewer with necessary structures and pumping stations. The items are:

247,012 ft. 8-in. vit. clay sewer;
17,590 ft. 12-in. vit. clay sewer;
2,615 ft. 15-in. vit. clay sewer;
1,515 ft. 18-in. vit. clay sewer;
2,745 ft. 21-in. vit. clay sewer;
2,784 ft. 24-in. vit. clay sewer;
3,266 ft. 27-in. vit. clay sewer;
2,513 ft. 30-in. vit. clay sewer;
295 ft. 33-in. vit. clay sewer;
4,184 ft. 24-in. centrifugally spun R. C. P.
2,55 ft. type B concrete backfill for 8-in. pipe;
16 ft. type A concrete backfill for 8-in. pipe;
60 ft. type A concrete backfill for 10-in. pipe;
87 ft. type A concrete backfill for 12-in. pipe;
6,000 tons rock or gravel for sub-base;
1,088 type A std. manholes;
15 type C std. manholes;
39 type D std. manholes;
8 type E std. manholes;
one spillway junction chamber;
82 std. lampholes;
95,585 ft. 6-in. vit. connecting sewer;
one pumping station including two

6-in. and one 8-in. pump, the total requirements being 600 G. P. M.

LOS ANGELES, Cal.—City defects proposal to issue and sell bonds of \$6,000,000 to finance construction of sewers in various sections of the city.

MISCELLANEOUS CONSTRUCTION

SACRAMENTO, Cal.—Lippen & Hawley, 3126 J St., Sacramento, awarded contract for electrical work in connection with the H Street Subway, the general contract for which was awarded by the City of Sacramento to Lindner & Swinerton, Inc., California State Bldg., Sacramento, at \$59,000.

WATER WORKS

SAN LUIS OBISPO, Cal.—See "Government Work and Supplies," this issue. Bids wanted by U. S. Property and Disbursing Office at Sacramento to construct 2,000,000-gallon reservoir at National Guard Training Camp at San Luis Obispo.

SANTA BARBARA, Cal.—City defects proposal to issue bonds of \$2,100,000 to finance enlargement of the Gibraltar Dam and provide improvements to the water supply system.

OAKLAND, Cal.—Steel Pipe & Tank Co., 1400 4th St., Oakland, at \$770 (\$365 each) awarded contract by East Bay Municipal Utility District to furnish and erect two 222,000-gallon steel storage tanks. Complete list of bids published in issue of May 29.

FAIRFIELD, Solano Co., Cal.—Until June 18, 8 P. M., bids will be received by Lewis Morrill, city clerk, for improvements in connection with sewer and water system, involving:

- (1) Water distribution system, with two alternates:
Alternate (A) Using centrifugal cast iron pipe.
Alternate (B) Using McWane pipe.
1,000 lin. ft. 12-in. pipe;
2,700 lin. ft. 10-in. pipe;
3,945 lin. ft. 8-in. pipe;
1,385 lin. ft. 6-in. pipe;
380 lin. ft. 2-in. pipe.
- (2) Fittings For Same,
1 12-in. gate valve;
6 10-in. gate valves;
8 8-in. gate valves;
22 6-in. gate valves;
24 4-in. gate valves;
4 3½-in. gate valves;
6 3-in. gate valves;
19 2-in. gate valves;
9 new fire hydrants;
10 existing fire hydrants to be removed;
63 ¼-in. service connections;
3 1-in. service connections.

(3) Elevated water tank and tower (lump sum): 100,000 gallon capacity; 100 ft. from top of foundation to bottom of tank.

(4) Foundation piers for elevated tank (lump sum): 40 cu. yds. concrete, approximately.

(5) Outfall sewer.
3,790 lin. ft. 15-in. vit. clay pipe sewer.
7 brick manholes.

(6) Completion of a deep well on the town property heretofore started by a test bore.

Plans and specifications are obtainable from Andrew M. Jensen, Engineer, Room 351, Rialto Building, San Francisco.

ORANGE, Orange Co., Calif.—Until June 23, 1 P. M., bids will be received by Paul Clark, city clerk, to furnish 1,000 ft. 6-in. and 500 ft. 8-in. water pipe. Further information obtainable from above.

CORNING, Tehama Co., Cal.—Pomona Pump Co., Pomona, at \$2,819 submitted low bid to city council to furnish and install deep well turbine pump, motor, 8-in. standard pipe, with wiring, fittings and equipment in connection with municipal water system. Complete list of bids follows:

Pomona Pump Co.	\$2,819
Woodin & Little	2,879
Lyon-Garret Co., Red Bluff	2,925
Peerless Pump Co.	2,914
Byron-Jackson Pump Co.	2,962
Anchorage Farm, Orland	2,975
Layne & Fowler Pump Co.	3,015
Corning Electric Co., Corning	3,086

CORCORAN, Kings Co., Cal.—Until June 15, 8 P. M., bids will be received by Jas. C. Condon, city clerk, to construct one circular concrete water storage tank, certified check 10% payable to city required with bid. Plans obtainable from city clerk, on deposit of \$5, returnable.

SAN DIEGO, Cal.—Until July 1, 11 A. M., under Specification No. 6483, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for 400,000-gallon steel tank for Naval Operating Base (Fuel Depot) at San Diego. Plans obtainable from Commandant, Eleventh Naval District, Foot of Broadway, San Diego, on deposit of \$10, checks for same to be made payable to Chief of the Bureau of Yards and Docks.

VALEJO, Solano Co., Cal.—Alf E. Edgcombe, city clerk, will ask bids to furnish city with a quantity of 16-in., 20-in. and 24-in. bell and spigot pipe with fittings for same. The bids will probably be opened June 26. T. D. Kilkenny, city engineer.

CHILKOOT BARRACKS, Alaska.—Following is a complete list of the bids received by Constructing Quartermaster, Fort Mason, San Francisco, for equipment for water supply system at Chilkoot Barracks, Alaska, consisting of pipe and fittings, insulation material, intake structure, materials for constructing trestle and crib and water filter.

- Item A (Pipe and Fittings)
(1) f.o.b. Alaska (2) f.o.b. Seattle (3) f.o.b. San Francisco.
C. G. Clausen & Co., Inc., 825 Folsom St., San Francisco, (1) \$8,175 (2) \$7,460 (3) \$7,350.
Walworth California Co., San Francisco (1) \$9,343 (2) \$5,591 (3) \$5,558.
Petroleum Equipment Co., (1) \$9,356 (2) \$5,555 (3) \$5,525.
Crane Co., San Francisco (1) \$9,521 (2) \$5,521 (3) \$5,500.
Grinnell Co., San Francisco (1) \$11,256 (2) \$10,000 (3) \$10,265.

Item B (Felt, Etc.)
Tilley Mfg. Co., 744 Folsom St., San Francisco, (1) \$1,700.

Item C (Intake Caisson)
California Steel Prod. Co., (3) \$60.
Western Pipe & Steel Co., (3) \$107.
Bethlehem Shipbuilding Co., (1) \$263 (2) \$251 (3) \$252.

Item D (Materials for Trestle and Crib at Intake)
California Steel Products Co., 452 Bay St., San Francisco, (3) \$14.

Item E (Water Filter)
Straut Steffens Equipment Co., 29 Moss St., San Francisco (1) \$686 (2) \$623 (3) \$550.
Crane Co., San Francisco (3) \$656.
California Filter Co., (2) \$682.
International Filter Co., San Francisco (1) \$855 (2) \$730 (3) \$710.
American Water Softener Co., New Jersey (2) \$1,000 (3) \$1,000.

Bids held under advisement.

PLAYGROUNDS & PARKS

ALAMEDA, Alameda Co., Cal.—W. H. Larson, 2805 Park St., Berkeley, at \$745 awarded contract by city council to resurface south tennis court in Lincoln Park.

SANTA ROSA, Sonoma Co., Cal.—Geo. S. Pittcock and Son, Ltd., Berkeley, at \$1,300 awarded contract by city council to construct ornamental cascade and fish pond in Fremont Park.

STREETS AND HIGHWAYS

SANTA CRUZ, Santa Cruz Co., Cal.—Leo Cardwell, Manor Ave., Santa Cruz, at \$3,330 awarded contract by county supervisors to construct a portion of the Coast Road, about 4 miles north of Davenport in the Seaside Rd. District. Project involves:

- (1) 5000 cu. yds. roadway excavation without classification;
- (2) 120 lin. ft. corrugated metal culverts, 12-in. dia. in place.

Following is a complete list of bids: Leo Cardwell, Santa Cruz.....\$3,330
J. L. Connor, Monterey.....3,600
Pacific Const. Co.....4,173
Earl W. Heple.....4,398

SACRAMENTO, Cal.—Clark & Henery, 564 Market St., San Francisco, at \$21,602 submitted lowest bid to the county supervisors for grading and paving Del Paso Blvd. from the North Sacramento city limits to Ben Ali Rd.

Following is a complete list of bids: Clark & Henery, S. F.....\$21,647
McGraw Co. Co., Sacto.....22,470
Teichert & Son, Sacto.....23,151
Bids held under advisement.

FRESNO-KERN COUNTIES, Cal.—Pacific Tank Lines, Inc., Los Angeles, at \$266.50 awarded contract by State Highway Commission, to treat with light fuel oil as a dust palliative, 15.4 miles in Fresno county, between the west boundary and 2 miles east of Parkfield Junction and in Kern county, 8.2 miles between the west boundary and 2 miles west of Maricopa.

MENDOCINO COUNTY, Cal.—Jas. W. Bertram, Hopland, at \$7131.25 awarded contract by State Highway Commission to surface with untreated crushed gravel or stone, 2.1 miles bet. Piercy and the north boundary.

MARTINEZ, Contra Costa Co., Cal.—Until July 6, 11 A. M., bids will be received by county supervisors to improve Bennett Ave. in town of Pinole. Project involves:

- 2,385 cu. yds. excavation;
- 2,067 tons base rock;
- 208 tons of 4 screenings;
- 347 tons pea gravel;
- 19,336 gals. emuls. asph. to be placed
- 3,462 gals. road oil to be placed.

County will furnish emulsified asph. and road oil. Plans obtainable from R. R. Arnold, county surveyor.

MARIPOSA COUNTY, Cal.—A. Telchert and Son, Inc., 186 37th Street, Sacramento, at \$14,646.10 awarded contract by State Highway Commission to cover with bituminous surface treatment consisting of asphaltic road oil and screenings, 12.5 miles between Loresnes on the Bridgeburg grade and El Portal.

TULARE-FRESNO COS., Cal.—Until July 2, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading 2.380 miles of Route 1, the General's Highway in General Grant National Park in Tulare and Fresno Counties. Project involves:

- (1) 15 acres clearing;

- (2) 74,000 cu. yds. unclass. excav.;
 - (3) 217 cu. yds. unclass. excav. for structures;
 - (4) 1,500 sta. yds. overhaul;
 - (5) 2,880 miles finish earth graded rd.
 - (6) 84 cu. yds. masonry;
 - (7) 1,330 lin. ft. c. m. pipe in place.
- Plans obtainable from district engineer on deposit of \$10, returnable, check for same to be made payable to Federal Reserve Bank of San Francisco.

SUTTER-BUTTE COUNTIES, Cal.—Jones and King, Hayward, at \$68,487 awarded contract by State Highway Commission to place bituminous treated rock borders on 19.2 miles between Yuba City and Biggs Road.

AMADOR COUNTY, Cal.—E. F. Hillard, 1355 43rd St., Sacramento, at \$5,508.75 awarded contract by State Highway Commission for bituminous surface treatment on 2.7 miles bet. Drytown and Amador City. Complete list of unit and total bids reported in issue of May 26.

MONO COUNTY, Cal.—Pacific Tank Lines, Inc., 2730 S. Alameda St., Los Angeles, at \$2.42 per barrel (\$5,386) awarded contract by State Highway Commission for oiling highway from Deadman's Creek to Leevining and from Leevining to 5 miles over Tioga Pass.

IMPERIAL COUNTY, Cal.—Griffith Co., Los Angeles Railway Bldg., Los Angeles, at \$95,550 awarded contract by State Highway Commission to widen with asphaltic concrete 21 miles of existing pavement between East High Line Canal and Sand Hills. Complete list of unit and total bids received on this project published in issue of June 3.

OAKLAND, Calif.—City council declares intention to improve portions of Guido St., Norton Ave., and certain conduit right-of-ways adjacent to Guido St., involving grade, curbs.

- (1) 15,208 sq. ft. grading;
- (2) 599 lin. ft. concrete curb;
- (3) 1,139 sq. ft. concrete gutter;
- (4) 7,918 sq. ft. of penetration macadam pavement;
- (5) 215 lin. ft. 2-ft. x 6-in. by 2-ft. x 6-in. concrete culvert;
- (6) 1 manhole with inlet pipe;
- (7) 1 manhole with standard top;
- (8) 34 lin. ft. 12-in. plain concrete pipe conduit;
- (9) 92 lin. ft. 21-in. reinf. concrete pipe conduit;
- (10) 2 storm water inlets (34-in. opening).

1911 Act. Hearing June 30. W. W. Chapell, acting city clerk. Walter N. Frickstad, city engineer.

ISLETON, Sacramento Co., Calif.—City trustees will call election shortly to vote bonds of \$8,000 to finance street improvements.

COLUSA COUNTY, Calif.—Union Paving Co., Call Bldg., San Francisco, at \$230,247, submitted low bid June 10 to State Highway Commission to grade and pave with Portland cement concrete, 8.6 miles between Williams and Maxwell. Complete list of bids follows: Union Paving Co., S. F.....\$230,247
Hanrahan Co., S. F.....235,913
N. M. Bell, Porterville.....241,787
C. W. Wood, Stockton.....249,543
Frederickson & Watson, Oakland.....259,235
Basich Bros., Torrance.....259,263

OAKLAND, Calif.—City council declares intention to improve Madrone Path and a portion of Masterson St. adjacent to Madrone Path, involving:

- (1) 210 cu. yds. fill;
- (2) 1234 sq. ft. sidewalk;
- (3) 228 ft. 15-in. reinf. pipe conduit.

1911 Act. City will pay 27½% of the cost from General Fund. Hearing June 25. W. W. Chapell, acting city clerk. Walter N. Frickstad, city engineer.

MARYSVILLE, Yuba Co., Cal.—City council declares intention (39) to improve portions of 12th St., Ramirez St. 12th, Yuba, and 9th Sts., involving construction of concrete curbs, gutters, c. i. gutter drains with c. i. covers; wooden box culverts; 6-in. concrete sewer pipe. 1911 Act. Bond Act 1915. Hearing June 22. Chester O. Gates, city clerk.

SACRAMENTO, Cal.—Until June 15, 10 A. M., bids will be received by Harry W. Hall, county clerk, for surfacing Manzanita Ave. with asphaltic macadam from Fair Oaks Blvd. northwesterly to Madison Ave. Estimated cost \$7,000.

Certified check 10% payable to Chair man of the Board of Supervisors required with bid. Plans obtainable from County Engineer Chas. Deterding, Jr., at Sacramento.

MONTEREY COUNTY, Cal.—C. W. Wood, Stockton, at \$15,104 awarded contract by State Highway Commission for oiling and constructing shoulders on ten miles between Chualar and Salinas.

SAN RAFAEL, Marin Co., Cal.—See separate bids tabulation on page five of this issue. Contract awarded to J. V. Galbraith, Petaluma, at \$34,017 for grading 43 miles of the Millerton-Marshall Road, Road No. 2, from one mile north of Millerton to Marshall.

SAN RAFAEL, Marin Co., Calif.—City council declares intention (\$80) to improve Laurel Place between Lincoln Ave. and west end of Laurel Place; portions of Nye and Wilkins Sts., involving:

- (1) 1,619 cu. yds. excavation;
- (2) 64,306 sq. ft. 3-in. rock subbase;
- (3) 64,306 sq. ft. 5-in. hydraulic concrete pavement;
- (4) 37 lin. ft. concrete curb (only);
- (5) 1,375 lin. ft. conc. gutter (only);
- (6) 3,447 lin. ft. conc. curb and gutter;
- (7) 2 standard catchbasins, complete;
- (8) 47 lin. ft. 10-in. C.I.P. culvert;
- (9) 183 lin. ft. 4x6x24-in. arch culvert, complete;
- (10) 14 lin. ft. 4x6x24-in. do;
- (11) 2 lampholes, complete;
- (12) 6 manholes, complete;
- (13) 398 lin. ft. 4-in. ironstone pipe;
- (14) 1,048 lin. ft. 6-in. do;
- (15) 1 cu. yd. concrete sewer protection.

1911 Act. Hearing June 22, Eugene W. Smith, city clerk. Herbert K. Brainerd, city manager.

REDWOOD CITY, San Mateo Co., Cal.—Of three proposed routes to the San Mateo-Hayward bridgehead intended primarily to speed travel for lower Peninsula, Palo Alto and San Jose motorists, County Surveyor J. S. James recommends the extension of 19th Ave., San Mateo.

This extension, which will be 7700 ft. long, 30 ft. wide with 20-ft. paving, and which will have a 240-ft. bridge across Seal creek, will cost \$45,000.

The second best route—that which would extend north from Belmont to the bridgehead—would cost about \$75,000, James estimates. The third route, north from Ralson Ave., would be prohibitive because of the high cost of building a fixed bridge across Seal creek.

MONO COUNTY, Cal.—Basalt Rock Co., Napa, at \$24,364 submitted only bid June 10 to State Highway Commission to treat with heavy June 10 and cut-back asphalt as a dust palliative, 28.4 miles between Leevining and 2 miles west of Bridgeport.

MERCED COUNTY, Calif.—Stewart & Nuss, Inc., 400 Thorne St., Fresno, at \$12,750 submitted low bid June 10 to State Highway Commission to treat with heavy fuel oil to a width of 3-ft. on each side of the existing pavement, 37.8 miles between the foot of Pacheco Pass and the easterly boundary. Complete list of bids follows:
Stewart N. Nuss, Fresno.....\$12,750

The California Legislature has passed Assembly Bill No. 734, which requires the standardization of existing hydrant and hose coupling threads. It makes unlawful the sale of such equipment having other than "National Standard" threads. There are at present some nine varying threads, which preclude the concerted operations of fire departments of different communities in rendering assistance to one another in case of a major conflagration. The bill provides that the standardization is to be done over a period of five years by or under the direction of the State Fire Marshal (Chief of the Division of Fire Safety in the Department of Industrial Relations).

The American Engineering Corporation, Ltd., of Sacramento, the Union Indemnity Company and the New York Indemnity Company are defendants in a suit for \$6,614.76 brought last week at Placerville by A. F. Baumhoff for labor and materials claimed to have been furnished the defendants in their contract to complete the El Dorado Irrigation District's Weber Creek dam.

The engineering corporation held the dam contract and the indemnity companies are named defendants since they are bondsmen for the contractor. The suit was brought by attorneys Abe Darlington and Henry S. Lyon for Baumhoff acting in behalf of himself and 15 other claimants. Baumhoff claims \$400.50 as owing. Other claims are as follows: Charles Posatti, \$1,262.12; M. J. Ferrari, \$41.25; P. N. Hosking, \$50; Thomas Ward, \$47.87; William Latimer, \$23.50; J. C. Rasmussen, \$25; William Baumhoff, \$937; James K. Pierson, \$309.10; Charles Snow, \$78.80; W. O. McIntock, \$377.70; Michigan-California Lumber Co., \$1,474.44; California Door Co., \$518.01; W. L. Amstaden estate, \$620.38; A. Pillet, \$24; and Burns Bros., \$425.

The economic depression has definitely reached the bottom of the decline. Sir Henry Thornton, president of the Canadian National Railways, believes, with certain signs indicating that business is definitely on the mend. Sounding a warning "not to believe we are off to the races," Sir Henry told members of the railway committee of the House of Commons, that he was of the opinion stocks were at "the irreducible minimum, with purchasing power starting again."

The first skyscraper, erected in 1883, is to be demolished to make way for a new fourteen million dollar office building in Chicago. The Field Estate is ordering its wrecking to make way for the new modern structure. In spite of the fact that office space in Chicago is today probably 17 per cent in excess of demand, it is anticipated that the demand will

be adequate by the time the new building is completed.

As proposed the structure will have 23 floors in the lower block on a lot which is a full block long in an east and west direction and half a block in the opposite direction. The tower part of the structure will be 42 stories high. It will be located on Adams Street between Clark and LaSalle. The first section to be constructed will be the west section, about 22 stories high, which will take the place of the old Home Insurance Building, the first skyscraper in the world of skeleton construction.

Uses of the Handy-Andy junior pulling jack are outlined in a 4-page leaflet issued by the John Waldron Corp., New Brunswick, N. J.

Robert D. Rennie of Portland, an active member of the Oregon State Association of Master Plumbers, was elected president of that body at the thirtieth annual convention in Bend, Ore. E. O. Pratt of Salem was elected vice-president and T. J. Rowe of Portland was re-elected treasurer. Walter J. Widmer of Portland was appointed secretary.

On April 30th ground was broken for the new \$16,000,000 New York City Freight Terminal Building. With the Radio City and New York Stock Exchange operations about ready to proceed, New York looks forward to a normal building year in 1931.

Under the sponsorship of the American Farm Bureau Federation and the National Lumber Manufacturers Association, 16,000 clubs listing over 220,000 farmers and farm wives have begun to study the why and the how of home remodeling and repairing. Long-neglected, the farm home will be subjected to an intensified analysis to show how the porches, finished attics, installation of various modern conveniences can be done more economically now. According to the Lumber Manufacturers Association, response from early club activities has been unusually encouraging, and is expected to accelerate rural home construction work during the summer and fall.

A patent has been issued to William E. Foster of Cleveland Heights, Ohio, for a process of reducing sounds in auditoriums by applying sound-absorbent materials to the surfaces of seats facing the floor. Heretofore, Foster states, it has been the regular practice to apply sound-absorbing materials to walls and ceilings for the purpose of preventing an echo. An advantage of applying them to the undersides of seats, he pointed out, is that sound produced by the shuffling of feet of those occupying the seats will be absorbed.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3559-S SALES ENGINEER, to sell sprinkler systems for outside and inside irrigation. Straight commission. Opportunity for right man. Location, San Francisco.

R-3544-S GRADUATE ENGINEER, age 44, with California registration and electrical engineering experience desires to connect with an established engineering firm in the capacity of partner. Has some capital to invest where hard work and application will pay dividends. Address communications in care of this office.

W-2462-S (K-364) CHEMICAL ENGINEER, under 40, having had thorough training in chemical engineering in general and with a record of successful practical experience in the paper-making industry. Apply only by letter. Location, New England.

R-3575-S ASSOCIATE or Full Professor of Mechanical Engineering, to carry on research work in agricultural engineering. Would not be required to do any teaching. Should be 35 to 40 years of age, exceptionally well qualified in mathematics and physics and preferably with an advanced degree in engineering. Apply by letter with full details of training and experience and photograph. Salary \$3600-4800 per year. Permanent. Location, West.

W-2427-S CHEMICAL ENGINEER with experience in responsible charge of design, construction and operation. Should be comparatively young with good personality and record of success. Salary open. Apply only by letter. Location, East.

W-2462-S JUNIOR PAPER TECHNOLOGIST for research laboratory. Must be qualified by practical experience to operate semi-commercial pulp and paper making equipment on a wide range of products and assist in preparation of engineering reports on technical and economic aspects of such work. Must have good personality and initiative. Apply only by letter giving refer-

ences as to character and ability, as well as statement of training, experience and salary requirements and preferably a recent photograph. Location, New England.

W-2751-S ENGINEER, technical graduate, American, with good experience in rock drilling and rock excavation, preferably on heavy construction work, and also having had sales experience or having ability and personality for selling. Apply by letter. Location, East.

The Federal Trade Commission has recently undertaken an investigation of the building material industry and preliminary work is now under way. In this inquiry the Commission will investigate and report facts relating to the letting of contracts for the construction of government buildings, particularly with a view of determining whether or not there have been any price-fixing or other agreements among individuals, partnerships or corporations engaged in the production, manufacture or sale of building materials with respect to the prices or other terms at which such materials will be furnished contractors or bidders for such work.

The Guardian Building and Loan Association of Portland, Oregon, together with the Western Savings & Loan Association and the Dime & Dollar Building and Loan Association, affiliated with the Guardian Company, have been taken over by the Oregon State Corporation Commission. James Mott, commissioner, made the announcement.

Mott said an examination disclosed that "the management of the Guardian Building & Loan Association had illegally abstracted funds from the association funds amounting to nearly \$300,000 and had diverted the same to the Mortgage Investment Company, its holding corporation, without any security as required by the building and loan law."

The State Railroad Commission has authorized all railroads operating out

of Oakland and Alameda, including the Southern Pacific, Western Pacific, Santa Fe, and Sacramento Northern, to discontinue the commodity rates on iron and steel articles in less than carload lots to Sacramento, Stockton and intermediate points. Under the ruling, all iron and steel articles in less than carload lots will take fourth class rates.

The effect of the order, as interpreted by railroad men, is to put Oakland and San Francisco on a par in rates on these articles to the valley points. Heretofore Oakland rates of this kind have been slightly lower than those from San Francisco.

Former State Senator Edwin A. Mueller of San Diego has been appointed to the State Board of Forestry by Governor James Rolph Jr. Mueller succeeds Robert C. Harbison, Sacramento publisher, who was offered the position but was unable to accept on account of the pressure of private business. As members of the board, Mueller also becomes a member of the Governor's State Fire Emergency Committee. He was formerly a member of the joint legislative water committee that drafted the proposed \$175,000,000 co-ordinated water program for California.

The West Coast Lumbermen's Association plans a campaign to increase sales of demonstration to farmers of the economic advantages of using lumber. Otto Hartwig, trade missionary of the association, will address 15 groups of lumber dealers in Western states, covering Washington, Montana, Idaho, Wyoming, Colorado, and Arizona on methods of showing the farmer how to increase efficiency and production on the farm with the proper use of lumber.

Joseph R. and Bernice E. Schuckling, 1007 South First St., San Jose, will operate under the firm name of San Jose Window Shade Company.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

WATER PROBLEMS BECOME WIDESPREAD

Water problems which many persons have long been accustomed to regard as common only to arid and semi-arid sections have become widespread in consequence of deficient rainfall throughout practically every part of the United States during the last year. Observations made at a well of the U. S. Geological Survey near Washington, D. C., which are taken to be indicative of conditions in all regions affected by drought, show that there is little probability of the replenishment of underground water storage until next winter, says South-west Builder and Contractor.

On March 28 the water level in the well near Washington was 3 ft. below that for the same date a year ago. This subsidence of the underground storage has been going on very slowly but continuously since May, 1930. Between March 28 and May 16 of this year the water level had risen only 8.28 inches as compared with a rise of more than 2 ft. in the early part of 1930.

ARIZONA LUMBERMEN ELECT NEW OFFICERS

John C. Light, president of the Norman-Light Lumber Company of Miami, Ariz., was elected president of the Lumbermen's Club of Arizona, at the annual meeting held last month in Phoenix. Other officers are: Vice-president, W. F. Edens, Cottonwood Lumber Company, Cottonwood, Ariz., (re-elected); secretary, E. H. Wheat, Phoenix, Ariz., (re-elected); directors, Frank Tutt, Jerome Lumber Co., Jerome; A. F. Radmacher, Yuma, Alhambra; W. A. Lampey, Pima Lumber Co., Tucson; R. E. Webster, Douglas Lumber Co., Douglas; L. M. Hamman, Hamman-McFarlane Lumber Co., Phoenix.

POTLATCH FOREST PRODUCTS ORGANIZED

Amalgamation into one company styled Potlatch Forest Products (Inc.) of the Clearwater Timber Co., Lewiston, Idaho, the Edward Rutledge Timber Co., Coeur d'Alene, Idaho, and the Potlatch Lumber Co., at Potlatch and Elk River, Idaho, has been completed, the American Lumberman reports.

All are Weyerhaeuser companies with plant investments. It is estimated in excess of \$10,000,000. The Clearwater company in 1927 finished at Lewiston what is probably the most modern electrical mill in the Pacific Northwest with a capacity of 200,000, 000 feet annually. The other three mills are almost as large. The Potlatch mills have an annual capacity of 200,000,000 feet and the Rutledge about 100,000,000.

Philip (J. P.) Weyerhaeuser, Jr., will be president of the new company and headquarters will be at Lewiston.

CONTRACT MUST GO TO LOW BIDDER, SAYS JUDGE C. J. GOODELL

Contracts must be given to low bidders on public construction work for the City and County of San Francisco, Superior Judge C. J. Goodel rules, even though the bidder is an out of town manufacturer.

The suit was brought by Mahony Brothers, general contractors of the new municipal warehouse at Fifteenth and Harrison Streets, against the Board of Public Works. Mahony Brothers complained that the low bidder on a sub-contract for millwork was the National Mill and Lumber Company of Oakland, but that the Board of Works refused to approve the sub-contract because the firm was not in San Francisco.

LABOR TO BATTLE WAGE REDUCTIONS

Organized labor stood more firmly entrenched in its fight against wage reductions, following an address of William Green, president of the American Federation of Labor, before an unemployment and economic conference at Rutgers University, New Brunswick, N. J., last Wednesday.

"Even though it be driven with its back to the wall, labor will not willingly accept a general reduction in wages," Green said.

"Labor will not join in the pursuit of a policy which, if applied, will intensify human distress and add to existing industrial demoralization."

Green called upon industry and government administrators to provide relief from the depression and prevent such upheavals in the future.

"Now is the time to face facts and face our responsibilities," he said.

AUSTIN COMPANY TO FINANCE LAUNDRIES

A financing service for a limited number of laundry owners contemplating a new plant or reconstruction and additions to present facilities has been announced by the Austin Co., engineers and builders, through its subsidiary, the Austin Finance Co.

The financing will be available to firms whose volume averages about \$250,000 or more a week and who have been established for at least 5 years.

"Our confidence in the future of the laundry business is indicated by this announcement," said W. J. Austin, president of the company. "At a time when financing is difficult through usual sources, we believe the service will be a distinct aid to progressive laundry firms seeking modern facilities to reduce costs and improve the quality of their work. It is a significant step in view of the fact that building costs are now 20 per cent below the past ten-year average."

WAGE LAW UPHELD BY N. Y. COURT

Constitutionality of the Dunmore labor law requiring an eight-hour day and the payment of "prevailing wage rates" on grade-crossing elimination projects, enacted by the State of New York in 1930, was affirmed by the state Court of Appeals in a unanimous decision rendered June 2. The railroads had attacked the validity of the law on the grounds that it interfered with interstate commerce and that its provisions were too vague for accurate determination of wage payments. The law does not apply to railway employees, according to the court, but only to contractors' forces.

The decision states that grade separation is not, in itself, interstate commerce, and that since the railroads have elected to accept the benefits of state funds for such work, they must subject themselves to state supervision in respect to hours and wages. The contention that the law is vague is dismissed with the comment that "when reliable data has been obtained, the prevailing rate can be calculated with exactness."

UNFILED STEEL ORDERS DECREASE

Unfiled orders of the United States Steel Corporation decreased 277,277 tons in May to a total of 3,620,452 tons May 31. In April a decrease of 97,601 tons was reported.

The backlog as of April 30 was 3,897,729 tons. On March 31 unfiled orders aggregated 3,985,330 tons, against 3,365,194 tons on February 28. On May 31, 1930, unfiled orders amounted to 4,058,227 tons.

Unofficial estimates of the decrease ranged from 250,000 to 300,000 tons. A decline during May is seasonal, and in the years back to 1924 the drop for that month has averaged about 350,000 tons. In May, 1930, unfiled orders declined 294,993 tons.

The Steel Corporation's operations fell off steadily last month and new buying was down to an even larger extent. Specifications calling for deliveries on previously placed contracts kept the mills working beyond the requirements of incoming business, which is believed to be running light thus far into June because of the cautiousness of buyers.

American Standards Association, 29 West St., New York City, as issued its year book for 1931. This 102-page volume gives a full account of the membership and administration of the organization, its relations with other associations and governments, and its aims and accomplishments. In addition, a list of all projects that have an official status before the association is given.

RESIDENTIAL CONSTRUCTION AND PUBLIC WORKS, NOTABLE HIGHWAYS, CITED IN BUILDING INDUSTRY OUTLOOK

(Reprint From "Trade Winds," Published by the Union Trust Company, of Cleveland, Ohio)

At a time when the nation is searching for some particular line of business to turn the economic tide, the building industry with the potential power to stimulate activity offers largely in price and quality workmanship. The difficulty is that there cannot be much building without a fair degree of prosperity. Conversely, the building industry contends that there cannot be a large measure of prosperity without building activity.

Since more than half of our national wealth is represented by land and the structures erected upon it, the condition of the real estate market and the activity in the construction field indirectly affect the economic welfare of a high percentage of our population. In addition, some 4,000,000 men and women depend directly on some phase of the industry for a living.

At present, there are few economic factors receiving more consideration in the future trend of business than the construction industry. It is rare to have good or poor business cycles running counter to conditions in this industry for any long period of time. It has become an indicator of general conditions, although not always a reliable barometer of future trends.

The most favorable factors in the immediate outlook for building are the deflation of land prices and the low cost of building materials. Both are regarded at near bottom levels. Until recently, the country experienced many land booms in which property prices soared to dizzy heights under the impetus of speculative bidding. The recent demand for housing units after the war was the propelling force to land values. Development projects sprang up in every sizeable community far in excess of reasonable future requirements. Time finally brought its inevitable result to such speculation, and the bubble burst after a record building activity which not only supplied the deficiency of housing, but in many cities far exceeded the requirements. As a result, exorbitant land costs do not exist today, although real estate may have declined less than many other types of investment.

In addition to the saner land prices, the prospective home builder has available the lowest building material costs since the spring of 1917. At no time in the past 14 years have conditions been more propitious for the purchase or construction of a home. Whether or not the future will bring further declines, the fact remains that the national price indexes for April this year showed a further drop, continuing the untaken decline that began in the fall of 1929. April figures stood at 80.7 on the basis of 100 for material costs in 1926. The figure was 92.3 at the first of the year and 92.9 for May, 1930. In some quarters, it is contended that prices in the construction field have not dropped as severely as commodities at wholesale in other lines. Other authorities believe that current prices are near bottom levels, and already menace the slender profit margins of manufacturers.

Labor that approximates 60 per cent of construction costs for many months escaped lower wage scales, but recent developments indicate labor costs are undergoing adjustment in some centers. Outwardly, however, the labor scale in many cities has remained unchanged. But the builder is getting more efficient and experienced labor, plus the advantage of the latest meth-

ods and equipment, making for speed and quality workmanship.

Broadly speaking, construction work is divided into three major classifications: residential, non-residential, and public works and utility operations. The forces affecting these classifications vary widely, but in all of them a buyer's market prevails, and apparently will continue for some time to come. After all, the law of supply and demand with its many ramifications applies quite generally to the building industry.

According to the F. W. Dodge Corporation, the value of all types of construction for the first quarter of this year in 37 Eastern States totaled \$53,767,800, compared with \$1,097,147,390 for the corresponding period of 1930, a decline of approximately 51 per cent. Recent surveys indicate the outlook for the second quarter will show construction valuation of at least 20 per cent under the second quarter of 1930, with non-residential building and public works and utilities contributing the bulk of the loss.

The most encouraging aspect of these national building figures is that residential construction in the first quarter of this year showed a drop of only 4 per cent in valuation from the corresponding period of a year ago, while actual floor space constructed exceeded the first quarter of 1930 by more than 2 per cent. It appears that the decline in residential construction may be definitely arrested. However, the outlook for the non-residential and public works fields is less encouraging. The former showed a 41 per cent loss and the latter a 16 per cent decline compared to a year ago.

For April of this year, the Dodge reports for 37 States revealed total construction valuation was \$336,925,206, compared to \$483,876,700 in April, 1930, and \$569,981,360 for March of this year.

Political, economic and social forces are tending to disturb the course of events heretofore regarded normal in the building industry. Out of the conditions created, it is only possible to point out some of the influences, and speculate on future trends. Owners of real estate, homes and buildings have seen market prices of their holdings depreciate in the past two years, wiping out paper profits. Further losses were attempted now and foreclosed properties at foreclosure prices are contributing to the instability of the market. In the meantime, the evermounting tax rates are partially responsible for the financial situations that vex governmental units and themselves.

The year 1925 witnessed the peak residential building year and real estate activity for the country generally. By 1928, when other investment lines offered more attractive immediate return, and when over-building was apparent, activity was curtailed. The tendency has been a declining market for so long that some observers believe the tide will turn shortly into an era of home building. They assert that a nation does not over-build except for brief periods, and in a larger sense there can be no prolonged accumulation of unwanted construction.

To substantiate this viewpoint, it is pointed out that the normal increase in our national population requires from 300,000 to 500,000 new housing units every year. Furthermore, Amer-

ican standards of living, constantly demanding finer homes, increase the potential market.

On the other hand, restrictions on immigration and the increasing unsustainability of living near downtown business districts are creating a vast number of vacancies and depleting values in such areas. Funds are frozen that might otherwise be extended to home builders on a safe mortgage loan basis in more desirable locations. In addition, current business conditions have forced considerable "doubling up" of families or roommates in smaller towns, and tend to check the normal demand for additional housing units.

In addition, the mounting tax rates, cost of home maintenance and the responsibility entailed as compared to the more care-free renter are cited in avoiding home ownership. Building executives believe that a merchandising campaign to counteract this sentiment could stress the point that a nation of home owners is economically and socially better off than a nation of renters. As far as costs are concerned, it would stress the investment standpoint over a long period of time, in which realty values are bound to adjust themselves and advance as they have in the past. But the problem of a nation-wide advertising campaign among the countless number of individual contractors and material manufacturers is one not easily solved. To date, the little effort in that direction has been spasmodic and local in character.

The matter of financing home ownership admittedly has caused loss of sales to the building industry. The industry has been somewhat backward in placing home ownership on more attractive terms. In fact, it has been pointed out that it is easier to borrow 75 to 80 per cent on an installment than to buy a home on anything like that basis. Part of the difficulties lie in inadequate financing, and part in obsolete banking laws. But the effect is the same in either case.

The growth of the single company which will design, build and finance a home to responsible owners at reasonable terms will continue to be helpful to the industry. As a general rule, there is too wide a breach for the prospective home buyer to bridge with cash between the financing agency and the actual construction company. It is proving popular to make the installment payments on a monthly basis as rent, either on a mortgage or to a construction financing company.

Recent national surveys have indicated that while there has been wide-spread deflation in residential property values, rents have been much slower in reacting to this decline. Only within the past few months has there been any general revision downward, and new homes and apartments are able to maintain rentals at fairly stabilized levels.

In this connection, obsolescence is a major factor in the building industry that is constantly developing new designs, fixtures and interior appointments for homes that appeal to the housewife, and who usually selects the rented home or apartment. As a result, the owner of older residential structures finds he is being forced to accept lower rents to hold his tenants, while the owner of the newer and modern structure is able to maintain some semblance of an owner's market. For this reason, modernization and re-

modeling often pay the owner far more in rental and market value than the money actually expended in effecting these improvements.

The shift of population to the cities has caused important changes in the type of residential construction during the past few years, as shown by the following table on relative construction value:

	Single Houses	Two-Family	Multi-Family
1921	58.5%	17.3%	24.4%
1925	46.1%	17.3%	36.4%
1926	40.7%	13.9%	45.4%
1927	38.3%	13.4%	48.3%
1928	35.2%	11.1%	53.7%
1929	40.2%	11.2%	48.6%

Not until 1929, when a prosperous era and more favorable credit terms were available, did the tide turn back to single homes. The ratio of two-family houses has remained fairly constant, but multi-family structures, including apartments, have practically doubled since 1921, reflecting the trek to urban communities.

The building industry is not unmindful of the fact that building materials and home styles may change rapidly in the future, effecting important changes in construction methods and equipment. Steel framework to replace wood is regarded favorably, the outstanding advantage being a firmer structure that will minimize settling and cracking of plaster. Steel and concrete floors are becoming more common, giving added strength and reducing the fire hazard.

From this substitution of accepted materials it may not be a far step to other new composition materials for interior or exterior use that may eventually reduce building costs even more. New products are constantly being developed, and few industries give more indication of radical changes than the building trade. Improved insulation against heat, cold and sound is indicated. Air conditioning is being developed. The American home of ten years hence also may present an entirely different architectural appearance, flat roofs lending themselves more readily to steel framework.

One authority has estimated that the complete cost of steel in residential construction would require about 3 tons, offering a potential market of 2,700,000 tons of steel annually. Promotion of this type of home has lagged far behind engineering, and it is only recently that any organized merchandising has been attempted. Germany has made the most rapid strides in steel home construction.

In the non-residential field, including commercial buildings, factories, public buildings, religious and memorial structures, hospitals and institutions, there has been a marked decline in activity this year.

Industrial construction has dropped sharply with curtailments in production, leading to idle capacity. In fact, some industrial engineering and building firms are driving home this very point in appealing to their manufacturers, asserting that today's manufacturing need is a compact and efficient plant in which operations can be carried on profitably at fractional capacity. Industrial construction, however, is totalling only about half of what it did a year ago. Adequate financing is difficult to obtain.

The commercial building situation is largely the result of over-building of recent years. Owners are finding it difficult to keep tenants occupied on a scale which provides a reasonable investment return. Business firms are merging or taking smaller office space in line with general retrenchment policies.

Public works, construction, embracing highway building, public utility extensions, bridge work, oil and gas pipe lines and similar projects by private and public capital have shown smaller losses this year. In fact, highway

building promises to attain a record-breaking volume in 1931, topped by a \$229,080,300 congressional appropriation for Federal highways. States have increased gasoline taxes and authorized additional bond issues to supplement this program. Construction has been accelerated wherever possible to provide jobs to the unemployed.

Normally, about \$3,500,000,000 is expended annually on public works programs, and while pressure has been exerted to promote all possible construction, the actual work under way has fallen short of original estimates. At a time when governmental units are faced with deficits legal restrictions and public policy have delayed the issuing of bonds, or held up final operations.

A recent survey of the S. W. Strauss Co., conducted in co-operation with 238 Chambers of Commerce throughout the country, indicates contemplated public works construction totaling \$4,500,000,000, of which only about one-fourth was going forward. The balance was being delayed for one reason or another. Conservative estimates place the volume for the second quarter at 25 per cent under the corresponding period of a year ago.

The alarming increase of taxes tends to keep both private and public interests from proceeding with extensive building projects at this time. Beyond a certain point, it is questionable whether the stimulating effect of new public construction overbalances the evils of higher taxes on individuals and business. However, privately owned corporations who must plan extensively and improvements years ahead of demand, such as the light and power industry, are taking advantage of low costs to build necessary additions to effect operating economies.

Summary

Barren unforeseen developments in the latter half of the year, it appears certain that the total volume of construction in 1931 will fall short of the 1930 mark, which was under the past ten-year average.

The most encouraging factors in the outlook are the improvement in the residential construction field and certain types of public works, notably highway construction. The value of all types of construction in the United States last year was estimated at \$6,525,000,000. Present indications point to a valuation volume some 20 per cent under this figure for 1931, although the decline in material costs will make the actual construction compare more favorably, as it already has in residential building.

It seems likely that comparisons for the second half of 1931 and 1930 will be far more favorable, and it is in this period that the industry should make its best showing.

RUN DOWN AUTOS PROVE A MENACE

One accident, out of every three involves an old, run-down car, in the opinion of R. G. Guyett, insurance broker, member of the San Francisco Builders' Exchange.

When behind the wheel of an old, rattle-trap car, a driver does not usually exercise the same degree of care in driving as he does when driving one in good condition. The reason for this is obvious, according to Guyett. He has the new, shiny object more at heart than he has the one with the flopping fenders and the leaking radiator. He does not have the added incentive of newness to protect this possession, and accordingly is just that much more careless.

"Then there is the element of safety devices on the older cars which makes them objects of danger on the streets," says Guyett. "Trucks, steering wheel, rear view mirrors, and acceleration facilities are usually very faulty. Add to this the more careless attitude, and you have the reason why old, rattle-trap cars are involved in one out of three accidents.

"Perhaps they may not be in the middle of things, but if you will carefully study the report of each accident, you will find that though they were not actually involved, they were more than likely the cause of two other cars smashing into each other because of inconsiderate or reckless driving. There are many motorists who have been compelled to drive into trees over ditches, and in the paths of other cars because of the slow and unsteady gait of some out-of-date car ahead of or beside them.

"You cannot point your finger at the driver of these cars and say that they are absolutely at fault and prove such contentions at law," Guyett declared.

Guyett advocates periodical testings under state supervision.

Gordon Chamberlain Is Killed by Truck

Gordon Chamberlain, grading and teaming contractor, operating under the firm name of McClure and Chamberlain, was killed last Saturday morning on the San Francisco War Memorial project.

Chamberlain was supervising the operations of his equipment when he was struck and run over with a five-ton truck loaded with concrete.

William P. Clement, 30, of 443 Peninsula Avenue, driver of the truck, was arrested.

HOW MATERIAL COSTS COMPARE

Below are the quantities of basic materials used in building a 24 by 26 foot brick and tile residence, showing the unit prices and total cost for 1914, the peak year of 1920 and the quotations on May 1 of this year. The tabulations were compiled by the Cleveland Builders Supply Company.

	1914		1920		1931	
	Unit	Total	Unit	Total	Unit	Total
2000 common brick.....	\$ 7.50	\$15.00	\$ 22.00	\$ 44.00	\$12.00	\$ 24.00
15,000 face brick.....	18.00	274.00	50.00	650.00	18.00	274.00
1200 5x8x12 tile.....	36.00	43.20	102.00	122.40	41.40	49.68
1000 5x8x12 tile.....	20.00	20.00	60.00	240.00	23.75	55.00
17 1/2 lb. cement, paper	2.00	25.00	4.00	70.00	1.83	32.92
42 tons sand.....	1.75	73.25	3.00	120.00	1.90	87.70
6 tons plaster.....	5.50	33.00	11.50	69.00	9.50	57.00
100 sacks White Rock	.28	28.00	.85	85.00	.25	25.00
1/2 bbl. plaster Paris	2.00	1.00	5.00	2.50	7.50	3.75
		\$544.45		\$1393.90 (156%)		\$612.15 (12%)

THE OBSERVER

What He Hears and Sees on His Rounds

Fred DeTemple, chairman of the Apprenticeship Committee of the Oregon State Association of Master Plumbers, at the annual convention of that body held in Bend, Oregon, reported that twenty boys were being trained in the Portland school under the supervision of a commission of four master and four journeymen plumbers, the school being conducted by the Portland school district.

Benjamin C. Gallup, 42, civil engineer, died at his home in Fair Oaks, Sacramento county, June 8. Gallup was a native of Houston, Texas.

Louis O. Hansson, Berkeley contractor, died in that city last Sunday following a brief illness. His widow and two children survive.

William H. Wattis, president of the Six Companies, Inc., contractors on the Boulder Dam, last Tuesday became a Doctor of Laws. The honorary degree was awarded the engineer at commencement exercises of the University of Utah, in Salt Lake City, according to Associated Press dispatches. Wattis is ill in St. Francis Hospital here. The degree will be formally presented to Wattis here at a date to be set later.

Contract for making 26 combination feed check and stop valves for the 30,000 ton liners now building in the east for the United States Lines has been won by the United Engineering Company of San Francisco. The valves are being shipped east as fast as they are finished. Each ship will use thirteen valves. Each valve weighs 500 pounds. Each of the new trans-Atlantic liners will cost about \$10,000,000.

Caterpillar Tractor Co., Peoria, Ill., has decided to discontinue production of its Super-Mogul, Super-Reliance, Super-Special and Twenty graders, which are being superseded by equivalent leaning-wheel models.

A cut of \$2 per day for eight principal trades in Houston, Texas, went into effect on May 1: all old work is to be completed at the old scale. Many union men walked out in protest but all new jobs will be operated on a non-union basis.

Babcock & Wilcox Co., New York City, has acquired non-exclusive licenses to use the automatic arc-welding patents of the Automatic Arc Welding Co.

Members of the building trades of Joliet, Ill., have refused to consider a 30 per cent reduction offered by the contractors of that city. Building work is continuing at the old scale.

Wisconsin state highway department has a big grade crossing elimination program under way. It calls for the building of 90 overhead structures at dangerous crossings. Contracts have been let or bids have been taken for 46 of these projects. The program represents work originally planned for 1931, 1932 and 1933, which, with the co-operation of the railroad companies, has been consolidated into a one-year program. A recent increase in the gasoline tax from 2 to 4 cents per gallon will provide the fund needed to advance the work.

Blaw-Knox Co., Pittsburgh, Pa., has acquired exclusive sales and manufacturing rights for the Ateco line of earth-moving machinery from the American Tractor & Equipment Co., Oakland, Calif., for the United States east of the Rocky Mountains and for all other countries.

Differences between the high-duty gasoline engine and the so-called industrial engine form the basis of an illustrated bulletin issued by the Sterling Engine Co., Buffalo, N. Y., which explains the essential points that should be considered in choosing an engine for a specific purpose.

Clover Valley Lumber Company has purchased the plant of the Union Mill & Lumber Company at Reno, Nevada. The purchase price is estimated at \$15,000. The Union mill is one of the oldtime planing and sash-and-door plants of Reno and will be operated in conjunction with the large Loyalton mill of the Clover Valley Lumber Company.

Mark Dillon, 236 Barenson Ave., San Mateo, will operate from 1240 El Camino Real, San Mateo, under the firm name of West Side Plumbing Shop.

Frank Lamb, general contractor, has been elected president of the Vallejo Builders' Exchange. George Barench, general contractor, was elected vice-president and Roy Morris, secretary.

American Lumber Co., has filed suit at Modesto against George Covell and others for \$513.70, alleged due for materials furnished defendants in the construction of the Hotel Covell annex.

New bookings for structural steel in April amounted to 293,600 tons, against 184,400 in March and 222,800 in April, 1930, according to the U. S. Department of Commerce. Shipments for the month totaled 147,600 tons, against 151,200 in March and 284,000 in April, 1930.

"I have been through six depressions during my life. They all act alike. The men who, if business fell off 66 per cent, increased their selling efforts 75 per cent, managed to pull through as if there were no depression, and the efforts of such men tend to shorten periods of depression."—Thomas A. Edison.

The man who writes "Realtor" on his window or on his letterhead or his advertising must be a realtor in fact, or he will be liable to suspension or revocation of his license under authority of the State Real Estate Department. The amendment to the act was signed last week by Governor Rolph. It is now the law of the State.

The 29th annual Convention and Road Show of the American Road Builders' Association will be held in Detroit, January 9 to 15, 1932. The Detroit Airport building will be used for both the convention and the road show. All exhibit space is on the ground floor and the huge doors make possible the setting of the largest equipment without difficulty.

W. Chester Morse, consulting engineer, who served as city engineer of Seattle, Wash., during 1927 and 1928,

has been named to succeed J. D. Ross as superintendent of Seattle's lighting department. The appointment was made by Mayor Edwards and was the second in a succession of five appointees named by the mayor and tentatively rejected by the city council during a protracted struggle to bring about the reinstatement of Mr. Ross. Mr. Morse was confirmed by a 5 to 4 vote of the council.

Removal of foreign trade barriers in the Pacific area, particularly tariff difficulties, in an effort to increase commerce, will form the principal topics of parley at the 1931 convention of the Pacific Foreign Trade Council in Oakland next September.

Increases from five to 20 per cent in rates paid by employers under the state workmen's compensation act, is announced by the Oregon Industrial Commission. Principal industries affected are logging, agriculture, sawmills, building, erection, canneries, longshoring and paper manufacturing.

E. K. Wood Lumber Company, Los Angeles, have been appointed distributors of Therman Corporation of Chicago. A. Van Zant is the factory representative in the western states with headquarters in Los Angeles.

According to a statement by the Bureau of the Census reports from 835 mills cutting 5,000,000 ft. or more annually showed production of 16,034,401,000 ft. in 1930, a decrease of 23.9 per cent compared with 1929. It is estimated these mills produce 57.1 per cent of the total output of lumber in the United States.

The organized contractors of Davenport, Iowa, have entered into negotiations looking toward a reduction of \$1 per day for all crafts. Work is continuing under the old scale.

Nine counties, comprising the San Francisco Bay area, contain 3,758 industrial establishments, whose products annually are valued at \$1,127,926,000, with \$8,038 wage earners and an annual payroll of \$139,532,000, according to the San Francisco Down-Town Association.

Robert S. Osgood, former manager of the Wheeler-Osgood Co., of Los Angeles, is now sales manager of the Washington Veneer Co. at Olympia, Wash.

The Dorr Co. and Oliver United Filtrators, Inc., have been united by the formation of the Dorr-Oliver Corp. under the joint management of V. N. Dorr and Edwin L. Oliver. The corporation will function through two wholly owned operating units, retaining their present names and staffs, making joint use of technical information and carrying on joint research and development work.

Walter Alfred Moser, 45, district manager of the Westinghouse Electric & Mfg. Co., in Salt Lake City, Utah, died May 22 of heart disease. He had been associated with Westinghouse since shortly after graduation from the University of Nebraska in 1907, was a past-president of the Electrical League of Utah and a member of the Utah Society of Engineers.

Sixteen hundred employees of the Mansfield plant of the Empire Steel Corporation at Mansfield, Ohio, have voluntarily cut their wages 5 per cent to help tide the company through its receivership. The same employees struck recently when a 5 per cent and later a 10 per cent reduction was announced. The strike was settled when the firm rescinded the wage cut.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3588-S ARCHITECTURAL Draftsman, with 4 or 5 years' experience on various kinds of detail work, to make tracings and drawings under the supervision of a structural engineer. \$175 month. Temporary. Location, San Francisco.

R-3589-S KEYSTONE DRILL Runners, experienced, for work in Western Canada. Must be either Canadian or English citizens. Headquarters, San Francisco.

W-2790 ENGINEER, 35-45, who has had experience in bringing industries to certain localities. This is for a Western Chamber of Commerce. Salary \$7500 a year. Apply only by letter.

W-2751-S ENGINEER, technical graduate, American, with good experience in rock drilling and rock excavation, preferably on heavy construction work, and also having had sales experience or having ability and personality for selling. Apply by letter. Location, East.

W-2745 EXECUTIVE ENGINEER, with broad gauge scientific experience, to coordinate the efforts of a number of other scientific engineers in all branches of engineering. The enterprise is educational and non-commercial and offers an exceptional opportunity to some one with tact and ability to secure cooperation. Apply by letter only. Salary \$5000 a year. Location, Middletown.

R-3755-S ASSOCIATE or FULL PROFESSOR of Mechanical Engineering, to carry on research work in agricultural engineering. Would not be required to do any teaching. Should be 35 to 40 years of age, exceptionally well qualified in mathematics and physics and preferably with an advanced degree in engineering. Apply by letter with full details of training and experience, and photograph. Salary \$3600-4800 per year. Permanent. Location, West.

\$5,770,000 DAM PROJECT APPROVED

State Engineer Edward Hyatt has approved the City of Pasadena's amended application to build a \$5,770,000 dam on the San Gabriel River, about four miles above Azusa, Los Angeles County.

The city originally asked permission to construct the dam last September, but later, after the safety of the proposed dam had been questioned, filed an amended application. The original plan contemplated storage of 64,000 acre feet of water and a dam fifty feet higher than will now be built. The new reservoir will hold 40,000 acre feet.

Hyatt, before granting the application, appointed a consulting board comprised of geologists and engineers to advise on the safety features of the project.

Sacramento Chapter, American Association of Engineers, at the last regular luncheon-meeting in the Hotel Sacramento, took steps to secure the national convention of its organization for Sacramento in 1932. E. A. Bailey was elected chief delegate to the 1931 national convention, to be held in Huntington, West Virginia, this October, and he will make the plea for Sacramento as a convention city in 1932.

RETAIL LUMBER SALES DURING MAY SHOW FAIR INCREASE

Sales of lumber by retail dealers showed an increase during May of from 5 to 10 per cent over April, the June 1 issue of "The Lumber Market" monthly business review and forecast of the National Lumber Manufacturers' Association, states. There will be a similar increase in June retail movement, at slightly lower prices, however, according to the consensus opinion of two thousand reporters, consisting of lumber retailers, wholesalers, manufacturers, banks, building and loan institutions and other informed sources.

Sales of lumber to retailers showed a 1 to 5 per cent decrease during May in the face of an expected increase, and prices paid by retailers dropped from 5 to 10 per cent, although only from 1 to 5 per cent of this drop was passed on to customers during the month. A very slight increase in sales to retailers is expected during June. A rather substantial increase in softwood sales to industrials, but no improvement in hardwood movement, is forecast for June.

On May 16 manufacturers' stocks were 5 per cent below those held on May 18, 1930. Dealers' stocks increased substantially during May over April of this year and there was a slight decrease in stocks held by industrials.

Residential building fulfilled expectations, showing a 5 to 10 per cent increase in May over April, though a slowing down of this ratio for June is anticipated. Building money is reported "ample, but difficult to procure" in most localities, due to rigid credit requirements.

Building Industries of San Jose Elects

Building Industries Association of San Jose, organized last year to protect the interests of affiliated building groups, held its first annual meeting last Wednesday and elected its second board of directors.

Activities of the association during its first fiscal year were reported by L. C. Rossi, secretary-manager.

Those elected directors were: Wm. Abbott, tile company; John P. Maluvius, material dealer; K. H. Borchers, material dealer; Warren Holmes, hardware dealer; William E. Verpa, plumbing contractor; J. Lester Miller and William Barkuloo, building and loan association officers; William F. Hayward, lumber dealer; A. L. Hubbard, lumber dealer, and L. C. Rossi, secretary-manager.

The directors will call a special meeting this month to elect officers. The present officers are J. Lester Miller, president; John P. Maluvius, vice-president, and L. C. Rossi, secretary-manager.

CONTRACTOR'S SUIT AGAINST COUNTY SET

With a motion for judgment on pleadings denied, the case of A. J. Raichs, San Francisco contractor, against the County of Monterey, involving \$15,899, was set for trial for August 24 by Superior Judge M. T. Dooling.

Raichs is suing the county for that amount, claimed due for paving work on the Salinas-Monterey road, done under contract two years ago. The county denies that the \$15,899, which is allegedly in excess of the terms of the contract, is due.

STEEL PRODUCT IN CERAMIC TILE FIELD

Steel sheets find a new market and ceramic tile a new competitor in the application of a heavy porcelain enamel to light pressed material. The Business Week reports. The product has been taking the place of ceramic tile in a number of places where weight is a consideration, as on shipboard, or where economy is important, as in hotels and other construction.

The Porcelain Tile Co., owner of the patent, has been having the product manufactured in several places the last two or three years. Recently it let a large contract to the Youngstown Pressed Steel Co. of Warren, O. The Ferro Enameling Co. of Cleveland, which handled the contract, is installing the enameling equipment at Warren and supplying the materials. The continuous process of enameling developed by Ferro at its Louisville, Ky., plant is being employed on the new product.

Steel sheet is stamped in the form of a tile, a rectangle with turned-up edges. The stamping is pickled and placed on a conveyor which carries it through the spray enameling machine. After baking, the tile is cooled and given a second coating of enamel. The steel tiles are mounted on wallboard, the edges fitted to grooves cut in the board, and cemented with waterproof cement.

A national survey of school finance in the United States involving a four-year investigation will start July 1, according to announcement by Secretary Ray Lyman Wilbur of the Department of the Interior.

Provided with an appropriation of \$350,000, the federal study will be conducted under the direction of Dr. Wm. John Cooper, commissioner of the federal office of education. Dr. Cooper was formerly of California. Dr. Paul R. Mort of Teachers College, Columbia University, has been named associate director of the survey.

Expenditures for public elementary, secondary and higher education in the United States now total \$2,450,000,000 annually. The national survey is expected to produce comparative information on sources and uses of these funds in order to satisfy the demand by state legislatures, school officials, and school boards for authoritative data.

From headquarters of the Bricklayers, Masons and Plasterers International Union at Washington comes a heated criticism of the suggestion made May 8 by organized contractors that the "prevailing wage" law be amended. The contractors contend that wage rates on federal government contracts should be predetermined and specified in the contract. The union quotes a contractor-official as suggesting "a constructive amendment to make the wage law workable and equitable and, at the same time, assure a living wage to construction labor." The words "living wage" evidently have started a conflagration, judging from the threat of the union that "organized labor will give these organized employers the battle of their life," should a so-called "living wage" be written into the law. The union's interpretation of the term is that it "cannot be anything except a bare subsistence wage."

The Hamilton Construction Company, formerly located at 5144 Geary Street, have opened new and larger quarters at Room 714 Hearst Bldg.

Electrical workers union of Spokane, Wash., accept a wage cut of \$1 per day, making the scale \$8 per day.

\$4,000 IS COST OF FUTURE MODERN HOME

American home lovers can look forward to being able to secure in the near future, houses that can be constructed and furnished in a week and which may cost, with all modern improvements, as low as \$4,000, A. L. Purcell, Kocher, managing editor of "Architectural Record," New York City, declares.

This house will be planned and built with a new regard to the preservation of health, it will have adjustable outside walls and partitions so that occupants can arrange the interior as fancy or necessity dictates; and central community heating will relieve house dwellers of all responsibility in this connection.

There will be more sun porches, roof terraces and attractive outdoor garden space, and the houses themselves will be built so that more sunlight and air may be admitted to keep the occupant out of the hospital, said the speaker.

Mass production of building sections, the development of the possibilities for assembling house parts in great quantities, and the setting up of hundreds of houses in an area at one time, would solve the housing need of the moment, and would make possible lower prices in this important field, said Mr. Kocher.

He called "ideal" the creation of community garages instead of individual ones, and said that it would be even more desirable to provide community automobile service so that busy men could merely call for a car when needed, order the size of vehicle he wanted, and be relieved of the responsibility and expense of having an individual automobile. The actual cost of such service each year would be less than individual car ownership, said the editor. Mr. Kocher said:

"A central kitchen should deliver meals to the house or apartment. There should be maid and valet service on call. Provision should be made for recreation, not only for children, but for adults as well. There should be a nursery for the care of children, and a group theater with movies and television provided.

"The house itself should be more flexible than the type that now exists. Such a house should provide a minimum of upkeep and should provide the utmost in convenience and effort-saving devices. It is highly important that this ideal house be low in cost so that the average wage earner could afford to live in utmost comfort.

"Today we erect hospitals provided with sun porches, terraces and perfect ventilation to bring back to health the victims of our crowded cities. Why should we not so build the house of the next decade that health may be conserved, that we may prevent the sickness, unhappiness and crime that result from crowded conditions and poorly designed houses?

"In short, the house of the future should be made for use and pleasure and not to satisfy the whim of architects and developers, who build a sweetly picturesque or quaint bungalow that attracts attention but that does not satisfy the more important human need."

Mr. Kocher said that houses are built along too massive lines, and that it is not necessary to construct them as though they were to endure for all time. He stated that materials for the "new" house will be of light metals and synthetic products, which already have proven their worth in other technical fields.

This development of the home is certain to come, and when it does come, the advance will be very rapid, said the speaker, who declared that tradition in design and construction had hindered improvement in the home building field.

S. F. BAY BRIDGE READY FOR USE IN 1937 SAYS PURCELL

Completion of the San Francisco-Oakland bay bridge project by July, 1937, is predicted by State Highway Engineer Charles H. Purcell.

Advertising for the first foundation contract for the \$75,000,000 structure will be made in the fall of next year, Purcell said.

When the \$650,000 loan appropriation from the State becomes available on August 15, intensive work on the bay bridge project will be started.

"I anticipate that design work in the headquarters office we are to establish in San Francisco will proceed with

C. H. PURCELL
State Highway Engineer

sufficient rapidity to enable us to determine an accurate estimate of the entire project by July 1, 1932, so that bonds may be sold immediately thereafter, Purcell said.

Considerable research is being made on preliminary work in connection with the huge project. Work has started on key maps of the area affected by the bridge and its approaches, showing all physical data, contours, buildings and tracks involved, which will form a basis for final studies of the entire layout, Purcell said.

Control monuments are being set to be used in locating borings and piers. The monuments will be placed on Telegraph and Rincon hills.

Purcell announced that Ralph Modjeski, chairman of the board of consulting engineers appointed for the project, is expected here soon. Moran and Proctor, foundation authorities, also have been named to the board and others may be added later, Purcell said.

Bulletin 40-1 of the Fairfield Engineering Co., Marion, Ohio, describes Fairfield's portable belt conveyors made in lengths of from 20 to 60 ft. for handling sand, gravel, crushed stone, mixed concrete and similar materials. Belt widths of 20 and 24 in. are available, equipped with either gasoline or electric power units.

Disadvantages of Unrestricted Bidding

"An unanswerable argument against unrestricted bidding is found in the fact that it is not to the owner's interest to have an incompetent contractor doing his work," says the Improvement Bulletin. "When seeking any other service the owner carefully weighs the qualifications of the man he employs. But too frequently the owner considers unrestricted and unlimited bidding an easy path to low cost. He depends upon his architect or his engineer to see that the work is performed in strict accordance with the specifications. He forgets that contractors are not on a dead-level of efficiency. There are good contractors, poor contractors, and those of all grades in between. There are contractors who consider it a point of honor to turn out a good workman-like job, and there are, alas, those who have scant regard for their future reputation. Their motto seems to be, 'let the owner beware.'"

"No architect or engineer, no matter how skillful, possesses any sort of magic wand that will turn a bungling workman into a competent one. The fact that both plans and specifications are above reproach will not result in a first-class job if the contractor has neither executive ability nor the skill that comes from experience. A bungling workman is a bungling workman, no matter what his profession or trade. An architect's skill cannot transmute the base metal of a contractor's inefficiency into the pure gold of able performance.

"The idea of turning loose sets of plans and proposals to every contractor is sheer nonsense. Each one of the bidders incurs an expense by no means inconsiderable in figuring the plans. The chance of obtaining the contract is very small, and it is quite apt to induce a contractor who is inexperienced, inefficient, and does not figure correctly."

BUILDING COSTS 15 TO 35% LOWER

The future offers much of hope to those engaged in the construction industry and to those who invest their money in building enterprises, Truman S. Morgan, president of the F. W. Deere Corporation, stated in a recent address broadcast by radio. He brought out that construction costs today range from 15 per cent to 35 per cent lower than they were a year or two ago.

Urging those who desire to own a home to take advantage of present conditions, Morgan said:

"In its social aspect, new building methods and improvements of all kinds represent advances in the standards of living, and construction, particularly home building, may be considered a measuring rod of progress of the American people. Statistics show that communities where home ownership predominates are far less affected by concurrent waves or cycle of depression. Today we have large accumulations of unemployed capital funds with restricted purchasing power. The launching of construction enterprises at such an opportune time as presents itself today would probably help more than any thing to bring back prosperity. It is probable that we will find directly around the corner many necessary adjustments."

CONTRACTORS MUST KEEP RECORDS OF CITIZENSHIP OF EMPLOYEES

Senate Bill No. 83, known as the "Alien Labor Bill," passed by the California Legislature and signed by Gov. Rolph, will become a law on August 14 next. It provides that any contractor or subcontractor who "shall knowingly employ or cause or allow to be employed" on any public work any alien, except in case of extraordinary emergency, shall forfeit as a penalty \$10 per day for each alien so employed.

Contractors will be required to keep accurate records of the names and citizenship of all persons employed on public work, such records to be open to inspection at all reasonable hours to those concerned in the enforcement of the law. In event any alien is employed the contractor shall within 30 days thereafter file with the contracting authority a verified statement setting forth the nature of the emergency.

No funds shall be withheld from progress payments to keep probable penalties without a full investigation.

Failure to keep proper records as required by the law on the part either of a public officer or agent or of a contractor is made a misdemeanor punishable by a fine not exceeding \$500 or imprisonment not exceeding 6 months or both. Following is the text of the new law:

Section 1. No person, firm, partnership, association or corporation, or agent thereof, doing any work on a public work being done for or under the authority of the state, or any officer or department thereof, or for or under the authority of any county, city and county, city, town, township, district, or any other political subdivision thereof, or any officer or department thereof, shall knowingly employ or cause or allow to be employed thereon any alien, except in cases of extraordinary emergency caused by fire, flood, or danger to life or property, or except to work upon public, military or naval defenses or works in time of war; provided, however, that within thirty days after any alien is permitted to work thereon due to such an extraordinary emergency, the contractor doing the work, or his duly authorized agent, shall file with the officer or public body awarding the contract a report, verified by his oath, setting forth the nature of the said emergency and containing the name of the said alien and each date he was permitted to work, and failure to file the said report within the said time shall be prima facie evidence that no such extraordinary emergency existed. Such contractor and each subcontractor shall also keep, or cause to be kept, an accurate record showing the names and citizenship of all workers employed by him in connection with the said public work, which record shall be open at all reasonable hours to the inspection of the officer or public body awarding the contract, his or its deputies and agents, and to the chief of the division of labor statistics and law enforcement of the state department of industrial relations, his deputies and agents.

Section 2. The contractor to whom such contract for a public work is awarded shall forfeit as a penalty to the state or county, city and county, city, town, township, district or other political subdivision on whose behalf the contract is made or awarded, \$10 per day for each alien knowingly employed in the execution of said contract, by him, or by any subcontractor under him, upon any of the public works, or upon any work herein mentioned, for each calendar day, or por-

tion thereof, during which such alien is permitted or required to labor in violation of the provisions of this act, and the officer or public body awarding the contract shall cause to be inserted in the contract a provision to this effect. It shall be the duty of such officer or public body to take

cognizance of all violations of the provisions of this act committed in the course of the execution of said contract, and, when making payments to the contractor of moneys becoming due him under said contract, to withhold and retain therefrom all sums and amounts which shall have been forfeited pursuant to the herein said stipulation and the terms of this act; provided, however, that no sum shall be so withheld, retained or forfeited, except from the final payment, without a full investigation by either the division of labor statistics and law enforcement of the state department of industrial relations or by said awarding body; and provided, further, that in all cases of contracts with assessment or improvement districts where the full payment is made in the form of a single warrant, or other evidence of full payment, after the completion and acceptance of the work, the awarding body shall accept from the contractor in cash a sum equal to, and in lieu of, any amount required to be withheld or retained under the provisions of this section, and the awarding body shall then release the final warrant or payment in full. It shall be lawful for any contractor to withhold from any subcontractor under him sufficient sums to cover any penalties withheld from him by the awarding body on account of the said subcontractor's failure to comply with the terms of this act, and if payment has already been made to him the contractor may recover from him the amount of the penalty or forfeiture in a suit at law.

Section 3. Work done for irrigation, utility, reclamation, improvement and other districts, or other public agency or agencies, public officer or body, as well as street, sewer and other improvement work done under the direction and supervision and by the authority of any officer or public body of the state, or of any political subdivision or district thereof, whether such political subdivision or district operates under a freeholder's charter heretofore or hereafter, shall be no more than work done directly by any public utility company, pursuant to order of the railroad commission or other public authority, whether or not done under public supervision or direction, or paid for wholly or in part out of public funds, shall be held to be "public work" within the meaning of this act.

The term "alien" as used herein means any person who is not a born or fully naturalized citizen of the United States.

Section 4. Any officer, agent or representative of the State of California, or of any political subdivision or district thereof who shall violate or omit to comply with, any of the provisions of this act, and any contractor, subcontractor, or agent or representative thereof, doing public work as aforesaid, who shall neglect to keep or cause to be kept, an accurate record of the names and citizenship of the workers employed by him in connection with the said public work, or who shall refuse to allow access to the same at any reasonable hour to any person authorized to inspect same under this act, shall be guilty of a misdemeanor, and shall upon conviction

be punished by a fine of not exceeding five hundred dollars, or by imprisonment for not exceeding six months, or by both such fine and imprisonment, in the discretion of the court.

Section 5. If any section, sentence, clause or part of this act, is for any reason held to be unconstitutional, such decision shall not affect the remaining portions of this act. The Legislature hereby declares that it would have passed this act, and each section, sentence, clause, or part thereof, irrespective of the fact that one or more sections, sentences, clauses, or parts be declared unconstitutional.

President's Timber Policy Now Effective

The President's policy restricting sales of timber from national forests as a means of relieving the depressed conditions in the lumber industry will not appreciably affect California lumbermen according to S. H. Shaw, Regional Forester, U. S. Forest Service.

Instructions issued by R. Y. Stuart, chief forester, effective immediately are to make no sales of timber where the value is over \$500 except to supply the needs of existing mills which are dependent on national forest timber where other timber cannot be obtained, to furnish domestic paper mills with raw material for news print and other pulp products for local markets and to dispose of wind thrown, fire damaged and bug-infested timber. According to Shaw the California region of the Forest Service has been following a similar policy for several years because of conditions in the lumber industry in this State.

The exceptions to the policy of making no sales over \$500 are designed to avoid causing unnecessary unemployment or unnecessary hazards to the national forests.

CEMENT PRICES AT SEATTLE IMPROVE

Stabilization of cement prices in Western Washington at \$2.85 per barrel gross, f.o.b. car Seattle to the consumer in large quantities, is reported effective by Seattle dealers. This figure is 20 cents below the level of early 1930.

Price of cement in paper sacks, car-load lots, is \$2.55 gross. This compared with a \$2.85 figure early last year.

During the last year or more no stable value for the commodity was effective in the Seattle territory. Dealers report Superior Portland Cement quoting the new prices.

Usual trade discounts and allowance of 10 cents for cloth sacks are provided.

NEW LUMBER CO. TO OPERATE YARD

The Cutter Mill and Lumber Company of Sacramento, has just leased its auxiliary lumber yard on the 12th Street Road at North B Street to a new Sacramento corporation known as the Sacramento Lumber Company, Ltd., which will operate the yard in the future.

The Cutter company has its main yards and mill at 34th and R Streets and Curtis Cutter, president, announced the company will concentrate its activities there. Several major improvements to the R Street plant are planned.

The Sacramento Lumber Company is headed by C. A. Minard, a former manager of the Cutter company, and Paul Norgbrunn, former owner of a lumber yard in Rio Linda.

 SAN FRANCISCO. Pier No. 38.
 Extension to pier (concrete piles; con-
 crete deck; track aprons of cre-
 osoted lumber; steel frame shed;
 concrete walls; flat wood roof).

Owner—State of California (Harbor
 Commission).

Engineer—Frank G. White, chief en-
 gineer, Ferry Bldg.

Expect to be ready for bids in about
 30 days.

SAN FRANCISCO—Until June 25, 11
 A. M., bids will be received by Of-
 fice Constructing Quartermaster, Fort
 Mason, to repair East Garrison Wharf
 at Fort McDowell, California. Spec-
 ifications and further information
 available from above.

Preparing Plans.
WHARF Cost, \$—
 OAKLAND, Alameda Co., Cal. Foot
 of Peralta Street.

Garbage disposal wharf (size and type
 of construction not yet decided).

Owner—City of Oakland (Port Com-
 mission), 424 Oakland Bank Bldg.,
 Oakland.

Plans by Owner.

MISCELLANEOUS CONSTRUCTION

Construction Postponed Indefinitely.
STATION Cost, \$20,000
PITTSBURG, Contra Costa Co., Cal.
Spanish type tile and stucco railroad station.

Owner—Sacramento Northern Railroad, Mills Bldg., San Francisco.
Plans by Eng. Dept. of Owners.
This structure will be similar to that recently erected by the railroad company at Chico.

BERKELEY, Alameda Co., Cal.—Until June 26, 11 A. M., bids will be received by Regents of the University of California for running track bleachers, at George C. Edwards Fields on the Campus of the University of California.

Plans and specifications obtainable from the Cashier's Window, California Hall, University of California, upon deposit of \$200.

Plans Being Figured By Selected List of Contractors.

MORTUARY Cost, \$25,000
OAKLAND, Alameda Co., Cal. Telegraph and 36th Avenues.

Two-story mortuary building.
Owner—Oakland Undertaking Co., 3007 Telegraph Ave., Oakland.
Architect—Raymond De Sanno, 2584 Milvia St., Berkeley.

Contract Awarded.

REPAIRS Cost, \$1400
LAWDALE, San Mateo Co., Calif.
Hills of Eternity Cemetery.
Repair private mausoleum (re-set granite and bronze, etc.)

Owner—A. Aronson.
Architect—W. A. Burlingame, 2025 Carmelita Ave., San Francisco.
Contractor—Gaetano Bocci and Sons, Colma.

SAN RAFAEL, Marin Co., Cal.—Until July 1, 7 P. M., bids will be received by Marin Union Junior College District to furnish: (1) Physics apparatus and supplies; (2) Chemistry apparatus and supplies; (3) Physical education apparatus and supplies. Further information available from A. C. Olney, president of Marin Union Junior College, Junior College Grounds-Kentfield.

POMONA, Los Angeles Co., Calif.—County Architect Karl Muck, Tenth floor, Hall of Records, has been authorized by the Los Angeles board of supervisors to revise the plans and specifications for the proposed grand stand to be erected at the Los Angeles County Fair Grounds, Pomona, to bring the cost within the estimate. This action was taken following the rejection by the board, at its meeting June 10, of all bids received June 8. The total of the segregated contracts was approximately \$23,000 above the architect's estimate, viz.: \$240,000, which was the amount which the board has planned to expend upon this project.

Plans Being Figured—Bids Close July 1st.

RECREATION PIER Cost, \$—
SAN FRANCISCO, Foot of Van Ness Ave., Aquatic Park.
300 foot pier (first unit of 900 ft. pier 60 ft. wide, hollow concrete piles, iron railings).

Owner—City of San Francisco (Park Commission), Park Lodge, Golden Gate Park, San Francisco.
Plans by Owner.

Segregated Bids In—Held Under Adjudication.

CREAMERY Cost, \$10,000
OAKLAND, Alameda Co., Calif. NE McAuley and Telegraph Aves.

One-story brick creamery (hollow tile partitions, composition roof, concrete floors).
Owner—Edna Grant Shuey, 2738 Benvenue Ave., Berkeley.
Architect—Gwynne Officer, Hotel Claremont, Berkeley.
Work will begin immediately.

SACRAMENTO, Sacramento Co., Cal.—Until June 23, 3 P. M., bids will be received by U. S. Engineer Office, California Fruit Building, for miscellaneous castings. Plans and further information available from above.

Plans Being Figured.
LABORATORY BLDGS. Cost, \$—
LOS ANGELES, Los Angeles Co., Cal. SW Alvarado and Valley Sts.
one and two-story brick laboratory building (50x137 feet).

Owner—A. R. Maas Chemical Co., 308 E. Eighth St., Los Angeles.
Architect—H. Roy Kelley, Architects Bldg., Los Angeles.

NAPA, Napa Co., Cal.—Articles of incorporation were filed by the Napa Mutual Fruit Dehydrating Company, Ltd., for formation of a \$75,000 fruit concern.

Four directors of the company, named to act until the first meeting of the shareholders, are: Wm. Bohlen, R. E. Minahan, Walter Lutge and F. J. Garwood.

It is understood that the new company will build a large dehydration plant in west Napa, construction to be completed in time to handle the coming prune crop.

SAN RAFAEL, Marin Co., Calif.—Until July 1, 8 P. M., bids will be received by Marin Union Junior College District to construct bleachers in the new gymnasium. Plans and specifications obtainable from Architect A. A. Cantin, Flatiron Bldg., San Francisco.

Completing Plans.

RESORT Cost, \$300,000
RENO, Nevada. Bowers Mansion.
100-room hotel (hollow tile construction) 30 cottages, gambling casino, pool room, swimming pool, polo field, bath houses, etc.

Owner—Withheld.
Architect—George E. Koster, 6 Arcade Bldg., Reno.

Taking Segregated Figures.

RESORT Cost, \$60,000
RENO, Nev. Block bounded by Center, Pine, State Sts. and Powwing Park.

Remodel residence for gambling casino and pleasure resort.
Owner—E. Dodge (attorney), Reno.
Lessee—Ray Smith, Reno.
Architect—George E. Koster, 6 Arcade Bldg., Reno.

Work will begin immediately.

MISCELLANEOUS SUPPLIES AND MATERIALS

BOULDER CITY, Calif.—Chapman Lumber Co., Portland, Ore., has been awarded a contract by Six Companies, Inc., for furnishing 250,000,000 board feet of lumber for use on the Hoover Dam and at Boulder City. Contracts awarded by the Chapman Lumber Co. are: Transportation to W. R. Chamberlin Steamship Co., Ltd., of Long Beach, 6,000,000 ft. per month; handling and transferring from the ships to railway cars, to L. W. Blinn Lumber Company.

SAN FRANCISCO—Until June 29, 2 P. M., bids will be received by Leonard S. Leavy, Purchaser of Supplies, 270 City Hall, to furnish gymnasium equipment for School Department. Specifications and further information available from above.

BERKELEY, Alameda Co., Calif.—Following is a list of bids received by city council to furnish No. 10 solid single conductor, double-braid, water-proof medium hard drawn copper wire, delivery f.o.b. Berkeley.
California Elec. Co., \$1462 per lb.
General Elec. Sup. Co., \$152 per lb.
Gilson Elec. Co., \$187 per lb.
Bids held under advisement.

SAN FRANCISCO—Until June 29, 3 P. M., bids will be received by Leonard S. Leavy, purchasing agent, 270 City Hall, to furnish lumber, hard and soft, for the School Departments. Specifications and further information obtainable from above.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco or Phone Garrison 8744.

21125—Spanish Tiles, Barcelona, Spain. Association would like to contact firms interested in importing Spanish tiles, mosaics, bronze fixtures and other articles of pure Spanish design used in the construction and decoration of private residences, clubs, hotels, libraries, etc.

21126—Stato, San Francisco. Party has inquiry from Norway for list of importers of talc, steatite (soapstone) and slate.

21132—Hardware, Paints, Oils, Mill Supplies. Manila, P. I. Party wishes to secure the representation for the Philippine Islands of reliable manufacturers of hardware, paints and oils, mill supplies, particularly and sundry merchandise in general.

State and county expenditures for county roads in 1931 will amount to \$1,550,881,000 as compared with \$1,532,945,000 in 1930, according to estimates of the statistical service of the American Road Builders' Association. Road building by states has increased in 1931 by \$50,000,000 as compared with the previous year while there has been a decrease of the same amount in county expenditures.

The state highway departments will buy highway equipment amounting to \$14,655,000 in 1931 as compared with \$14,714,706 in 1930. County purchases of highway equipment may be somewhat smaller in 1931 than in the previous year due to the slight lifting off in county road building.

State expenditures amount to \$962,871,000 in 1931 as compared with \$913,778,000 in 1930; county expenditures are \$578,010,000 as compared with \$639,167,000.

One of the most remarkable examples of the durability of western red cedar was found recently on the timber lands of the Canadian Western Lumber Co. at Comox, British Columbia, it is reported by The Timberman. Two seven-foot cedars were discovered side by side. One tree when felled and the rings counted proved to be 265 years old. The other, a dead tree, was 242 years old, according to the ring count, and had apparently been dead for at least 265 years, or since the live oak took root. The tree was evidently killed by a forest fire and the charred roots were twined with the roots of the live specimen. The older tree was completely girdled by fire scars in a conflagration that took place several centuries ago. The live forest of mature trees surrounding it, without question, dates since the fire.

PUBLIC WORKS CONSTRUCTION IS PROFITABLE TO TAXPAYER SAYS U. S. EMPLOYMENT CHIEF

Public officials who wisely push public construction to stimulate employment and buying power need not fear complaints of taxpayers, E. Joseph Aronoff, director of the Public Works Section of the President's Emergency Committee for Employment, told the convention of the Illinois Association of Sanitary Districts at Peoria, last week.

"To inaugurate public works in times such as these, when building materials prices are low, when engineers, contractors and builders are accepting lower profits, will benefit the taxpayer in the long run," Mr. Aronoff said. "I am certain in my own mind that the lack of demand for charity, consequent to the prompt initiation of public works in times of industrial depression, will leave in the public purse an amount sufficient to make the taxpayer happy in the improvement of his community, rather than disgruntled over some slight increase in taxes."

Mr. Aronoff discussed the part that expedited Federal construction programs have in minimizing the effects of business depression and pointed out the need for further expansion of municipal and state projects.

"The Federal Government has, and is expediting its construction program. Many municipalities, counties and states have done and are doing the same. But there still remains a vast reservoir of potential public construction."

"Every public-spirited citizen, every publisher, every newspaper, every editor, must make it his job to understand the true value of initiating public work in times of industrial depression and must then make it his business to cry the truth from the house tops that, our citizenry may be fully informed."

Excerpts from the address follow:

"What relation does public work bear to the business situation? What does public work amount to, anyhow? The lack of information permitting an answer to these questions is somewhat, at least, somewhat appalling."

"Since the time of the Caesars, public works in times of stress has been recognized as good economic practice. Not a single, warped idea, is this, but its purposes and effects are manifold. To inaugurate public works in times such as these is to place on the public payroll, for services rendered and value received, those who would otherwise help to swell the ranks of the unemployed. It serves to keep in the minds of the workers and their families that they are upright, useful citizens (not indigents, not parasites) earners and spenders who, by the maintenance of their standards of living, are helping to build communities, states and nations."

"This will come, too, when we learn that without employment, men, women, and children must become objects of charity who will not be permitted to starve, but whose sustenance must come from the pocketbook of those who now protest against increases in taxes; those who do not see that charity brings no permanent or tangible return, but that the self-respect of the wage earner constantly employed is payment enough in itself, to say nothing of the permanent value of the remits of his labor; those who do not see that they must make their choice between paying taxes for relief and paying taxes for something tangible, lasting and effective. It will come, when we realize what we have taken from the worker, never to return, the minute we make him an ob-

ject of charity. It will come, just as soon as we have been educated to the point where we understand that charity is a make-shift, unsavory in its effects, while work and earned income for all is an ideal of an enlightened civilization."

"Since the latter days of November, 1920, there has been reported to the Public Works Section of the President's Emergency Committee for Employment more than six billion dollars worth of contemplated projects. We know we haven't all of it, but that, nevertheless, is what public work means in dollars and cents—billions. We, who are dealing with the question, have the feeling, however, that even this value is far overshadowed by the effect of public work upon the public mind, and by the amount of private work public work induces."

"Something over one and one-half billion dollars of contracts have already been awarded this year. Just a very small fraction less than 60%—but, mind you, 60% of the remainder consistently awaits authorization, appropriation and selection of sites, including a negligible amount delayed by litigation. Forty per cent is in a position to be advanced, the delays being occasioned by preparation or approval of plans of 20%, advertising or awaiting bids 12.9%, and miscellaneous minor factors of about 4%."

"We have been given to understand that building tradesmen constitute the largest group of artisans, and that of the total number of unemployed, the largest percentage are members of building trades. Think what it would mean if that great body of men, with the accompanying unskilled and semi-skilled labor, could be put into employment. The cement mills would grind, the steel and tube factories would be belching forth the smoke of three shifts a day, the brick manufacturer, the stone-cutter, the butcher, the baker and the candlestick maker, all, yes, everyone of them, would receive the benefits of increased industry and of debt slates wiped clean."

"In normal times, the construction industry, directly and through its various ramifications in the manufacture and sale of the necessary materials, is estimated to furnish employment to two and one-half million people, or about one-tenth of the nation's payroll. This involves annual wages aggregating three or four billion dollars, and materials and equipment of an equal value."

"Criticized, though it may be, by those who can see on the crumbling walls of an old postoffice that might well have been replaced a few years ago, the Federal government has not been derelict in its duty. Under the Supervising Architect, on April 30, there were one hundred and forty-two projects under contract amounting to \$5,733,366. By August 15, ninety-two additional contracts will have been let amounting to \$58,236,000; and by November 15, still another ninety-seven projects amounting to \$60,236,000 will be let. The Supervising Architect's office started on a ten-year building program by an Act of Congress of July 1926. They are now nearly three years ahead of their estimated program."

"During the fiscal year 1927 they spent \$6,952,089; in 1928 \$10,938,192; in 1929 \$18,147,005; in 1930 \$35,055,588; and this year they will spend more than twice that much, or approximately \$75,000,000. By 1933 they will have completed, under contract or in the drawing stage, not less than 75% of the projects to be completed in the ten-

year program, but that program has been increased from \$165,000,000 to almost \$700,000,000. The Veterans' Bureau will spend \$13,000,000 more on new hospitals and additions this year. You are familiar with the \$80,000,000 emergency highway fund provided by Congress in addition to regular appropriations; and the rivers and harbors works, and the reclamation projects; but there are too many branches of the government to go into this at length."

"Now, what couldn't be done with that more than two billion dollars worth of contemplated public work which still awaits authorization—31.1 per cent—or appropriation—20.8%, or selection of sites—5.9%, to say nothing of the other almost two billion dollars representing the 40% I spoke of a moment ago; and the millions upon millions of dollars of highways, both state and county, and municipal paving, comparatively little of which is included in my figures?"

"That is something for you gentlemen to think about. The Federal government has and is, expediting its construction program. Many municipalities, counties, and states have done and are doing the same. But there still remains a vast reservoir of potential public construction. Every public-spirited citizen, every public official, every newspaper editor, must make it his job to understand the true value of initiating public work in times of industrial depression and must then make it his business to cry the truth from the house tops that our citizenry may be fully informed."

"Hark ye to the sage words of your own Governor Emerson: 'Our greatest need of the past two years has been to build public buildings, new roads, new engineering systems to take up the slack and, at the same time, furnish employment.' Our greatest need of the next few years will be the building of citizenship."

"There has not been a more opportune time in recent years for securing the maximum your money can buy. Construction costs range from fifteen to thirty-five per cent below what they were a year or two ago. Furthermore, you are rendering a distinct public service in participating in a movement which will help your community, as well as contribute to the relief of the unemployment situation."

"A needed sanitary system, water or paving project is not only job providing, but in these days of low costs is indeed an investment that will yield large returns in money and public health and happiness. More money must be appropriated for public construction, and what has been appropriated must get into the pick and shovel stage without delay. Let us not try to fool ourselves, build now that we may restore buying power and preserve the American standard of living. There must be no delay in the building of a sanitary sewer, or the construction of a water works, or the paving of a street will sound the political death-knell of those public officials responsible therefor; but, rather, should a life-giving, necessary public improvement be held up, let the local unemployment problem serve to set them up on a higher plane in the estimation of their fellows."

With a record of holding the position of city engineer of Sheboygan, Wis., from 1888 to 1919, Charles Boley retired on May 1. Beginning with a city of some 10,000 population, having no sewers or paved streets, Mr. Boley has handled the paving, sewerage, water supply and other municipal developments for a 45-year period, during which the population has increased to more than 40,000.

Engineering News Section

BRIDGES

SAN FRANCISCO.—Following list of bids received by Golden Gate Bridge District, 722 Financial Center Bldg., to construct the Golden Gate Bridge across the Golden Gate at the entrance to San Francisco Harbor, together with approaches, approach roads and certain accessory structures. Bonds of \$25,000,000 were voted by the district to finance construction. Complete list follows:

Contract (1a) Steel super-structure, involving 75,000 tons of structural steel, etc.;

McClintic-Marshall Co., 2050	
Bryant St., S. F.....	\$10,494,000
Columbia Steel Co., S. F.....	10,676,000

Contract (1b) Cable, Suspenders and Accessories:

American Cable Co., 425 2nd St., San Francisco.....	\$6,255,767
Robbling & Sons Co., 646 Folsom St., San Francisco.....	6,844,399
McClintic-Marshall Co., 2050 Bryant St., San Francisco	7,974,000

Contract (2) Main Piers:	
Pacific Bridge Corp., E Water and Salmon Sts., Portland Oregon	\$2,260,000
Siems - Helmers, Inc., 1014 Guardian Bldg., St. Paul, Minn.	2,845,000
George Pollock Co., Forum Bldg., Sacramento	3,657,800

Contract (3) Anchorages:	
Barrett & Hilp, 918 Harrison St., San Francisco.....	\$1,645,841
George Pollock, Sacramento.....	1,746,144
Merritt, Chapman and Scott, San Pedro	1,864,991
Siems-Helmers, Inc., St. Paul Minnesota	2,048,854
Healy-Thibbitts Co., S. F.....	2,125,914
G Atkinson & Co. Russ Bldg. San Francisco	2,275,945
Porter Bros., Detroit, Mich.....	2,972,930

Contract (4) San Francisco and Approach Spans:
Columbia Steel Co., S. F. \$ 996,000
McClintic-Marshall Co., S. F. 1,093,400

Contract (5) Presidio Rd., involving
(1) Grading, unclass., 110,000 cu. yds.;
(2) Concrete paved roadway, etc., 4,-
862 lin. ft.:

Alternate of Item No. 2:
 (3) Asphalt concrete, etc., 4,862 lin. ft.
 (4) Underpass bridge, etc., lump sum;
 (5) High viaduct, complete, etc., "
 (6) Low viaduct, do;
 Alternate of Item No. 6:
 (7) Low viaduct, complete, etc., lump
 sum;

(8) Property fence, 10,000 lin. ft.;
 (a) Total lump sum bid, excluding
 Items Nos. 3 and 7;
 (b) Total lump sum bid, excluding
 Items Nos. 3 and 6;
 (c) Total lump sum bid, excluding
 Items Nos. 2 and 7;
 (d) Total lump sum bid, excluding
 Items Nos. 2 and 6.
 Barrett & Hilp, San Francisco (a)
 \$966,180 (c) \$385,545.

Rocca & Caletti, San Rafael (a) \$983,826 (b) \$994,540 (c) \$1,006,823 (d) \$1,017,537

Frederickson & Watson and Frederickson Bros., Oakland (a) \$995,406.
Monson Bros., San Francisco (a) \$1-

024,518 (b) \$1,063,802 (c) \$1,031,115 (d) \$1,070,290

Clinton Const. Co., San Francisco (a) \$1,038,000 (c) \$1,061,337.
George Pollock, Sacramento (a) \$1.-

Merritt, Chapman & Scott San Pedro (a) \$1,108,777 (b) \$1,103,163 (c) \$1,127,982 (d) \$1,122,568.

Healy - Tibbitts, San Francisco (a)
\$1,144,500 (b) \$1,133,500 (c) \$1,164,000
(d) \$1,153,000.

Contract (6) Sausalito Road:
 Granfield Farrar & Carlin, S. F. \$67,686
 Frank C. Cuffern, San Rafael..... 76,100
 Frederickson & Watson and
 Frederickson Bros., Oakland 76,240
 Barrett & Hilp, San Francisco. 84,561
 Eaton & Smith, San Francisco..... 88,665
 Healy-Tilbotts, San Francisco.... 95,670
 Merritt, Chapman & Scott, San
 Pedro 102,036

Contract (7) Paving of Main Approach Spans:	
Barrett & Hilp, S. F.	\$345,000
Monson Bros., San Francisco	444,900
Healy-Tilbitts, San Francisco	496,000

Contract (8) Electrical Work;	
Progressive Signal & Lighting	
Co., Los Angeles.....	\$132,495
Alta Elec. Co., San Francisco..	142,460
NePage-McKenny, S. F.....	161,369
H. S. Tittle, San Francisco.....	166,225
Weldenthal - Gosliner Electric Works, San Francisco.....	377,047

Contract (9) Cable Housing and Toll Terminals.
Barrett & Hilp, 918 Harrison St.
San Francisco\$71,430

Contract (10) 100,000 Barrels Portland Cement f.o.b. San Francisco:
Santa Cruz Portland Cement
 Co., San Francisco.....\$2.44 per bbl.
Pacific Portland Cement Co.
\$2.44 per bbl.
Henry Cowell Lime & Cem't
 Company\$2.44 per bbl.
Yosemite Portland Cement
 Company.....\$2.44 per bbl.
Calaveras Cement Co......\$2.44 per bbl.
 Complete list of unit bids will appear shortly.

MENDOCINO COUNTY, Cal.—A. T. Howe, Santa Rosa, at \$28,725, submitted low bid June 17 to State Highway Commission to construct bridge across the Russian River about 2 miles south of Ukiah, consisting of two 125-ft. timber truss spans and eight 19-ft. timber trestle spans and for grading and surfacing with bituminous treated crushed stone or gravel, 170 ft. of roadway approach. Complete list of bids follows:

A. T. Howe, Santa Rosa	\$28,725
Smith Bros. Co., Eureka	29,677
W. J. O'Neil, San Francisco	30,502
C. Dudley DeVelbliss, S. F.	31,886
A. W. Kitchen, San Francisco	33,570
J. W. Hoops, Sacramento	33,949
W. J. Beatty	35,539
M. E. McGowan, S. F.	35,539
Peter McHugh, S. F.	Not totaled
	29

PATTERSON, Stanislaus Co., Cal.—A cutoff highway is being proposed through the Coast range mountains, providing a closer link between Santa Clara and San Joaquin valley points. Possibilities of linking this highway

with the new route to Modesto from Patterson, would include a new \$165,000 bridge over the San Joaquin river.

NAPA, Napa Co., Cal.—City of Napa has filed a new application in the office of the United States Engineers at the War Department Headquarters in San Francisco. The new plans proposed contemplate the construction of three span bridge, with a horizontal clearance of 47 feet 3 inches for the center span and 46 ft. 9 inches clearance for the side spans. The plans call for a vertical clearance of 17.25 feet at mean low water and 10.25 feet at mean high water.

SANTA ROSA, Sonoma Co., Cal.—H. A. Richardson, Stewarts Point, Cal. at \$3,644 awarded contract by county supervisors to construct 153-ft. timber bridge near Stewarts Point.

SHASTA COUNTY, Cal.—Until July 8, 2 P. M., bids will be received by State Highway Commission to construct timber bridge across Seamans Gulch about 23 miles east of Redding, consisting of twenty-two 19-ft spans on frame bents with concrete pedestals.

SAN LUIS OBISPO COUNTY, Cal.
—L. C. Clark and C. E. Doughty, Visalia, at \$20,116 awarded contract by State Highway Commission to construct reinf. concrete girder bridge over San Marcos Creek about 7 miles north of Paso Robles, consisting of four 40-ft. spans on concrete bents and grading and paving approaches with Portland cement concrete. Unit bids published in issue of June 8.

SHASTA COUNTY, Calif.—As previously reported bids will be received July 8, 2 P. M., by State Highway Commission to construct timber bridge across Seaman's Gulch about 23 miles east of Redding, consisting of twenty-two 19-ft. spans on frame bents with concrete pedestals. Quantities involved follow:

- (1) 250 cu. yds. structure excav.;
- (2) 25 M. ft. b.m. redwood timber, select all-heart struc. grade;
- (3) 157 M. ft. b.m. Douglas fir timber, struc. grade;
- (4) 72 cu. yds. class B Portland cement concrete;
- (5) 188 cu. yds. class A Portland cement concrete (pavement);
- (6) 20,500 lbs. reinf. steel;
- (7) 1 lot misc. items of work.

SAN DIEGO, Cal.—Until June 29, 11 A. M., bids will be received by County Supervisors to construct a reinforced concrete pile bridge across the Escondido Creek on County Highway Commission Route 19, Division 1. Plans obtainable from Board of Supervisors upon payment of actual cost of same. Certified check of 5% required. Miss C. Buckley, clerk. Ernest Childs, county surveyor.

SACRAMENTO, Cal.—Until June 26, 1910 A. M., bids will be received by Harry Hall, county clerk, to construct a wooden bridge on Swanston Road over Chicken Ranch Slough. Certified check of 10% required, payable to the Chairman of the County Board of Supervisors. Plans and specifications obtainable from Chas. Deterding, Jr., county engineer.

CHICO, Butte Co., Cal.—In accordance with action of the Board of Supervisors, J. A. Baumgartner, county engineer, is preparing to obtain right-of-ways for a three mile road from the North Canal Road to the Bennett Ranch, north of Chico. Besides the constructing of the road there will be a 16-ft. bridge over Dog River Slough; 16-ft. truss bridge over Pine Creek; 16-ft. bridge over Big Slough.

SAN JOSE, Santa Clara Co., Cal.—Plans and specifications were ordered drawn by the City Council for a pedestrian subway under Park Ave. at Randol Ave. Plans for a similar subway on East Santa Clara Street in the vicinity of Horace Mann School will be ready for consideration in several weeks. W. L. Popp, city engineer.

DREDGING, HARBOR WORKS & EXCAVATIONS

STOCKTON, San Joaquin Co., Cal.—Bids for excavation of 1,500,000 cubic yards of dirt from the channel in the vicinity of Hog and Spud Islands will be called for within the next two weeks. Specifications are now in the hands of Federal engineers, according to Walter Coffey, city engineer.

STREET LIGHTING SYSTEMS

LOS ANGELES, Cal.—Until July 1, 10 A. M., bids will be received by the Board of Public Works for constructing an ornamental lighting system in Kenmore Avenue between Ambrose and Franklin Avenues, 1911 Act. Spec. and further information available from above.

MACHINERY AND EQUIPMENT

SAN FRANCISCO.—Kleiber Motor Co., 1480 Folsom Street, submitted the lowest bid to U. S. Forest Service to furnish and deliver two heavy duty stakeside trucks:

(1) 1½-ton truck \$1,777
(2) 2-ton truck \$2,597

Bids held under advisement.

CHOWCHILLA, Madera Co., Cal.—Until June 26, 8 P. M., bids will be received by Homer Probert, Clerk, Chowchilla Union High School District, to furnish:

One three-ton Moreland chassis (or equal) equipped with Gruss (or equal) air shocks, and four-wheel hydraulic brakes (or equal).

One forty-eight passenger school bus body. Bidders will submit their own specifications.

Further information obtainable from clerk.

PEARL HARBOR, T. H.—Following is a complete list of bids received by Bureau of Yards and Docks, Navy Dept., Washington, D. C., to furnish 30-ton revolving crane at the Naval Submarine Base, Pearl Harbor. Previous three low bidders reported in issue of June 11:

R. W. Kaltenbach Corp., Bedford, Ohio, \$25,323.

Industrial-Brown Heat Corp., Cleveland, Ohio, \$30,700.

American Hoist & Derrick Co., St. Paul, Minn., \$31,854.

Honolulu Iron Works Co., 165 Broadway, N. Y. City, \$31,951.

Orton Crane & Shovel Co., 608 S. Dearborn St., Chicago, \$32,210.

Heyl & Patterson, Inc., 51 Water St., Pittsburgh, Pa., \$32,400.

English Constr. Co., Washington, \$37,600.

Dravo Contracting Co., Pittsburgh, \$37,950.

Lakeside Bridge & Steel Co., Milwaukee, Wis., \$39,500.

John Hanson, P. O. Box 2041, Honolulu, \$29,500.

CALEXICO, Imperial Co., Cal.—Until June 26, 7:30 P. M., bids will be received by Calexico Union High School District to furnish one 250-mch wheel-base Mack coach chassis or equivalent also one 50 passenger Crown body or its equal. Bert Reddish, Secretary of District, will give further information.

BAKERSFIELD, Kern Co., Cal.—Until July 1, 7 P. M., bids will be received by C. E. Coleston, Clerk, Belridge School District, for the purchase of a school bus. Specifications obtainable from clerk.

SAN MATEO, San Mateo Co., Cal.—Recommendation for the installation of a generator and new boiler in the new east wing of the San Mateo Community Hospital was taken under consideration by the Board of Supervisors. The estimated cost is \$15,000.

PUGET SOUND, Wash.—Following three low bids received by Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6342 to furnish 250-ton stationary hammer-head crane electrically operated; 20-ton traveling tower crane having gasoline electric power; and 10-ton traveling gantry crane and traveling revolving jib having gasoline-electric power at the Navy Yard, Puget Sound, Wash.:

Lakeside Bridge & Steel Co., Milwaukee \$497,500
Heyl & Patterson, Pittsburgh, 592,000
Dravo Contracting Co., Pittsburgh 603,500

RAILROADS

SACRAMENTO, Sacramento County, Cal.—The Western Pacific Company will authorize within the next few days the expenditure of \$100,000 for construction of a spur track from the Sacramento Northern right-of-way at 194th and X Streets to the icing plant of the Consumers Ice Company.

FIRE EQUIPMENT

SANTA CLARA, Santa Clara Co., Calif.—American Manufacturing Company awarded contract to furnish 500 feet of 2½-in. fire hose by city council.

RESERVOIRS AND DAMS

PASADENA, Los Angeles Co., Cal.—State Engineer Edward Hyatt approves plans for the construction of the Pine Canyon Dam for the city of Pasadena. The dam will have a storage capacity of 40,000 acre feet and will cost \$5,777,000. It will be 302 ft. high from the foundation to the spillway and 325 ft. high from the foundation to the parapet wall. The dam will be 277 ft. thick at the bottom and 20 ft. wide at the top. There will be 450,000 cubic yards of concrete in the structure.

ALHAMBRA, Los Angeles Co., Cal.—Until A. M., June 30, bids will be received by the city commission to construct reinforced concrete reservoir of approximately 700,000 gallons capacity on a site on Dupuy Hill, located in the southwestern part of the city southeast Valley Blvd. and west of Fremont Ave. The proposed reservoir will be of what is known as the circular concrete ring-tension type, having a diameter of 72 ft. and a water depth of 23 ft. with 24-ft. walls. It will have a wood roof supported by reinforced

concrete columns with a composition covering and mission tile trim. The estimated cost is \$15,000. Plans and specifications may be seen at the office of the city clerk, R. E. Wallace, and at the office of T. E. Bowman, water superintendent, and may be obtained from the latter upon deposit of \$10. Certified check or bond, 10%.

PIPE LINES, WELLS, ETC.

PALO ALTO, Santa Clara Co., Cal.—Until June 26, 2:30 P. M., bids will be received by the Supervising Superintendent of Construction, U. S. Veterans Hospital, Palo Alto, for drilling, developing and test deep well at the Veterans' Hospital Pumping Site No. 4 at Palo Alto. Specifications and further information obtainable from above.

SAN FRANCISCO—Bids will be called within the next few months for the construction of the Alamo Pan Pipe Line in Alameda County in connection with the Hetch-Hetchy Water Supply project. The pipe line will be 30 to 35 miles in length with a capacity of 45,000,000 to 60,000,000 gallons daily, and 350 to 400 ft. pumping head. Plans are now being prepared for this work in the engineering department, city hall.

OAKLAND, Alameda Co., Cal.—Until June 22, 2:30 P. M., bids will be received by Board of Port Commission, 421 Oakland Bank Bldg., to install fire hose piping and domestic water piping in Warehouse "C" Outer Harbor Terminal. Plans and specifications available on deposit of \$5, from G. P. Hagarth, Secretary of Board. Certified check of 10% required with bid.

RIVERDALE, Fresno Co., Cal.—Instead of accepting the proposal of the Coleman Estate to furnish the Riverdale Irrigation District with water at a stated sum per acre foot, the irrigators of the district may decide to install a pumping system, according to the result of a discussion at a meeting of the district. Surveys are now being made.

WOODLAND, Yolo Co., Cal.—Considerable discussion will be given at the next meeting of the city council for drilling and boring new wells. New wells are badly needed to provide adequate water supply, and preliminary tests are to be made at the East Street Plant.

PALO ALTO, Santa Clara Co., Cal.—Until June 24, 2:30 P. M., bids will be received by U. S. Veterans' Hospital, Palo Alto, to drill, develop and test Deep Well at California Pumping Site No. 4. Previously reported to have been opened June 30. Specifications and further information obtainable from above.

OAKLAND, Alameda Co., Cal.—Plans and specifications are now being prepared by the Port Engineering Department for a proposed garbage disposal plant at Foot of Peralta Street Inner Harbor to take the place of the present pier at foot of 11th Street Outer Harbor Terminal.

SAN FRANCISCO—Until July 1, 2:30 P. M., bids will be received by J. J. Hester, secretary, Board of Public Works, to drill 2 to 12 wells at Piedmont, Calif., depending on depth of water table. Estimated cost, \$5,000. Specifications obtainable on deposit of \$10, returnable, at Room 701, 425 Mason St. City contracting for the deepening of two wells with the privilege of increasing to 12.

SAN FRANCISCO.—Until July 1, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to drill 2 to 6 wells, depending on depth of water table, at Pleasanton, Calif. Estimated cost, \$30,000. Plans obtainable on deposit of \$10 at Room 701, 425 Mason St. Quantities involved are:
1,800 lin. ft. sinking test bore;
180 lin. ft. 30-in. dia. conductor pipe;
1,800 lin. ft. reaming bore and 14-in. casing with gravel envelope;
6 installation test pumps;
288-hp. operating test pump.

SEWERS AND SEWAGE DISPOSAL PLANTS

BERKELEY. Alameda Co., Cal.—Following list of bids received by city council to furnish sewer pipe, f. o. b. Corp. Yard, Alston Way and West St., for fiscal year commencing July 1, 1931.
(1) carload lots; (2) less than carload: Gladding-McBean (1) 50%; (2) 50%, 2% off for cash.
California Pottery Co. (1) 50%; (2) 50%, 2% off for cash.
N. Clark & Son (1) 50%; (2) 50%, 2% off for cash.

WATER WORKS

SAN FRANCISCO.—Until June 29, 3 P. M., under Proposal No. 732, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver cast iron pipe for water department, as follows:

- (1) 10,000 ft. 4-in.,
 - (2) 50,000 ft. 6-in.,
 - (3) 40,000 ft. 8-in.,
 - (4) 5,000 ft. 12-in.
- Specifications obtainable from the above office.

VALLEJO. Solano Co., Calif.—Until June 20, 11 A. M., bids will be received by Alf. E. Edgcombe, city clerk, to furnish a quantity of 16-in., 20-in., and 24-in. bell and spigot cast iron water pipe, as follows:

- 1,776 ft. 20-in. cast iron pipe, class B or class 100;
- 6,778 ft. 24-in. do;
- 1,152 ft. 24-in. cast iron pipe class C or class 250 (alternate bid);
- 1 length of 16-in. cast iron pipe, class B or class 100;
- 70 fittings.

Certified check 10% payable to city required with bid. Further information obtainable from T. D. Kilkenny, city engineer.

OAKLAND. Cal.—Until July 8, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 515 16th St., to furnish and deliver approximately 175,000 ft. of cast iron pipe of 2-in., 4-in., 6-in. and 8-in. diameters. Specifications obtainable from above office.

CORNING. Tehama Co., Cal.—Lyon & Garrett Co., Red Bluff, at \$2875 awarded contract by city trustees to furnish and install Fairbanks-Morse deep well turbine pump, motor, 8-in. standard pipe, with wiring, fittings and equipment in connection with municipal water system. Complete list of bids published in issue of June 8.

SAN FRANCISCO.—Contract of the Consolidated Steel Company of Los Angeles, to fabricate steel pipe for the San Francisco Water Department has been turned over to the Western Pipe & Steel Co. The information came when the board was asked to approve of the transfer.

The contract is for fabricating pipe necessary to place a main from the University Mount reservoir to Twenty-fifth and Harrison Streets. Western

Pipe & Steel Company bid \$228,292.50 for the entire job and \$94,815 for the fabricating.

PLAYGROUNDS & PARKS

SAN RAFAEL. Marin Co., Cal.—Until June 26, 8 P. M., bids will be received by Oliver B. Hantwell, secretary, Board of Education, for improving high school grounds. Specifications obtainable from the secretary at the high school.

REDWOOD CITY. San Mateo Co., Cal.—The City Council will be asked to call a \$65,000 park bond election early in September. The request will be made by the Chamber of Commerce Committee, which, during the past year has been making a careful study of the need for more parks. The bond issue, if passed, would be used to purchase park and playground sites throughout the city.

REDWOOD CITY. San Mateo Co., Cal.—City Council unanimously approved a recommendation to call a \$65,000 bond election in September. The purpose of the election will be to purchase three additional park sites and for improving and equipping proposed new acquisition and seven other sites now available.

STREETS AND HIGHWAYS

SAN JOSE. Santa Clara Co., Cal.—City Council ordered plans and specifications prepared for the paving of Sixteenth Street, between Jackson and Taylor Sts. Wm. Popp, city engineer. Plans were also adopted for the installation of a sewer in 19th street, between Mission and Ross Streets.

SAN FRANCISCO.—Until June 22, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, under Proposal No. 729 to furnish ready mixed concrete, required during the fiscal year 1931-32. Specifications obtainable from above. Previously announced to be opened June 15.

SACRAMENTO. Sacramento Co., Cal.—The Western Pacific Company will authorize within the next few days the expenditure of \$100,000 for construction of a spur track from the Sacramento Northern right-of-way at 19th and X Streets to the icing plant of the Consumers Ice Company.

ALAMEDA. Alameda Co., Cal.—Following low bids submitted to the city council to furnish 1500 tons, more or less, of crushed rock; 1000 tons, more or less, screenings and 600 tons, more or less, Bird's eye screenings:

Oil—Healy-Moore Co., 344 High St., Oakland, \$3.25 per barrel
Bird's Eye Screenings—Pacific Coast Aggregates, \$1.44 per ton, not delivered; \$1.64 per ton delivered.
Rock—Cowell Bros., \$1.48 not delivered; \$1.58 delivered.

Plain Screenings—Cowell Bros., \$1.48 not delivered; \$1.58 delivered.
Bids held under advisement.

ALAMEDA. Alameda Co., Cal.—C. Moore at \$2.25 per barrel submitted only bid to the City Council to furnish 2000 barrels, more or less, "Calol L 2" road oil or equal and 2000 barrels, more or less, "Bitumex-65" or equal. Bids held under advisement.

COLUSA COUNTY. Cal.—Union Paving Company, Call Bldg., San Francisco, awarded contract at \$230,247 by State Highway Commission to grade and pave with Portland cement concrete 8.6 miles between Williams and Maxwell. Complete list of unit prices listed in June 16 issue.

BOULDER CITY. Nevada—Until June 30, 10 A. M., bids will be received at the office of the U. S. Reclamation Bureau, Las Vegas, for grading, paving, constructing curbs, gutters, sidewalks, sewer and water system for Boulder City, located about 25 miles southeast of Las Vegas. The work will involve the following quantities:

- 120,000 cu. yds. excav. common grading;
- 20,000 cu. yds. excav. rock, grading;
- 1000 cu. yds. excav. rock, in trenches;
- 20,000 sta. yds. overhead;
- 40,000 lin. ft. excav. and backfilling sewer trench, not more than 5 ft. deep;
- 17,500 lin. ft. excav. and backfilling sewer trench, more than 5 ft. and not more than 8 ft. deep;
- 1700 lin. ft. excav. and backfilling sewer trench, more than 8 ft. and not more than 12 ft. deep;
- 400 lin. feet excav. and backfilling sewer trench, more than 12 ft. deep;
- 20,000 lin. ft. laying 4-in. sewer pipe, fittings, and specials;
- 23,000 lin. ft. laying 6-in. sewer pipe, fittings and specials;
- 7200 lin. ft. laying 8-in. sewer pipe, fittings, and specials;
- 1700 lin. ft. laying 10-in. sewer pipe, fittings and specials;
- 7700 lin. ft. laying 12-in. sewer pipe, fittings and specials;
- 165 manholes, not more than 5 feet deep;
- 100 additional feet of depth, manholes over 5 ft. deep (at a price per ft.);
- 52,000 lin. ft. excav. and backfilling water pipe trench, not more than 4 ft. deep;
- 300 cu. yds. excav., common, and backfill of water pipe trench, quantities below the 4-ft. depth only;
- 2400 lin. ft. laying 2-in. cast iron pipe, valves, fittings and specials;
- 23,500 lin. ft. laying 6-in. cast iron pipe, fittings, valves and specials;
- 6,000 lin. ft. laying 8-in. cast iron pipe, fittings, valves and specials;
- 5200 lin. ft. laying 10-in. cast iron pipe, fittings, valves and specials;
- 2900 lin. ft. laying 12-in. cast iron pipe, fittings, valves and specials;
- 153 valve metre boxes, installing ¾-in. and 1-in. valve metre boxes and 1-in. valve metre boxes and connecting to water main;
- 470 curb stop, installing ¾-in. curb stop and connecting to water main;
- 10,000 lin. ft. laying and connecting ¾-in. to 1-in. copper service pipe from curb stop to buildings;
- 13 street washers, installing 1½-in. street washers and connecting to water main;
- 55 fire hydrants, installing 5-in. fire hydrant and connecting to water main;
- 34,000 lin. ft. class A and B curb and gutter, incl. excav.;
- 6000 sq. yds. class B curb, incl. excav.;
- 180,000 sq. ft. class A sidewalks, incl. excav.;
- 190,000 sq. ft. class B sidewalks, incl. excav.;
- 36,150 sq. yds. 2-course asphalt. concr. pavement, class I;
- 46,150 sq. yds. 2-course full penetration emulsified asphalt. pavement, class I;
- 13,550 sq. yds. one-course asphalt. concrete pavement, class II;
- 43,850 sq. yds. one-course full penetration emulsified asphalt. pavement, class II;
- 128,000 sq. yds. oil-treated gravel surfacing, class III;
- 11,000 sq. yds. hardpan or gravel surfacing, class IV;
- 22,000 sq. yds. parking area surfacing with materials furnished by the government;
- 22,000 sq. yds. parking area surfacing with material furnished by contractor.

MONTEREY, Monterey Co., Calif.—Clark & Henery, 553 Market St., San Francisco, awarded contract by city council to improve Teresa St. between Monroe and Harriet Sts., and between Clay and High Sts.

Unit bids as follows:

(1) 26,000 sq. ft. 4-in. asphalt concrete \$185.
(2) 7,150 sq. ft. concrete sidewalks, \$185.

(3) 1,350 lin. ft. concrete curbs and gutters, \$1.00 per lin. ft.
(4) 10 sidewalk crossings 12-ft. wide, \$16.00 each.

(5) 350 lin. ft. 4-in. house connection sewers, \$1.00 per lin. ft.

GLENDORA, Los Angeles Co., Cal.—Until June 23, 8 P. M., bids will be received by City Council to improve Michigan Avenue between Whitcomb Ave. and the north city boundary and portions of other streets, involving 1½ inch oil macadam pavement; 6-inch concrete pavement and incidental work. 1911 Act. A. E. DeMott, city engineer. Fred Long, city clerk.

NEVADA COUNTY, Cal.—Tiesthus Bros., Berkeley, at \$101,164 submitted low bid June 17 to State Highway Commission to surface with crusher run base and bituminous treated crushed gravel or stone (plant mix), 8.5 miles between Truckee and Hinton. Complete list of bids follow:
Tiesthus Bros., Berkeley.....\$101,164
F. W. Nighbert, Bakersfield.....122,235
A. Telchert & Son, Sacto.....139,147
Hemstreet & Bell, Marysville.....146,622
Granite Constr. Co., Watsonville.....147,235
Clark & Henery, S. F.....179,499
Valley Paving Co., Fresno.....199,529

COLUMBIA COUNTY, Cal.—Union Paving Co., Calif. Bldg., San Francisco, at \$124,606 submitted low bid June 17 to State Highway Commission to grade and pave with Portland cement concrete 4.1 miles between 4 miles south of Williams and Williams. Complete list of bids follow:
Union Paving Co., S. F.....\$124,606
C. W. Wood, Stockton.....125,845
N. M. Ball, Porterville.....127,600
Hanrahan Co., San Francisco.....135,673
M. J. Bevanda, Stockton.....138,496

TRINITY-SHASTA COUNTIES, Calif.—Heafey Moore Co., 344 High St., Oakland, at \$61,233 submitted low bid to State Highway Commission for bituminous treatment on 32.0 miles between Weaverline and Tower House. Only other bid submitted by George French Jr., Stockton, at \$61,579.

MONO COUNTY, Cal.—Basalt Rock Company, Napa, at \$24,364 awarded contract by State Highway Commission to treat with heavy fuel oil and cut-back asphalt as a dust palliative, 28.4 miles between Leevining and 2 miles west of Bridgeport.

MONO COUNTY, Cal.—Southwest Paving Co., Washington Bldg., Los Angeles, at \$84,619 submitted low bid June 17 to State Highway Commission to surface with crusher run base and bituminous treated crushed gravel or stone, 12.5 miles between Sonora Junction and 4 miles south of Coleville. Complete list of bids follow:
Southwest Paving Co., L. A.....\$ 84,619
Geo. Herz & Co., San Bernardino.....96,986
George Oswald, Los Angeles.....108,811
Clark & Henery, S. F.....111,840
F. W. Nighbert, Bakersfield.....115,374

R. J. Blanco.....178,675

SAN FRANCISCO—Until July 1, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to install sewers in Alemany Blvd., Section C, from San Jose to Palmetto. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall, on deposit of \$10, returnable. Estimated cost, \$2,700. Quantities involved are:
175 lin. ft. 18-in. V.C.P. sewer;
585 lin. ft. 12-in. do;
315 lin. ft. 8-in. do;
80 lin. ft. 6-in. V.C.P. side sewer;
6 18x6-in. Y branches;
19 12x6-in. Y branches;
13 8x6-in. Y branches;
5 brick manholes;
1 drop manhole.

RIVERSIDE, Riverside Co., Cal.—T. C. Jameson, chairman of the County Supervisors, has announced that \$75,000 additional to the \$250,000 fund tentatively allotted to the Pines-to-Palms highway has been appropriated by the U. S. Bureau of Public Roads. This \$250,000 will provide for the construction of 8.5 miles of the scenic drive. Included in the proposed plans are two concrete bridges to cost about \$20,000 additional, if funds are available.

SAN JOSE, Santa Clara Co., Cal.—Until June 29, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to oil and screen Hecker Highway in Supervisors District No. 1. Plans and specifications available from county clerk on deposit of \$1.00.

SAN JOSE, Santa Clara Co., Cal.—A. J. Raich awarded contract at \$6509 by County Supervisors for macadamizing Fruitvale Ave., from the Meridian Road to the San Jose-Los Gatos Highway.

FRESNO, Fresno Co., Cal.—Until June 26, 11 A. M., bids will be received by H. S. Foster, City Clerk, (111-D) to improve Coast Ave., bet. Olive Ave. and Elizabeth Ave., involving grading, cement concrete sidewalks, curbs and driveway approaches. 1911 Act.

Certified check 10% required, made payable to City of Fresno. Plans and further information available from H. S. Foster, City Clerk. J. L. Vincenz, City Engineer.

JEFFERSON COUNTY, Oregon—S. H. Newell & Co., 1254 Reed College Place, Portland, have been awarded the contract by the U. S. Bureau of Public Roads, Portland, at \$112,435.69 for grading 5.378 miles of the Santiam Highway. Project 23-E 1, located in Deschutes National Forest. Involving:
(1) 18 acres clearing;
(2) 40 acres grubbing;
(3) 267,300 cu. yds. excavation;
(4) 5378 miles finishing earth graded road;
(5) 2560 ft. culverts.

CALAVERAS COUNTY, Cal.—Until June 30, 3 P. M., bids will be received by R. E. Pierce, District Engineer, State Highway Commission, Room 502 State Office Building, Sacramento, to surface with bituminous treated crushed gravel or stone about two and eight-tenths (2.8) miles in length between 1.1 miles north of Calaveritas Creek and 1.1 miles south of Calaveritas Creek. Certified check of 10% required with bid. Specifications and plans obtainable from above.

SAN DIEGO COUNTY, Cal.—Until July 8, 2 P. M., bids will be received by State Highway Commission to furnish and apply heavy fuel oil on each side of existing pavement on 32.9 miles between La Mesa and La Posta Creek.

PLACER COUNTY, Cal.—Until July 8, 2 P. M., bids will be received by State Highway Commission to surface with bituminous treated crushed gravel or stone (plant mix), 9.1 miles between Colfax and Gold Run.

COLUMBIA COUNTY, Cal.—Until July 8, 2 P. M., bids will be received by State Highway Commission to surface with gravel 6.6 miles between 12 miles and 5 miles west of Williams.

NEVADA COUNTY, Cal.—Until July 8, 2 P. M., bids will be received by State Highway Commission for grading and surfacing with untreated crushed gravel or stone, 2.9 miles between westerly boundary and Toll House.

LASSEN COUNTY, Cal.—Until July 8, 2 P. M., bids will be received by State Highway Commission to improve 7.5 miles between Doyle and Long Valley Creek, 4.3 miles to be surfaced with selected material and 7.5 miles to be oiled.

SAN FRANCISCO—Until June 22, 11 A. M., bids will be received by the Constructing Quartermaster, Ft. Mason, for resurfacing roads and installing concrete curbs, etc., at National Cemetery in Presidio. Specifications obtainable from above.

MONO COUNTY, Cal.—Macco Const. Co., Clearwater, at \$235,997.29 awarded contract by State Highway Com-

mission to grade and surface with bituminous treated gravel or stone, 12.3 miles between Yerby and Casa Diablo Hot Springs. Unit bids published in issue of June 6.

GILROY, Santa Clara Co., Calif.—City council declares intention (7) to improve portions of 4th, 7th, Rosanna, Church, Railroad Sts., etc., involving: (1) 360,049 sq. ft. 5-in. asph. conc. pavement; (2) 48,814 sq. ft. 2-in. do surfacing; (3) 13,562 sq. ft. 2-in. do resurf.; (4) 35,580 sq. ft. Portland cem. conc. gutter; (5) 6,623 lin. ft. Portland cement concrete class A curb; (6) 3,204 lin. ft. Portland cement concrete class B curb; (7) 2,708 sq. ft. Portland cement concrete sidewalk; (8) 7,500 cu. yds. excavation; (9) 395 lin. ft. 6-inch storm water sewer; (10) 3,426.70 lin. ft. 8-in. do; (11) 466.59 lin. ft. 10-in. do; (12) 1,145 lin. ft. 15-in. do; (13) 15 catchbasins; (14) 20 manholes. 1911 Act. Bond Act 1915. Hearing June 22. E. F. Rogers, city clerk. R. W. Fisher, 74 N 1st St., San Jose, engineer.

SAN BERNARDINO COUNTY, Cal.—Griffith Company, Los Angeles Railway Bldg., Los Angeles, at \$99,112 awarded contract by State Highway Commission to grade and pave with asphalt concrete 2.2 miles through Up-land. Complete list of unit bids received on this project published in issue of June 8.

CALAVERAS COUNTY, Cal.—W. J. Schmidt, 79 Rock Lane, Berkeley, at \$17,065 awarded contract by State Highway Commission for surface treatment on 15.5 miles between Murphys and Big Trees. Unit bids received on this project published in issue of June 8.

MONTEREY COUNTY, Cal.—Granite Const. Co., Watsonville, at \$7,248 awarded contract by State Highway Commission to surface with oil treated gravel, 3.2 miles between Priest Valley School and the easterly boundary. Unit bids published in issue of June 5.

SAN BENITO-SANTA CLARA COS. Cal.—Granite Const. Co., Watsonville, at \$51,404 awarded contract by State Highway Commission to grade and surface with bituminous treated crushed gravel or stone, 4.7 miles between 2.2 miles north of Hollister and Pacheco Pass road. Unit bids published in issue of June 6.

LYON COUNTY, Nevada—Nevada Rock & Sand Co., Reno, Nev., at \$31,629.88 awarded contract by State Highway Commission to construct portion of state highway in Lyon County, between Wilson's and the Mouth of Wilson Canyon, a length of 11.2 miles. The work will consist of grading and construction of a concrete and steel bridge over the West Walker river together with the construction of minor structures.

WHITE PINE COUNTY, Nevada—Wheelwright Construction Co., Ogden, Utah, at \$93,139.51 awarded contract by State Highway Commission for gravel surfacing on 17.25 miles between Connor's Pass and Ely; engineer's estimate \$123,663.14.

CLARK COUNTY, Nevada—Nevada Rock & Sand Co., Reno, at \$17,914.64 awarded contract by State Highway Commission to furnish, heat and apply asphaltic fuel oil and mixing it with crushed rock or crushed gravel surface from Las Vegas to 13 miles southeast, 10.18 miles in length.

SAN BENITO-MONTEREY-SAN LUIS OBISPO AND SANTA BARBARA COUNTIES, Calif.—McEverlast, Inc., 111 W 7th St., Los Angeles, at \$1,525.56 submitted low bid to L. H. Gibson, district engineer, State Highway Commission, San Luis Obispo, for painting traffic stripes for designating traffic lanes on 254.26 miles in the above counties between the northerly boundary of San Benito County and the southerly boundary of Santa Barbara County and between San Juan Bautista and Hollister in San Benito County. Essick & Co., Los Angeles, next low bidder at \$1,975.60.

SAN JOAQUIN COUNTY, Cal.—Until June 25, 2 P. M., bids will be received by R. E. Pierce, division engineer, State Highway Commission, 502 State office Bldg., Sacramento, to grade and pave with Portland cement concrete, 0.3 miles at Ripon. See call for bids under official proposal section in this issue.

SONOMA, Sonoma Co., Cal.—Peres & Gatto, Richmond, awarded contract by city trustees for asphaltic oil surfacing on six miles of streets, involving:

- (6) 60 barrels light oil;
- (1) 20 tons heavy oil;
- (2) 150 tons rock;
- (1) 100 tons screenings.

PALO ALTO, Santa Clara Co., Cal.—City council declares intention (986) to improve portions of Amherst and Cedar Sts., Channing, Grant, Harker and Hopkins Avenues, Marlowe St., Palo Alto Ave., Pine St., and Ruthven Ave., involving construction of vit. san. sewer mains; brick manholes; copper pipe water service connections; concrete storm sewer pipe; catchbasins; Armo pipe culverts; curbs; walks, etc. 1911 Act. Hearing June 29. E. L. Beach, city clerk. J. F. Byxbee, city engineer.

SAN LUIS OBISPO COUNTY, Cal.—Cook & Clark, Santa Barbara, at \$2,13 per barrel at \$6,637.15 awarded contract by State Highway Commission to treat with heavy fuel oil on each side of the existing pavement, 9.1 miles between Atascadero and Paso Robles. Project involves 4655 barrels heavy fuel oil in place.

GRASS VALLEY, Nevada Co., Cal.—Plans submitted to the City Council by City Engineer E. C. Uren for the proposed sewer line down Kelsey Ravine, between Orchard Street and Nivens Alley. According to the Council immediate action will be taken.

LINCOLN COUNTY, Oregon—E. C. Hillard, Medford, Oregon, was awarded contract by the U. S. Bureau of Public Roads, Portland, at \$81,835 to construct or improve the Alsea Highway Reconstruction Project, 6-D2, E2, National Forest Road Project, located

within the Shuslaw National Forest, County of Lincoln, State of Oregon. The length of the project to be constructed or improved is approximately 6.356 miles and the principal items of work are approximately as follows:

- (1) clearing, 26 acres;
- (2) grubbing, 9 acres;
- (3) unclass. excav., 149,500 cu. yds.;
- (4) overhaul, 100,000 ½ mi. yds.;
- (5) sub-base, 3500 cu. yds.;
- (6) finishing, 6.4 miles;
- (7) Class A concrete, 10 cu. yds.;
- (8) culverts, 1600 lin. ft.;
- (9) hand-laid riprap, 1500 cu. yds.;
- (10) porous tile underdrain, 1000 lin. ft.

SACRAMENTO, Cal.—E. F. Hillard, 1555 43rd St., Sacramento, at \$11,932.90 submitted lowest bid to County Supervisors for resurfacing Manzanita Ave. with asphaltic macadam from Fair Oaks Blvd. northerly to Madison Ave. Est. cost, \$7000.

Following is a complete list of bids: E. F. Hillard \$11,932.90
A. Telchert & Son 11,415.24
J. R. Reeves 12,559.86
Bids held under advisement.

SACRAMENTO, Cal.—A. Telchert & Son, 1846 37th St., Sacramento, at \$15,590.10 submitted lowest bid to County Supervisors (1621) to improve North B Street, involving grading, asphalt macadam pavement, consisting of 5-in. crushed rock base course with 2-in. asphaltic macadam surface. Work under County Improvement Act 1921. Following is a complete list of bids received: A. Telchert & Son, Sacramento, \$15,590.10
E. F. Hillard, Sacramento, 16,390
J. R. Reeves, Sacramento, 17,181
Bids held under advisement.

SACRAMENTO, Cal.—P. F. Bender, 1012 Del Paso Blvd., Sacramento, at \$597.77 submitted lowest bid to County Supervisors to construct reinforced concrete culverts in Madison Avenue. Est. cost \$880. Following is complete list of bids received: P. F. Bender, \$597; Stangler & Edger, \$613; J. Downar, \$616; Henry Finnigan, \$623; Gene Kenyon, \$643; D. McQuaid, \$652; C. Hunt, \$662; Yolo & Dauger, \$691; Holdener Constr. Co., \$707; Mayhew, \$716; George Hudnutt, \$867.

Bids held under advisement.

STOCKTON, San Joaquin Co., Cal.—Pereira & Reed, Stockton, at \$392.15 awarded contract by County Supervisors to improve Holt Road from Holt to the McDonald Island Road in Road District No. 1. Other bidders were: George French Jr., \$11,077; Moreing Bros., \$9917.50 and Willard & Biasotti, \$9258.

SAN JOSE, Santa Clara Co., Cal.—J. H. Grimby at \$6590 submitted only bid to County Supervisors for macadamizing Fruitvale Ave. from Meri-

NEVADA COUNTY, Calif.—As previously reported bids will be received July 8, 2 P. M., by State Highway Commission for grading and surfacing with untreated crushed gravel or stone 2.9 miles between Western boundary and toll house. Quantities involved follow:

- (1) 20 acres clear and grub right of way;
- (2) 75,000 cu. yds. roadway excavation without classification;
- (3) 163,000 sta. yds. overhaul;
- (4) 2000 cu. yds. struc. excav.;
- (5) 5300 cu. yds. crusher run base;
- (6) 100 cu. yds. untreated crushed gravel or stone surf.;
- (7) 130 cu. yds. class A Portland cement concrete (struc.);
- (8) 15 cu. yds. class B do.;
- (9) 13,000 lbs. bar reinf. steel (struc.);
- (10) 100 lin. ft. 8-in. corr. metal pipe;
- (11) 134 lin. ft. 12-in. do.;
- (12) 1102 lin. ft. 18-in. corr. metal pipe;
- (13) 330 lin. ft. 24-in. do.;
- (14) 48 lin. ft. 36-in. do.;
- (15) 70 lin. ft. 12-in. corr. metal pipe (siphon);
- (16) 8 lin. ft. 48-in. do.;
- (17) 86 lin. ft. 60-in. do.;
- (18) 200 lin. ft. 8-in. perforate metal pipe under drains;
- (19) 18 lin. ft. corr. metal pipe (clean and relay);
- (20) 8 lin. ft. 6-in. wrought iron pipe;
- (21) 24 lin. ft. 3-in. do.;
- (22) 20 cu. yds. dry rubble wall;
- (23) 350 cu. yds. light riprap;
- (24) 6.0 miles new property fence;
- (25) 15 each new fence gates;
- (26) 20 M. ft. b.m. redwood timber dense select all-heart struc. grade;
- (27) 32 M. ft. b.m. redwood timber select all-heart struc. grade;
- (28) 420 M. gals. water applied to base and surface;
- (29) 151 stations finish roadway;
- (30) 23 each monuments.

The State will furnish corrugated metal pipe, Dayton couplers, manhole covers and frames, and gate valves.

PLACER COUNTY, Calif.—As previously reported, bids will be received July 8, 2 P. M., by State Highway Commission to surface with bituminous treated crushed gravel or stone (plant mix) 9.1 miles between Colfax and Gold Run. Quantities involved follow:

- (1) 32,000 tons crusher run base;
- (2) 17,500 tons bit. treated crushed gravel or stone surf. (plant mix);
- (3) 960 M. gals. water applied to sub-grade;
- (4) 700 bbls. light fuel oil;
- (5) 15 cu. yds. structure excav.;
- (6) 6 lin. ft. 18-in. corr. metal pipe;
- (7) 6 lin. ft. 24-in. do.;
- (8) 80 lin. ft. corr. metal pipe (clean and relay);
- (9) 4 each, move and reset conc. head-walls.

The State will furnish corrugated metal pipe.

TEHAMA COUNTY, Cal.—Until July 9, 3 P. M., bids will be received by C. H. Sweetser, District Engineer, 461 Market St., San Francisco, to grade Section B, Deer Creek National Forest, Tehama County, about 3.66 miles in length involving:

- (1) 23.5 acres clearing;
- (2) 84,800 cu. yds. unclass. excavations;
- (3) 851 cu. yds. unclass. excav. for structures;
- (4) 52,000 sta. yds. overhaul;
- (5) 3,632 miles finish earth graded road;
- (6) 162 cu. yds. class "A" concrete;
- (7) 12,900 lbs. reinforcing steel;
- (8) 1282 lin. ft. corrugated metal pipe;
- (9) 36 each right-of-way monuments;

- (10) 6 each log truss spans;
- (11) 4134 sq. ft. crib face in place;
- (12) 295 cu. yds. hand placed rock fill for log cribs;
- (13) 301 sq. ft. log, wyeing surface.

Specifications and plans obtainable from above at cost of \$20, returnable.

Certified check of 5% required.

TEHAMA COUNTY, Cal.—Until July 9, 2 P. M., bids will be received by C. H. Sweetser, District Engineer, 461 Market St., San Francisco, to grade Section A, Route 78, Morgan Summit-Morgan Springs National Forest Highway, Lassen National Forest, Tehama County, about 3.17 miles in length, involving:

- (1) 26 acres clearing;
- (2) 85,200 cu. yds. unclass. excav.;
- (3) 555 cu. yds. unclass. excav. for structures;
- (4) 71,500 sta. yds. overhaul;
- (5) 17,757 miles finish earth-graded road;
- (6) 130 cu. yds. class "A" concrete;
- (7) 23 cu. yds. class "B" concrete;
- (8) 12,809 lbs. reinforcing steel;
- (9) 1834 lin. ft. corr. metal pipe;
- (10) 84 each right-of-way monuments;
- (11) 1000 lin. ft. moving and resetting rail;

Plans and specifications obtainable from above at cost of \$10, returnable. Certified check of 5% required with bid.

"Finally the architectural profession seems to be coming to an appreciation of the necessity of tearing away the veil of exclusiveness which has heretofore more or less hidden its part in the general construction scheme and acquainting the public with its usefulness," says Building Economy. A very commendable decision.

Continuing the publication says: "By the average home builder the architect has long been regarded as a luxury, more or less unnecessary and utterly expensive. Neither his value nor his duties have been adequately understood. And that has been largely the architect's fault."

"He left it to the various material associations to introduce architecture of a sort into the small home field and although they were educating the public at large to the eventual benefit of the architect, some railed at these purveyors of stock house plans."

"Today the field is ripe for the planting of the architectural idea. The stock plan has played an important part in bringing this situation about. A greater percentage of prospective builders than perhaps ever before want real architecture in their homes."

"But the architect must sell more than merely the prospect of an appealing home. He must be a structural type and mechanically well fixated."

"He must impress the prospective building public with the certainty that his employment will insure the use of standard, proved materials which will afford the maximum of service and durability."

"He must constitute himself a protector of the public against the sham and misrepresentation and reception in building materials, synthetic and otherwise, which has brought so many home builders to grief in recent years. He must be both mentor and guide."

"He must guarantee more than merely a pleasing design and the seeing that it is built, not botched in the building."

"The architect and the engineer are very much in the same position in relation to the public. Their responsibility may be better described than Thaddeus Merriman did it in a recent issue of *Civil Engineering*, addressing the engineering profession, but it is doubtful Merriman said:

"The worst lawyer is an officer of the court, so every engineer represents the people. The interests of his im-

mediate client must always be subservient to the public safety. The duty of the engineer is fourfold: he owes responsibility to the people; loyalty to his client; honesty to himself and duty to his profession. These are the commandments which logic lays down for the engineer to follow in his every day relationships. These the student must learn, for they go beyond the logic of science into the realm of the logic of life."

"While the architect adopts these principles and puts them into such general practice that the public becomes impressed not only with his artistry but his sincerity, then will building better homes in America become something more than a convenient catch phrase."

Reports from district managers of the Bureau of Foreign and Domestic Commerce, located in principal cities of the United States, reveal a growing demand for the new type of standard "Light Frame House Construction," prepared jointly by the Federal Board for Vocational Education and the National Committee on Wood Utilization of the Department of Commerce. Although the publication has been out only short time, the total supply of 15,000 copies is completely exhausted and the government printing office is rushing through a second printing order. Wholesale and retail lumber dealers have been enthusiastic in their reception of the material and have purchased it in quantity lots for distribution among their carpenter contacts. In a number of instances schools are using the publication as a textbook.

The general contractor will protest the action of material dealers in encouraging incompetent general contractors by the extension of credit, but some general contractors so protesting are encouraging the continued operations of incompetent sub-contractors by calling them in the hiding in competition with competent sub-contractors. The competent general contractor further encourages the incompetent general contractor who is often brought into direct competition with himself by patronizing a bonding company which will write a bond for anyone. When we are prone to criticize the actions of others it is well to consider first that our own house is in order, for indulging in unethical or unfair methods can very well prove a two-edged sword and bring about a condition in an allied trade which shortly works about to bring disaster upon our own trade. The operations of incompetents and the control of the problem is 90 per cent within the hands of the building industry itself, general contractor, architect, material dealer, sub-contractor and surety bonding company. It can be done and will be done eventually. But, general support from the trade as a whole is essential—a support that reaches every cog in the wheel of the construction business. Without such support and effort hosts of incompetents will continue to invade the field with disastrous results, for as soon as one dies off, under present conditions there are two or three taking his place.—(Journal of Commerce).

The home construction division of Sears, Roebuck & Co. expects to build 2500 new homes and employ over 80,000 building trades workers during 1931, according to Harvey L. Harris, general manager of the division. The 1930 construction program, following the inauguration of the year-in-stallment mortgage financing plan and supervised construction, used six million man-hours of labor. Operations for the first four months of 1931

F. F. Burrows, 1125 Laguna St.,
Burlingame; contractor, G. W.
Williams Co., Crawford Bldg., Bur-
lingame.

BUILDING PERMITS

REDWOOD CITY

ADD to dwelling, \$2000; No. 330 Myrtle
St., Redwood City; owner, Marie
E. Bement; contractor, E. A.
Florence, 229 Hillview St., Red-
wood City.
DWELLING, frame, \$1000; No. 424 E.
Brewster Ave., Redwood City;
owner, Mrs. Elizabeth Smith, 271
Baldwin Ave., San Mateo; con-
tractor, C. Archibald, 911 Arguello
Blvd., Redwood City.
STORE building, one-story reinforced
concrete, \$4000; No. 733-35 El
Camino Real, Redwood City; own-
er and contractor, D. Houle, 162
Grand St., Redwood City.
DWELLING and garage, frame, \$4000;
No. 1141 Fay St., Redwood City;
owner and contractor, Ivan D.
Peterson, 832 Pepper Ave., Bur-
lingame.

BUILDING PERMITS

STOCKTON

BARN, horse, \$2000; County Fair
Grounds, Stockton; owner, San
Joquin County Fair Assn.; con-
tractor, Lewis & Green, Bank of
Italy Bldg., Stockton.
RESIDENCE, brick veneer, one and
one-half-story, \$5700; No. 1965 N-
Yosemite St., Stockton; owner, L.
Lagle, 1605 N-Yosemite St., Stock-
ton; contractor, E. Merle, More-
ings Lane, Stockton.
ADD to dwelling, \$1000; No. 450 S-
Central Ave., Stockton; owner, J.
M. McDonald, Premises; contrac-
tor, Wm. J. Scott, 1661 W-Poplar
St., Stockton.

DWELLING, rustic 5-room and gar-
age, \$2500; No. 1370 N-Orange
St., Stockton; owner and builder,
Robert Wagner, Bank of Italy
Bldg., Stockton.

DWELLING, 2-story 6-room and gar-
age, \$2000; No. 1340 N-Elbow
St., Stockton; owner and builder,
Anton Larson, 123 W-Maple St.,
Stockton.

BARN, hog, \$9000; County Fair
Grounds, Stockton; owner, County
Fair Association; contractor, Carl
Nelson, 1421 E-Channel St.,
Stockton.

DWELLING, brick veneer, 6-room
and garage, \$4500; No. 1911 North
Commerce St., Stockton; owner,
Silvio Moranco, contractor, C. H.
Haton, 1014 N-Wilson Way, Stock-
ton.

WILL YOU BE WITHIN THE LAW?

The Legislature of 1931 adopted numerous amendments to the Contractors License Law of 1929 and these amendments have been approved by the Governor and are now in effect.

Under the amended law, it is mandatory upon the Registrar of Contractors to require applicants for licensing to comply with certain provisions, namely:

1. The filing of a new and complete application on an official form approved by the Registrar.
 2. The application form should contain, in addition to the names and addresses of the personnel of the firm, such further information as the Registrar shall require in determining the applicant's fitness to be licensed as a contractor.
 3. The application must be accompanied by a fee of \$10.00 in the form of money order, certified or cashier's check.
 4. The application must be received in Sacramento prior to July 30, 1931, or there is added an additional penalty of \$10.00, making the fee \$20.00 subsequent to that date.
- Under the amended law, the Registrar has within his discretion the right to refuse to grant a license to any contractor until fully satisfied of the proper qualifications of the applicant. The first step in this qualification means the complete execution of the application form which has been sent to all contractors holding a 1930-1931 license and its prompt return to the office of the Registrar.

TOLL BRIDGE GOES INTO RECEIVERSHIP

Because of default in the payment of interest on its \$1,300,000 25-year 7 per cent debenture bonds, the Mount Hope Bridge Co., owner of the Mount Hope toll bridge, spanning the Mount Mount Hope and Narragansett Bay, R. I., has gone into receivership, Engineering News-Record reports.

The superior court in Providence on June 2 named R. F. Haffenreffer, of Bristol and Fall River, temporary receiver.

The bridge was opened on October 24, 1929, after it had been dismantled and rebuilt because of breaks in the wires in the main cable.

The capitalization of the bridge company consists of \$2,850,000 first mortgage bonds, bearing interest at 6 1/2 per cent, \$1,300,000 25-year 7 per cent debenture bonds, \$100,000 7 per cent cumulative preferred stock and \$50,000 shares of common stock, no par value.

Roy W. Carlson, for four years testing engineer for the Los Angeles County Flood Control District, has been selected as engineer in charge of all tests of concrete on the Hoover Dam project by the U. S. Reclamation Bureau.

Outdoor Advertising Regulated In Maryland

The state of Maryland recently put into effect a law imposing the most stringent regulations on outdoor advertising ever enacted, according to The Business Week. Similar laws are being formulated in 21 other states.

But what appears as a blow to the \$75,000,000 outdoor advertising industry may prove a blessing in disguise. The Maryland law, for instance, eliminates "snipe" signs, scattered indiscriminately over the country and bringing the property owner no compensation. Reducing the number of these signs would tend to emphasize those left, make advertisers willing to pay more for them.

The outdoor advertising industry already is confronted with some form of regulation in every state except Wyoming. In most cases, these regulations are purely nominal and do not tend to suppress the industry.

Regarded by anti-billboard factions as a model law, the Maryland regulation provides: That every individual sign shall be taxed at the rate of 2 1/2¢ a square foot a year; that all companies maintaining more than 50 signs in the state must pay a license fee of \$200 annually; and that the State Highway Commission shall have the right to remove from locations within 50 feet of highways all signs that endanger the traveling public. Furthermore, advertisers are made responsible for illegally placed signs devoted to the merits of their products or services. This applies to signs placed on property without the owner's consent—snipe signs in advertising vernacular.

HONORABLE MENTION FOR QUANTITY SURVEY

Quantity Surveys submitted by H. A. Hoyt, secretary and treasurer of The Milton Company, general building contractors of Palo Alto, were awarded honorable mention at the 6th Annual Convention of the American Institute of Quantity Surveyors held in Cincinnati last May.

Hoyt was advised yesterday of the award by F. E. Dischner, secretary of the Institute, who urges that he prepare for the competition to be held at the next convention in Chicago in September, 1932.

"The point that pleased me personally," says Hoyt, "was that my exhibits of quantity surveys and take-offs were on a general contract including all branches of a complete bid for a building, while most of the other mentions and awards were on some single trade alone. The surveys submitted were taken from my regular files covering current work. I had no intention to prepare them for a prize exhibit but submitted them for their own merit."

Hoyt was the only Pacific Coast contributor to the competition.

ARIZONA TO LICENSE CONTRACTORS JULY 1

After July 1 next all contractors operating in Arizona must have a state license under a law enacted at the recent session of the Legislature. The bill requiring registration of contractors, known as House Bill No. 64, creates the office of Registrar, which has just been filled by Governor Hunt, who appointed B. L. Hammock of Miami to the position. His term of office will correspond with that of the governor. The Registrar will have quarters in the office of the labor department of the Arizona Industrial Commission at Phoenix.

The new law is similar to the California statute providing for registration of contractors. Under the statute all contractors in the state not specifically exempted will be required to take out licenses. The license period corresponds to the fiscal year, July 1 to June 30. Under the law, all contractors in the state, subject to its provisions, must have a state license to do business after July 1, 1931.

The license fee for contractors is fixed at \$25 and \$10 each year for renewal.

Operating without a license is punishable by a fine of \$500 or six months in prison, or both. The registrar is empowered to cancel licenses for the following causes: (1) Failure to complete a contract; (2) Fraud; (3) Embezzlement; (4) Disregard of any building code or safety laws or the labor laws of the state.

FINANCING OF HOMES DURING PAST YEAR

California building and loan associations made loans for the refinancing or construction of more than 30,000 homes, during the past twelve months, according to C. H. Wade, newly elected president of the California Building-Loan League. Figuring an average of four persons to a home, this financing assisted 120,000 people to live in their own dwellings. The total amount loaned approximated \$90,000,000, Mr. Wade reports.

The largest proportion of these loans were made on single family dwellings on a monthly repayment basis. This plan not only gives the association a constant inflow of funds but gives to the borrower the opportunity to pay for his home gradually, out of income.

More than 700,000 homes were financed by the 13,000 building and loan associations of the nation, during the past twelve months period, states Mr. Wade. These institutions now have more than eight billion dollars loaned on improved real estate, representing the savings of 12,000,000, or 10 per cent, of the population of the country.

Henry J. Schmidt, 1121 Ward St., Berkeley, passed away June 14 in Oakland, where he had been ill for a week. He was a builder and contractor for many years.

BASIC PRINCIPLES OF CONCRETE MAKING COORDINATED

By JOSEPH A. KITTS,
Consulting Concrete Technologist, San Francisco

4A. The Coordinated Method of Proportioning

Preliminary to the production of concrete at a central plant, or on a major project, the concrete technologist must test the physical qualities of the materials to be used and basic concrete mixtures of concrete in order to establish the constants for the four laws of mixtures presented in Part 3. This preliminary testing or research procedure will be presented in Part 5.

Let it be assumed that the preliminary tests have been made and that we have established criteria for the cement and water contents, fineness moduli, and yield of combinations, as given hereunder. We may then proceed with the calculation of proportions of mixtures, based on the given criteria, and such mixtures may be used, in turn, for the determination of new criteria for a new set of conditions, employing the research procedure to be given in Part 5.

Notation.

The notation used herein applies only to the particular subject and does not have the same meaning throughout.

In this connection, it should be appreciated that the physico-mathematics of concrete materials and mixtures is in process of evolution and a proper notation is one of the difficult projects confronting the worker in concrete research and one which requires the coordinated effort of the various agencies concerned.

Criteria of Mixtures.

The following criteria of normal portland cement content, water content and fineness moduli of mixed aggregate, are based on the data contained in "Design and Control of Concrete Mixtures," second Edition, published by Portland Cement Association under date of January, 1927. The values are very conservative for the new standards of cement quality, and for the coordinated processes of proportioning and technological control of production presented herein. They were, however, well founded bases of preliminary test mixtures for the determination of new constants for a given set of materials and conditions.

Cement Content for Skilled Control.

The constants A and B, in the law of the cement content equation,

$\log C = BK_1 + A$ (Kitts) (1)
(in which C is properly taken as the proportion of cement by absolute volume in a unit volume of cured concrete) are given in Table I for various maximum sizes of aggregate and slumps, and for the determination of C in pounds per cubic yard of concrete as a measure of practical convenience.

In determining the absolute volume of cement in pounds, it will be sufficiently accurate to consider 1 sack of standard portland cement, (94 lbs.) as 0.455 cu. ft. absolute volume, or, 154 pounds of cement as 1 cu. ft. by absolute volume.

Cement Content for Ordinary Control. Where the water-cement ratio is indifferently controlled, and where only rough methods are used for determining quantities of materials, the cement contents as determined by Table I must be increased by the percentages given in Table II.

Water Content for Skilled Control

The constants F and G, in the equation,
 $W = FC(G - \log K_2)$, (Abrams) (2)
expressing the law of the water-cement ratio for any strength, should be determined by preliminary tests

(Copyright, 1931, by Joseph A. Kitts. Reprints may be made on condition that due credit be given the author and publication.)

of the given materials, simulating, as nearly as possible, the conditions of control which will obtain on the job. Under various conditions of material quality and proportioning and control methods, G varies from 3.5 to 4.5 and F from 0.01 to 0.02. The strength obtained with a given water-cement ratio increases with the quality of cement and aggregate, with the accuracy and efficiency of the measuring, mixing, placing and curing equipment, and particularly with the skill of technological control.

The equation of the water content for average conditions of aggregate and cement quality, where the water-cement ratio is carefully controlled by accurate measurement of quantities of water, cement and aggregate, and proper correction is made for water content and absorption of the aggregate, (a modified expression of the Abrams law), is

$W = 0.025 C (4.1413 - \log K_2)$ (2')
in which W is the cubic feet of mixing water per cubic yard of concrete, C is the pounds of cement per cubic yard as determined from Table I, and K_2 is the compressive strength required at 28 days.

Water Content for Ordinary Control. Where the water-cement ratio is indifferently controlled, and where only rough methods are used for determining and measuring quantities of materials, the water-content equation for average quality materials is

$W = 0.025 C (4.1413 - \log K_2)$ (2'')
in which C is the cement content, as determined by Table I with a percentage increment (in lieu of skilled control) as given in Table II.

Aggregate Content.

Having determined the required contents of cement and of water in the mix, there remains only the content of aggregate, which is determined by the modified Fuller equation

$$A_v = (K_3/K_2) - (C_1 + W_1) \quad (3)$$

in which A_v , C_1 and W_1 are the absolute volumes of aggregate, cement and water, respectively, in a required volume, K_2 of set concrete; and K_3 is the yield of the absolute volumes of aggregate, cement and water, or, the ratio of the volume of set concrete to the sum of the absolute volumes of ingredients, as expressed by Equation (4).

The exact value of the yield depends upon the volume of entrapped air and the amount of cement absorbed by the mixing water, which, in turn, depends somewhat on the dryness or wetness of the mix, the leanness or richness of the mix, the fineness or coarseness of grading of the aggregate and the content of voids. The yield should be determined by test of the particular mix, as will be given in Part 5.

Practical values of the yield for usual fluid mixtures are approximately as given in Table III, based on the cement content of the mix. The volume of water considered should be the total water in the mix minus the water absorbed by aggregate and admixture.

This table will generally be correct within one half of one percent of error for the usual range of plastic and fluid mixtures, provided other values are determined and measurements are made with equal accuracy and are properly taken into consideration.

The Optimum Fineness Modulus for the Aggregate Mixture.

The fineness modulus of an aggregate is the sum of the absolute volume proportions coarser than each of the standard square hole sieve openings, 6", 3", 1½", ¾", ½", ¼", etc., or of round hole openings whose dimensions are 1½ times the standard square hole dimensions viz., 7.5", 3.75", etc. It is a logarithmic function of the average diameter of particles and, likewise, of the average surface area of particles. It is an essential physical measure easily determined and of important utility, as will be shown.

For any given maximum size of aggregate, there is an optimum fineness modulus of uniform grading corresponding to an optimum cement content, requiring a particular water-cement ratio for a specified strength and slump. The equation of the optimum fineness modulus for gravel aggregates is

$f.m. = 1.07 (\log C - E)$ (Kitts) (3a')
in which E is a minus quantity and varies as the logarithm of the maximum size of the aggregate as given in Table IV.

The optimum fineness modulus is that degree of coarseness of aggregate grading from fine to coarse which gives the optimum combination of strength, density, cement economy, and of workability, flowability and cohesion of the fresh mix. A higher fineness modulus may be used with less of cement and of water, for the specified strength and slump, but at the sacrifice of a measure of the workability, flowability and cohesion of the fresh mix; and, vice versa. It is, therefore, an essential supplement of the water-cement ratio law. It will be observed that, as the cement is increased, the fineness modulus and the voids in the aggregate are increased, and vice versa. Accordingly, the optimum fineness modulus, for the determined cement content, is that degree of coarseness, of a reasonably uniform grading of particles from fine to coarse, which produces the optimum ratio of cement to voids in the mixed aggregate, and of mortar to voids in the coarse aggregate, for a specified strength and slump, and thus, comprehends the fundamentals of the voids theories.

It can be seen from the equation of the optimum fineness modulus that increase of cement content is accompanied by increase of fineness modulus, which, in turn, means decrease of sand content as in the Fuller method of deducting a weight of sand from the theoretical grading, equal to the weight of cement added. Likewise, increase of cement to sand ratio is accompanied by increase of strength in accordance with the Thatcher Law. Similarly, the optimum density and the optimum ratio of cement to space occupied is maintained. Thus the fundamental effects of density and mortar-voids ratios are coordinated with the various laws of mixtures previously mentioned, excepting the grading of three or more aggregates.

Proportioning Two Aggregates

Determination of the fineness of a mixture from the respective proportions and fineness moduli of two aggregates, and likewise, determination of the proportions of two aggregates for a mixture of a given fineness modulus, are merely problems of simple proportion: If
 $p =$ the proportion (by absolute volume) of fine aggregate in the mix,

Table 1 Cement Content For Rigid Control By Absolute Volume

Constants for Determining Pounds of Normal Standard Portland Cement per Cubic Yard of Concrete for any Compressive Strength (at 28 days) for Given Slumps and Maximum Sizes of Aggregates, Employing the Equation, $\text{Log } C = BK + A$, and Based on the Water Content Equation, $W = .0125 C (4.14613 - \log K)$

(For average commercial gravel aggregates of standard quality.)

		Maximum Size of Aggregate

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 67 Post Street, San Francisco. (Phone Sutter 1684).

W-2751-S ENGINEER, technical graduate, American, with good experience in rock drilling and rock excavation, preferably on heavy construction work, and also having had experience or having ability and personality for selling. Apply by letter. Location, East.

W-2225 PROFESSOR OF CIVIL ENGINEERING, proficient in matters relating to water supply and sewerage and particularly in the treatment of sewage; should have acquired a reputation as one who can speak authoritatively on the subject. Preferably be about 40 and must be full member of the American Society of Civil Engineers. Candidate must have had some teaching experience and must show that he has been active in the discussion of professional topics. Salary about \$6000 a year with opportunity to do private consulting work. Apply by letter. Location, East.

W-2836-C-S (K-268) MECHANICAL ENGINEER, thoroughly trained in design of rotary rigs, with long experience in pipe and shopwork, wanted by European oil well supply works. In reply give information concerning personal history, education and experience; send kodak picture of yourself; state salary expected and date available. Location, Germany.

R-3587-S STRUCTURAL DRAFTSMAN, preferably college graduate very familiar with building details and capable of designing as well as making own drawings. Salary \$250-275 month. Location, San Francisco.

W-2783-C-S (K-362) MEN in all parts of the country with both electrical and mechanical engineering background to handle sales of Photo Electric Control Units on a liberal commission basis. These units have a wide industrial application and the field for light-sensitive devices is rapidly increasing. Apply by letter. Headquarters, New England.

R-3592-S ENGINEERS to sell portable hand operated pull jacks to contractors, garage owners, public utilities, etc. Opportunities for active men with acquaintance in construction field. Straight commission from \$20 to \$40 per order. Any territory. Apply by letter. Headquarters, East.

R-2589-S KEYSSTONE DRILL RUNNERS, experienced, for work in Western Canada. Must be either Canadian or English citizens. Headquarters, San Francisco.

Upon conclusion of a series of 22 meetings designed to promote aggressive lumber merchandising methods in rural Illinois territories, C. F. Miller, agricultural engineer of the National Lumber Manufacturers' Association, has reported to headquarters that 506 dealers attended the meetings in various sections of the state and showed an enthusiastic interest in the discussions, the sales suggestions, and the literature made available by way of sales help. He was accompanied at these meetings by "Bill" Joyce, Field Service Director, Illinois Lumber and Material Dealers' Association. In his report Miller stated the experience of a dealer who took two photographs of a customer's home, had an architect draw in attractive modernizing suggestions, showed it to the customer and sold a \$1,400 modernizing material bill.

Table III
Approximate Values of K_v in Equations 3 and 4, Based on the Content of Normal Portland Cement, in Pounds per Cubic Yard of Set Concrete.

3/4	4.13	4.22	4.30	4.39	4.46	4.53	4.59	4.65	4.73	4.79	4.85
3/4	3.73	3.81	3.89	3.96	4.03	4.10	4.16	4.22	4.28	4.34	4.39
3/4	3.26	3.34	3.41	3.49	3.55	3.61	3.67	3.72	3.79	3.85	3.90
3/4	2.88	2.95	3.01	3.07	3.14	3.20	3.25	3.30	3.36	3.41	3.46

Then $l = p =$ the proportion of coarse aggregate,

If $S =$ the actual fineness modulus of the sand,

$R =$ the actual fineness modulus of the rock,

and $M =$ the fineness modulus of the mix, then

$$M = pS + (1-p)R, \quad (5)$$

$$\text{and } p = (R-M)/(R-S), \quad (6)$$

When proportions are to be determined by equation (6), the required fineness M is determined by equation (5a), in which $\log C$ is determined by equation (1) for the given conditions.

While no particular uniformity of grading may be obtained by the combination of two aggregates, their combination by the fineness modulus method approaches the theoretical uniformity, as nearly as possible, and the theoretical average diameter and surface area of particles is effected

with essential accuracy. This is the important function of the fineness modulus characteristic.

Proportioning Three or More Aggregates

Three aggregates, having different fineness moduli, may be proportioned in innumerable combinations for a mixture of a particular fineness modulus between the maximum and minimum modulus of the individuals. As example, three aggregates, whose moduli are 3.0, 5.0 and 7.0, respectively, may be combined as follows for a fineness modulus of 5.5:

F.M.	Proportions								
3.0	.15	.20	.25	.30	.33	.35	.36		
5.0	.45	.35	.25	.15	.09	.05	.03		
7.0	.40	.45	.50	.65	.58	.60	.61		
Mx.F.M.	5.5	6.5	5.5	5.5	5.5	5.5	5.5		

The fineness modulus indicates the average diameter of particles, but, as shown, does not indicate the gradation of diameters. In order to proportion three or more sizes of aggregates to a definite uniformity of gradation of sizes for any required fineness modulus, it is necessary to have a grading equation which provides such uniformity and fineness modulus. This flexibility is provided by the Talbot equation

$$r = 1 - (d/D)^n \quad (3b)$$

in which r is the absolute volume proportion of the whole retained on given sieve opening of d dimension, D is the maximum square hole dimension of aggregate particle, and n is an exponent determining the coarseness or fineness of the grading.

A modulus of the average diameter of particles may be obtained by any set of sieves having a uniform ratio of hole dimension in the successive sieve sizes; the holes may be any regular sided opening of the same average diameter,—square, pentagonal, hexagonal, octagonal, etc. to round, and the measure may be in any unit; but, the ratio of hole diameters, the maximum hole diameters, and the unit of measure of hole diameters, determine the unit basis of the modulus. In order to coordinate the Talbot Grading Equation (3b), with Abrams' fineness modulus, d and D must be taken on the square hole basis and it is necessary to use the present A.S.T.M. standard square hole sieves, or equivalent round hole sieves, whose theoretical openings are as follows:

Number sieve	Theoretical Side d of Sq. Ave. Diam. Inches	Equivalent Round Hole of Ave. Diam. Inches
100	0.005859375	.007
60	0.01171875	.014
30	0.0234375	.028
16	0.046875	.056
8	0.09375	.112
4	0.1875	.225
3/4"	.375	.45
3/4"	.75	.9
1-1/2"	1.5	1.8
3"	3.0	3.6
6"	6.0	7.2
12"	12.0	14.4

The values of the fineness moduli, for various values of n and D , are given in Table V. When n is equal to 0.5 the grading corresponds to Fuller's theoretical grading.

The employment of the Fuller grading has necessarily been a graphical cut-and-try process and that is

also true of any grading equation unless it is coordinated with a measure of the average diameter of particles such as the fineness modulus.

Assuming that, for a 3" maximum size of aggregate, it has been determined by equation (3a) that a fineness modulus of 7.11 is required, it is found in Table V that n=.60, and using this value of n in equation (3b) will show that .49 of the total aggregate is from 0-3/8" (No. 4 sieve) with a fineness of 3.30, .29 from 0-3/4" with fineness of 4.22, .43 from 0-1 1/2" with fineness of 5.17, .66 from 0-1 3/4" with fineness of 6.13, and the whole from 0-3" has a fineness modulus of 7.11. The fineness modulus of each part is the sum of the proportions coarser than each of the included standard sieves. These theoretical proportions are based on perfect screening of sizes No. 100-50, 50-30, 30-16, 16-8, 8-4, 4-2, 2-1, 1-1/2, 1-1/4, and 1-1/8" with the respective fineness moduli of 1, 2, 3, 4, 5, 6, 7, 8, 9 for the 3" maximum. Job aggregates, however, may usually be expected to have a considerable portion of under-size and a small portion of oversize particles. Provided the aggregates are clean and sound, this condition of under-size and oversize is not objectionable when it is a fairly constant condition. It is the purpose of the grading and fineness principles to compensate for such conditions.

As a practical example, let us assume that we have (to be graded) a f. m. of 7.11 six sizes of aggregate on the job whose maximum sizes approximate most closely the standard sizes given, with their actual fineness moduli, etc., in the following table:

Table A—Data for Grading Six Aggregates.

Aggregate No.	Standard Size Theo. Min.		Standard Size Appx. Max.		Fineness Moduli	
	Theoretical	Actual	Theoretical	Actual	For Grading n=.60, D=3" (Table V)	(Part)
I	0-1/8"	1.6	0-1/8"	1.6	2.0	3.3 (0-4")
II	0-1/4"	2.0	0-1/4"	2.0	3.3	4.2 (0-5")
III	0-3/8"	2.9	0-3/8"	2.9	4.2	5.1 (0-6")
IV	0-1/2"	4.3	0-1/2"	4.3	5.1	6.1 (0-7")
V	0-3/4"	6.6	0-3/4"	6.6	6.1	7.1 (0-8")
VI	0-1"	9.0	0-1"	9.0	7.1	8.0 (0-9")

In order to determine the proportions compensating for divergence of the actual fineness moduli from the theoretical or, in other words, to proportion the actual aggregates to fit the theoretical grading, Equation (6) may be employed in connection with the moduli of the respective parts as given in Table V, and with regard to the actual f.m.'s of the job materials, as in the following scheme:

Part: Percent of Whole (Job Coarse—Theo. Total)		$P' = \frac{\text{Job Coarse—Theo. Fine}}{\text{Job Coarse—Theo. Total}} = p$	
p = proportion of fine; 1.0-p = proportion of coarse.			
0-3/8": 100% (VI) (Whole) (8.8-7.11)		1.0 - .63 = .37 of 1-V.	
(8.8-6.13) (I-V)		1.0 - .63 = .37, No. VI.	
0-1/2": 63% (V) (8.2-6.13)		.63 - .43 = .20, No. V.	
.63 (8.2-5.17) (I-IV)		.43 - .28 = .15, No. V.	
0-3/4": 43% (IV) (7.0-5.17)		.43 - .28 = .15, No. V.	
.43 (7.0-4.22) (I-III)		.43 - .28 = .15, No. V.	
0-1": 28% (III) (6.5-4.22)		.28 - .16 = .12, No. II.	
.28 (6.5-3.3) (I-II)		.28 - .16 = .12, No. II.	
0-No. 4: 16% (II) (3.7-3.3)		.16 - .04 = .12, No. II.	
.16 (3.7-2.0) (I)		.16 - .04 = .12, No. II.	
Total		1.00	

We have then, .04 of I, .12 of II, .15 of IV, .20 of V, and .37 of VI, by absolute volume.

Another manner of determining the proportions will be given in the subsequent example of calculation of a concrete mixture employing a maximum size of aggregate in the 8", 4", 2", etc. series of gradings.

Physical Tests of Aggregates

Aggregates, although from the same source, vary from day to day in specific gravity, density, grading, fineness modulus, moisture content and absorption. Correct weight or volumetric proportions for one delivery of aggregates may be expected to be decidedly wrong the next delivery for a required quality of concrete. Therefore, the method of formulation of mixtures must comprehend re-proportioning in accordance with these periodical changes in the physical characteristics of the aggregates, and, these measures of the physical characteristics are necessary and basic in any method of proportioning which accomplishes uniformity in the quality of the concrete produced.

The procedure of aggregate tests must be simple, expedient and accurate, in order to keep up with the change of materials. A coordinated test procedure, described as the "weight-volumetric method", has been designed by the writer for this purpose and is briefly stated as follows:

Tests	Aggregate Tests	Example:
Test A—Weigh water exactly filling standard or similar container		62.40
Test B—Weigh loose moist aggregate filling container		88.68
Test C—Surface dry weight B and weigh		84.82

Test D—Dry weight C at 212° F and weigh	83.22
Test E—Inundate D, exactly filling container with water, and weigh	113.73
Test F—Make sieve analysis, finding total proportions by absolute volume (or by wt.) coarser than each of the standard sieves Nos. 100, 50, 30, 8, 4, 2, 1, etc.	
Test G—Weigh dry aggregate filling container, rodding in the standard (A.S.T.M.) manner	102.77
Test G—Weigh loose dry aggregate filling container	89.74
Tests F and G are not essential excepting where dry-rodded or dry-rodded volumes are specified or desired for special purposes.	
Calculations: (employing weights determined.)	
d = loose-moist density = (A-E+D)/.531	(7)
g = apparent specific gravity = B/(A+D-2.61)	(8)
a = absorption by absolute volume = (C-B)/Ad+.050	(9)
m = moisture by absolute volume = (E-D)/Ad+.171	(10)
b = weight of moist aggregate in lb. per cu. ft. by absolute volume = 62.4(g+m)/173.534	(11)
h = bulking of absolute volume by loose measure, moisture and voids = 1.0/d+1.957	(12)
f.m. = $R_{10} + R_{50} + R_{30} + R_{8} + R_{4} + R_{2}$	(13)
dr = dry-rodded den. = F/Ag+.631	(14)
dd = dry-loose den. = G/Ag+.551	(15)

Example of Concrete Mix
Tables and equations, such as given in Part 4A, are determined as preliminaries to production on a project or at a central concrete manufacturing plant, and establish criteria of mixtures under the local conditions. There remains, then, only the routine tests of materials and proportioning of mixtures in accordance therewith. Let it be assumed that concrete is required for deep foundation cylinders, for heavy loads, where 2" maximum size aggregate and 6" slump are practicable and where the most economical design is obtained with 4500-lb. concrete.

Assume, also, that four sizes of gravel aggregates are to be employed, whose physical characteristics at a particular time are as follows:

Table B—Characteristics of Job Aggregates (Determined by Tests A, B, C, D, E, F, G and R)

Age, No.	Practical Size Limits	Fineness Modulus	Moisture-moist Density	Apparent Specific Gravity	Moisture by abs. vol.	Absorption by abs. vol.	Dr-dry-rodded Density	Dd-dry-loose Density
1	0-6"	2.00	.502	2.56	.172	.047	.600	.550
2	0-4"	3.65	.574	2.42	.170	.040	.673	.640
3	0-4"	6.54	.597	2.64	.101	.037	.636	.610
4	1-2"	8.50	.570	2.70	.025	.025	.610	.590

The cement content per cubic yard of concrete, as indicated for 4500-lb. concrete with 6" slump, 2" aggregate and skilled control, is found in Table 1 to be
Log C = (.001689 X 4500) + 2.2555 By 1 = 3.01555
and C = 1037 lbs. per cu. yd. of concrete.

If the apparent specific gravity of the cement is 3.11, the absolute volume of cement is, then
1037/(3.11x2.64) = 5.344 cu. ft. (1a)
The corresponding volume of mixing water is
W = (.0125x1037) (4.14613-log 4500) By (2) = 6.389 cu. ft.
The corresponding absolute volume of mixed aggregate per cu. yd. of concrete is

CAPITAL CITY TILE COMPANY

J. C. PALEN

Manager

914 Seventh Street

Sacramento - - - California

Av=27/Ky-5.344-6.389 By (3)
then Av=16.217 cu. ft. By Table III

The corresponding fineness modulus of the mixed aggregate for 2" maximum size aggregate (E=3.0233) and 1037 lbs. of cement is (See Table IV)

f m.=1.07 (log 1037 + 3.0233) By (3a)'

Referring to Table V, we find, for D=2" and f m.=5.41, that n=.56 which we will use, (increasing n up to .59 would be satisfactory and would increase the measure of strength and density at the sacrifice of a measure of cohesion and workability of the wet mix.)

The theoretical gradings of the aggregate for D=2" and n=.56, and of parts of same, are as follows:

Table C—Theoretical Gradings of Aggregates for D=2" and n=.56.

Job Agg. No. and Size Max	Sieve No.	Proport. Retained			
		Mixed Aggr. 0 to 1"	0 to 1" 1" to 2"	0 to 2" 2" to 4"	0 to 4" 4" to 6"
I	100	.97	.94	.89	1.00
	50	.94	.92	.78	1.00
	30	.92	.88	.79	1.00
II	16	.88	.82	.56	1.00
	8	.82	.73	.33	1.00
	4	.73	.61	.00	1.00
III	3/4"	.61	.42	.15	1.00
	3/8"	.42	.15	.00	1.00
	1/2"	.15	.00		
IV	2"	.00			.47
Fineness Modulus		6.44	5.47	3.26**	8.47

*Note—The maximum size of the No. III aggregate is not in the standard sieve scale, and, therefore, must be included in summing for the fineness modulus.

** Plus .06 due to calculations limited to hundredth place. Determining the theoretical proportion of the whole aggregate retained on the 1" sieve by the equation

$r' = 1 - (1/2)^n$ By (3b)
the proportions retained for the 0-1" part may be determined by the equation

$r_1 = (r' - r)/(1.0 - r)$ (16)

Those for the 0-No. 4 part must be determined in this same manner, not being in the same grading series as the whole aggregate. The proportions retained and fineness modulus for any part of the aggregate, such as that from 1"-2", may be determined by the equation

$r_2 = r_1 r' / r'$ not greater than 1.0, (17)

Employing these determined values of the fineness modulus of the parts, as given in Table C, and the actual fineness moduli of the separate aggregates, as given in Table B, the proportions of each aggregate are determined by Equation 6 (as in previous example):

0-2", 100%	
$1.0 \times \frac{(8.5-6.46)}{(8.5-5.47)}$	= .67 of I-III
	1.00-.67=.33 of IV
0-1", 67%	
$.67 \times \frac{(6.54-5.47)}{(6.54-3.26)}$	= .22 of I-II
	.67-.22=.45 of III
0-No. 4, 22%	
$.22 \times \frac{(3.65-2.26)}{(3.65-2.00)}$	= .05 of I
	.22-.05=.17 of II
	.05 of I
Total	1.00

Mixture Specifications

The complete specifications of the basic mixture are, then:

1. Maximum size of aggregate. 2"
2. Slump of concrete. 6"
3. Compressive strength at 28 days, lb. per sq. in. 4500
4. Absolute volume of cement per cu. yd., cu. ft. 5.344
5. Absolute volume of mixing water per cu. yd., cu. ft. 6.389
6. Proportionate yield of absolute volumes .966
7. Absolute volume of aggregate per cu. yd. of concrete 16.217
8. Fineness modulus of whole mix 6.46
9. Grading of aggregate, n, .564
- Requirements 4-9 remain constant for the determining requirements 1, 2 & 3. If the individual maximum sizes of the aggregate do not change, the following two items also remain constant:
10. Fineness modulus of 0-1" part. 5.47
11. Fineness modulus of 0-No. 4 part. 3.26

As long as the given fineness modulus of the job aggregates remain constant, the absolute volume proportions remain as previously determined:

12. Proportion of No. 1 aggregate .05
13. Proportion of No. 11 aggregate .17
14. Proportion of III aggregate .45
15. Proportion of IV aggregate .33

Proportions by Absolute Volume:

(1st Basis of Measure)
The proportions by absolute volume for one cubic yard of set concrete, then

Materials	Absolute Volume
Cement By (1) & (2)	= 5.344
Mixing water By (1a)	= 6.389
I Fine Sand .05x16.217	= 0.811
II Coarse Sand .17x16.217	= 2.757
III Medium Gravel .45x16.217	= 7.298
IV Coarse Gravel .33x16.217	= 5.352

Absolute vol. = proportion x abs. volume of aggregate
= 27/.966 By Table III

Job Proportions by Loose-Moist Vol. (2nd Basis)

The mixing water, plus the absorptions of the absolute volumes of aggregates, minus the moisture content of the absolute volumes of aggregates determine the water to be added. The correction is made as follows: (See Table B)

$6.389 - 16.217 [(0.05) + (.172) + (.047) + (.17) + (.170) - (.049) + (.45) + (.101) - (.037) + (.33) + (.025) - (.025)] = 6.389 - (16.217 \times .05715) = 5.462$ cu. ft. (18)
to be added to the loose-moist mix.
The corresponding job proportions, measuring the aggregates by loose-moist volume (the customary manner), are then:

Materials	Loose moist Volume
Cement, 1037 lbs./94	= 11.0 sks.
Added Water, 5.462x7.5	= 41.0 gal
	7.5 gals/cu. ft.
I Fine Sand .05x16.217/502	= 1.6
II Coarse Sand .17x16.217/574	= 4.8
III Med. Gravel .45x16.217/597	= 12.2
IV Coarse Gravel .33x16.217/570	= 9.4
Loose-moist Vol. = proportions x abs. vol. of agg./d	

It has been the custom (since decimal fractions have been used) to call this 1 : 1.6 : 2 or a 1 : 2.6 mix.

Job Proportions by Moist Weight: (3rd Basis)

The corresponding job proportions by moist weight are:

Materials	Moist Wt., lbs.
Cement	= 1037
Added water, 5.462x62.4	= 341
	As corrected
I Fine Sand, 16.217x62.4x .05 (2.56+172)	= 138
II Coarse Sand, 16.217x62.4x .17 (2.52+170)	= 480
III Medium Gravel, 16.217x62.4x .45 (2.64+301)	= 1248
IV Coarse Gravel, 16.217x62.4x .33 (2.70+325)	= 910
Total	4154
Moist Wt. = abs. vol. agg. x proportion x (g+m)	x 62.4

Laboratory Proportions by Dry-Rodded Volume:

(4th Basis)
Corresponding proportions by dry-rodDED volume are determined as in the 2nd Basis, with modifications as follows:

a. The total moisture in the aggregates, as given in equation (18), are changed to 0.0, and the absorption of the aggregate must be provided for by adding same to the mixing water.

b. In calculating the proportions of aggregates, their dry-rodDED densities, dr, are employed instead of the loose-moist density, d.

Laboratory Proportions by Loose-Dry Volume:

(5th Basis)
Corresponding proportions by loose-dry volume are determined as in the 4th Basis excepting that the loose-dry densities, dd, are employed in part b.

Laboratory Proportions by Dry Weight:

(6th Basis)
For accurate results, proportions for concrete research tests should be made by the weight-volume-metric method, taking the absolute volume as the basic measure of ingredients, and, as the most practical and accurate method, measuring the absolute volumes by weighing the quantities calculated on the basis of accurately predetermined specific gravities of the ingredients. It will generally be sufficiently accurate to assume 1.0 as the specific gravity of tap water of usual temperature.

Aggregates for laboratory mixtures should generally be thoroughly dry, as evaporation of moisture from moist aggregates, during the manipulation, introduces error into the test results.

The correction of the water to be added, compensating for absorption of the aggregates, is determined by equation (18) as follows:
 $6.389 - 16.217 [(0.05) + (.47) + (.17) + (.00) - (.040) + (.45) + (.00) - (.027) + (.33) + (.00) - (.025)] = 6.389 - 16.217 (-.03465) = 6.389 + .552 = 6.941$

The weight proportions, employing dry aggregates, are then:

Materials	Weight, Lbs.
Cement	= 1037
Added water, 6.941x62.4	= 433
	As corrected
I Fine sand 16.217x62.4x .05x2.56	= 129
II Coarse Sand, 16.217x62.4x .17x2.62	= 451
III Medium Gravel, 16.217x62.4x .45x2.64	= 1202
IV Coarse Gravel, 16.217x62.4x .33x2.70	= 902
Total	4154
Weight, Lbs. = abs. vol. of agg. x proportion x g	x 62.4

This shows exactly the same weight of ingredients as in 3rd basis, which is correct.

Arbitrary Proportions:

The buyer of central plant concrete often specifies arbitrary proportions 1:2.4, or 1:6 etc. Generally, he does not know anything about strength, slump, dry-rodded volume, or, that concrete is made of various maximum sizes of aggregates. Questions in regard to these matters only confuse him. The manufacturer should provide a concrete suitable for the purpose and, at the same time, comply with the implied requirements of these indefinite specifications. A "1:2.4 mix" has meant loose-moist volume of aggregates, down the ages, and not the standard dry-rodded volume which requires less cement per cubic yard. 1:2.4 or 1:6 has also meant 2000-lb concrete which points to a water cement ratio of 1.0 plus or minus.

The fundamental principles, of calculation of arbitrary mixtures, are set forth herein, and ingenuity of calculation is soon acquired by practice and experience.

Taking given aggregates I, II, & III, and requiring a 1:2.4 mix, we may assume a water-cement ratio of 1.0 and $\frac{1}{2}$ cu. ft. of No. 1 with $1\frac{1}{2}$ cu. ft. of No. II. The proportions, then, would be as follows:

L.M. Vol. x d = Abs. Vol.	
I	5x.502= .251
II	1.5x.574= .861
III	4.0x.597=2.388
Cement, sks.	1.0x.455= .455
Mixing Water	1.0 1.000

Yield of concrete = 4.985x.988=4.925 c.f., 27/4.925 = 5.48 sks. or 1.37 bbis. = 515 lbs. of cement per cu. yd. of set concrete.

The calculation of added water and weight proportions are indicated in the foregoing principles and the reader will readily find the logical procedure.

The various problems of proportioning are innumerable and these few cases will be found to cover the fundamental procedures of calculation, if it is kept in mind that the fundamental basis of measure of proportions is the absolute volume, that the fundamental basis of measure of apparent specific gravity, moisture content and absorption is the absolute (= apparent) volume of the aggregate.

Practice Problem

Given aggregates I, II and III, as in Table B, calculate mixture for 2000-lb. concrete, 1" maximum size of aggregate, and 7" slump.

San Francisco, California.
March 31, 1931.

Directors of the Schumacher Wall Board Corporation have declared the second regular quarterly dividend of 25 cents a share on common stock payable June 27 to stockholders of record June 17. Schumacher sales and earnings were declared by the directors to be very satisfactory. The opening of new markets has provided additional outlets for the Schumacher wall and a conservatively enthusiastic outlook for the future is held by the directors, according to A. R. Meylan, vice president and general manager.

Winston Bros. Co. of St. Louis, Mo., has been awarded the contract to construct a pipe line from the Canadian border to Butte by way of Helena, Deer Lodge and Anaconda, and from Dry Creek near Red Lodge to Boseman by way of Big Timber and other towns. The project is for the Montana Power Company and will involve an expenditure of between \$12,000,000 and \$15,000,000. Most of the pipe will be 28 inches in diameter and will be furnished by the A. O. Smith Company of Milwaukee, Wis., which concern will do all the welding.

FACTORS AFFECTING HEATING OF ROOMS WITH DIRECT STEAM RADIATORS COVERED IN BOOKLET

Bulletin No. 223, issued by the Engineering Experiment Station of the University of Illinois, "Investigation of Various Factors Affecting the Heating of Rooms with Direct Steam Radiators," is a continuation and extension of the previous investigation, the results of which were published in Bulletins Nos. 109 and 132. The investigations were made by Arthur C. Willard, Alonzo P. Kratz, Maurice K. Fahnestock and Seichi Konzo.

The immediate object of the tests reported in the present bulletin was to determine the effect of various factors encountered in actual heating practice on the heating of a typical room by means of cast-iron steam radiators. Among the factors studied were: location of the radiator in the room; types of radiators, enclosures, shields, and covers; kind of paint used on radiators; storm doors and sash; variation in attic and basement temperatures; relative amount and location of wall and glass exposure; and variation in steam temperatures. A special study was made of surface

temperatures and temperature gradients through walls and glass.

In order to provide for all the factors affecting the performance of bare, enclosed, and shielded radiators, actual rooms with typical outside walls, windows, and doors, and located in a specially constructed low temperature testing plant for maintaining constant outside temperatures of zero or less, were used in the tests. In such a plant it was possible to place the radiator in the actual environment existing in practice, and investigate not only the heat emission of the radiator itself but also the heating effect produced in the room as well. The intelligent design and selection of radiators and enclosures depends fully as much on the effect produced in the room as on the conventional heat emission factor so generally taken as the sole criterion of excellence in the past.

Copies of Bulletin No. 223 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

ADEQUATE COMPENSATION FOR STRUCTURAL ENGINEERS ENGAGED IN BUILDING CONSTRUCTION URGED

"Structural engineers engaged in the building industry find one problem continually confronting them that is quite as perplexing as are some of the well-known technical questions," says Engineering News-Record. "That problem is the one of securing adequate compensation for services rendered. Wherever structural engineers gather, the question of fees is a live topic, and often of late the consensus is that direct employment by the owner rather than through an architect is the only answer. Is such a reform, if reform it be, wise?"

"In the building field the structural engineer is usually employed by the architect, who as the owner's representative directs the job. If the architect knows his business, if he has due regard for his own reputation, if, indeed, he holds the owner's best interests at heart, he will insist upon a fee that is adequate not alone for himself but for the structural engineer who will design the framework for him. There are such architects, many of them. But there are also others who through lack of backbone permit the owner to pare their fees to the danger line. Not much is left for the structural engineer, and being inadequately paid he is hampered in doing his best in furnishing the owner a safe and efficient structure.

"The structural engineer who accepts employment from such an architect, known for type of fee-cutting practices, is of course open to the same charge of lack of character and backbone as is the architect. Whether the engineer would show more professional and personal fortitude in dealing with the owner direct than he does with this type of architect is a new question. But upon the answer to it would seem to depend the success or failure of a direct-with-owner contract.

"Those attempts which have been made to correct the evils of inadequate compensation and fee cutting have usually been in the nature of appeals broadcast to the public, based on the possibly truthful but nevertheless assumed fact that modern buildings would be built better if the structural

engineering were handled differently. Such appeals are largely fruitless because of public apathy and lack of knowledge. So far as memory serves, no serious attempts have been made to enlist the help of the architect, who obviously is the key factor in any proposed change. This is the more surprising because the architect, better than anyone else, should understand the difficulties of the structural engineer, which in many respects are the same as those confronting the architect himself.

"Admittedly, fee cutting is not practiced by the best architects; their business is so handled that it is not necessary. Perhaps, as some structural engineers maintain, these architects would not suffer any disadvantage in permitting the structural engineer to deal direct with the owner, so long as the architect reserved the right to compel the owner to retain a structural engineer satisfactory to him. The same structural engineers also maintain that the other architects, who are always on the ragged edge and who resort to cutting structural engineering fees because their own fees have been unmercifully cut by the owner, would probably welcome a divorce from financial dealings with the engineer.

"If these suppositions be true, the advisability of enlisting the help of the architects is all the more apparent. Fee cutting and compensation are questions for arbitration between architects and engineers. The present year should see some progress made in this direction. Also it should witness progress on the part of structural engineers in relating the efforts of certain architects to reduce engineering fees to a dangerous minimum. Backbone is what is needed first and in largest degree. Conferences between architects and engineers concerning their mutual problems will then produce the required results. Mutual welfare is the only basis upon which both the architect and the engineer can survive, and it is the basis upon which the owner can rest his assurance of safe, more economical and more efficient buildings.

THE OBSERVER

What He Hears and Sees on His Rounds

Plans for substantial increases and decreases in cement duties were made before the tariff commission at Washington last Thursday as it concluded a hearing ordered by a Senate resolution. For the domestic producers, Albert MacC. Barnes of New York asked the levy be raised from 23 to 35 cents a barrel.

Newspaper reports recently carried the account of a strike in Brooklyn, New York, when painting contractors refused to adopt the use of a three-inch brush instead of a six-inch brush in order to provide work for unemployed painters. The Master Painters' Association has asked the Supreme Court to enjoin the Painters' Union from striking when their request is not acceded to.

Just because there is a business depression and there is no sight of contractors, is no reason why they should let their organization go to the dogs and disintegrate.

Everybody realizes that without organization, the whole works gets gummed up and nothing but dry rot accumulates to take the place of pep and safety.

Keep your organization moving along, attend your meetings and give suggestions that will tend to create interest and give some encouragement to the weak sister these distressing times.

Of the 157,390 manufacturing plants in the United States, only 13.7 per cent operate as closed union shops, arbitrarily discriminating against workers who do not possess union membership cards, says the monthly bulletin of the East Bay Industrial Association. "These plants," the bulletin continues, "employ only 7.4 per cent of the 8,254,261 manufacturing wage earners."

"Eleven and nine-tenths per cent of all these manufacturing plants operate as non-union establishments, refusing employment to union members. These plants employ 11.3 per cent of the manufacturing wage earners."

"Seventy-four and four-tenths per cent of the total number of manufacturing plants operate under open shop conditions and employ 81.3 per cent of all the factory workers."

"Thus it will be seen that 92.6 per cent of the manufacturing wage earners are employed in either open shops or non-union shops," the bulletin says.

J. D. Ross, formerly superintendent of the city of Seattle light department, has been engaged as consulting engineer by the Public Power Authority of New York, according to word received at Seattle. Mr. Ross will tour the St. Lawrence river area, site of what is proposed as the world's largest hydro-electric power project. As an international development, this project is proposed to produce ultimately 2,000,000 horsepower at a total cost of \$221,000,000. Of this figure \$171,000,000 will be expended in connection with the power project proper and \$50,000,000 for navigation aids.

Cass Gilbert, designer twenty years ago of the Woolworth Building, precursor of the skyscraper of today, received the gold medal of the Society of Arts and Sciences for that achievement recently, and was hailed by many

distinguished men as the prophet of a new and great movement in architecture.

In response, Mr. Gilbert told how he had emphasized the vertical line in his structure—the first great American business building so to employ it—discussing the problems of skyscraper and city congestion, and declared that the most beautiful skyscraper possible has not yet been built.

"It may never be built," he conceded. "Those of us living today may never see it. And remote posterity may never see it, for the need may change and these temporary structures will not last indefinitely. But if the answer has been found in some measure in this work, we have met the challenge and pointed out one of the many ways in which Caliban may be exchanged for Ariel, in which ugliness may flower into beauty, we shall not have lived in vain."

Due to the relatively large number of fatalities which have occurred when well-drilling rigs, derricks, steam shovels, reinforcing steel, drag-line excavators, cranes, etc., have been brought into contact with high-voltage overhead electric lines, the State Industrial Accident Commission is preparing a set of Safety Orders to eliminate the hazard. Committees have been formed in San Francisco and Los Angeles, and it is hoped that before the end of the year these orders will have been completed and be in effect.

Based on their 1931 programs, the cement factories in the Moscow Region are to account for 16 per cent of the output of the entire industry and supply cement to 78 plants under construction, as well as to 158 agricultural machine and tractor stations, according to the Economic Review of the Soviet Union, a publication issued by the Amtorg Trading Corporation of New York. During the first quarter of 1931, however, these cement factories carried out less than half of their program. At the same time, production costs have increased, due partly to poor organization of work and inefficient utilization of equipment and of fuel.

The National Conference on Street and Highway Safety estimates that states which have laws for licensing motor vehicle drivers after mandatory examination and driving tests have effected a reduction of 29 per cent in traffic death rates. At the same rate, if drivers were licensed after examination and tests in all the states, 8510 lives would be saved and 290,000 injuries would be prevented each year.

For the last three months the Union Building-Loan Association has noted a marked increase in the number of applications for construction loans on homes in the bay cities.

Character of loans during this period form an interesting comparison with former periods in that relatively few applications are from contractors or builders erecting to sell.

By a great majority applications come from individuals who wish to build for their own occupancy.

This fact, in the opinion of Union Building-Loan officials, points clearly to a new confidence in the future prosperity of this area.

The request for loans are small and obviously represent the wage earning class of our community.

The business depression has now entered the psychological stage, says the Silberberg Research Corporation, investment counselors.

In other words, we are contending not so much with unsound situations or credit difficulties, but rather with a state of mind.

Executives and financiers are hesitating to go ahead with projects which logically could and should be undertaken at this time. They are not going ahead because they have vague, ill-defined fears for the immediate future.

There is a feeling that there has been over-investment in many directions—in buildings, plant, materials—and hence all further investment would prove futile and unprofitable.

This, however, is not a justifiable attitude.

There are alterations in commercial and industrial structures which are badly needed and which can be undertaken at very advantageous terms in the matter of cost, with money in the bank to pay for them.

It is most important that these projects be put under way promptly as a means of breaking up the jam in the flow of business enterprise.

Contracts of the last five months total 137 millions, about the same as in 1927, says Engineering News-Record. Public-works volume, though the largest on record, is only 10 per cent above last year's figure and 20 per cent above the average of the last five years. Due to the severe slump in building, public construction this year amounts to 57 per cent of total engineering construction, compared with 38 per cent in 1930 and also averaged during the last five years.

New public and corporation securities issued in the last five months total 131 millions. Though this is the smallest volume of the last five years, the public bond component is the largest. It amounts to 41 per cent of the total, or twice the ratio of other years. Common stock issues this year amount only to 7 per cent of total new capital compared with 24 per cent last year, 43 per cent in 1929 and 11 per cent in 1927 and 1928.

An ordinance given first reading by the Richmond City Council reduces the annual plumbers' license fee from \$100 to \$50 per year.

E. T. Kibler has been appointed purchasing agent for the Six Companies, Inc., contractors on the Boulder Dam, succeeding A. H. Baer. Kibler will maintain offices at Las Vegas, Nevada.

Average hourly rate for skilled building trades mechanics is \$1.36, same since April, says Engineering News-Record. A year ago it was \$1.39. In manufacturing, the skilled rate is 65c. The national average for common labor is \$5.94c, unchanged from May. A year ago this rate was 55.25c. In manufacturing, the unskilled rate is 47c per hour.

A strike which threatened over a demand for an increase in carpenters' wages at Dubuque, Iowa, was settled with a renewal of the present contract for a term of two years.

A bill passed by the Arizona Legislature over the governor's veto relieves the state engineer of supervision over all dams erected for storage of water for livestock. The state engineer's jurisdiction over other dams is not affected by the new law.

NEW STATUTE LIMITS USE OF TERM "STRUCTURAL ENGINEER"

Two bills amending the act regulating the practice of civil engineering were passed by the California Legislature. One of these, Assembly Bill No. 615, limits the use of the title, "structural engineer," and provides a method whereby civil engineers must qualify before using it.

The other measure, Assembly Bill No. 616, defines the term civil engineer and amends various sections to clarify and strengthen the act.

Both bills have been signed by the governor and will become effective on August 14, next.

The text of the bills as approved by the governor follows:

The people of the State of California do enact as follows:

Assembly Bill No. 615

Section 1. A new section is hereby added to chapter 801, statutes of 1929, to be numbered 1b, and to read as follows:

Section 1b. No person shall use the title "structural engineer" unless he is a registered civil engineer in his state and furthermore unless he has been found qualified as such structural engineer according to the rules and regulations established therefore by the board of registration for civil engineers. Anyone who violates the provisions of this section is guilty of a misdemeanor.

Assembly Bill No. 616

The people of the State of California do enact as follows:

Section 1. Section 1 of chapter 801, statutes of 1929, entitled "An act regulating the practice of civil engineering," is hereby amended to read as follows:

Section 1. In order to safeguard life, health, property, and public welfare, any person practicing, or offering to practice civil engineering in any of its branches in this state, shall hereafter be required to submit evidence that he is qualified so to practice, and shall be registered as hereinafter provided, and from and after twelve months after this act becomes effective, it shall be unlawful for any person to practice, or offer to practice, as a civil engineer in this state, unless such person has been duly registered or specifically exempted as required by the provisions of this act.

Section 2. A new section is hereby added to chapter 801, statutes of 1929, to be numbered 1a, and to read as follows:

Sec. 1a. The term "civil engineering" shall mean that branch of professional engineering which deals with any or all of the following studies, and/or analyses, the economics of, the use and design of, materials of construction and the determination of their physical qualities; the supervision of the construction of engineering structures; the investigation of the laws, phenomena, and forces of nature; and appraisals and evaluations: in connection with fixed works for any or all of the following divisions and/or subjects: irrigation, drainage, water power, water supply, flood control, inland waterways, harbors, municipal improvements, railroads, highways, tunnels, airports, and airways, purification of water, sewerage, refuse disposal, foundations, framed and homogeneous structures, buildings and bridges.

Said term shall include city and regional planning in so far as any of the above mentioned features are concerned therein, and geodetic, cadastral, municipal and topographic surveying, but nothing in this act contained shall be

construed to repeal, alter or modify that certain act entitled "An act to define the duties of and to license land surveyors, and to repeal an act entitled 'An act to define the duties of and to license land surveyors,' approved March 31, 1891," approved March 16, 1929.

The term "civil engineer" shall mean one who practices or offers to practice civil engineering in any of its branches.

The phrase "responsible charge of work" shall mean the control and direction of the investigation, design and construction of works involving some feature of civil engineering, and requiring initiative, skill, and independent judgment.

Sec. 3. Section 11 of chapter 801, statutes of 1929, is hereby amended to read as follows:

Sec. 11. The board shall, from time to time, examine the requirements for the registration of civil engineers in other states, territories and countries and shall record those in which, in the judgment of the board, standards not lower than those provided by this act, are maintained. The board is hereby empowered to arrange for reciprocal registration in this state of civil engineers from other states, territories or countries so recorded under terms mutually agreed upon. The board, upon the presentation to it by any person, of satisfactory evidence that such person holds an unexpired certificate of registration issued such person by proper authorities in any state, territory, or country, recorded as herein provided, which state, territory or country grants full and equal reciprocal registration rights and privileges to registrants of its board, shall, upon the payment of a fee of five dollars (\$5) to be retained by the board, issue to such person a certificate of registration under this act.

Sec. 4. Section 12 of chapter 801, statutes of 1929, is hereby amended to read as follows:

Sec. 12. (a) It shall be the duty of the board to inquire into the identity of any person not registered as provided in this act and practicing as or claiming to be a civil engineer. The board shall have the power by a two-thirds (2/3) vote to suspend for a period not to exceed two years, or to revoke the certificate of any civil engineer registered hereunder who has been convicted of a felony or who has not a good character or who has been found guilty by the board of any deceit, misrepresentation, violation of contract, fraud or gross incompetency in his practice, or guilty of any fraud or deceit in obtaining his certificate.

(b) Proceedings for the suspension or revocation of certificates of registration shall be begun by filing with the secretary of the board written charges against the accused. Such charges shall be in detail, and sworn to under oath by the complainant. The board shall designate a time and place for a hearing and shall notify the accused of this action and furnish him a copy of all charges at least thirty (30) days prior to the date of hearing. The accused shall have the right to appear personally or by counsel, to cross-examine witnesses or to produce witnesses in his defense. The board shall have the power to compel the attendance of witnesses and the production of necessary papers and documents.

The board may reissue a certificate of registration to any person whose

certificate has been revoked, provided, two (2) or more members of the board vote in favor of such reissue, for reasons the board may deem sufficient.

Sec. 5. Section 13 of chapter 801, statutes of 1929, is hereby amended to read as follows:

Sec. 13. (a) Any certificate issued under the provisions of this act shall remain in effect until the thirtieth (30th) day of June following the date of issuance, the date of issuance.

(b) Every civil engineer registered under this act who desires to continue the practice of his profession beyond the thirtieth (30th) day of June following the date of issuance of his original certificate shall on or before the thirtieth (30th) day of June of each year pay to the secretary of the board a fee of five dollars (\$5) to be retained by the board, for which fee a renewal certificate of registration for the current year shall be issued. Certificates of registration which have expired for failure to pay renewal fee may be reinstated within one year under rules and regulations prescribed by the board. An unexpired, unrevoked or unexpired certificate and endorsement of reciprocity, provided in this act, shall be presumptive evidence in all courts and places that the person named therein is legally registered.

Sec. 6. Section 14 of chapter 801, statutes of 1929, is hereby amended to read as follows:

Sec. 14. Each registrant hereunder may, upon registration, obtain a seal of the design authorized by the board, bearing the registrant's name, number of certificate, and the legend "Registered civil engineer." Plans, specifications, plats, reports and other documents issued by a registrant may be stamped with the said seal during the life of the registrant's certificate, but it shall be unlawful for anyone to stamp or seal any plans, specifications, plats, reports, or other documents with said seal after the certificate of the registrant named therein has expired or has been suspended or revoked, unless said certificate shall have been renewed or reissued.

Sec. 7. Section 15 of chapter 801, statutes of 1929, is hereby amended to read as follows:

Sec. 15. Nothing in this act shall be construed as prohibiting a civil engineer from practicing or offering to practice his profession through the medium of or as employee of a partnership or a corporation, provided that the plans, specifications and reports of such partnership or corporation be signed and be stamped with the seal of each registered civil engineer in specific and responsible charge of the preparation of the same. The same exemptions shall apply to partnerships and corporations as apply to individuals under this act; provided, however, that nothing in this act shall be construed as requiring registration for the purpose of practicing or offering to practice civil engineering, by an individual, firm, partnership or corporation on or in connection with property owned or leased by said individual, firm, partnership or corporation, unless the same involves the public health or safety or the health and safety of employees of said individual, firm, partnership or corporation. Provided, however, no one shall represent himself as, or use the title of registered civil engineer, or any other title whereby such person could be considered as practicing or offering to practice civil engineering in any of its branches, unless he is provided by registration under this act. Nothing in this act shall be construed as in any way repealing or abrogating any provision of that certain act entitled "An act to regulate the practice of architecture," approved March 23, 1901, as amended, or in any way re-

pealing or abrogating any amendments to said act.

Sec. 8. Section 16 of chapter 801, statutes of 1929, is hereby amended to read as follows:

Sec. 16. The following shall be exempt from the provisions of this act:

(a) Officers and employees of the United States of America practicing solely as such officers or employees.

(1) A subordinate to a civil engineer registered under this act, or a subordinate to a civil engineer exempted under this act, in so far as he is acting in such capacity.

(c) Any architect registered in this state under the provisions of any act to regulate the practice of architecture, in so far as he practices architecture, in its various branches.

(d) Any person, firm or persons, or corporation furnishing, either alone or with sub-contractors, labor and materials (with or without plans, drawings, specifications, instruments of service or other data covering such labor and materials), for such fronts, interior alterations or additions, fixtures, cabinet work, furniture or other appliances or equipment, or for any work necessary to provide for their installation, or for any alterations or additions to any building necessary or attendant upon the installation of such store fronts, interior alterations or additions, fixtures, cabinet work, furniture, appliances or equipment.

(e) Any person not a resident of the State of California, qualified as a civil engineer, offering to practice civil engineering in this state who does not have or maintain a regular place of business in this state.

(f) Any person practicing civil engineering in this state who does not maintain a regular place of business in this state and who does not practice for more than sixty days in any one calendar year, providing that such person shall be qualified as a civil engineer and shall, before engaging in such practice, notify the board in writing of his intention so to do, stating in said notice the approximate date when he intends to commence such practice and the approximate length of time he expects to continue in such practice. In which event the secretary of the board, after having determined that the applicant is qualified, and after the payment by the applicant of a fee of ten dollars (\$10) is hereby empowered to issue a temporary license to practice for a period of not to exceed sixty (60) days.

(g) Any person, firm or corporation holding a license as real estate broker or real estate salesman, when making appraisals and valuations of real estate properties, when engaged in the business or acting in the capacity of a real estate broker or a real estate salesman, within the meaning of the California real estate act.

Sec. 9. Section 17 of chapter 801, statutes of 1929, is hereby amended to read as follows:

Sec. 17. (a) Any person, who is not legally authorized to practice civil engineering in this state according to the provisions of this act and shall so practice, or offer to practice except he be exempt under this act, and any person presenting or attempting to file as his own the certificate of registration of another, or who shall give false evidence of any kind to the board, or to any member thereof, in obtaining a certificate of registration, or who shall falsely impersonate or use the seal of any other practitioner, of like or different name, or who shall use an expired or revoked certificate of registration shall be deemed guilty of a misdemeanor and shall for each such offense of which he is convicted be punished by a fine of not more than five hundred dollars (\$500) or by imprisonment not to exceed three

months, or by both fine and imprisonment.

(b) It shall be the duty of the respective officers charged with the enforcement of laws and ordinances to prosecute all persons charged with the violation of any of the provisions of this act. It shall be the duty of the secretary of the board, under the direction of the board, to aid such officers in the enforcement of this act.

DEFENSE OF YOUR TITLE

(By J. S. LOOFBOUROW, Executive Vice-President, Calif. Title Insurance Co.)

One of the advantages of a policy of Title Insurance offers over a Guarantee Title is that in a policy the title company obligates itself to defend all attacks that may be made against the interest of the insured.

Heretofore, the title company became responsible to pay certain losses only after they have been established by a court of last resort. In other words, the title was attacked and the insured had to defend it. If he was successful and no loss therefore occurred, there was no liability.

With the policy, however, there is a definite obligation on the part of the title company to carry on the defense. The title company stands as a protection between the claimant and the insured. This is not merely a gesture but a real protection as will be seen from the fact that the expense in the defense of titles last year by local title companies ran well over the aggregate amount expended the past five years.

This defense must ward off blackmail attempts to get nuisance-value settlements; claims arising out of the interests of heirs or alleged heirs; claims of easements, mechanics' liens, and all manner of similar false and false, even to forgery and false impersonation; claims arising out of irregularities in trustee's sales, and so forth.

Some of these strike only at the incumbrances insured and some strike at the very root of the title itself. In connection with the risks that strike at the whole title, quite frequently new problem arises. The title company has agreed to defend, but the value of the property is now far in excess of the original policy because of subsequent improvements or discoveries that the owner has much more to lose than the title company. It becomes important, therefore, that he protect his larger value. He may wish to compromise; to handle the defense in a different way; to proceed with other settlement negotiations, but these all invalidate his policy of title insurance.

The only way for him to protect against such contingencies is to insure his property for its full value. If improvements are added, title insurance should be increased. If the property enhances in value, title insurance should be increased, for, even though there were no complications growing out of the defense provision, many of these claims strike at the complete title and should they prevail, the only salvage that the insured owner has is the face of his policy.

When 1931 comes to an end, \$423,478,300 will have been spent for industrial buildings. It is estimated by Domestic Engineering. This does not include expenditure for public works and utilities, which together equal another \$1 billion and a half. Railroad expenditures alone will amount to \$700,000,000. Out of every dollar spent for building, 9.3 cents go for plumbing, while 7 cents go for heating, says the publication.

PERMIT FIGURES SHOW DECLINE

Building permits issued in 555 cities and towns of the United States during the month of May, 1931, amounted to \$139,467,981, according to official reports made to S. W. Straus & Co. This figure represents an 18% decline from April of this year, when the volume was \$170,115,330. Normally there is a seasonal decline of about 11.8% between the two months. The permits issued during May fell 30% below the same month of 1930.

MUNICIPAL WORKERS GO ON 5-DAY WEEK

A resolution establishing the 5-day week for per diem employees of the city has been passed by the Board of Supervisors.

After much discussion the resolution was passed when it was pointed out that the new order would permit the employment of a greater number of men. At the present time city employees are employed five and one-half days a week and receive pay for six days.

"Modernization" is the weapon against building senility," says Charles F. Palmer, President National Association of Building Owners and Managers in the Architectural Forum for July.

"Obsolescence" continues Mr. Palmer, "is the unseen enemy of the office building, creeping in and bringing destruction of property values through a slow, wearing process. The signs of obsolescence cannot be readily determined until it has advanced beyond the primary stages. Once they are seen they must be vigorously dealt with, lest the property go down grade with a speed unwarranted by the actual years of the building.

"The alert building owner and manager can do much to guard against obsolescence in the beginning and can accomplish wonders even after the symptoms become pronounced. The remedy is, of course, modernization. Architectural fashions change, mechanical methods are undergoing constant development, new materials are being put to use and new appliances are being put into service at the time passes. The new buildings have these advantages. The introduction of each innovation speeds the obsolescence of the old buildings. That obsolescence can be retarded by adopting the new things to such an extent as the design of the building will permit.

"Perhaps we cannot change the structural design, but we can do a thousand and one things to make the buildings as serviceable and as comfortable as the best of the new ones."

A 4-page publication entitled, "Westinghouse Arc Welding," Data Bulletin No. 15, has recently been announced. This booklet contains illustrations of many unusual arc welding achievements, explains with the aid of diagrams various methods of testing, and discusses methods for obtaining good welds. Copies of this publication (D.M.F. 5250) may be obtained from the nearest Westinghouse district office or directly from the advertising department, Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa.

More than 300 miles of all-concrete roads were built in Great Britain during 1930, which constitutes a record for any one year, according to a report received by the U. S. Department of Commerce.

Sam Hanley, city engineer of Renton, Wash., for the past ten year, died in that city recently at the age of 53 years.

Building News Section

APARTMENTS

Preparing Plans
APARTMENTS Cost, \$250,000
SAN FRANCISCO, Cal., Cor Fillmore and Pacific Ave.

6-story and basement, reinforced concrete apartment house (2-story basement for garages, steam heat oil burner, composition roof, 2 elevators, electric refrigeration, incinerator, etc.)
 Owner—Marian Realty Co., 110 Sutter St., San Francisco.
 Architect—H. C. Baumann, 251 Kearny St., San Francisco.

60 apartments, 2-3 rooms. All modern equipment and finishing.

Taking Segregated Figures.
APARTMENTS Cost, \$40,000
SAN FRANCISCO. E Fillmore St. S. Jefferson St.

Three-story and basement frame and stucco apartments (12 3-rm apts.)
 Owner and Builder—M. P. Storheim, 475 Euclid Ave.
 Architect—R. R. Irvine, Cal Bldg.

Composition roof, steam heating system, gas fire boiler, etc.

BONDS

SAN ANDREAE, Calaveras Co., Cal.
 —West Point Union School District votes bonds of \$7500 to finance erection of a new school. Trustees of the district are: Winnie Bardsley, Thelma Porteous, Harold Havens, W. W. Congdon and Claude T. Smith.

DEL MONTE, Monterey Co., Cal.
 —Election will be held in July by the Del Monte School Dist. to vote bonds of \$34,000 to finance erection of additions to the present plants of the Del Monte and Seaside Schools.

CHURCHES

Sub-Contracts Awarded.
CHURCH Cost, \$40,000
SAN FRANCISCO. Bush Street near Divisadero Street.

One-story frame church.
 Owner—West Side Christian Church.
 Architect—Bertz, Winter and Maury, 210 Post Street.

Contractor—Jacks and Irvine, 74 New Montgomery Street.

Acoustical Work—Western Asbestos
 Magnesia Co., 25 South Park.
 Steel Sash—Soule Steel Co., Rialto Bldg.

Contract Awarded.
CHURCH Cost, \$35,000
NAPA, Napa Co., Cal. Third and Patchett Streets.

One-story steel frame and reinforced concrete church.
 Owner—St. Mary's Episcopal Church, Napa.

Architect—C. Leroy Hunt, Second and Main Sts., Napa.

Contractor—E. W. Doughty, 1125 1st St., Napa.

FACTORIES AND WARE-HOUSES

Sub-Bids Being Taken.
LAUNDRY Cost, \$40,000
SAN FRANCISCO. Heron St. east of 8th St.

Three-story reinforced concrete class

B laundry.
 Owner—Amalgamated Laundry Co., 355 8th St.
 Architect—Hyman & Appleton, 68 Post Street.

Contractor—Barrett & Hilp, 918 Harrison Street.
 Subbids particularly wanted on plastering, plumbing, electric work, sheet metal, roofing and miscellaneous iron.

Bids Opened.
STATION BLDG. Cost, \$—
BOONVILLE, Mendocino Co., Cal.

Highway Maintenance Station, consisting of superintendent's cottage; combination woodshed and garage; blacksmith shop, septic tank, yard trellis and clothes line posts.

Owner—State of California (State Highway Commission).
 Engineer—John H. Skegg's, district engineer, State Highway Commission, 211 State Bldg., San Francisco.

The work of this contract comprises excavation, concrete and masonry work, carpentry and millwork, lathing and plastering, sheet metal work, painting, plumbing, heating and electrical installations.

Following is a complete list of bids:
 Theo. Johanns, 741 14th Street
 San Francisco.....\$5,598
 R. Hodgson & Son, Porterville.....5,750
 Wm. Spivock, San Francisco.....6,200
 J. W. Cobby & Son, S. F.....6,645
 O. S. Almie, San Francisco.....6,935
 Chas. Swansfelt, San Francisco.....7,000
 E. G. Hart, San Francisco.....7,100
 Bids held under advisement.

Bids Rejected; Work Postponed
SHOP BLDG. Cost, \$13,000
SANTA ROSA, Sonoma Co., Cal.
 Brick addition for high school shop (110-64-ft.; housing auto mechanics department and general repair shop).

Owner—Santa Rosa High School Dist.
 Architect—Wm. Herbert, Rosenberg Bldg., Santa Rosa.
 Low Bidder—Ralph McLeran Co., Hearst Bldg., S. F.....\$12,321

Contract Awarded.
FACTORY Cost, \$—
BURBANK, Los Angeles Co., Calif.
 Front and Verdugo Streets.
 One- and two-story concrete and brick underwear factory (20,000 sq. ft.)

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander
SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammer (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. **UNDERHILL**
 San Francisco **7662**
SALES . SERVICE . RENTALS

Owner—Cooper's, 750 S Los Angeles St., Los Angeles.
 Architect—Harry T. Miller, 4814 Loma Vista, Los Angeles.
 4814 Loma Vista, Los Angeles.

Bids Opened.
STATION BLDG. Cost, \$—
LIVERMORE, Alameda Co., Cal. One mile west of Livermore.

Highway Maintenance Station, consisting of superintendent's cottage; combination woodshed and garage; blacksmith shop, septic tank and clothes line posts.
 Owner—State of California (State Highway Commission).

Engineer—John H. Skegg's, district engineer, State Highway Commission, 211 State Bldg., San Francisco.

The work of this contract comprises excavation, concrete and masonry work, carpentry and millwork, lathing and plastering, sheet metal work, painting, plumbing, heating and electrical installations.

Following is a complete list of bids:
 Theo. Johanns, 741 14th Street, San Francisco.....\$5,161

 The Minton Co., Mt. View.....5,499
 C. A. Bruce, Pleasanton.....5,654
 Wm. Spivock, San Francisco.....6,828
 Arthur Holyoke, Hayward.....6,986
 N. H. Sjoberg & Son, S. F.....6,483
 O. S. Almie, San Francisco.....6,589
 Bids held under advisement.

Taking Sub-Bids.
WAREHOUSE Cost, \$20,000
OAKLAND, Alameda Co., Cal. South Seventh St. E Fallon St.
 One-story reinforced concrete warehouse.

Owner—George R. Bormann Steel Co., 4th and Grove Sts., Oakland.
 Engineer—H. W. Holin, Financial Center Bldg., Oakland.
 Contractor—H. J. Christensen, Ray Bldg., Oakland.

Structural Steel—Pacific Coast Engineering Co., Foot of 14th St., Oakland.

Completing Plans.
FACTORY Cost, \$1,000,000-\$1,500,000
ALAMEDA, Alameda Co., Cal. Fernside and Versailles Aves.

Factory building.
 Owner—Owens-Illinois Glass Co., (W. I. Cole, Mfg.) 133 Kearny St., San Francisco.

Plans by Eng. Dept. of Owner, Toledo, Ohio (H. Barnard, chief engineer).

A zoning ordinance permitting the erection of the factory at the above site was passed this week and plans will go ahead immediately.

Preparing Preliminary Plans.
LAUNDRY Cost, \$10,000
VALLEJO, Solano Co., Cal.

One- and two-story reinforced concrete laundry (50x130; composition roof; steel sash).

Owner—Vallejo Steam Laundry, 301 Pennsylvania St., Vallejo.

Plans by builder.
 Contractor—G. Parenchi, Vallejo.

Contract Awarded.
CEMENT PLANT Cost, \$2,250,000
SAN JOSE, Santa Clara Co., Cal. Eight miles southwest of San Jose.
 Cement manufacturing plant.
 Owner—San Jose Cement Co., Ltd., Ernest H. Dettner, president, 835

Howard St., San Francisco.
Engineers & Contractors—Hunt-Mirk
& Co., 141 2nd St., San Francisco.
Bids Opened—Held Under Advertisment.
SUPERSTRUCTURE Cost, \$250,000
OAKLAND, Alameda Co., Cal. Outer
Harbor Terminal.

Superstructure for 2-story reinforced
concrete warehouse ("C", 310x280).
Owner—City of Oakland Port Com-
mission (G. B. Hegardt, secretary).
424 Oakland Bank Bldg., Oakland.
Plans by Eng. Dept. of Owner.
Low Bidder—Schuler & McDonald,
1723 Webster St., Oakland.

Complete list of bids follows:
Schuler & McDonald, Oakland \$167,773
Cahill Bros., San Francisco. 168,250
Geo. Peterson, San Leandro. 169,700
R. W. Littlefield, Oakland. 172,240
Mission Concrete Co., S. F. 176,531
K. B. Parker Co., S. F. 182,500
Geo. Swanstrom, Oakland. 182,970
MacDonald & Kahn, S. F. 182,990
David Nordstrom, Oakland. 183,156
Geo. Maurer, Oakland. 185,000
F. C. Amoroso & Son, S. F. 187,000
Barrett & Hilly, S. F. 191,245
Dinwiddie Const. Co., S. F. 192,450
Bodenhamer Const. Co., Oak-
land. 196,227

Sprinkler System

J. H. Pinkerton, 927 Howard St.,
San Francisco. \$7392
The Turner Co., San Francisco. \$500
Automatic Sprinkler Co., Oakland 9141
Grinnel Co., of Pacific, S. F. 9250

Freight Elevators

Spencer Elevator Co., 166 7th St.,
San Francisco. \$6700
Otis Elevator Co., S. F. 7945
Pacific Elevator Equip. Co., San
Francisco. 8647

Rolling Doors

Kennerson Mfg. Co., 361 Brannan
St., San Francisco. \$4688
J. G. Wilson Corp., San Francisco 4772
Cornell Iron Works, S. F. 5050
Gunn, Carle & Co., San Francisco 5120
Rolph, Mills & Co., S. F. 5148

GARAGES AND SERVICE STATIONS

Plans Being Figured—Close June 30.
SERVICE STATION Cost, \$7000
SACRAMENTO, Sacramento Co., Cal.
Fifteenth and N Streets.
Service station (steel frame construc-
tion).

Owner—General Petroleum Co., 1924
Broadway, Oakland.

Plans by Cwner's Engineers.

Fill and Retaining Wall Bids Wanted.
SERVICE STATION Cost, \$7500
SAN FRANCISCO. Eighteenth Street
and Potrero Avenue.

Service station (steel frame construc-
tion).

Owner—General Petroleum Co., 1924
Broadway, Oakland.

Plans by Eng. Dept. of Owner.

Fill and retaining wall bids wanted.
General construction bids will be called
about July 15.

Sub-Contracts Awarded.
AUTO SALES BLDG. Cost, \$50,000
PALO ALTO, Santa Clara Co., Cal.
High St. and Forest Ave.

One-story reinforced concrete sales
and service building (105x225 feet;
Spanish design; showroom, offices,
super-service station, repair shop,
used-car department; flagstone
floors, hewn beam ceilings, tile
roof, electric heating).

Owner—Shaw Motor Co., Ltd., Emers-
on and Homer Sts., Palo Alto.
Designer—A. C. Shaw.

Specifications by J. D. Campbell, 15
Crescent St., Palo Alto.

Steel—W. C. Hauck & Co., 280 San
Bruno Ave., San Francisco.
Concrete—E. C. Bateman, Palo Alto.

Plumbing—J. Dahl, Palo Alto.
Bids are being taken by Mr. Camp-
bell, who is supervising construction.

GOVERNMENT WORK AND SUPPLIES

WASHINGTON, D. C.—Until July 2,
bids will be received by the Bureau
of Supplies and Accounts, Navy De-
partment, Washington, D. C., to fur-
nish and deliver miscellaneous sup-
plies and equipment to various West
Coast Navy Yards and Stations, as
follows:

Puget Sound, 3 laundry presses;
sch. 5945.
Mare Island, 3 motor-driven engine
lathes; sch. 5908.

Mare Island, 232 ball bearings; sch.
5919.

San Francisco, 4 corrugated fur-
naces; sch. 5943.

Mare Island, 300 pneumatic rivet
sets; sch. 5949.

Puget Sound, 250 sheets non-shat-
terable glass; sch. 5935.

Mare Island, 10,200 lbs. kraft paper;
sch. 5933.

Mare Island, 8,500 yds. black enamel

SAN DIEGO, Cal.—Construction of a \$175,000 garbage disposal plant is included in the proposal recently made to the city of San Diego for handling all the refuse of the city. The proposal came from Edwin Carrawe and associates in Los Angeles. No decision has yet been made by San Diego City Officials.

WATSONVILLE, Santa Cruz Co., Cal.—City council contemplates erection of a Neon sign on the Watsonville-Santa Cruz Highway at the city limits.

Plans Complete.
CAT & DOG HOSPITAL Cost, \$25,000
SAN MATEO, San Mateo Co., Cal.
Two-story frame and stucco cat and dog hospital, double garage separate (concrete floors, iron work, composition roof, steel sash, hot water heating).

Owner—Dr. Harold H. Groth, 2600 S El Camino Real, San Mateo.
Architect—Treichel and Goodpastor, 1540 San Pablo Ave., Oakland.

Specifications will be ready for bids the first of next week.

STOCKTON, San Joaquin Co., Cal.—Until June 29, bids will be received by B. L. Trahern, city clerk, to construct new grandstand at Oak Park to replace that destroyed by fire. Will have seating capacity of 2,750. Plans on file in office of clerk.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—City council has rejected bids to furnish the following materials or equipment during the fiscal year 1931-1932 and the same will be purchased in the open market: Fire hose; storage of, and making compression tests on, Portland cement concrete cylinders; mixed concrete; kerosene.

SAN FRANCISCO.—Until July 6, 3 P. M., under Proposal No. 728, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish:

5,000 cubic yards of red rock screenings and

10,000 cubic yards (more or less) of clay.
Above material for use of City Park Commission. Specifications obtainable from above office.

BERKELEY, Alameda County, Cal.—Until July 6, 3 P. M. bids will be received by C. F. Andrews, secretary, Berkeley High School District to furnish:

49 Underwood Typewriters or equal;
43 Royal Typewriters or equal;
28 L. C. Smith Typewriters or equal;
6 Remington Typewriters or equal.

Certified check of 10% required with bid. Specifications and further information available from above.

SAN JOSE, Santa Clara Co., Cal.—City council takes under advisement for one week the following bids to furnish radio equipment, as follows:

(a) One 100-watt police alarm broadcast transmitter (RCA - ET - 3670 or equal).

(b) Ten (more or less) police communication receivers:

R. C. A. Victor Co., Inc., one 100-watt police alarm broadcast transmitter, #2936; 10 receivers, less tubes, \$111.50 each.

Ralph Berggren, (Berggren Electric Service) Receivers only, \$110 in lots of eight or more, \$115 for single receivers. Less tubes, deduct, \$5; less B batteries, deduct \$7. Installation cost, \$10 set.

Gray-Electric Co., Transmitter, \$5,800; receivers, \$92.50 each.

Electric Lighting Supply Co., transmitter, \$4890; receivers, \$103.25 each.

It is estimated that the city will require at least 10 receivers to equip its auto patrols and cars operated by the chief of police and chief of the fire department.

SAN FRANCISCO.—Eddie Gravel Co., Golden Gate Adas Materials Co., and Ready Mixed Concrete Co., both of San Francisco, at \$8.00 cu. yd., submitted identical bids to the City Purchasing Agent, under Proposal No. 729, to furnish approximately 700 cu. yds. of ready mixed concrete. Taken under advisement.

OAKLAND, Calif.—City council has awarded contracts as follows to furnish and deliver miscellaneous supplies and equipment during the fiscal year 1931-1932:

Gasoline, engine distillate and Ethyl gasoline, to Union Oil Co., 1924 Broadway, Oakland.

Fuel oil to Associated Oil Co., 2395 Webster St., Alameda.

Dry concrete mix to Hutchinson Co., 1450 Harrison St., Oakland.

Corrugated iron culverts to California Corrugated Culvert Co., Fifth and Parker Sts., Berkeley.

Emulsified oil and asphalt to American Bitumuls Co., 860 45th Ave., Oakland.

The American Standards Association has announced the appointment of H. Lawrence, mining engineer, and S. W. Benham as assistant engineer on the staff of the association. Mr. Lawrence will have supervision of all the mining, chemical and ferrous and non-ferrous metallurgy projects being developed under the procedure of A.S.A. Mr. Benham will assist in the supervision of civil engineering and transportation projects. Mr. Lawrence comes to the American Standards Association from the International Agricultural Corporation, where he was employed as mining engineer. From 1924 to 1930 Mr. Lawrence was connected with the U. S. Bureau of Mines as metallurgist. Mr. Benham was connected with the Portland Cement Association and the Johns-Manville Corporation.

The importance of careful inspection of materials purchased on specification is pointed out by the Electrical World in a recent editorial. The inclusion of specifications in some purchase orders, the writer of the editorial asserts, is merely a part of a ritual and has little justification since no basis for inspection is provided.

"Of course," the editorial says, "if material or equipment that is bought on specification should go 'haywire' during operation, from inherent fault, then the buyer may recover from the seller. But the fault may be proved to be inherent, and one caused since the purchase. That is none too easy if the purchase was made several years before. Furthermore, a fault disclosed by operation usually does damage in bringing itself to view, and although there may be recovery for the fault itself, it will be extremely difficult to collect for the damage it caused. It is much better to find the fault before it has a chance to advertise, perhaps violently, its presence in operation.

"The only way to ascertain whether goods purchased are in conformity with the specifications is to inspect them and find out. The time to inspect them is before the bill is paid. Inspection of purchases must be a regular organized function in charge of responsible men. Only in this way can purchase by specification be more than a futile gesture, a vestigial habit."

His Angier, who has been western manager of the Angier Corporation, with headquarters in Los Angeles, has been called back to the factory at Farmington, Mass., to assume the general management of the corporation. Mark Enfield will be in charge of the territory. E. K. Wood Lumber Co., are the distributors of his products in California, Arizona and Nevada.

City Mill & Lumber Company of Santa Barbara, Ltd., has filed articles of incorporation with the Secretary of State. The company is capitalized for \$50,000. Directors are: W. E. Wheatley, Maxwell Nichols, Ernest N. Carter, Elizabeth Williams and John C. Canfield.

Cambridge-Wheatley Co., Inc., the manufacturers, formerly operating as the Rossman Corporation of California, announces the removal of offices and show rooms from 49 Geary street to 1155 Harrison street. E. L. Bradley is division manager for the company.

The Cement Contractors' Association of Southern California is considering the adoption of a standard, scientific, workable specification for cement topping, both with sand and with pea gravel. A standard bid form for concrete work is also under consideration and will be worked with the co-operation of Portland Cement Association.

Contracts for \$88,540,224 worth of public and semi-public construction were awarded last week. It is announced by the President's Emergency Employment Committee. This brings contracts for public projects since December 1 to \$1,769,355,499.

A. W. Copley of San Francisco was elected vice-president of the American Institute of Electrical Engineers at the Institute's summer convention in Asheville, N. C., last Monday. Charles E. Selmer of East Pittsburgh, Pa., was elected president. H. V. Carpenter of Fullman, Wash., was elected a director.

Engineering News Section

BRIDGES

VENTURA COUNTY, Calif.—Until July 15, 2 P. M. bids will be received by State Highway Commission to construct undergrade crossing under tracks of Southern Pacific Railroad about 1/2 mile west of El Rio (VI-40-60-13) consisting of two concrete abutments with wing walls, installing drainage system and pumping equipment and grading and paying approximately thirty-three hundredths (0.333) of a mile of roadway with Portland cement concrete and bituminous macadam.

MADERA COUNTY, Calif.—As previously reported bids will be received July 15, 2 p. m. by State Highway Commission to construct a steel stringer bridge with concrete deck across Fresno River at Madera (VI-Mad-4-D) consisting of ten 41'-0" spans and two 40'-9" spans on steel pile bents.

- Quantities involved are:
- (1) 165 cu. yds. structure excavations;
 - (2) 3220 lin. ft. furnishing steel piles, including test piles;
 - (3) 91 each, driving steel piles, including test piles;
 - (4) 610 cu. yds. class A Portland cement concrete;
 - (5) 55,000 lbs. reinforcing steel;
 - (6) 482,000 lbs. structural steel;
 - (7) 850 lbs. bronze expansion plates;
 - (8) 1050 lin. ft. timber railing;
 - (9) 1 lot miscellaneous items of work.

MARIN AND SONOMA COUNTIES, Calif.—As previously reported bids will be received by State Highway Commission on July 15, 2 p. m. for repairs to a bridge across Petaluma Creek at Green Point (IV-Marin & Son-S-A) consisting of replacing the floor on the bascule span and making repairs, replacements and additions to operating equipment. Quantities involved are:

- (1) 1 only, existing timber floor of bascule span to be removed;
- (2) 12 cu. yds. concrete in existing structure to be removed;
- (3) 25 cu. yds. class A Portland cement concrete (placed by tremie);
- (4) 32 cu. yds. class A Portland cement concrete (structure);
- (5) 2200 lbs. reinforcing steel;
- (6) 11,500 lbs. structural steel;
- (7) 2750 lbs. cast steel;
- (8) 3 M ft. board measure Douglas fir timber, structural grade;
- (9) 28 M ft. board measure Redwood timber, dense select all-heart structural grade;
- (10) 400 sq. yds. asphalt plank;
- (11) 1 lot repairs, replacements, and additions to operating equipment;
- (12) 1 lot miscellaneous items of work.

MARTINEZ, Contra Costa Co., Cal.—Definite action on a proposal for construction of a reservoir for water shortage will be taken by the City Council the latter part of July. The new construction will require a suction line from the pump house to the California Water Service corporation meter, an outlet pipe and 200 feet of 12 inch line to a Main street connection.

MONTEREY COUNTY, Cal.—G. J. Ulrich Const. Co., Modesto, at \$23,705 submitted low bid to State Highway Commission June 24 to construct a reinforced concrete bridge across Granite Creek about 14 miles south

of Monterey, consisting of one 127-ft. open spandrel arch span, two girder spans, each approximately 44 ft. long and two girder spans, each approximately 36 ft. long. Following is a complete list of bids:

Ulrich Const. Co., Modesto	\$23,705
Guthrie Bros., Oakland	35,146
Hanrahan Co., San Francisco	35,308
Cheng Bros., Los Angeles	35,970
Fred J. Maier & Son, Eureka	39,677
Beddenham Const. Co., Oakland	40,178
Roeck & Callett, San Rafael	40,287
M. B. McGowan, San Francisco	40,446
R. B. McKenzie, Red Bluff	42,000

RIVERSIDE COUNTY, Cal.—Everts & Dunn, 708 Santa Monica Blvd., Los Angeles, at \$105,865 submitted low bid June 24 to State Highway Commission to widen the existing multiple span arch bridge across the Santa Ana River near Riverside, by constructing alongside existing bridge a multiple span reinforced concrete arch bridge consisting of two 95 ft. spans, two 102 ft. spans and one 106 ft. span on concrete piles and abutments with pile foundations. Following is complete list of bids:

Everts & Dunn, Los Angeles	\$105,865
Matich Bros., Elsmore	116,096
Oberg Bros., Los Angeles	116,683
Dodehamer Const. Co., Oakland	120,920
Owl Truck Co., Compton	125,347
Robinson-Roberts Co., L. A.	125,605
Lynch-Cannon Eng. Co., L. A.	128,649
Merritt, Chapman & Scott San Pedro	134,031
R. H. Travers, Los Angeles	150,930

SEARS POINT, Sonoma Co., Cal.—Lancaster J. Harrelson, 400 Young Bldg., San Francisco, awarded contract by Sears Point Toll Road Company to construct Tolay Creek drawbridge to replace unit destroyed by fire. The work will involve an expenditure of approximately \$30,000.

VALLEJO, Solano County, Calif.—Fire completely destroyed the Tule Creek drawbridge on the Sears Point toll road, 12 miles southwest of Vallejo. It was a 125 foot wooden structure.

DREDGING, HARBOR WORKS & EXCAVATIONS

SANTA CRUZ, Santa Cruz Co., Cal.—Frank Wilson heads a committee appointed by the Santa Cruz Yacht Club, to investigate the possibility of improving the mouth of the San Lorenzo River with a jetty, breakwater and yacht harbor with appurtenances for pleasure boating and other seaside amusements. Preliminary surveys have been made and a report will be submitted to the directors of the club in the immediate future.

IRRIGATION PROJECTS

GRIMES, Colusa Co., Cal.—A. J. Atran is chairman of a committee seeking the formation of an irrigation district in the Grimes section to include approximately 10,000 acres with an estimated cost of placing water on the lands at \$5 per acre. A general meeting of landowners in the district will be held July 1 to consider tentative plans.

MACHINERY AND EQUIPMENT

SAN DIEGO, Cal.—Until 11 A. M., June 30, bids will be received by city purchasing agent, A. V. Goeddel, for furnishing one power grader in accordance with specifications prepared by the Manager of Operations and on file at the office of the Purchasing Department, 524 F St. Certified check, 5%.

PLACENTIA, Orange Co., Cal.—Until 7:30 P. M., July 6, bids will be received by the Placentia Union Grammar School District for furnishing one Mack school coach chassis, type No. 50, or equal; also for furnishing one Crown or Egge school coach body. Certified check or bond for 10% required. Mrs. Hazel Francis, clerk.

MERCED, Merced Co., Calif.—Until July 7, 7 P. M., bids will be received by Walter Mink, clerk, Merced Union Grammar School District, to furnish one 45-passenger school bus body and one chassis of sufficient strength and wheel base to accommodate this body. Bids will be received separately on the body and chassis. Certified check 10% payable to clerk required with bid. Specifications obtainable from W. E. Bedesen, engineer, Shaffer Bldg., Merced.

NAPA, Napa Co., Cal.—County supervisors authorize purchase of 30-hp. Caterpillar Tractor from the Ross Berglund Company for \$2,660, f.o.b. Napa.

RICHMOND, Contra Costa Co., Cal.—Until July 7, 2 P. M., bids will be received by W. T. Helms, secretary, Richmond Union High School District, to furnish and deliver:

(a) One gasoline motor three-ton bus chassis capable of accommodating 50 passenger bodies, the motor to be of sufficient size to attain a speed of at least thirty-five miles per hour without undue racing of the engine. Price must include speedometer, extra tire carrier, and extra tire, electrical equipment, not less than 10 ply tires with dual tires in rear.

(b) A bus body for the above type of chassis with driver controlled entrance door and driver controlled emergency door at the rear. Price must include a complete job, including painting, lettering, etc. Before submitting bids, secure approval of seating plan.

Further information obtainable from secretary.

RENO, Nevada.—Associated Equipment Co., Chicago, at \$3,675 submitted low bid to city council to furnish 50-hp. tractor for street department. Other bids, all taken under advisement, were: Nevada Hardware Co., \$3,725; Caterpillar Tractor Co., Reno, \$4,945.

MOUNTAIN VIEW, Santa Clara County, Calif.—Until July 13, 8 P. M. bids will be received by Mountain View Union High School District to furnish school coach body and school coach chassis. Specifications and further information available from D. Brunton, principal, Mountain View.

KINGSBURG, Fresno Co., Cal.—Until July 8, 8 P. M., bids will be received by Kingsburg Joint Union High School District to furnish two 30- to 45-passenger school buses, not to exceed \$2,550 each in cost. Bids to include chassis and body and to be made with and without consideration of trade-in on two old Garford buses. Specifications and further information available from A. E. Swanson, clerk of board.

FRESNO, Fresno Co., Calif.—Until July 11, 9 P. M., bids will be received by the Central Union High School District to furnish completely installed one body to take the place of that now being used on said Districts Buses No. 10. Plans and further information available from J. A. Brown, Route 19, Box 178, Fresno, Calif.

PLACERVILLE, El Dorado County, Calif.—Yellow Coach Company at \$2,228 awarded contract El Dorado County High School district to furnish and deliver one 50-passenger school bus chassis and one 50-passenger school bus body.

ARCATA, Humboldt Co., Cal.—Bids will be asked soon for a school bus with a capacity of 40 students, fitted with all modern safety appliances, by the Arcata Union High School Dist.

FIRE EQUIPMENT

SACRAMENTO, Sacramento County, Calif.—Until June 29, 3 P. M. bids will be received by U. S. Engineers Office, California Fruit Building, Sacramento to furnish 4 Foamite Fire Extinguishers, 2½ gal.; Pyrene Fire Extinguishers, 2½ gal.; 12 Pyrene Fire Extinguishers, 1 quart; 24 Refills for 2½ gal. Arrow Fire Extinguishers; 8 Refills for Foamite Fire Extinguishers, 2½ gal.; 6 Refills for Pyrene Fire Extinguishers, 2½ gal.; 2 Refills for Foamite Fire Extinguishers, 2½ gal.; 48 Refills for Pyrene Fire Extinguishers, 1 quart.

Specifications and further information available from above.

SUNNYVALE, Santa Clara County, Calif.—Until July 6, 8 P. M. bids will be received by I. Trubschenck, city clerk to furnish 750 feet an alternate of 50 foot lengths of Standard Double Jacket 2½ in. fire hose guaranteed to stand four hundred lbs. initial test pressure with heavy duty couplings. Certified check of 5% required, payable to Mayor. Further information available from above.

RENO, Nevada.—Durham-Chevrolet Co., Reno, at \$13,495 submitted low bid to city council to furnish new Mack fire truck. Alternate bid of \$12,995 submitted by same bidders for similar truck with dual reduction drive. Others, all taken under advisement, were: Snelson Motor Co., representing the American La France Co., \$13,500; Segrave Co. of Columbus, Ohio, \$13,500.

RESERVOIRS AND DAMS

PANAMA CANAL ZONE.—Until ten thirty A. M., Sept. 1, bids will be received by the office of the Panama Canal, Munitions Bldg., Washington, D. C. (Harry Burgess, Governor), for the construction of the Madden Dam, power plant and appurtenant works, Madden Dam Project, Canal Zone. The works is located near the village of Ahajuela on the upper Chagres river, in the Panama Canal Zone. The principal items are:

855,000 cu. yds. excav., all classes;
646,000 cu. yds. earth and rock fills in embankments;
518,000 cu. yds. concrete;

38,000 cu. ft. of grout;
35,000 lin. ft. drilling grout holes;
2,500,000 lbs. bars (main);
75,000 lbs. small to total pipe and fittings, installing;
765,000 lbs. large metal conduits, installing;
1,187,000 lbs. structural steel, installing;
6,700,000 lbs. gates, hoists and other metal work, installing.

Materials to be furnished by the contractor and those furnished by the Government are described in the specifications. Proposal guarantee, 10%. Plans and specifications may be obtained upon payment of \$2.50.

PIPE LINES, WELLS, ETC.

VISTA, San Diego Co., Cal.—Until 2 P. M., July 11, bids will be received by the Vista Irrigation District for trenching approximately 46,000 feet of trench at an average size of 18 by 35 in. and hauling and welding approximately 46,000 ft. of Matheson steel pipe ranging from 8-in. to 4-in. in diameter. Specifications obtainable from the secretary, W. C. Witman.

PITTSBURGH, Contra Costa Co., Cal.—J. M. Buch, 1201 East Twelfth St., Oakland, at \$125 awarded contract by city council for drilling and casing well in connection with the municipal water system.

WATSONVILLE, Santa Cruz Co., Cal.—S. C. Marcus, Watsonville, at \$142.92 awarded contract by city council to drill well in Second Street for municipal water department.

WATER WORKS

MARTINEZ, Contra Costa County, Calif.—Board of Directors, of the Contra Costa Golf Club plan to install \$1,000 automatic sprinkling system on the new nine hole course.

WOODLAND, Yolo Co., Cal.—Byron-Jackson Co., Berkeley, at \$152.50 awarded contract by city council to furnish one 1000-gallon turbine pump for water system. Other bidders were: Norman B. Miller, \$1747; Sterling Pump Corp., \$1945; Layne & Bowler, \$1967.

SAN FRANCISCO.—Until July 6, 2 P. M., bids will be received by Leonard S. Leavy, purchasing agent, 270 City Hall, to furnish 200 fire hydrants, complete and 50 extra hydrants bodies for fire department. Specifications and further information available from above.

OAKLAND, Cal.—Until July 8, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 Sixteenth St., to construct and furnish from 22nd and Adeline Streets, valve operating mechanisms for Lafayette and Wabash Creek Pumping Plants. Specifications No. 44 obtainable from above office.

SACRAMENTO, Calif.—City council has sold the \$480,000 bond issue to finance construction of a new sedimentation basin in connection with municipal water system and bids will be asked this week for driving the piles in connection with the project. Harry G. Denton is city clerk and Fred J. Klaus, city engineer.

LONG BEACH, Cal.—California Industries, Ltd., Monrovia, submitted the low bid to city manager, C. C. Lewis, at 14c ft. for 30,000 ft. of 2-in. bell and spigot cast iron water pipe. Other bids were: Central Foundry, 18.8c; Crane Co., 19.5c; Pacific States Cast Iron Pipe Co., 19.5c; American Cast Iron Pipe Co., 20.5c; Grinnell Co., \$20.08 per C.

VALLEJO, Solano Co., Cal.—American Cast Iron Pipe Co., 808 Balboa Bldg., San Francisco, at \$29,005.70 awarded contract by city council to furnish bell and spigot cast iron pipe as follows:
1,776 ft. 20-in. cast iron pipe, class B or class 100;
6,778 ft. 21-in. do;
1,152 ft. 21-in. cast iron pipe class C or class 250 (alternate bid);
1 length of 16-in. cast iron pipe, class B or class 100;
76 fittings.

Complete list of bids follows:
"American Cast Iron Pipe Co., San Francisco, .. \$25,934.32
American C. I. Pipe Co., S. F., \$28,905.70
U. S. C. I. Pipe & Foundry Co., San Francisco .. \$1,277.42
R. D. Wood, Philadelphia .. \$1,842.93
Bid included, but did not bid on Alternate "C".

VISTA, San Diego Co., Cal.—Until 2 P. M., July 11, bids will be received by the Vista Irrigation District for furnishing 6,000 ft. of steel pipe ranging in diameter from 7-in. to 8-in. Specifications may be obtained from the secretary, W. C. Witman, at the office of the district at Vista.

PITTSBURGH, Contra Costa Co., Cal.—Bids will be asked shortly to furnish and install pump in connection with new water well for which a drilling contract has just been let. Geo. T. Oliver is city manager.

VALLEJO, Solano Co., Calif.—City council plans purchase of six 1½-in. fire hydrants for installation in the Cordelia section for fire protection, residents in the vicinity having petitioned for the installation. T. D. Kilkenny is city engineer.

PLAYGROUNDS & PARKS

SAN FRANCISCO.—Until July 6, 3 P. M., under Proposal No. 738, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish:

5,900 cubic yards of red rock screenings and
10,000 cubic yards (more or less) of clay.

Above material for use of City Park Commission. Specifications obtainable from above office.

STREETS AND HIGHWAYS

SAN RAFAEL, Marin Co., Cal.—Until July 6, 8 P. M., bids will be received by Eugene W. Smith, city clerk to improve Laurel Place between Lincoln Avenue and west end of Laurel Place; portions of Nye and Wilkins Streets, involving:

- (1) 1,619 cu. yds. excavation;
- (2) 64,306 sq. ft. 3-in. rock subbase;
- (3) 64,306 sq. ft. 5-in. hydraulic concrete pavement;
- (4) 37 lin. ft. concrete curb (only);
- (5) 1,578 lin. ft. conc. gutter (only);
- (6) 3,447 lin. ft. conc. curb and gutter;
- (7) 2 standard catchbasins, complete;
- (8) 47 lin. ft. 16-in. C.I.P. culvert;
- (9) 153 lin. ft. 48x24-inch arch culvert, complete;
- (10) 14 lin. ft. 4x2x4-in. do;
- (11) 2 lampholes, complete;
- (12) 6 manholes, complete;
- (13) 238 lin. ft. 4-in. ironstone pipe;
- (14) 1,048 lin. ft. 6-in. do;
- (15) 1 cu. yd. concrete sewer protection.

Certified check 10% payable to city required with bid. Plans on file in office of clerk, Herbert K. Brainerd, city manager.

SEBASTAPOL, Sonoma County, Calif.—City Council declares intention (209A) to improve McFarlane Avenue by widening 20 feet for a distance of

205 feet. Further information available from city clerk.

EUREKA, Humboldt County, Calif.—Until July 10, 10 A. M. bids will be received by Fred M. Kay, County Clerk to surface with Emulsified Asphalt the following roads:

DISTRICT NO. 2—From the State Highway at Alton to the end of the Warrentite Pavement at Hydenville, a distance of two and six-tenths (2.6) miles. To be surfaced eighteen feet (18') wide. From the end of the Warrentite Pavement at Rohnerville to the end of the Warrentite Pavement at Hydenville, via Wolverton Gulch, a distance of two and five-tenths (2.5) miles. To be surfaced eighteen feet (18') wide.

DISTRICT NO. 3—The Cannibal Island road from the end of the Warrentite Pavement to Quills Slough, a distance of seven-tenths (.7) miles. To be surfaced eighteen feet (18') wide. The Light House road from the end of the Warrentite Pavement to Quinn's Road, a distance of two and nine-tenths (2.9) miles. To be surfaced eighteen feet (18') wide. The Dungan Ferry Road from the end of the Warrentite Pavement toward Eel River, to be surfaced sixteen feet (16') wide for a distance of eighty-five hundredths (.85) miles.

Certified check of 5% required. Specifications obtainable from County Surveyor.

EUREKA, Humboldt County, Calif.—Until July 6, 10 A. M. bids will be received by Fred M. Kay, County Clerk to construct concrete sidewalk around the "Veterans Memorial Building." Certified check of 5% required. Plans and specifications available from County Surveyor.

EL DORADO COUNTY, Cal.—As previously reported bids will be received by State Highway Commission to surface about five and two-tenths (5.2) miles in length between Mays and the Nevada State Line (111-E-D-11-K) with bituminous treated sealed surfacing material and one and eight-tenths (1.8) miles between Bay View Rest and 1 mile north of Eagle Falls (111-E-D-33-B) surfacing to be bituminous treated. Quantities involved are:

- (1) 3390 cu. yds. imported borrow;
- (2) 7800 cu. yds. selected surfacing material;
- (3) 100 bbls. light fuel oil;
- (4) 765 tons cut-back asphalt, Grade E;
- (5) 370 stations mixing cut-back asphalt and surfacing material;
- (6) 273 stations constructing shoulders

BERKELEY, Alameda Co., Cal.—City council declares intention (659) to improve Oxford St., from west extension of Hearst Ave. east of Oxford St., north to Rose St. and Rose St., from north extension to Shattuck Ave. to Spruce St., and Spruce St. from Rose St. to northeast city limits, involving grading; concrete pavement; concrete curbs and gutters; culverts; street and sanitary sewers, etc. 1911 Act and Bond Act 1915. Hearing July 7. City will pay \$31,200 of the total cost from the city treasury general fund and an additional \$32,200 from the Trust Fund known as the Spruce St. Improvement Fund. Florence E. Turner is city clerk. Harry Goodridge, city engineer.

SACRAMENTO, Cal.—Until July 2, 5 P. M. bids will be received by H. G. Denton, city clerk, (2307) to improve alley between J and K, 25th and 29th streets, involving grading; concrete drains with vit. sewer pipe connections; construct vit. sewers; reconstruct manhole; install one-inch water main connections, grading, hydraulic concrete pavement. 1911 Act. Bond Act 1915.

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Fred J. Klaus, city engineer.

MARIPOSA COUNTY, Calif.—Until July 15, 2 P. M. bids will be received by State Highway Commission to grade between Orange Hill School and Pain Flat (VI-334-18-A-L) about seven and four-tenths (7.4) miles in length.

LOS ANGELES COUNTY, Calif.—Until July 15, 2 P. M. bids will be received by State Highway Commission to grade about twelve and five tenths (12.5) between Fin Creek and Gorman (VII-L-A-4-I&J).

NAPA, Napa Co., Cal.—Until July 7, 10 A. M. bids will be received by Jas. A. Daly, county clerk, for cut-back asphaltic wearing surface on 10 miles from the Putah Creek Bridge through the town of Monticello to a point above the entrance to the Joseph W. Harris Ranch. Specifications on file in office of clerk.

SAN JOSE, Santa Clara Co., Cal.—Until July 6, 11 A. M. bids will be received by Henry A. Pfister, county clerk, to improve portions of the Senter, Tully and Story roads in Supervisor District No. 2. Depressions in the Senter road, from the San Jose city limits to the Tully road and from Singleton to the Monterey road, will be filled with asphaltic concrete. The same work will be done to the Story roads from Coyote Creek to McLaughlin Ave. and Tully road from the Monterey road to the King road. Specifications obtainable from Robert Chandler, county surveyor, on payment of \$1.

SAN JOSE, Santa Clara Co., Cal.—Until July 6, 11 A. M. bids will be received by Henry A. Pfister, county clerk, for all macadam pavement on the Foxworthy road to Union Ave. and Ahmader road to Union Ave. in Supervisor Districts Nos. 4 and 5. Specifications obtainable from Robert Chandler, county surveyor, on payment of \$1.

HUMBOLDT COUNTY, Nev.—Until July 1, 3:30 P. M. bids will be received by S. C. Durkee, state highway engineer, for furnishing, heating and applying asphaltic fuel oil and mixing it with a crushed rock or crushed gravel surface from Winnemucca to Stonehouse, Route 1, Sections A4, B, C1, and C2, a length of 37.7 miles, involving:

- (1) 758,571 gals. asph. fuel oil applied to roadway surface;
- (2) 33.77 miles mixing asph. fuel oil with crushed rock or crushed gravel surface;
- (3) 33.77 miles rebuilding and finishing shoulders.

NOTE: The oil shall be delivered at the following railway sidings and in the quantities shown: Winnemucca siding, 194,027 gals.; Bliss siding, 132,667 gals.; Golconda siding, 347,995 gals. Valmy siding, 158,972 gals. Average haul on entire contract, 4.77 miles. Plans may be obtained from engineer at Carson City. Certified check, 5%.

DOUGLAS COUNTY, Nev.—Until July 1, 3 P. M. bids will be received by S. C. Durkee, state highway engineer, for furnishing, heating and applying asphaltic fuel oil and mixing it with a crushed rock or crushed gravel surface from 5 miles east of Holbrook to 2 miles north of Carters, and from 4 miles south of Hydenville to Giddensville, Route 2, Sections A2, B1 and B2, a length of 19.06 miles, involving:

- (1) 402,646 gals. asphaltic fuel oil applied to roadway surface;
- (2) 19.06 miles mixing asphaltic fuel

oil with crushed rock or crushed gravel surface;

- (3) 19.06 miles rebuilding and finishing shoulders.

NOTE: The oil shall be delivered at the following railway siding and in the quantity shown: Minden, 402,646 gals. Average haul on entire contract, 13.04 miles. Plans may be obtained from engineer at Carson City. Certified check, 5%.

ELKO COUNTY, Nev.—Until July 1, 2 P. M. bids will be received by S. C. Durkee, state highway engineer, to construct state highway between east foot of Pequops and 4 miles east of Silver Zone, Route 1, Sections F and G2, a length of 18.76 miles, involving:

- (1) 85,100 cu. yds. roadway excav.
- (2) 875 cu. yds. structure excav.
- (3) 7160 cu. yds. selected borrow excavation in place;
- (4) 63,077 yd. sta. overhaul;
- (5) 10.31 miles prepare subgrade and shoulders;
- (6) 905 demolish headwalls;
- (7) 8.45 miles prepare shoulders;
- (8) 59,300 cu. yds. crushed rock or crushed gravel surface in place;
- (9) lump sum, furnish water equip.;
- (10) 4245 M. gals. applying water;
- (11) 30 cu. yds. class A concrete;
- (12) 20 cu. yds. class B concrete;
- (13) 206 lin. ft. 15-in. corr. metal pipe in place;
- (14) 1018 lin. ft. 18-in. do;
- (15) 518 lin. ft. 24-in. do;
- (16) 214 lin. ft. 30-in. do;
- (17) 36 lin. ft. 36-in. do;
- (18) 15 corr. metal pipe culvert extensions;
- (19) 163 cu. yds. cement rubble masonry in place;
- (20) 110 cu. yds. riprap in place;
- (21) 1750 lin. ft. remove woven wire guard fence;
- (22) 162 monuments in place;
- (23) 3 furnish and install posts for F. A. markers;
- (24) 18.76 mi. finishing roadway.

Plans may be obtained from Carson City on deposit of \$15, of which \$10 will be returned. Certified check 5%.

CLARK COUNTY, Nev.—Until July 1, 2:30 P. M. bids will be received by S. C. Durkee, state highway engineer, for furnishing, heating and applying asphaltic fuel oil and mixing it with a crushed rock or crushed gravel surface from west slope of Mormon Mesa to Lower Virgin River Bridge, Route 6, Sections C2 and H1, a length of 19.68 miles, involving:

- (1) 461,827 gals. asphaltic fuel oil applied to roadway surface;
- (2) 19.68 miles mixing asphaltic fuel oil with crushed rock or crushed gravel surface;
- (3) 19.68 miles rebuilding and finishing shoulders;
- (4) 8584 sq. yds. oiling shoulders and side slopes, including furnishing 4392 gallons asphaltic fuel oil.

NOTE: The oil shall be delivered at the following railway siding and in the quantity shown: Arrow Siding, 461,827 gals. Average haul on entire contract, 14.49 miles. Plans may be obtained from engineer at Carson City. Certified check, 5%.

STOCKTON, San Joaquin Co., Cal.—Until July 20, bids will be received by Eugene Graham, county clerk, to improve the Mosely Road. Plans obtainable from Julius Manthey, county surveyor.

STOCKTON, San Joaquin Co., Cal.—Willard and Biasotti, Stockton, at \$9,832 awarded contract by county supervisors to improve three miles of the A. O. Stewart Road.

GILROY, Santa Clara Co., Calif.—city council, due to protests of property owners, has cancelled proceedings to improve 4th, 7th, Rosanna, Church and Railroads Sts., etc., under Resolution of Intention No. 7, in-

volying in the main 360,000 sq. ft. 5-in. asphalt concrete pave, curbs, walks, etc. R. W. Fisher, engineer, 74 N First St., San Jose.

WILLIOW GLEN, Santa Clara Co., Cal.—Until July 13, bids will be received by Dana Thomas, city clerk, (80) to widen and extend Kottenberg Avenue in Acq. and Imp. Dist. No. 1, involving:

- (1) 55,685 sq. ft. 4½-in. asphalt concrete pavement;
 - (2) 3,060 lin. ft. P.C. concrete curb;
 - (3) 7,582 sq. ft. P.C. concrete gutter;
 - (4) 15,300 sq. ft. P.C. conc. sidewalk.
- Acq. and Imp. Act 1925. Plans on file in office of city clerk. H. N. Bishop, engineer, Bank of Italy Bldg., San Jose.

HAYWARD, Alameda Co., Calif.—City Engineer Jesse B. Holly is preparing specifications for a 14-ft. setback on the west side of Castro St. from C Street to the southern city limits. James D. Smalley, city water superintendent, was authorized to make extensions of the water system in the Jacobsen tract near Kelly Avenue.

ELKO COUNTY, Nev.—Until Aug. 5, 2 P. M., bids will be received by S. C. Durkee, district engineer, Carson City, to furnish and apply asphaltic oil to the roadway surface in Elko County between 4 miles east of Silver Zone and Wendover, approximately 16.36 miles in length. Certified check of \$5 required with bid. Plans and specifications will be ready for examination about July 20 at the offices of the following: County Clerk's Office at Elko; the Highway Department Division Offices at Reno and Elko, and at the District Office of the Bureau of Public Roads, 461 Market St., San Francisco.

SACRAMENTO, Sacramento Co., Cal.—H. Gould, 1922 27th St., Sacramento, awarded contract by city council for clearing and grading site for the new pre-treatment works at the municipal filtration plant. Following is a complete list of bids received:

- (a) clearing site; (b) grading site.
- H. Gould, Sacramento (a) \$800; (b) \$2500, 60 days.
- M. J. Krenator, Sacramento (a) \$1185; (b) \$2380, 30 days.
- Delta Dredging Co., Stockton (a) \$1500; (b) \$4400.
- J. R. Reeves, Sacramento (a) \$1800; (b) \$6255.

SAN JOSE, Santa Clara Co., Cal.—Until June 29, 8 P. M., bids will be received by J. J. Lynch, city clerk, (5354) to improve Plomema Ave. from San Pedro St. to a point 402 ft. westward and a portion of San Pedro St., involving grading, 1½-in. asphalt concrete surface pavement on 3-in. asphalt base, cem. conc. gutters, walks and inlets, 8-in. vit. pipe drains. 1911 Act. Certified check of 10% required with bid. Specifications and further information obtainable from above. Wm. Popp, city engineer.

SAN JOSE, Santa Clara Co., Cal.—City Council declares intention (5393) to improve Sixteenth street from Jackson to Taylor Sts. in concrete grading, paved with asphaltic concrete wearing surface one and one-half (1½) inches thick, with asphaltic concrete foundation three (3) inches thick; cement concrete curbs; gutters; cement concrete walks; six (6) inch vitrified pipe sanitary main sewer; brick manholes; 4-in. vit. pipe house laterals; wire branches. Act 1911. Hearing June 29, at 8 P. M. J. J. Lynch, city clerk. Wm. Popp, city engineer.

EUREKA, Humboldt Co., Cal.—Smith Brothers awarded contract at \$194 cu. yd. of \$3880 for total work by County Supervisors to furnish 2000

cubic yards or more of crushed rock for Martins Ferry Road; same to be surfaced with crusher run 7-foot wide and 6-inches thick, beginning at a point near French Camp and extending to Martins Ferry in Road District No. 5. Complete list of bids follows:

Smith Bros.	\$3850
W. S. Selvaage	4150
J. C. Kjer	4900
H. C. Andrews	5900

MONTREY, Monterey Co., Cal.—Until July 7, 7 P. M., bids will be received by C. A. Dorsey, city clerk, (3146) to improve Hoffman Ave., bet Ocean View Ave. and Lighthouse Ave. and from Lighthouse Ave. to Hawthorne St. and Prescott Ave. from Ocean View Ave. to Lighthouse Ave. and from Lighthouse Ave. to Hawthorne St., involving paving with 1½-in. asphalt macadam surface. 1911 Act. Bond Act 1915. Certified check of 10% required with bid. Plans and specifications obtainable from city clerk.

MONTREY, Monterey Co., Cal.—Until July 7, 7 P. M., bids will be received by C. A. Dorsey, City Clerk, (3137) to improve David Avenue, bet Hawthorne and Pine Sts., and from Pine St. to west city limits, involving paving with 1½-in. asphalt macadam surface on existing waterbound macadam base; 24 4-in. house connection sewers. 1911 Act. Bond Act 1915. Certified check of 10% required with bid, payable to City of Monterey. Specifications on file with city clerk.

EUREKA, Siskiyou Co., Calif.—City Council declares intention (9C) to improve Center Street, Lane Street, intersections of Miner with Oregon and Fourth, Broadway, Gold Street, portion of Main adjacent to Broadway involving grading; hydraulic cement concrete curbs; curbs, and corrugated iron pipe culverts with concrete headwalls and aprons, junction manholes, cement concrete catchbasins; corrugated iron pipe; hydraulic cement concrete pavement with emulsified asphaltic penetration macadam. Bond Act 1915. Improvement Act 1911. Hearing July 2, 8 P. M. U. F. Brown, city clerk.

EL DORADO COUNTY, Calif.—Until July 15, 2 P. M. bids will be received by State Highway Commission to surface about one and eight-tenths (1.8) miles between Bay View Rest and 1 Mile North of Eagle Falls (111-E-14-38-B) surfacing to be bituminous treated

SANTA CLARA COUNTY, Calif.—Until July 15, 2 P. M. bids will be received by State Highway Commission to grade and pave about one and four-tenths (1.4) miles in length between Coyote Creek and San Jose (IV-SCL-5-A) with Portland cement concrete and asphalt concrete.

ALAMEDA, Alameda County, Calif.—Healy-Moore Company, 334 High Street, Oakland, awarded contract at \$3.25 per barrel to furnish 2000 barrels more or less Calo L 2 road oil or equal and 2000 barrels more or less Bitumuls 95 or equal.

SALINAS, Monterey County, Cal.—Granite Const. Co., Watsonville, at \$31,762.50 awarded contract by county supervisors for grading and surfacing a portion of the Watsonville-San Juan Road from the State Highway near Uniontown westerly 2½ miles in Supervisor District No. 1.

Following is a complete list of bids: Granite Const. Co., Watsonville, \$31,762.50; Peninsula Paving Co., S. F., \$36,936; W. A. Dontanville, Salinas, \$31,127.

SAN BERNARDINO COUNTY, Cal.—Until July 14, 2 P. M. bids will be received by C. H. Sweetser, district engineer, 461 Market Street, San Francisco, to grade Section A, Route 68, Mill Creek National Forest Highway, San Bernardino County, about 1.366 miles in length. Approximate quantities involved follow:

- (1) 15 acres clearing;
- (2) 162,100 cu. yds. unclass. excavation;
- (3) 2,650 cu. yds. unclass. excavation structures;
- (4) 3,900 cu. yds. unclass. excavation borrow;
- (5) 48,200 station yards overhaul;
- (6) 1,256 miles finish, earth graded road;
- (7) 2,200 cu. yds. miles hauling borrow;
- (8) 4 cu. yds. Class A concrete;
- (9) 15.5 cu. yds. Class B concrete;
- (10) 400 lbs. reinforcing steel;
- (11) 255 cu. yds. Cement Rubble Masonry;
- (12) 1,452 lin. feet corr. metal pipe;
- (13) 246 cu. yds. Hand Laid Rock embankment;
- (14) Lump Sum Spillway connections and fittings;
- (15) 566 each Stretchers for concrete cribbing;
- (16) 316 each Headers for concrete cribbing.

Certified check of 5% required with bid, made payable to Federal Reserve Bank of San Francisco. Plans and specifications obtainable from above on deposit of \$10, returnable.

EL DORADO COUNTY, Calif.—Until July 15, 2 P. M. bids will be received by State Highway Commission to surface about eight and six-tenths (8.6) miles in length between River-ton and Kyburz (111-E-D-11-G) with bituminous treated crushed gravel or stone (Road Mix.)

SANJA CLARA COUNTY, Cal.—As previously reported bids will be received by State Highway Commission to grade and pave about one and four-tenths (1.4) miles in length between Coyote Creek and San Jose (IV-SCL-5-A) with Portland cement concrete and asphalt concrete.

and asphalt concrete. Quantities involved are:

- (1) 56 each, removing trees (Size 1);
- (2) 30 each, removing trees (Size 2);
- (3) 8 each, removing trees (Size 3);
- (4) 1899 cu. yds. roadway excavation without class;
- (5) 700 cu. yds. structure excavation;
- (6) 20,000 cu. yds. imported borrow;
- (7) 2000 cu. yds. gravel base;
- (8) 1630 cu. yds. class A Portland cement concrete (pavement);
- (9) 50 cu. yds. class A Portland cement concrete (structures);
- (10) 4,200 lbs. bar reinf. steel (pavement and structures);
- (11) 21,530 sq. yds. asphalt paint binder;
- (12) 7425 tons asphalt concrete;
- (13) 831 lin. ft. 12-in. corr. metal pipe
- (14) 160 lin. ft. 18-in. corr. metal pipe
- (15) 255 lin. ft. corr. metal pipe (clean and relay);
- (16) 12,500 sq. yds. asphaltic skin coat removed from existing pavement;
- (17) 233 cu. yds. Portland cement concrete removed from existing pavement and structures;
- (18) 1100 cu. yds. Portland cement concrete removed from existing bridge;
- (19) 1333 cu. yds. riprap (broken concrete);
- (20) 0.5 mile new property fence;
- (21) 0.15 mile moving and resetting property fence;
- (22) 0.1 mile moving and resetting tight board property fence;
- (23) 5 each, gates complete in place;
- (24) 556 lin. ft. laminated timber guard rail;
- (25) 6 each, culvert markers;
- (26) 74 sta. finishing roadway;
- (27) 21 each, monuments complete in place.

State will furnish corrugated metal pipe and cast steel frames and covers for drop inlets.

MARIPOSA COUNTY, Calif.—As previously reported bids will be received by State Highway Commission to grade between Orange Hill School and Pain Flat (VI-Mpa-13-A-I.J.) about seven and four-tenths (7.4) miles in length.

Quantities involved are:

- (1) 70 each, trees removed and disposed of;
- (2) 148,650 cu. yds. roadway excavation without class;
- (3) 454,700 sta. yds. overhaul;
- (4) 2050 cu. yds. imported borrow (selected material);
- (5) 550 cu. yds. structure excavation;
- (6) 80 cu. yds. class A Portland cement concrete (structures);
- (7) 469 bbls. light fuel oil;
- (8) 30 lin. ft. 12-in. corr. metal pipe;
- (9) 184 lin. ft. 18-in. corr. metal pipe;
- (10) 76 lin. ft. 30-in. corr. metal pipe;
- (11) 96 lin. ft. 42-in. corr. metal pipe;
- (12) 150 cu. yds. rubble masonry;
- (13) 2 miles new property fence;
- (14) 4 each, gates complete in place;
- (15) 232 sta. finishing roadway;
- (16) 125 each, monuments complete in place.

The state will furnish corrugated metal pipe, reinforcing steel, monuments, gates and materials for fencing.

EL DORADO COUNTY, Calif.—Until July 15, 2 P. M. bids will be received by State Highway Commission to surface about five and two-tenths (5.2) miles in length between Albany and the Nevada State Line (111-B-D-11-K) with bituminous treated selected surfacing material.

SAN FRANCISCO—Hanrahan Co., Hobart Bldg., at \$36,892.50 awarded contract by Board of Public Works to extend Van Ness Ave. from Mission to Howard street. Complete list of unit and total bids received on this project published in issue of June 18.

WILLOW GLEN, Santa Clara Co., Cal.—Until July 13, bids will be received by Dana Thomas, city clerk, (83) to improve Blewett Avenue, Acq. and Imp. District No. 2, involving:

- (1) 55,640 sq. ft. 4½-in. asphalt concrete pavement;
- (2) 4,000 lin. ft. P.C. concrete curb;
- (3) 8,000 sq. ft. P.C. concrete gutter;
- (4) 20,000 sq. ft. P.C. conc. sidewalk.

Acq. and Imp. Act 1925. Plans on file in office of city clerk, H. N. Bishop, engineer, Bank of Italy Bldg., San Jose.

WILLOW GLEN, Santa Clara Co., Cal.—Until July 13, bids will be received by Dana Thomas, city clerk, (86) to improve Willow St., Acq. and Imp. Dist. No. 3, involving:

- (1) 120,000 sq. ft. 5½-in. asphalt concrete pavement;
- (2) 400 lin. ft. 12-in. P.C. conc. pipe;
- (3) 260 lin. ft. 18-in. do;
- (4) 48 lin. ft. 21-in. do;
- (5) 325 lin. ft. 24-in. do;
- (6) 355 lin. ft. 24-in. do;
- (7) 588 lin. ft. 30-in. do;
- (8) 204 lin. ft. 36-in. do;
- (9) 43 lin. ft. 42-in. do;
- (10) 19 inlets;
- (11) 10 manholes;
- (12) 7000 lin. ft. P.C. concrete curb;
- (13) 14,000 sq. ft. P.C. conc. gutter;
- (14) 35,000 sq. ft. P.C. conc. sidewalk.

Acq. and Imp. Act 1925. Plans on file in office of city clerk, H. N. Bishop, engineer, Bank of Italy Bldg., San Jose.

SANTA CRUZ, Santa Cruz Co., Cal.—Until July 7, 2:30 P. M. bids will be received by H. E. Miller, county clerk, for macadam pavement surface on the Bodfish road in the Pajaro Road District, from the end of East Lake Ave. to the summit in Santa Clara County; estimated cost \$37,000. Certified check 10% required with bid. Plans obtainable from Lloyd Bowman, county surveyor, on payment of \$3.

HUMBOLDT COUNTY, Cal.—Hemstreet & Bell, Marysville, at \$64,908 submitted low bid June 24 to the State Highway Commission to surface with bituminous treated gravel, 8.4 miles between Big Lagoan and Freshwater Lagoan. Following is a complete list of bids:

Hemstreet & Bell, Marysville.....\$64,908
Mercer-Fraser Co., Eureka..... 66,184
W. H. Hauser, Oakland..... 69,920
Heafey-Moore, Oakland..... 73,320

MENDOCINO COUNTY, Cal.—Peter McHugh, 300 Valdez Ave., San Francisco, at \$67,631 submitted low bid June 24 to State Highway Commission to improve 2.3 miles between Dry Creek Bridge and Christine, involving grading, surface with screened gravel and construct timber bridge. Complete list of bids follows:

Peter McHugh, San Francisco.....\$67,631

F. C. Cuffe, San Rafael..... 67,970
H. H. Doomer, San Francisco..... 68,053
Granfield, Farrar & Carlin, San Francisco..... 71,309
Healy-Thibbitts Const. Co., San Francisco..... 75,233
Kennedy Const. Co., Oakland..... 75,989
Chouteaus Const. Co., S. F..... 76,635
Cittenden & Howe, Napa..... \$5,311

PLACER & NEVADA COUNTIES, Cal.—C. W. Wood, Stockton, at \$66,380 submitted low bid June 24 to the State Highway Commission for bituminous treatment on 20 miles between Airport and Soda Springs. Complete list of bids follows:

C. W. Wood, Stockton.....\$66,380

Force Const. Co., Piedmont..... 69,930

Geo. French, Jr., Stockton..... 70,838

Fred Nighert, Bakersfield..... 75,264

Granite Const. Co., Watsonville..... 75,929

A. Teichert & Son, Sacramento..... 85,813

MADERA COUNTY, Calif.—Until July 16, 2 P. M. bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading Section C of Route 47, Oakhurst National Forest Highway in the Sierra National Forest, Madera County, 6.139 miles in length, involving:

- 50 acres clearing;
- 304,000 cu. yds. unclass. excav.;
- 780 cu. yds. unclass. excav. for struc.;
- 20,000 sta. overhaul;
- 6,139 miles finish earth graded roads;
- 8 cu. yds. foundation fill;
- 322 lin. ft. class A concrete;
- 57 cu. yds. class B concrete;
- 630 lbs. reinforcing steel;
- 164 cu. ft. corru. metal pipe in place;
- 164 cu. yds. hand-laid rock embankment;
- 22 each R. W. monuments.

Plans obtainable from district engineer on deposit of \$10, returnable, checks for same to be made payable to the Federal Reserve Bank of San

RED BLUFF, Tehama Co., Cal.—Until July 15, 10 A. M. bids will be received by the Directors of Joint High School District No. 18 to construct the first unit of the road from Proberta to Los Molinas, being that section between Gerber and Los Molinas, a distance of 4 miles, 20 ft. wide. Armor type asphaltic oil surfacing is specified. M. C. Polk, Chico, engineer for the district.

Simplified practice recommendation R-28-29 covering sheet steel has been reaffirmed by the standing committee of the industry, without change, for another year, according to an announcement by the division of simplified practice of the Bureau of Standards, Department of Commerce. This recommendation provides for stock sizes of sheet steel in various gages, and has been instrumental in reducing variety from 1869 sizes to 209, or approximately 88 per cent.

How much does it cost to operate automotive vehicles over the public roads? How much does it cost per vehicle mile to provide the highway for their use? How much are the highway users—trucks and automobiles—now contributing toward the cost of the roads they use, and how much should they pay to pay their fair share of the expense? No one yet can say exactly, but upon the answers to these questions depend the development of sound and equitable fiscal policies, says R. W. Crum, director of the Highway Research Board. The Committee on Highway Transportation of the Highway Research Board has recently made a notable contribution to the study of these problems. In its 1929 report, the committee set up the theorem that the actual average annual cost of a highway consists of the interest on the cost to construct, plus the average annual maintenance charge, plus the amount that should be set aside each year at compound interest to produce sufficient money at periodic intervals for reconstruction.

In the report for this year the committee has illustrated the application of this formula by detailed computations of transportation costs for two highways. One is for the section of the Boston Post Road between New Haven and Milford, Connecticut. This is one of the most heavily traveled roads in New England, carrying upwards of 18,500 vehicles per day. The other road differs very greatly from this one in general physical characteristics and is located on U. S. Highway 65, between Ames and Des Moines, Iowa. Here the traffic ranges from 2,125 vehicles on week days to 3,400 on Saturdays and Sundays.

The elements of roadway cost that must be taken into account include: Right of way; drainage structures; earthwork; salvage value of prior surfaces; cost to construct the existing surface; signs and other appurtenances; engineering and administration; annual maintenance; maintenance supervision and periodic reconstruction.

The annual costs of these sections of highway per vehicle mile were compared with the taxes per vehicle now imposed and with the vehicle operating costs. The results, therefore, show the relation between the annual costs of these two roads and the contribution to road funds being made by the users during the year.

The discussion of this report, which was participated in by Professor T. R. Agg, chairman of the committee; Professor C. B. Ered, Mr. A. J. Bross, Mr. E. W. James, Mr. L. I. Hewes, Mr. J. A. Sourwine, Mr. H. K. Craig and Professor D. P. Krynnine, brought out the fact that since the relations between highway costs, vehicle operating costs and taxes upon vehicles and fuel vary widely with the extent to which the particular road is used, the comparisons shown by the report could only be applied to these roads and could not be used as bases for general taxation. However, it was pointed out that by the extension of such methods to a whole road system, average costs might be deduced which would furnish a sound basis for rate making or taxation.

Superior Judge Goodell has ruled that a contractor engaged on city work need not have his lumber and millwork done by San Francisco firms if he can obtain a cheaper price for work of a similar quality done in another community. The decision was made in the suit brought against the city by Mahony Brothers, contractors, to whom had been awarded the contract for the \$140,000 central warehouse at Fifteenth and Harrison Sts. According to Timothy A. Reardon, president of the Board of Public

Works, this decision will be nullified by a new charter provision that becomes effective July 1, which makes it incumbent on contractors to pay wages identical to the wage in San Francisco by private concerns for similar work and to use material manufactured in establishments where the wage scale is the same as that in this city.

Also it is incumbent on the contractor to furnish proof that such material as he may use from outside manufacturers has been made by men receiving the San Francisco wage scale.

The ordinance applies to work done for city outside the limits as well as within them.

"Legislation safeguarding prevailing wage rates on public building projects is beginning to bear fruit," says Organized Labor, official organ of the California State Building Trades Council. "In the first test case organized labor won a complete victory."

"Last week the Interior Department refused to consider the W. R. Rose Company of North Carolina in awarding a contract for the construction of a new tuberculosis ward at St. Elizabeth's Hospital, Washington, although it had offered the lowest bid."

"This action was taken after representatives of building trade unions had protested that on other Federal jobs in Washington the Rose company had imported workers from the South when there were several thousand idle building tradesmen on the ground looking for work. It was also shown that the Rose company had unmercifully slashed wages and imposed bad conditions."

"Another count was that the company is indifferent to the safety of its employees. Last week a scaffolding on a Washington job of the Rose company collapsed, killing one worker and seriously injuring another. A grand jury indicted a foreman for manslaughter after a city building inspector had testified that he had twice warned officials of the unsafe condition of the scaffolding and directed that it be strengthened."

"Labor Department officials cooperated with labor representatives in getting the Rose company's record before the Interior Department. They strongly urged that its bid be rejected. "The Rose company is the first of the group of wage-slashing contractors on Federal work to fall under the ban of the safeguarding law."

At the recent convention of the Association of Master Plumbers of Washington, proceedings were started to secure passage of a measure to license plumbers under a state law. Plans were also discussed for promoting a state building code before the 1932 legislature.

The five-day week at six days' pay and a fair wage for all work are advocated by Richard J. Welch, California congressman from San Francisco.

"A fair and prevailing wage should be paid on all work, public or private," Welch said. "It hurts right down the line from factory to consumer when wages are reduced. It would be a calamity to take advantage of unemployment and reduce wages, thereby reducing the purchasing power of the people. That is common sense and not union labor propaganda."

Approval of bond issues totalling \$29,950,000 was given by voters of Kansas City and Jackson County, Mo., on May 26. The city will expend \$32,000,000 for various city improvements, including \$3,500,000 waterworks improvements; \$1,500,000 sewers, pumping station and equipment; \$9,500,000 for city hall, auditorium, police and fire stations and \$2,000,000 for traffic ways, river control works and parks and playgrounds. Jackson County bonds will finance court houses in Kansas City (\$4,000,000) and Independence (\$200,000); county roads (\$3,500,000), and a \$250,000 detention home.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

C. E. Skinner, assistant director of engineering of the Westinghouse Electric and Manufacturing Co., has been appointed as the representative of the American Standards Association on the Council of the International Standards Association. The International Standards Association is a federation of 18 national standardizing bodies, its purpose being the systematic exchange of information on standardization work in the different countries and the promotion of uniformity among the various national standards. The council is composed of the president of the International Standards Association and six other members, each representing a national standardizing body. C. Hoening, chairman of the Swiss national body, is now president of the association, and the six members of the council represent Italy, France, Holland, Russia, Denmark, and the United States.
